Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

ACTC_AR2129

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2130

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

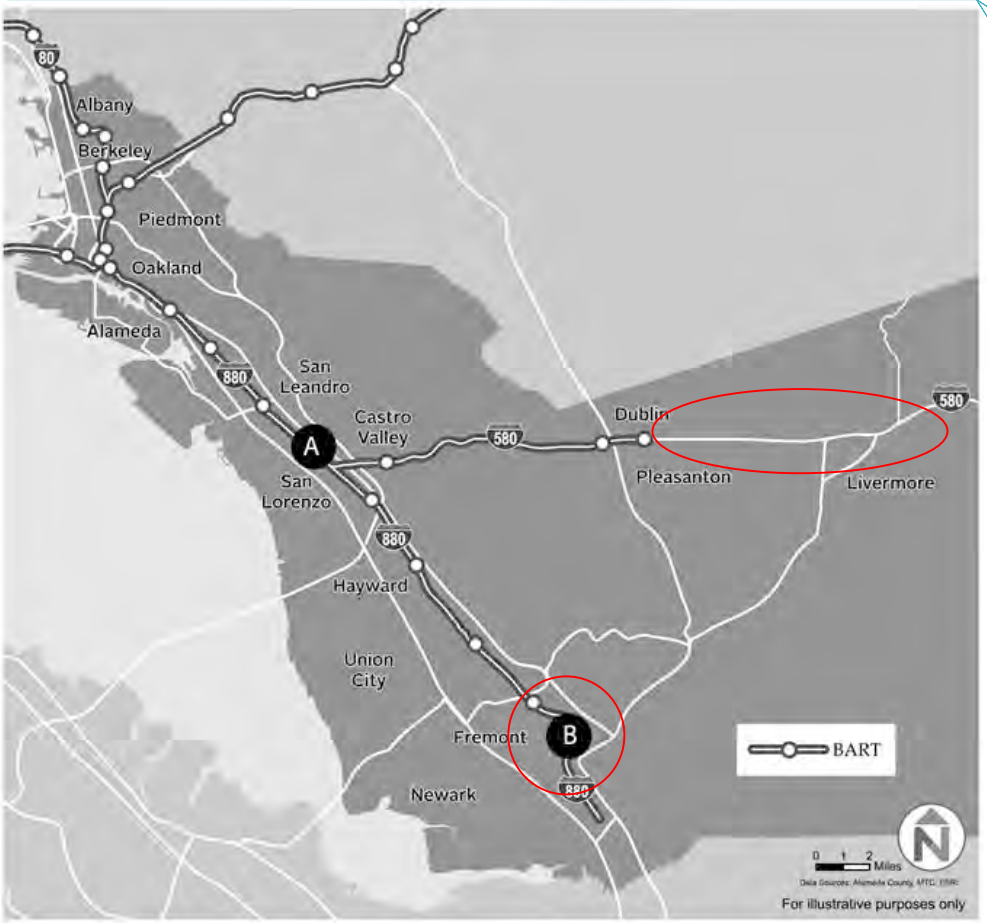
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

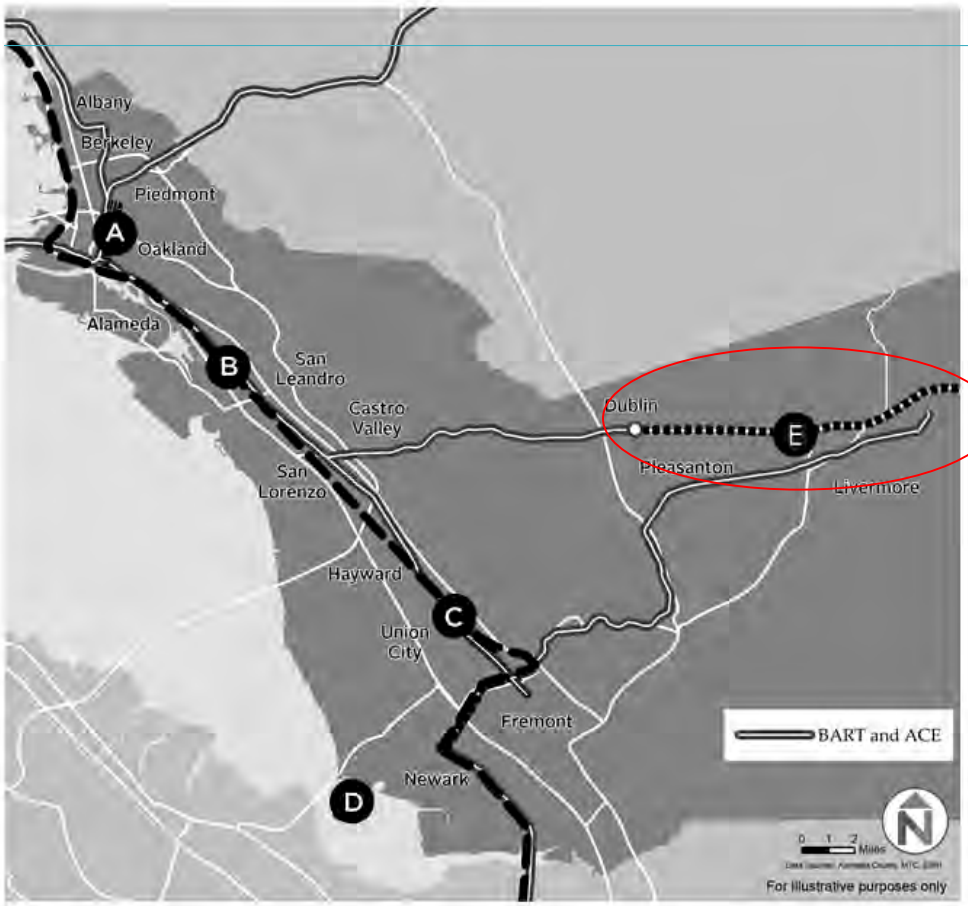
This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.



Oakland Broadway Corridor Transit ($10 M)

This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen
Co-Founder and President,
Bay Area Transportation Working Group

Subject: Bike East Bay comments on Valley Link

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

LAS POSITAS
COMMUNITY
COLLEGE
DISTRICT

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

LIVERMORE
CALIFORNIA

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

Re: Alameda County Transportation Commission 2014 Measure BB Transportation Expenditure Plan Amendment Comment Period

Dear Mayor Thorne,

In November 2014, voters in Alameda County approved Measure BB, authorizing an extension of the existing transportation sales tax (Measure B), administered by the Alameda County Transportation Commission (Alameda CTC). The 2014 Transportation Expenditure Plan (2014 TEP) guides the investments of Measure BB revenues toward capital projects and programs that improve the countywide transportation system.

On May 28, 2020, the Alameda CTC Commission voted to initiate a comment period for comments by jurisdictions in Alameda County on a proposed amendment to the 2014 TEP to replace the BART to Livermore project with the "Valley Link" project. The 2014 TEP Implementing Guidelines specify that all jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

Proposed Amendment

In September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) requested that Alameda CTC amend the 2014 TEP to replace the BART to Livermore project that is in the 2014 TEP with the Valley Link rail project, and transfer the associated $400 million that was identified for BART to Livermore to the Valley Link project. The TVSJVRRA was created in 2017 by the State Legislature (Assembly Bill 758) for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County. In 2017, BART released the Draft Environmental Impact Report for the BART to Livermore project, which had been under consideration for many years. In May 2018, the BART Board voted to certify the Final EIR and also passed a motion directing the BART General Manager to not advance an alternative, effectively

passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The amendment that has been requested to be made to the 2014 TEP includes the following key elements:

1. Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds.

2. Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.

3. Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.

4. Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above.

A detailed description of the proposed amendment and background can be found in the attached Alameda CTC Commission staff report.

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP) that is proposed to be removed:

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies

and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP, as detailed in the attached Alameda CTC Commission staff report.

Comment Period

On May 28, 2020 the Alameda CTC Commission voted to initiate the comment period. The 45-day comment period closes on July 13, 2020. Given the current shelter in place in effect in Alameda County, comments can be submitted electronically to: tepamendment@alamedactc.org, or by mail to the ACTC office.

Email: tepamendment@alamedactc.org, or

Address: 1111 Broadway, 8th Floor
Oakland, CA 94607

After the 45-day comment period, Alameda CTC staff will review and analyze the comments received and present the proposed amendment and comments to the Alameda CTC Planning, Policy and Legislation Committee for consideration and recommendation to the full Commission for action. To modify and amend the TEP, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners.

If you have any questions regarding this item, please contact me at tlengyel@alamedactc.org or 510.208.7402.

Sincerely,

Tess Lengyel
Executive Director

SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. Approval of this item will initiate a 45-day comment period by jurisdictions in Alameda County on the proposed amendment, which would then return to the Committee and Commission for final action. This is an action item and requires 2/3 approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. This recommended action would authorize the initiation of the 45-day comment period. Staff will then return to PPLC and the Commission after the completion of the comment period for final action on the proposed TEP amendment. Once a final amendment is recommended to the Commission after the comment period, a 2/3 vote by the Commission is needed per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical

documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail services between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

Attachment D includes a summary fact sheet and diagram of the proposed project.

The project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $20 million and is currently being appraised.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section

"Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring

requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Planning, Policy and Legislation Committee (PPLC)

At the May PPLC meeting, Alameda CTC staff provided the Committee an overview of the amendment process and schedule, and Michael Tree, Executive Director of the TVSJVRRA gave an overview of the project. Discussion focused on questions related to the timing of the need for the amendment and clarification on the action the Commission would be voting on in May. A number of comment letters were received and summarized verbally for the Committee by the Clerk and emailed to the Committee members as received. The set of public comment letters received for the PPLC meeting is included here as Attachment E. Comment letters sent by Commissioners in their capacity as local government officials are not included but may be expressed verbally by Commissioner at the full Commission meeting. PPLC voted unanimously to advance the item to the full Commission.

Next Steps

Upon Commission approval to initiate the TEP amendment process, a 45-day comment period for jurisdictions in Alameda County will commence. Staff will return to the Commission to report on the comments received and to recommend final action by the Commission later this year.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Valley Link
Connecting People, Housing, and Jobs

Draft

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the Valley Link project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (subject to approval of this amendment to the 2014 TEP by the Commission), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail. The project is generally shown on the diagram below:

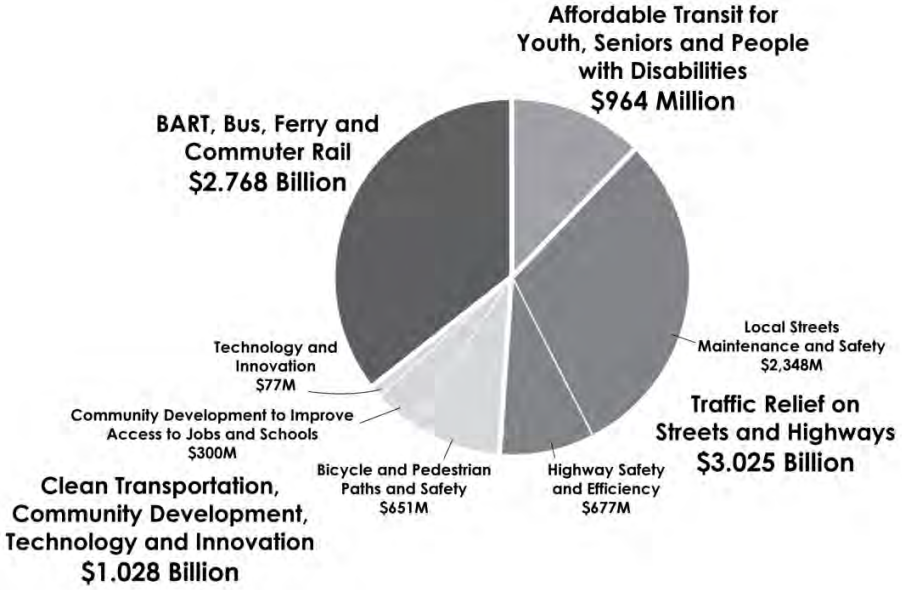
DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, May 28, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____

Pauline Russo Cutter, Vanessa Lee,



Chair, Alameda CTC Clerk of the Commission

INTRODUCTION

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~
Ferry Services in Alameda County	$39
Affordable Transit for Youth, Seniors and People with Disabilities	**$964**
Affordable Youth Transit to School and Transit Innovation	$190
Affordable Transit for Seniors and People with Disabilities	$774
Traffic Relief on Streets and Highways	**$3,025**
City and County Streets*	$2,348
Highway Safety and Efficiency	$677
Clean Transportation, Community Development, Technology and Innovation	**$1,028**
Bicycle and Pedestrian Paths and Safety Projects and Educational Programs*	$651
Community Development Projects to Improve Access to Jobs and Schools	$300
Technology and Innovation	$77
TOTAL INVESTMENTS (YEAR 2015 TO 2045)**	**$7,785**

Notes:
*15% of city and county streets funding will support bicycle and pedestrian paths and safety improvements on local streets.
**Estimated funds from 2015 to 2045 are anticipated to be almost $8 billion.

$7,785 in Total Investments Year 2015 to 2045

See Table 1 for a detailed list of transportation investments.

Table 1: List of Investments

Type	Investment Category	Project/Program	Amount ($ x millions)	% of Total Funds
BART, Bus, Senior, and Youth Transit (48%)	Transit: Operations, Maintenance, and Safety Program	AC Transit	$1,455.15	18.8%
		Altamont Commuter Express	$77.40	1.0%
		BART Maintenance	$38.70	0.5%
		San Francisco Bay Area Water Emergency Transportation Authority	$38.70	0.5%
		Livermore Amador Valley Transit Authority	$38.70	0.5%
		Union City Transit	$19.35	0.25%
		Innovative grant funds, including successful student transportation programs	$174.63	2.24%
	Affordable Transit Program for Students and Youth	Affordable Student Transit Pass Program	$15.00	0.19%
		Subtotal	**$1,857.63**	**24%**
	Affordable Transit for Seniors and People with Disabilities	City-based and Locally Mandated	$232.20	3.0%
		East Bay Paratransit - AC Transit	$348.31	4.5%
		East Bay Paratransit - BART	$116.10	1.5%
		Coordination and Service Grants	$77.40	1.0%
		Subtotal	**$774.01**	**10%**
	Rapid Bus Projects	Telegraph Avenue/East 14th/ International Boulevard project	$10.0	**14%**
		Alameda to Fruitvale BART Rapid Bus	$9.0	
		Grand/MacArthur BRT	$6.0	
		College/Broadway Corridor Transit Priority	$10.0	
		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2207

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

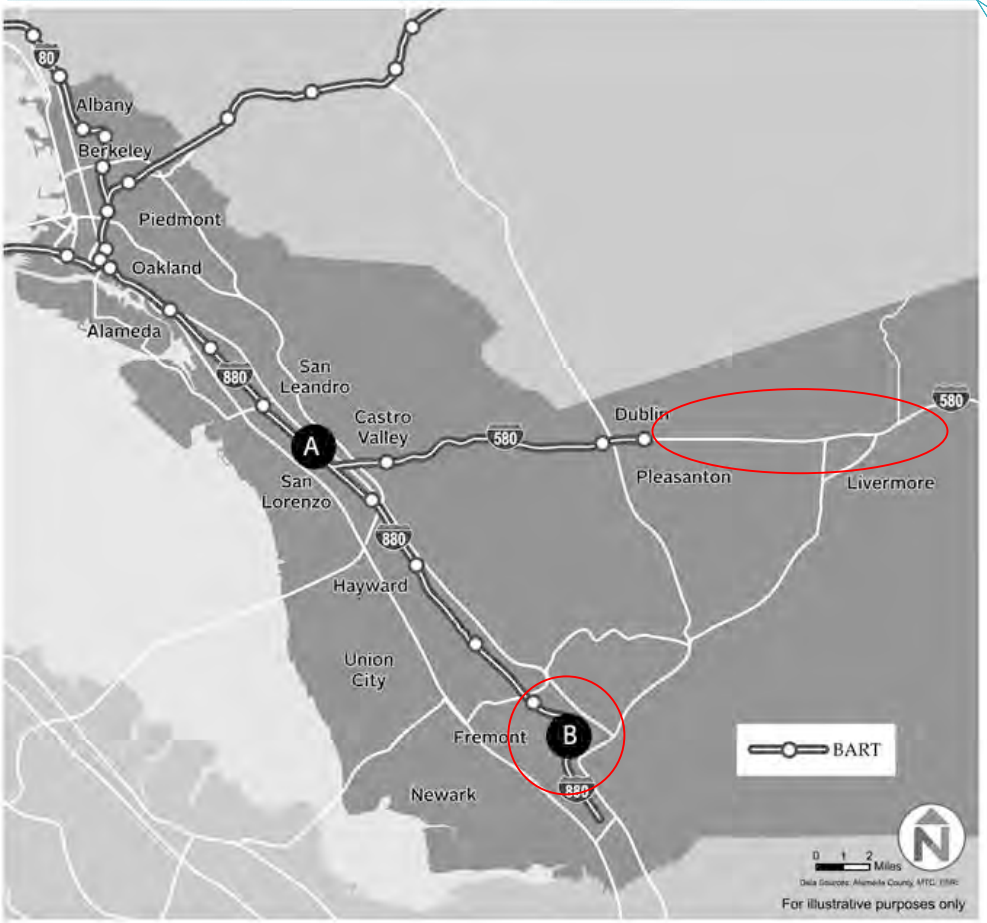
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

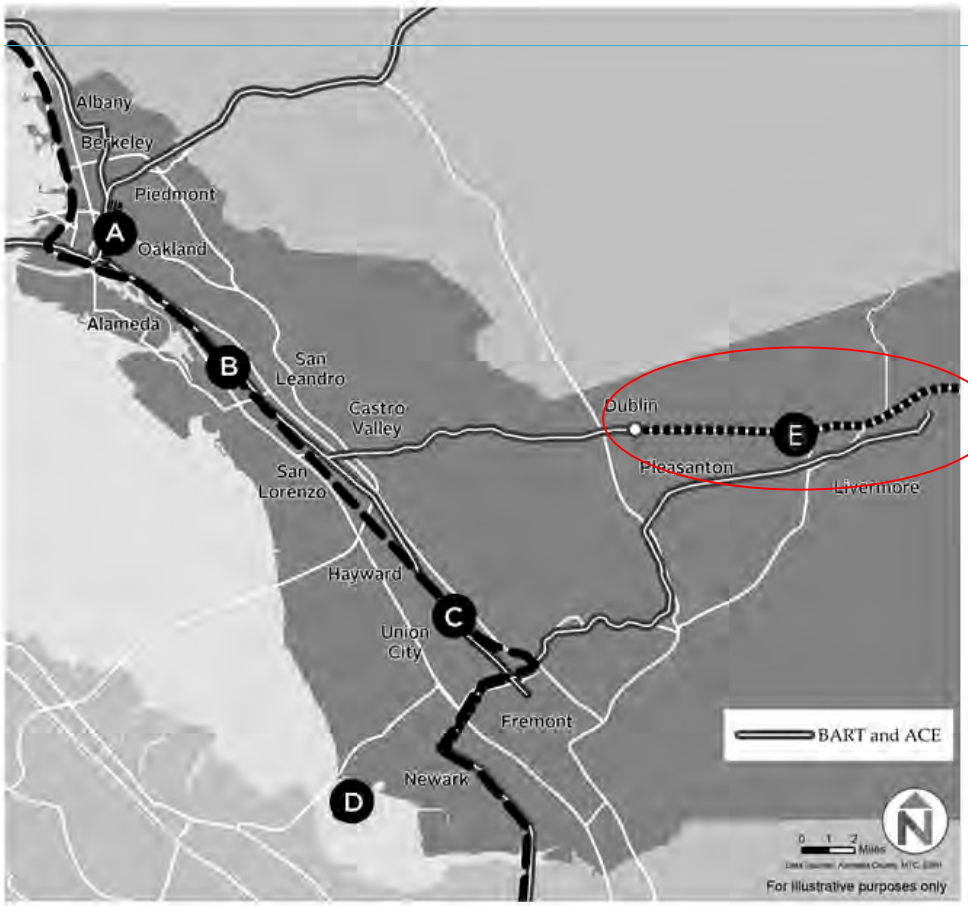
This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.



Oakland Broadway Corridor Transit ($10 M)

This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Subject: Bike East Bay comments on Valley Link

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,
Dawn P. Argula

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

via: e-mail to Clerk of the Commission

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland
BART Director, District 5

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Ronald P. Gerhard

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

CALIFORNIA

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

From:	Tim Sbranti
To:	Vanessa Lee
Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

From:	Rafael Gonzalez
To:	Vanessa Lee
Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

Re: Alameda County Transportation Commission 2014 Measure BB Transportation Expenditure Plan Amendment Comment Period

Dear Mayor Cutter,

In November 2014, voters in Alameda County approved Measure BB, authorizing an extension of the existing transportation sales tax (Measure B), administered by the Alameda County Transportation Commission (Alameda CTC). The 2014 Transportation Expenditure Plan (2014 TEP) guides the investments of Measure BB revenues toward capital projects and programs that improve the countywide transportation system.

On May 28, 2020, the Alameda CTC Commission voted to initiate a comment period for comments by jurisdictions in Alameda County on a proposed amendment to the 2014 TEP to replace the BART to Livermore project with the "Valley Link" project. The 2014 TEP Implementing Guidelines specify that all jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

Proposed Amendment

In September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) requested that Alameda CTC amend the 2014 TEP to replace the BART to Livermore project that is in the 2014 TEP with the Valley Link rail project, and transfer the associated $400 million that was identified for BART to Livermore to the Valley Link project. The TVSJVRRA was created in 2017 by the State Legislature (Assembly Bill 758) for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County. In 2017, BART released the Draft Environmental Impact Report for the BART to Livermore project, which had been under consideration for many years. In May 2018, the BART Board voted to certify the Final EIR and also passed a motion directing the BART General Manager to not advance an alternative, effectively

passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The amendment that has been requested to be made to the 2014 TEP includes the following key elements:

1. Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds.

2. Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.

3. Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.

4. Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above.

A detailed description of the proposed amendment and background can be found in the attached Alameda CTC Commission staff report.

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP) that is proposed to be removed:

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies

and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP, as detailed in the attached Alameda CTC Commission staff report.

Comment Period

On May 28, 2020 the Alameda CTC Commission voted to initiate the comment period. The 45-day comment period closes on July 13, 2020. Given the current shelter in place in effect in Alameda County, comments can be submitted electronically to: tepamendment@alamedactc.org, or by mail to the ACTC office.

Email: tepamendment@alamedactc.org, or

Address: 1111 Broadway, 8th Floor
Oakland, CA 94607

After the 45-day comment period, Alameda CTC staff will review and analyze the comments received and present the proposed amendment and comments to the Alameda CTC Planning, Policy and Legislation Committee for consideration and recommendation to the full Commission for action. To modify and amend the TEP, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners.

If you have any questions regarding this item, please contact me at tlengyel@alamedactc.org or 510.208.7402.

Sincerely,

Tess Lengyel
Executive Director

Memorandum

8.1

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

DATE:	May 21, 2020
TO:	Alameda County Transportation Commission
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. Approval of this item will initiate a 45-day comment period by jurisdictions in Alameda County on the proposed amendment, which would then return to the Committee and Commission for final action. This is an action item and requires 2/3 approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. This recommended action would authorize the initiation of the 45-day comment period. Staff will then return to PPLC and the Commission after the completion of the comment period for final action on the proposed TEP amendment. Once a final amendment is recommended to the Commission after the comment period, a 2/3 vote by the Commission is needed per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical

documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail services between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

Attachment D includes a summary fact sheet and diagram of the proposed project.

The project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $20 million and is currently being appraised.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section

"Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring

requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Planning, Policy and Legislation Committee (PPLC)

At the May PPLC meeting, Alameda CTC staff provided the Committee an overview of the amendment process and schedule, and Michael Tree, Executive Director of the TVSJVRRA gave an overview of the project. Discussion focused on questions related to the timing of the need for the amendment and clarification on the action the Commission would be voting on in May. A number of comment letters were received and summarized verbally for the Committee by the Clerk and emailed to the Committee members as received. The set of public comment letters received for the PPLC meeting is included here as Attachment E. Comment letters sent by Commissioners in their capacity as local government officials are not included but may be expressed verbally by Commissioner at the full Commission meeting. PPLC voted unanimously to advance the item to the full Commission.

Next Steps

Upon Commission approval to initiate the TEP amendment process, a 45-day comment period for jurisdictions in Alameda County will commence. Staff will return to the Commission to report on the comments received and to recommend final action by the Commission later this year.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Valley Link
Connecting People, Housing, and Jobs
1362 Rutan Court, Suite 100 | Livermore, CA 94551 | (925) 455-7564 | valleylink.com

~~BART to Livermore~~ Valley Link to Livermore ($400 M)
The project funds Valley Link ~~the first phase of a BART to extension~~ within the I-580 Corridor freeway alignment from the Dublin/Pleasanton BART station to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction of or any element of this ~~first phase~~ project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

In accordance with the Alameda County 2014 Transportation Expenditure Plan Implementing Guidelines, the Tri-Valley – San Joaquin Valley Regional Rail Authority understands and can fully comply with the requirements of recipients of Measure BB funds, including, but not limited to, annual audits and compliance reporting, the establishment of separate accounting funds for Measure BB funds, independent Watchdog reviews, performance measures, environmental clearance timelines, timely use of funds, contracting requirements, public reviews and approvals.

Thank you for your consideration,

Alameda County Supervisor Scott Haggerty, Chair

Draft

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the Valley Link project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (subject to approval of this amendment to the 2014 TEP by the Commission), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail. The project is generally shown on the diagram below:

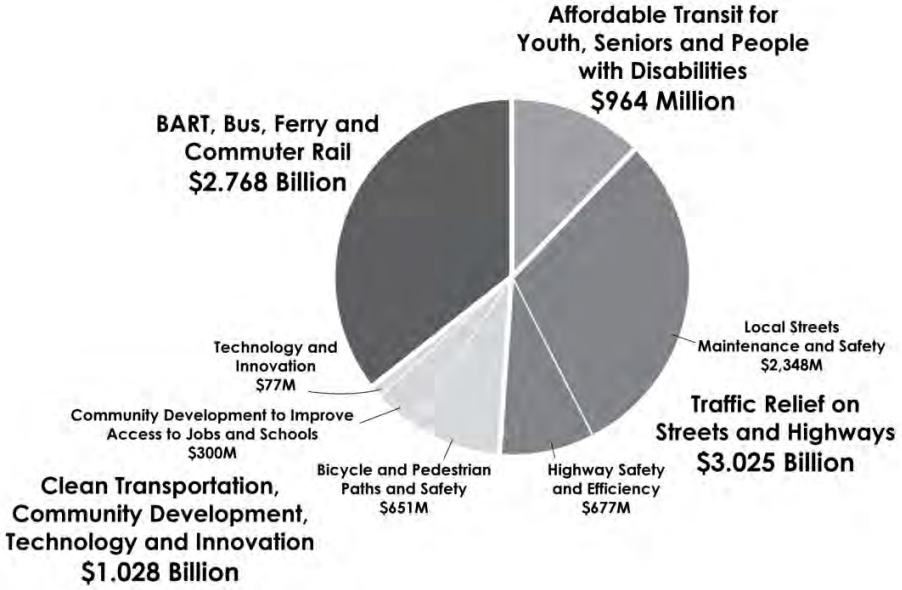
DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, May 28, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____

Pauline Russo Cutter, Vanessa Lee,



Chair, Alameda CTC Clerk of the Commission

INTRODUCTION

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~
Ferry Services in Alameda County	$39
Affordable Transit for Youth, Seniors and People with Disabilities	**$964**
Affordable Youth Transit to School and Transit Innovation	$190
Affordable Transit for Seniors and People with Disabilities	$774
Traffic Relief on Streets and Highways	**$3,025**
City and County Streets*	$2,348
Highway Safety and Efficiency	$677
Clean Transportation, Community Development, Technology and Innovation	**$1,028**
Bicycle and Pedestrian Paths and Safety Projects and Educational Programs*	$651
Community Development Projects to Improve Access to Jobs and Schools	$300
Technology and Innovation	$77
TOTAL INVESTMENTS (YEAR 2015 TO 2045)**	**$7,785**

Notes:
*15% of city and county streets funding will support bicycle and pedestrian paths and safety improvements on local streets.
**Estimated funds from 2015 to 2045 are anticipated to be almost $8 billion.

$7,785 in Total Investments Year 2015 to 2045

See Table 1 for a detailed list of transportation investments.

Table 1: List of Investments

Type	Investment Category	Project/Program	Amount ($ x millions)	% of Total Funds
BART, Bus, Senior, and Youth Transit (48%)	Transit: Operations, Maintenance, and Safety Program	AC Transit	$1,455.15	18.8%
		Altamont Commuter Express	$77.40	1.0%
		BART Maintenance	$38.70	0.5%
		San Francisco Bay Area Water Emergency Transportation Authority	$38.70	0.5%
		Livermore Amador Valley Transit Authority	$38.70	0.5%
		Union City Transit	$19.35	0.25%
		Innovative grant funds, including successful student transportation programs	$174.63	2.24%
	Affordable Transit Program for Students and Youth	Affordable Student Transit Pass Program	$15.00	0.19%
		Subtotal	**$1,857.63**	**24%**
	Affordable Transit for Seniors and People with Disabilities	City-based and Locally Mandated	$232.20	3.0%
		East Bay Paratransit - AC Transit	$348.31	4.5%
		East Bay Paratransit - BART	$116.10	1.5%
		Coordination and Service Grants	$77.40	1.0%
		Subtotal	**$774.01**	**10%**
	Rapid Bus Projects	Telegraph Avenue/East 14th/ International Boulevard project	$10.0	**14%**
		Alameda to Fruitvale BART Rapid Bus	$9.0	
		Grand/MacArthur BRT	$6.0	
		College/Broadway Corridor Transit Priority	$10.0	
		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

ACTC_AR2283

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2284

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

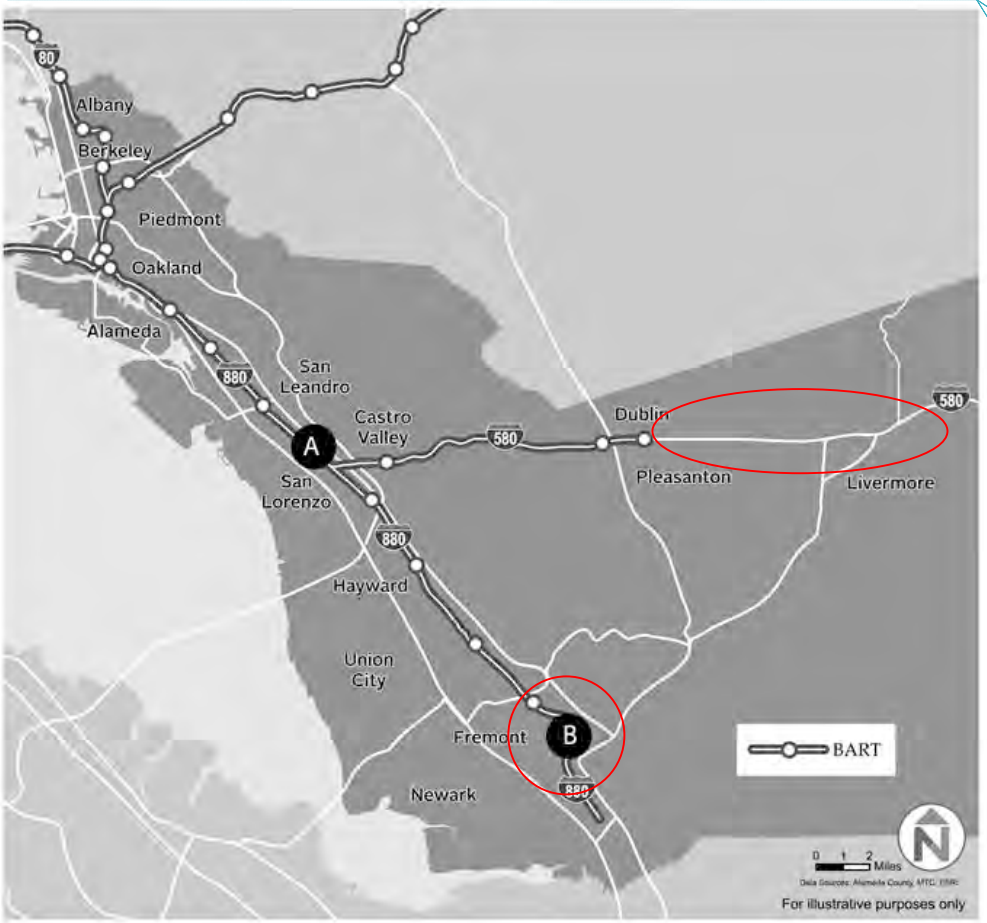
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

ACTC_AR2285

BART INVESTMENTS

A Bay Fair Connector / BART METRO

B Irvington BART Station

Not Shown:

- BART Station Modernization and Capacity Improvements
- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

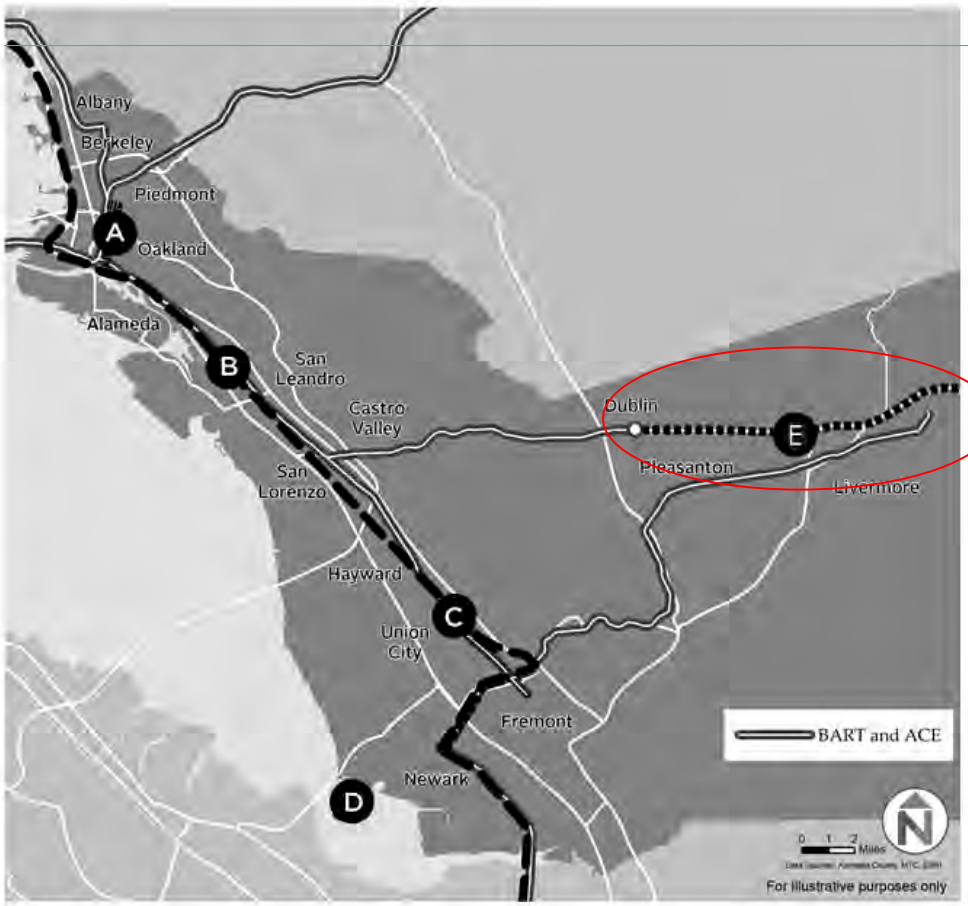
Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.

Oakland Broadway Corridor Transit ($10 M)



This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. Pauline Cutter, Chair, and ACTC Commissioners May 22, 2020
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, California 94607

via: e-mail to Clerk of the Commission

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland
BART Director, District 5

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

From:	Tim Sbranti
To:	Vanessa Lee
Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

From:	Rafael Gonzalez
To:	Vanessa Lee
Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Rafael Gonzalez

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Sincerely,

Steve Van Dorn
President & CEO

Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

Re: Alameda County Transportation Commission 2014 Measure BB Transportation Expenditure Plan Amendment Comment Period

Dear Mayor Dutra-Vernaci,

In November 2014, voters in Alameda County approved Measure BB, authorizing an extension of the existing transportation sales tax (Measure B), administered by the Alameda County Transportation Commission (Alameda CTC). The 2014 Transportation Expenditure Plan (2014 TEP) guides the investments of Measure BB revenues toward capital projects and programs that improve the countywide transportation system.

On May 28, 2020, the Alameda CTC Commission voted to initiate a comment period for comments by jurisdictions in Alameda County on a proposed amendment to the 2014 TEP to replace the BART to Livermore project with the "Valley Link" project. The 2014 TEP Implementing Guidelines specify that all jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

Proposed Amendment

In September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) requested that Alameda CTC amend the 2014 TEP to replace the BART to Livermore project that is in the 2014 TEP with the Valley Link rail project, and transfer the associated $400 million that was identified for BART to Livermore to the Valley Link project. The TVSJVRRA was created in 2017 by the State Legislature (Assembly Bill 758) for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County. In 2017, BART released the Draft Environmental Impact Report for the BART to Livermore project, which had been under consideration for many years. In May 2018, the BART Board voted to certify the Final EIR and also passed a motion directing the BART General Manager to not advance an alternative, effectively

passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The amendment that has been requested to be made to the 2014 TEP includes the following key elements:

1. Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds.

2. Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.

3. Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.

4. Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above.

A detailed description of the proposed amendment and background can be found in the attached Alameda CTC Commission staff report.

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP) that is proposed to be removed:

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies

and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP, as detailed in the attached Alameda CTC Commission staff report.

Comment Period

On May 28, 2020 the Alameda CTC Commission voted to initiate the comment period. The 45-day comment period closes on July 13, 2020. Given the current shelter in place in effect in Alameda County, comments can be submitted electronically to: tepamendment@alamedactc.org, or by mail to the ACTC office.

Email: tepamendment@alamedactc.org, or

Address: 1111 Broadway, 8th Floor
Oakland, CA 94607

After the 45-day comment period, Alameda CTC staff will review and analyze the comments received and present the proposed amendment and comments to the Alameda CTC Planning, Policy and Legislation Committee for consideration and recommendation to the full Commission for action. To modify and amend the TEP, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners.

If you have any questions regarding this item, please contact me at tlengyel@alamedactc.org or 510.208.7402.

Sincerely,

Tess Lengyel
Executive Director

Memorandum

8.1

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

DATE:	May 21, 2020
TO:	Alameda County Transportation Commission
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. Approval of this item will initiate a 45-day comment period by jurisdictions in Alameda County on the proposed amendment, which would then return to the Committee and Commission for final action. This is an action item and requires 2/3 approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. This recommended action would authorize the initiation of the 45-day comment period. Staff will then return to PPLC and the Commission after the completion of the comment period for final action on the proposed TEP amendment. Once a final amendment is recommended to the Commission after the comment period, a 2/3 vote by the Commission is needed per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical

documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail services between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

Attachment D includes a summary fact sheet and diagram of the proposed project.

The project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $20 million and is currently being appraised.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section

"Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring

requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Planning, Policy and Legislation Committee (PPLC)

At the May PPLC meeting, Alameda CTC staff provided the Committee an overview of the amendment process and schedule, and Michael Tree, Executive Director of the TVSJVRRA gave an overview of the project. Discussion focused on questions related to the timing of the need for the amendment and clarification on the action the Commission would be voting on in May. A number of comment letters were received and summarized verbally for the Committee by the Clerk and emailed to the Committee members as received. The set of public comment letters received for the PPLC meeting is included here as Attachment E. Comment letters sent by Commissioners in their capacity as local government officials are not included but may be expressed verbally by Commissioner at the full Commission meeting. PPLC voted unanimously to advance the item to the full Commission.

Next Steps

Upon Commission approval to initiate the TEP amendment process, a 45-day comment period for jurisdictions in Alameda County will commence. Staff will return to the Commission to report on the comments received and to recommend final action by the Commission later this year.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

Alameda County Supervisor Scott Haggerty, Chair

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

~~**BART to Livermore**~~ **Valley Link to Livermore ($400 M)**
The project funds Valley Link ~~the first phase of a BART to extension~~ within the I-580 Corridor freeway alignment from the Dublin/Pleasanton BART station to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction of or any element of this ~~first phase~~ project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

In accordance with the Alameda County 2014 Transportation Expenditure Plan Implementing Guidelines, the Tri-Valley – San Joaquin Valley Regional Rail Authority understands and can fully comply with the requirements of recipients of Measure BB funds, including, but not limited to, annual audits and compliance reporting, the establishment of separate accounting funds for Measure BB funds, independent Watchdog reviews, performance measures, environmental clearance timelines, timely use of funds, contracting requirements, public reviews and approvals.

Thank you for your consideration,

Scott Haggerty

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the Valley Link project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (subject to approval of this amendment to the 2014 TEP by the Commission), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

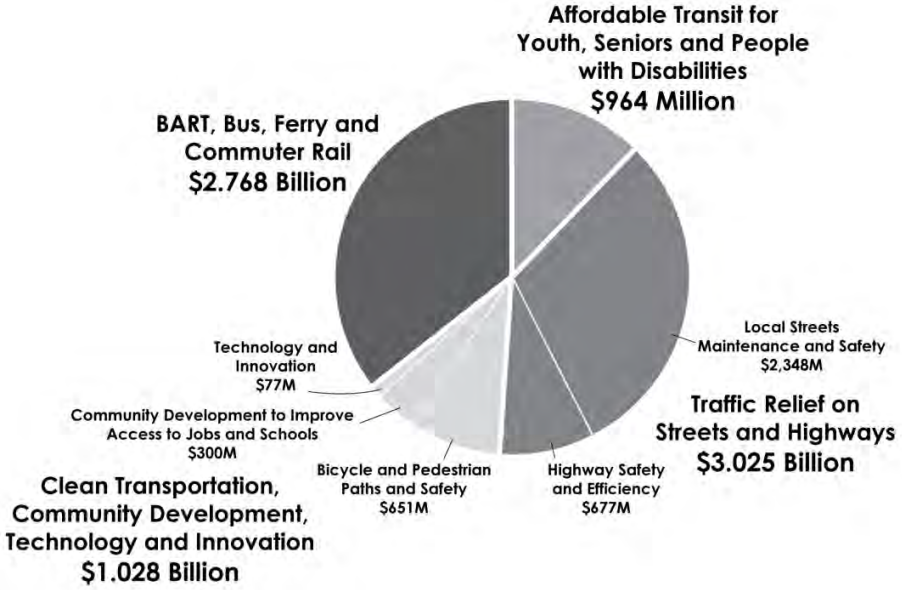
A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail. The project is generally shown on the diagram below:

DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, May 28, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____



Pauline Russo Cutter, Vanessa Lee,

Chair, Alameda CTC Clerk of the Commission

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~
Ferry Services in Alameda County	$39
Affordable Transit for Youth, Seniors and People with Disabilities	**$964**
Affordable Youth Transit to School and Transit Innovation	$190
Affordable Transit for Seniors and People with Disabilities	$774
Traffic Relief on Streets and Highways	**$3,025**
City and County Streets*	$2,348
Highway Safety and Efficiency	$677
Clean Transportation, Community Development, Technology and Innovation	**$1,028**
Bicycle and Pedestrian Paths and Safety Projects and Educational Programs*	$651
Community Development Projects to Improve Access to Jobs and Schools	$300
Technology and Innovation	$77
TOTAL INVESTMENTS (YEAR 2015 TO 2045)**	**$7,785**

Notes:
*15% of city and county streets funding will support bicycle and pedestrian paths and safety improvements on local streets.
**Estimated funds from 2015 to 2045 are anticipated to be almost $8 billion.

$7,785 in Total Investments Year 2015 to 2045

See Table 1 for a detailed list of transportation investments.

Table 1: List of Investments

Type	Investment Category	Project/Program	Amount ($ x millions)	% of Total Funds
BART, Bus, Senior, and Youth Transit (48%)	Transit: Operations, Maintenance, and Safety Program	AC Transit	$1,455.15	18.8%
		Altamont Commuter Express	$77.40	1.0%
		BART Maintenance	$38.70	0.5%
		San Francisco Bay Area Water Emergency Transportation Authority	$38.70	0.5%
		Livermore Amador Valley Transit Authority	$38.70	0.5%
		Union City Transit	$19.35	0.25%
		Innovative grant funds, including successful student transportation programs	$174.63	2.24%
	Affordable Transit Program for Students and Youth	Affordable Student Transit Pass Program	$15.00	0.19%
		Subtotal	**$1,857.63**	**24%**
	Affordable Transit for Seniors and People with Disabilities	City-based and Locally Mandated	$232.20	3.0%
		East Bay Paratransit - AC Transit	$348.31	4.5%
		East Bay Paratransit - BART	$116.10	1.5%
		Coordination and Service Grants	$77.40	1.0%
		Subtotal	**$774.01**	**10%**
	Rapid Bus Projects	Telegraph Avenue/East 14th/ International Boulevard project	$10.0	**14%**
		Alameda to Fruitvale BART Rapid Bus	$9.0	
		Grand/MacArthur BRT	$6.0	
		College/Broadway Corridor Transit Priority	$10.0	
		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2361

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($3~~7~~10 M)

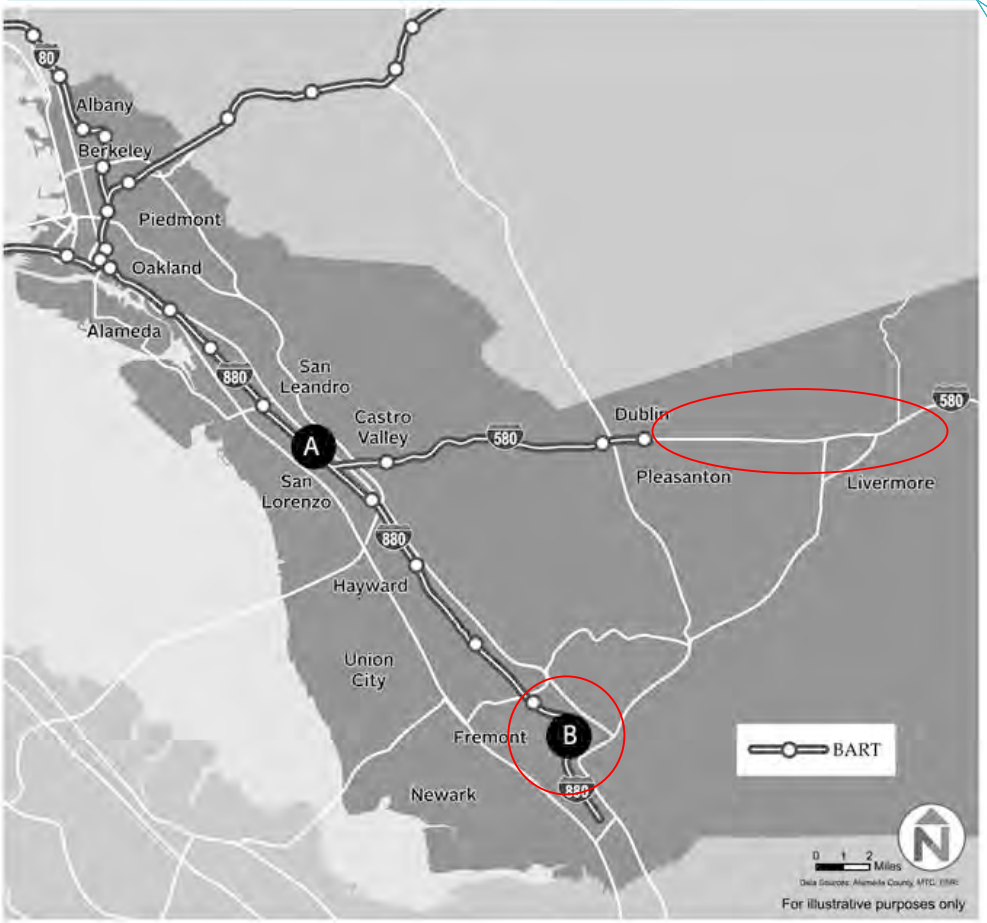
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

ACTC_AR2362

BART INVESTMENTS

A Bay Fair Connector / BART METRO

B Irvington BART Station

Not Shown:

- BART Station Modernization and Capacity Improvements
- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

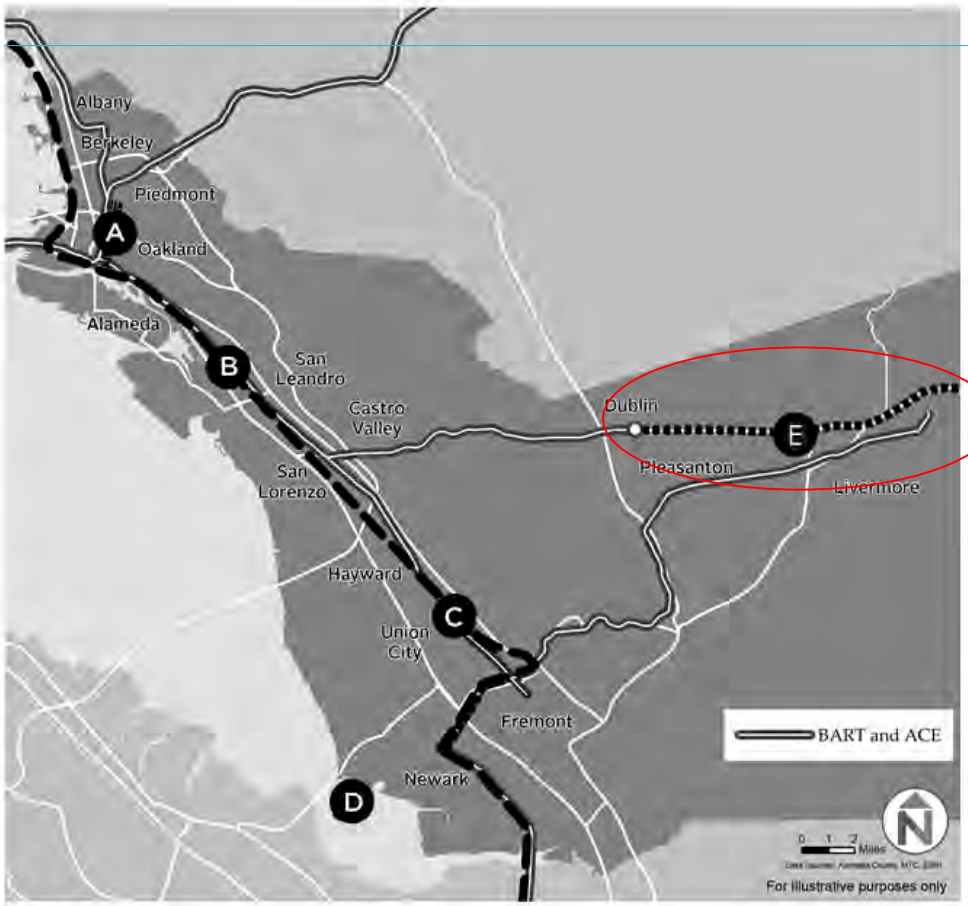
Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.

Oakland Broadway Corridor Transit ($10 M)



This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Subject: Bike East Bay comments on Valley Link

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove “BART to Livermore” from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of “BART, Bus, Senior, and Youth Transit” options identified as the relevant “Type” on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the “superseded” request dated September 11, 2019, recognized that there was no entitlement to the “local funds controlled by the Alameda County Transportation Commission.”

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be “used.” The text below sets forth full “before and after” language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

Pauline Cutter, Chair, and ACTC Commissioners May 22, 2020
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, California 94607

via: e-mail to Clerk of the Commission

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland
BART Director, District 5

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

BAYAREA COUNCIL
Shape the Future

May 27, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Jim Wunderman

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

From:	Rafael Gonzalez
To:	Vanessa Lee
Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Rafael Gonzalez

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

David G. Hudson

PLEASANTON CHAMBER of COMMERCE

May 27, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I am writing to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to eventually advance rail connectivity to the San Joaquin Valley. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Sincerely,

Steve Van Dorn

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

Re: Alameda County Transportation Commission 2014 Measure BB Transportation Expenditure Plan Amendment Comment Period

Dear Mr. Adams,

In November 2014, voters in Alameda County approved Measure BB, authorizing an extension of the existing transportation sales tax (Measure B), administered by the Alameda County Transportation Commission (Alameda CTC). The 2014 Transportation Expenditure Plan (2014 TEP) guides the investments of Measure BB revenues toward capital projects and programs that improve the countywide transportation system.

On May 28, 2020, the Alameda CTC Commission voted to initiate a comment period for comments by jurisdictions in Alameda County on a proposed amendment to the 2014 TEP to replace the BART to Livermore project with the "Valley Link" project. The 2014 TEP Implementing Guidelines specify that all jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

Proposed Amendment

In September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) requested that Alameda CTC amend the 2014 TEP to replace the BART to Livermore project that is in the 2014 TEP with the Valley Link rail project, and transfer the associated $400 million that was identified for BART to Livermore to the Valley Link project. The TVSJVRRA was created in 2017 by the State Legislature (Assembly Bill 758) for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County. In 2017, BART released the Draft Environmental Impact Report for the BART to Livermore project, which had been under consideration for many years. In May 2018, the BART Board voted to certify the Final EIR and also passed a motion directing the BART General Manager to not advance an alternative, effectively

passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The amendment that has been requested to be made to the 2014 TEP includes the following key elements:

1. Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds.

2. Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.

3. Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.

4. Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above.

A detailed description of the proposed amendment and background can be found in the attached Alameda CTC Commission staff report.

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP) that is proposed to be removed:

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies

and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP, as detailed in the attached Alameda CTC Commission staff report.

Comment Period

On May 28, 2020 the Alameda CTC Commission voted to initiate the comment period. The 45-day comment period closes on July 13, 2020. Given the current shelter in place in effect in Alameda County, comments can be submitted electronically to: tepamendment@alamedactc.org, or by mail to the ACTC office.

Email: tepamendment@alamedactc.org, or

Address: 1111 Broadway, 8th Floor
Oakland, CA 94607

After the 45-day comment period, Alameda CTC staff will review and analyze the comments received and present the proposed amendment and comments to the Alameda CTC Planning, Policy and Legislation Committee for consideration and recommendation to the full Commission for action. To modify and amend the TEP, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners.

If you have any questions regarding this item, please contact me at tlengyel@alamedactc.org or 510.208.7402.

Sincerely,

Tess Lengyel
Executive Director

Memorandum

8.1

DATE:	May 21, 2020
TO:	Alameda County Transportation Commission
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. Approval of this item will initiate a 45-day comment period by jurisdictions in Alameda County on the proposed amendment, which would then return to the Committee and Commission for final action. This is an action item and requires 2/3 approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. This recommended action would authorize the initiation of the 45-day comment period. Staff will then return to PPLC and the Commission after the completion of the comment period for final action on the proposed TEP amendment. Once a final amendment is recommended to the Commission after the comment period, a 2/3 vote by the Commission is needed per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical

documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail services between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

Attachment D includes a summary fact sheet and diagram of the proposed project.

The project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $20 million and is currently being appraised.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section

"Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring

requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Planning, Policy and Legislation Committee (PPLC)

At the May PPLC meeting, Alameda CTC staff provided the Committee an overview of the amendment process and schedule, and Michael Tree, Executive Director of the TVSJVRRA gave an overview of the project. Discussion focused on questions related to the timing of the need for the amendment and clarification on the action the Commission would be voting on in May. A number of comment letters were received and summarized verbally for the Committee by the Clerk and emailed to the Committee members as received. The set of public comment letters received for the PPLC meeting is included here as Attachment E. Comment letters sent by Commissioners in their capacity as local government officials are not included but may be expressed verbally by Commissioner at the full Commission meeting. PPLC voted unanimously to advance the item to the full Commission.

Next Steps

Upon Commission approval to initiate the TEP amendment process, a 45-day comment period for jurisdictions in Alameda County will commence. Staff will return to the Commission to report on the comments received and to recommend final action by the Commission later this year.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Valley Link

~~BART to Livermore~~ Valley Link to Livermore ($400 M)
The project funds Valley Link ~~the first phase of a BART to extension~~ within the I-580 Corridor freeway alignment from the Dublin/Pleasanton BART station to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction of or any element of this ~~first phase~~ project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

In accordance with the Alameda County 2014 Transportation Expenditure Plan Implementing Guidelines, the Tri-Valley – San Joaquin Valley Regional Rail Authority understands and can fully comply with the requirements of recipients of Measure BB funds, including, but not limited to, annual audits and compliance reporting, the establishment of separate accounting funds for Measure BB funds, independent Watchdog reviews, performance measures, environmental clearance timelines, timely use of funds, contracting requirements, public reviews and approvals.

Thank you for your consideration,

Alameda County Supervisor Scott Haggerty, Chair

Draft
ALAMEDA COUNTY TRANSPORTATION COMMISSION
Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the Valley Link project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (subject to approval of this amendment to the 2014 TEP by the Commission), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail. The project is generally shown on the diagram below:

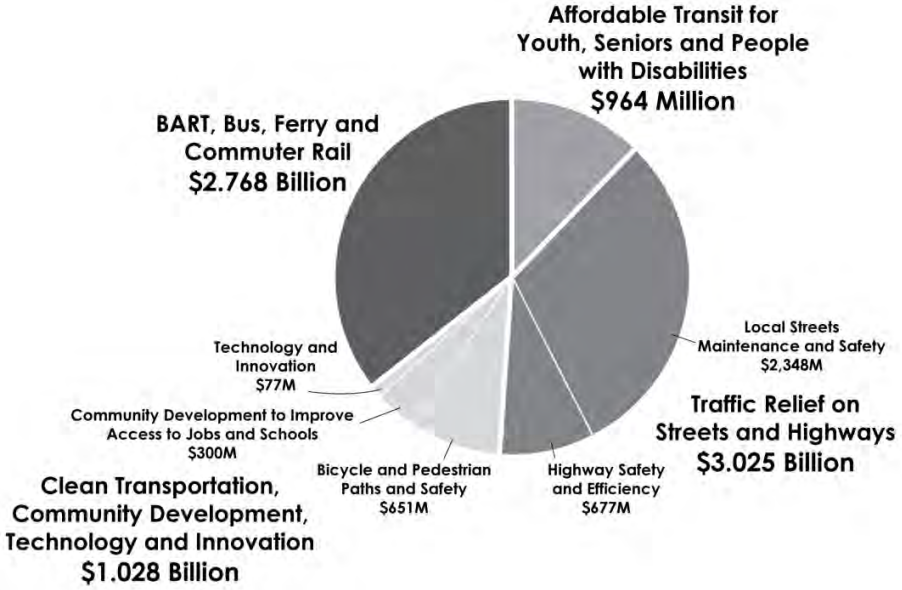
DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, May 28, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____

Pauline Russo Cutter, Vanessa Lee,



Chair, Alameda CTC Clerk of the Commission

INTRODUCTION

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~
Ferry Services in Alameda County	$39
Affordable Transit for Youth, Seniors and People with Disabilities	**$964**
Affordable Youth Transit to School and Transit Innovation	$190
Affordable Transit for Seniors and People with Disabilities	$774
Traffic Relief on Streets and Highways	**$3,025**
City and County Streets*	$2,348
Highway Safety and Efficiency	$677
Clean Transportation, Community Development, Technology and Innovation	**$1,028**
Bicycle and Pedestrian Paths and Safety Projects and Educational Programs*	$651
Community Development Projects to Improve Access to Jobs and Schools	$300
Technology and Innovation	$77
TOTAL INVESTMENTS (YEAR 2015 TO 2045)**	**$7,785**

Notes:
*15% of city and county streets funding will support bicycle and pedestrian paths and safety improvements on local streets.
**Estimated funds from 2015 to 2045 are anticipated to be almost $8 billion.

$7,785 in Total Investments Year 2015 to 2045

See Table 1 for a detailed list of transportation investments.

Table 1: List of Investments

Type	Investment Category	Project/Program	Amount ($ x millions)	% of Total Funds
BART, Bus, Senior, and Youth Transit (48%)	Transit: Operations, Maintenance, and Safety Program	AC Transit	$1,455.15	18.8%
		Altamont Commuter Express	$77.40	1.0%
		BART Maintenance	$38.70	0.5%
		San Francisco Bay Area Water Emergency Transportation Authority	$38.70	0.5%
		Livermore Amador Valley Transit Authority	$38.70	0.5%
		Union City Transit	$19.35	0.25%
		Innovative grant funds, including successful student transportation programs	$174.63	2.24%
	Affordable Transit Program for Students and Youth	Affordable Student Transit Pass Program	$15.00	0.19%
		Subtotal	**$1,857.63**	**24%**
	Affordable Transit for Seniors and People with Disabilities	City-based and Locally Mandated	$232.20	3.0%
		East Bay Paratransit - AC Transit	$348.31	4.5%
		East Bay Paratransit - BART	$116.10	1.5%
		Coordination and Service Grants	$77.40	1.0%
		Subtotal	**$774.01**	**10%**
	Rapid Bus Projects	Telegraph Avenue/East 14th/ International Boulevard project	$10.0	**14%**
		Alameda to Fruitvale BART Rapid Bus	$9.0	
		Grand/MacArthur BRT	$6.0	
		College/Broadway Corridor Transit Priority	$10.0	
		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

ACTC_AR2437

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2438

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

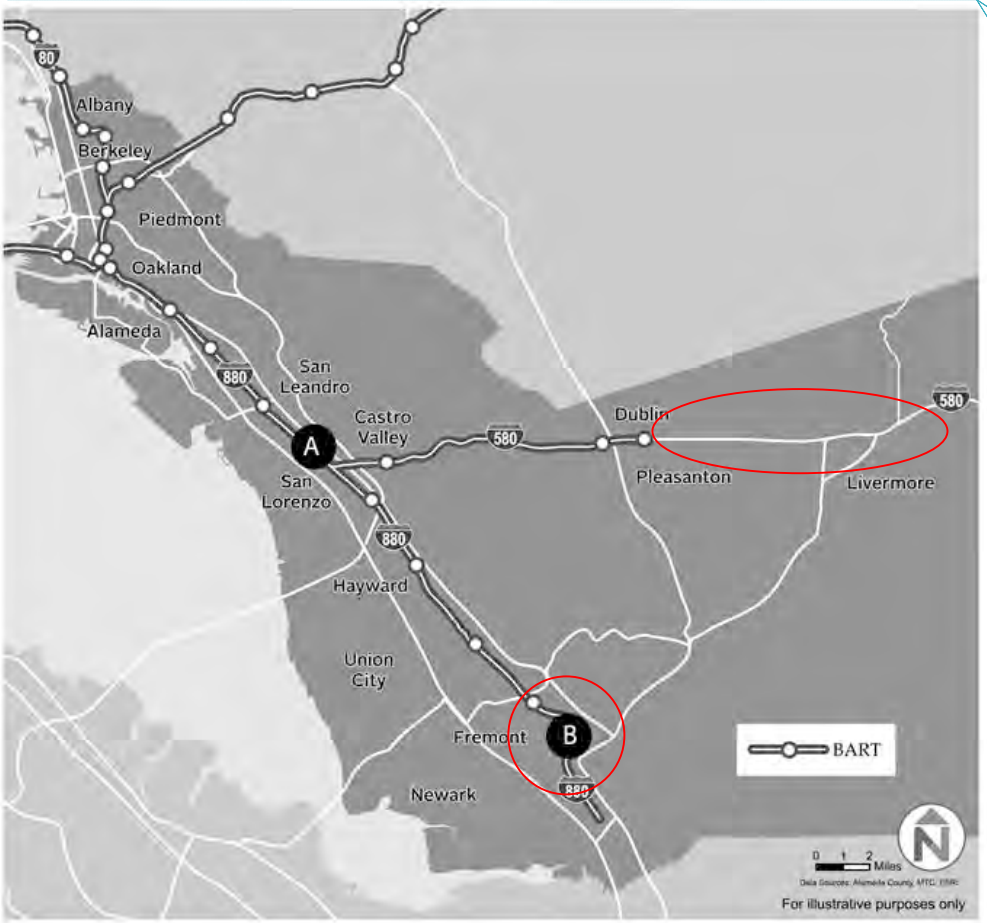
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

ACTC_AR2439

BART INVESTMENTS

A Bay Fair Connector / BART METRO

B Irvington BART Station

Not Shown:

- BART Station Modernization and Capacity Improvements
- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

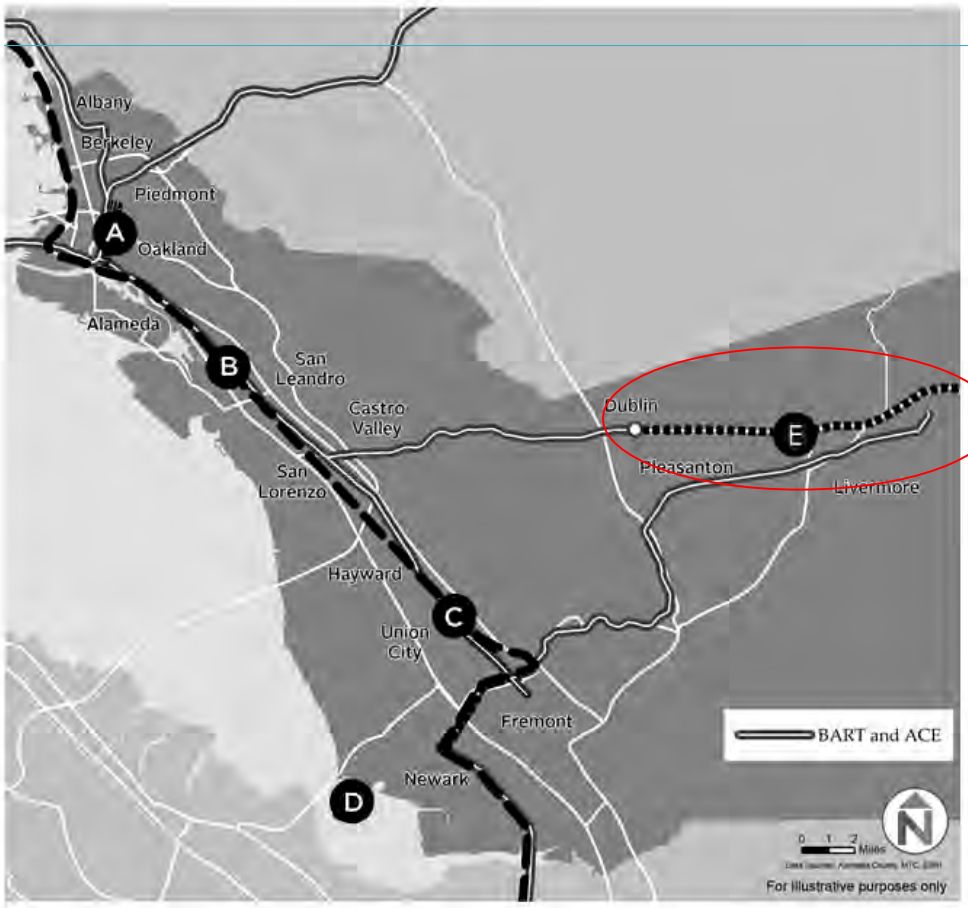
Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.

Oakland Broadway Corridor Transit ($10 M)



This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

Pauline Cutter, Chair, and ACTC Commissioners May 22, 2020
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, California 94607

via: e-mail to Clerk of the Commission

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Livermore Amador Valley
TRANSIT AUTHORITY

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

David G. Hudson

PLEASANTON CHAMBER of COMMERCE

May 27, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

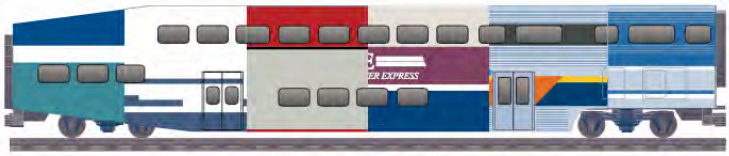
I am writing to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to eventually advance rail connectivity to the San Joaquin Valley. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Sincerely,



Steve Van Dorn

Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

Re: Alameda County Transportation Commission 2014 Measure BB Transportation Expenditure Plan Amendment Comment Period

Dear Mr. Haubert,

In November 2014, voters in Alameda County approved Measure BB, authorizing an extension of the existing transportation sales tax (Measure B), administered by the Alameda County Transportation Commission (Alameda CTC). The 2014 Transportation Expenditure Plan (2014 TEP) guides the investments of Measure BB revenues toward capital projects and programs that improve the countywide transportation system.

On May 28, 2020, the Alameda CTC Commission voted to initiate a comment period for comments by jurisdictions in Alameda County on a proposed amendment to the 2014 TEP to replace the BART to Livermore project with the "Valley Link" project. The 2014 TEP Implementing Guidelines specify that all jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

Proposed Amendment

In September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) requested that Alameda CTC amend the 2014 TEP to replace the BART to Livermore project that is in the 2014 TEP with the Valley Link rail project, and transfer the associated $400 million that was identified for BART to Livermore to the Valley Link project. The TVSJVRRA was created in 2017 by the State Legislature (Assembly Bill 758) for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County. In 2017, BART released the Draft Environmental Impact Report for the BART to Livermore project, which had been under consideration for many years. In May 2018, the BART Board voted to certify the Final EIR and also passed a motion directing the BART General Manager to not advance an alternative, effectively

passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The amendment that has been requested to be made to the 2014 TEP includes the following key elements:

1. Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds.

2. Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.

3. Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.

4. Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above.

A detailed description of the proposed amendment and background can be found in the attached Alameda CTC Commission staff report.

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP) that is proposed to be removed:

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies

and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP, as detailed in the attached Alameda CTC Commission staff report.

Comment Period

On May 28, 2020 the Alameda CTC Commission voted to initiate the comment period. The 45-day comment period closes on July 13, 2020. Given the current shelter in place in effect in Alameda County, comments can be submitted electronically to: tepamendment@alamedactc.org, or by mail to the ACTC office.

Email: tepamendment@alamedactc.org, or

Address: 1111 Broadway, 8th Floor
Oakland, CA 94607

After the 45-day comment period, Alameda CTC staff will review and analyze the comments received and present the proposed amendment and comments to the Alameda CTC Planning, Policy and Legislation Committee for consideration and recommendation to the full Commission for action. To modify and amend the TEP, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners.

If you have any questions regarding this item, please contact me at tlengyel@alamedactc.org or 510.208.7402.

Sincerely,

Tess Lengyel
Executive Director

ACTC_AR2494

Memorandum

8.1

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

DATE:	May 21, 2020
TO:	Alameda County Transportation Commission
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. Approval of this item will initiate a 45-day comment period by jurisdictions in Alameda County on the proposed amendment, which would then return to the Committee and Commission for final action. This is an action item and requires 2/3 approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link.

The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. This recommended action would authorize the initiation of the 45-day comment period. Staff will then return to PPLC and the Commission after the completion of the comment period for final action on the proposed TEP amendment. Once a final amendment is recommended to the Commission after the comment period, a 2/3 vote by the Commission is needed per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical

documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail services between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

Attachment D includes a summary fact sheet and diagram of the proposed project.

The project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $20 million and is currently being appraised.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section

"Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C.

> Valley Link Rail in Alameda County ($400 M)
>
> This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring

requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Planning, Policy and Legislation Committee (PPLC)

At the May PPLC meeting, Alameda CTC staff provided the Committee an overview of the amendment process and schedule, and Michael Tree, Executive Director of the TVSJVRRA gave an overview of the project. Discussion focused on questions related to the timing of the need for the amendment and clarification on the action the Commission would be voting on in May. A number of comment letters were received and summarized verbally for the Committee by the Clerk and emailed to the Committee members as received. The set of public comment letters received for the PPLC meeting is included here as Attachment E. Comment letters sent by Commissioners in their capacity as local government officials are not included but may be expressed verbally by Commissioner at the full Commission meeting. PPLC voted unanimously to advance the item to the full Commission.

Next Steps

Upon Commission approval to initiate the TEP amendment process, a 45-day comment period for jurisdictions in Alameda County will commence. Staff will return to the Commission to report on the comments received and to recommend final action by the Commission later this year.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Valley Link

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the Valley Link project costs included in the Final Feasibility Report range from a low year of expenditure cost of $2.4 billion to a high year of expenditure cost of $3.2 billion. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $628 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (subject to approval of this amendment to the 2014 TEP by the Commission), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds) and $40 million in impact fees from the City of Livermore. The project is expected to compete for regional, state and federal funds to close the funding need. Other measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail. The project is generally shown on the diagram below:

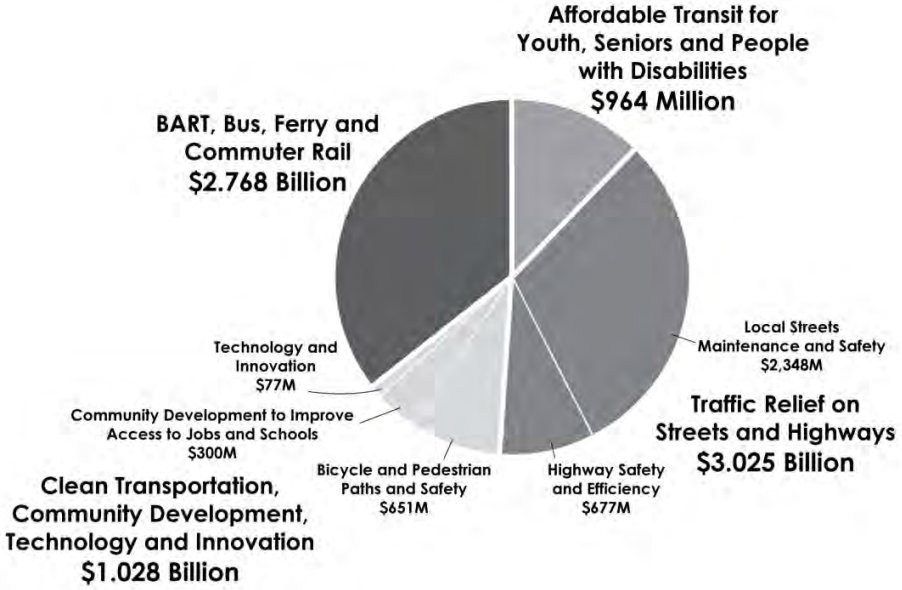
DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, May 28, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____

Pauline Russo Cutter, Vanessa Lee,



Chair, Alameda CTC Clerk of the Commission

INTRODUCTION

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~
Ferry Services in Alameda County	$39
Affordable Transit for Youth, Seniors and People with Disabilities	**$964**
Affordable Youth Transit to School and Transit Innovation	$190
Affordable Transit for Seniors and People with Disabilities	$774
Traffic Relief on Streets and Highways	**$3,025**
City and County Streets*	$2,348
Highway Safety and Efficiency	$677
Clean Transportation, Community Development, Technology and Innovation	**$1,028**
Bicycle and Pedestrian Paths and Safety Projects and Educational Programs*	$651
Community Development Projects to Improve Access to Jobs and Schools	$300
Technology and Innovation	$77
TOTAL INVESTMENTS (YEAR 2015 TO 2045)**	**$7,785**

Notes:
*15% of city and county streets funding will support bicycle and pedestrian paths and safety improvements on local streets.
**Estimated funds from 2015 to 2045 are anticipated to be almost $8 billion.

$7,785 in Total Investments Year 2015 to 2045

See Table 1 for a detailed list of transportation investments.

Table 1: List of Investments

Type	Investment Category	Project/Program	Amount ($ x millions)	% of Total Funds
BART, Bus, Senior, and Youth Transit (48%)	Transit: Operations, Maintenance, and Safety Program	AC Transit	$1,455.15	18.8%
		Altamont Commuter Express	$77.40	1.0%
		BART Maintenance	$38.70	0.5%
		San Francisco Bay Area Water Emergency Transportation Authority	$38.70	0.5%
		Livermore Amador Valley Transit Authority	$38.70	0.5%
		Union City Transit	$19.35	0.25%
		Innovative grant funds, including successful student transportation programs	$174.63	2.24%
	Affordable Transit Program for Students and Youth	Affordable Student Transit Pass Program	$15.00	0.19%
		Subtotal	**$1,857.63**	**24%**
	Affordable Transit for Seniors and People with Disabilities	City-based and Locally Mandated	$232.20	3.0%
		East Bay Paratransit - AC Transit	$348.31	4.5%
		East Bay Paratransit - BART	$116.10	1.5%
		Coordination and Service Grants	$77.40	1.0%
		Subtotal	**$774.01**	**10%**
	Rapid Bus Projects	Telegraph Avenue/East 14th/ International Boulevard project	$10.0	**14%**
		Alameda to Fruitvale BART Rapid Bus	$9.0	
		Grand/MacArthur BRT	$6.0	
		College/Broadway Corridor Transit Priority	$10.0	
		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2515

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

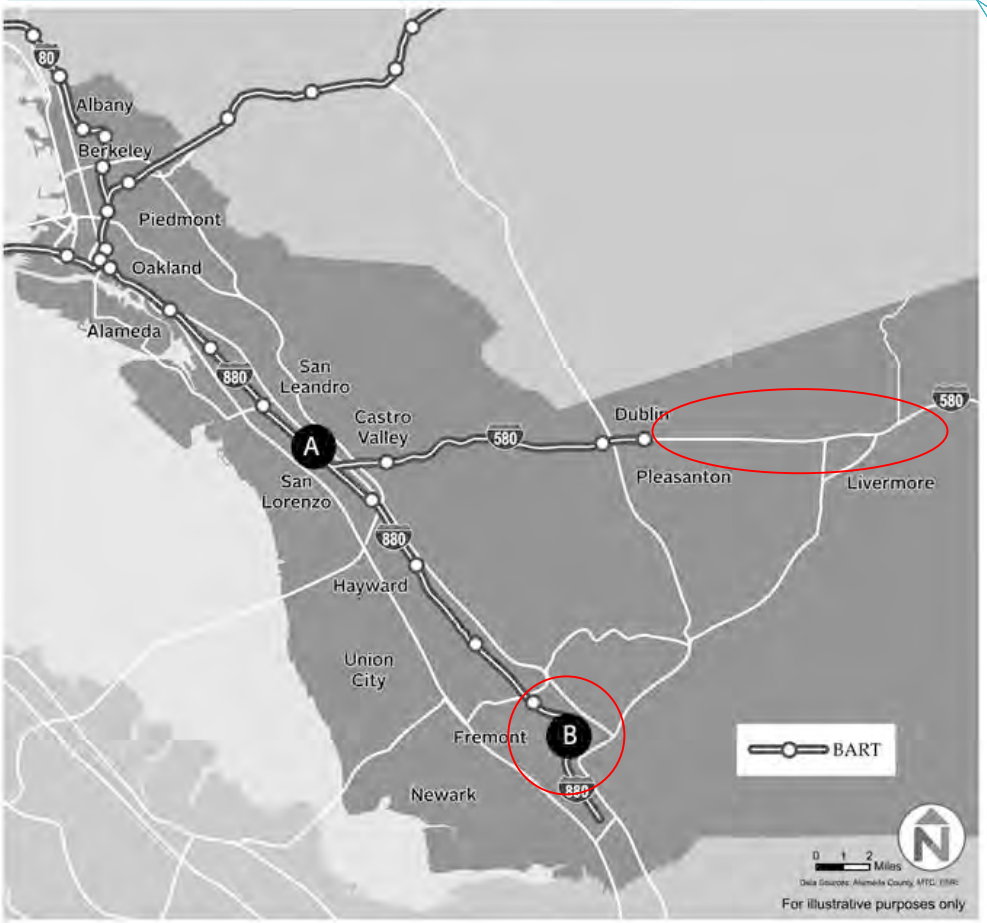
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

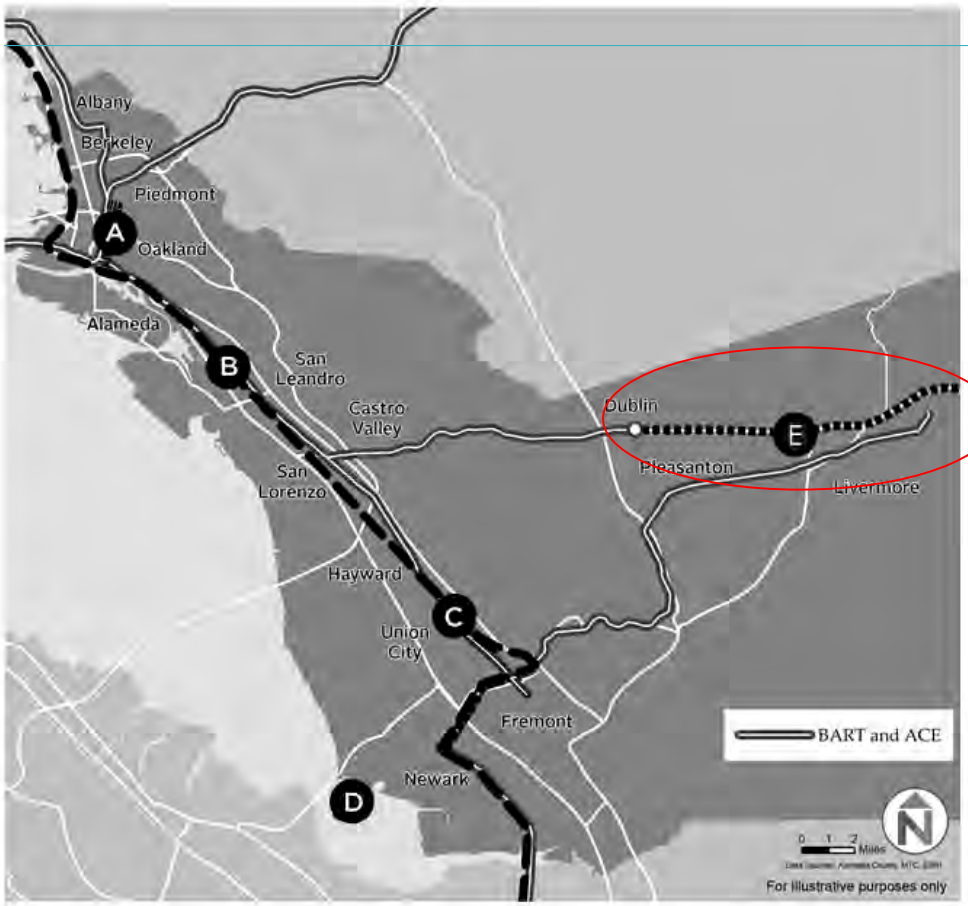
Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.

Oakland Broadway Corridor Transit ($10 M)



This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Valley Link

Connecting People, Housing, and Jobs

Fact Sheet

Project Overview

Connecting San Joaquin Valley to the Bay Area. Valley Link will offer a reliable and efficient commute alternative, providing San Joaquin Valley and eastern Alameda County residents with a direct connection to BART and ACE.

A Seamless Connection to BART. The first phase of service will provide a seamless and timed connection to BART, with service from North Lathrop to the Dublin/ Pleasanton BART station.

Frequent and Reliable Service. Trains will run throughout the day in both directions with the goal of matching BART frequency and hours of operation.

Initial Service Characteristics

	PEAK	OFF-PEAK
Between Dublin/ Pleasanton and Greenville	12 min (meeting every BART train)	30 min (meeting every other BART train)
Beyond Greenville	24 min (meeting every other BART train)	60 min (meeting every 4th BART train)

As of APRIL 2020

Tri-Valley • San Joaquin Valley REGIONAL RAIL AUTHORITY

By the Numbers

- **9,3500 Bay Area workers** - commuting from San Joaquin Valley today
- **42 Miles** - using existing transportation corridors
- **7 Stations** – Dublin/Pleasanton, Isabel, Mountain House, Tracy, River Islands, North Lathrop
- **78 Minutes** - current average commute each way
- **28 days** – total commute time per year for average commuter
- **75% increase** - commute traffic on I-580 by 2040
- **58% increase** – truck traffic on I-580 by 2040
- **25 daily round-trips** - by Valley Link trains each day in 2040
- **28,000 riders** – estimated in 2040 for Valley Link per day
- **99.4 Million** – reduction in Vehicle Miles Traveled (VMT) per year in 2040
- **33,000 metric tons** – reduction in greenhouse gas emissions (GHG) per year
- **0 Emissions** – battery-electric and hydrogen vehicle technologies under development
- **$2.4 Billion** - cost of Valley Link Phase 1 from Dublin/ Pleasanton BART to North Lathrop, in year of expenditure
- **$628 million** - identified as available for the project:
  - **$400 million** - Measure BB funds
  - **$188 million** - Bridge Toll funds
  - **$40 million - impact fees from the City of Livermore**
- **2027 – target date for Valley Link revenue service**

Project Benefits

Valley Link aims to be a model of sustainability in the design, construction and operation of the system. It is vital to our state's economy, environment and the quality of life in our communities:

- Serves communities and households in the Northern San Joaquin Valley with some of our state's highest poverty rates;
- Promotes equity by maximizing benefits to disadvantaged communities
- Links the Northern California Megaregion's workforce to affordable housing;
- Readily connects our state's future high-speed rail system to BART;
- Provides direct and seamless service to major employment centers in all parts of the Bay Area;
- Provides opportunities for compact transit-oriented development; and
- Will have a significant impact on the reduction of VMT and greenhouse gas emissions.
- Operates on renewable energy

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

Sincerely,

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

May 28, 2020

The Honorable Pauline Russo Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that all of our Tri-Valley residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

ALAMEDA COUNTY TAXPAYERS' ASSOCIATION, INC., *et al*., Petitioners and Plaintiffs, vs. TRI-VALLEY-SAN JOAQUIN VALLEY REGIONAL RAIL AUTHORITY *et al.*, Respondents and Defendants.	Case No.: RG21110126 Assigned for all purposes to the Hon. Michael M. Markman Department 14 TRANSCRIPT OF ALAMEDA COUNTY TRANSPORTATION COMMISSION REMOTE MEETING OF MAY 28, 2020 AGENDA ITEM 8.1

Commission Chair Cutter: Thank you so much. Okay, moving right along. We are on Item #8, Planning, Policy, and Legislation committee. The first item would be to approve the Tri-Valley-San Joaquin Valley Regional Rail Authority request. With that, I would like to have the staff presentation. And I know we have a – there we go.

Ms. Lengyel: Madame Chair, I'll go ahead and start off. This is the initiation of a multi-step process for a request for 2024 amendment in accordance with the implementation –

Vice-Chair Bauters: I don't – you're not near the microphone or something. It's very hard to year you. I don't know if anyone else is having that problem.

Commission Chair Cutter: Yes. We're having a little trouble hearing you.

Vice-Chair Bauters: Very faint.

Staff: Okay.

Commission Chair Cutter: There we go.

Ms. Lengyel: Can you hear me better now?

Vice-Chair Bauters: Uhhh –

Commission Chair Cutter: Okay. Start talking and we'll tell you.

Ms. Lengyel: Let me put on a headset and then hopefully, you can hear me better that way. Are you able to hear me now?

Commission Chair Cutter: Let's hear your outside voice.

Ms. Lengyel: I'll use my outside voice.

Commission Chair Cutter: There you go.

Ms. Lengyel: Okay. Hopefully that works better.

So this is an action item. It came to you unanimously approved by the Planning Policy And Legislation Committee earlier this month. It is an item To Initiate The Multi-Step Process For A Transportation Expenditure Plan Amendment and the amendment request came in in September from the Tri-Valley San Joaquin Valley

Regional Rail Authority, a public agency created in 2017 by state law. Following that request, Alameda CTC staff did extensive assessment and had several workshops with the staff at the Tri-Valley San Joaquin Regional Rail Authority to assess the impacts and implications of the project on I-580. So in January through March, we had changed in leadership at Alameda CTC. We were intending to bring this item in April but the COVID hit and now, here we are in May to initiate the process. Next slide please

Next slide. So today, what I'd like to do is go over some background on the existing project in the 2014 Transportation Expenditure Plan, share with you a bit about the creation of the Tri-Valley San Joaquin Rail Authority and go over the Substitute Rail Project and then we'll have a project briefing by Michael Tree, who's the executive director of the Tri-Valley San Joaquin Valley Regional Rail Authority, and then I'll go over in detail what the proposed amendment is, including the proposed language and the amendment process, and we'll talk about the next steps. Next slide.

So as I mentioned, the Tri-Valley San Joaquin Valley Regional Rail Authority as a public agency under their authorizing statutes of legislation has requested the Amendment to the 2014 Transportation Expenditure Plan. Today's action is to immediate a 45-day comment period and I will go into more detail at the end of the PowerPoint about that comment period in timeline for the proposed amendment.

What I'd like to do now is turn it over to Caroline Clevenger, who's our Deputy Executive Director of Planning and Policy, and she can give you a little bit of history about the project and then we'll move into a presentation of what specifically the project is by Michael Tree. Caroline?

Ms. Clevenger: Thank you, Tess. Good afternoon, Commissioners. Rail service and connectivity in the Tri-Valley has been under discussion for a very long time. The BART to Livermore Project has been included in the Alameda County-wide Transportation Plan for a number of cycles, as well as in the 2007 Regional Rail Plan. Planning and environmental phases for the project is included in the current Regional

Transportation Plan and the Valley Link Project is being considered for the Regional Transportation Plan, Plan Bay Area 2050, that is currently under development, and it was recently amended into the San Joaquin County Regional Transportation Plan and Sustainable Community Strategy. In addition, in 2018, the State Rail Plan identified a Tri-Valley rail hub and increased service frequencies connecting the Bay Area and the Central Valley as a key priority for the future state rail network. In addition, cities in Alameda County have been doing local land use planning and focus growth planning work around potential stations, including Livermore, which completed the Isabel Neighborhood Specific Plan in 2018. Next slide, please.

Voters across the county have made long standing commitments that include funding for transit in the Tri-Valley dating back to the 1986 Measure B and the 2000 Expenditure Plans, which included funding for rail, and the 2014 Measure BB Expenditure Plan that included $400 million for BART to Livermore and is the focus of today's discussion. In additional, Regional Measures One and Three which were approved by voters throughout the region, included funding some of which BART and now the Tri-Valley San Joaquin Valley Regional Rail Authority have used to advance the initial phases of project development. Next slide, please.

As many of you know, BART was for a long time the lead on the project, and they last briefed the Commission on the project in June of 2018. As early as the 1980s, BART purchased sites near 580 at Isabel and Greenville to preserve land for future extensions or facilities. Between 2010 and 2018, BART advanced a significant amount of planning and environmental work. They evaluated a number of station sites and alignments as well as different rail technologies and an express bus alternative. That work culminated in May 2018 certification of a project-level EIR by the BART board. After extensive discussions and debate, the BART board finalized the EIR without selection of a preferred project to advance. Next slide, please.

In 2017, as Tess mentioned, the legislature approved a AB 758 which created the Tri-Valley San Joaquin Valley Regional Rail Authority for the purposes of planning, developing and delivering cost effective and responsive transit connectivity in the Tri-Valley and San Joaquin County. When the BART board voted to not advance the project, the Authority assumed responsibility to advance the project as defined by AB 758. The Authority utilized the significant amount of previous work had been completed BART as well as by ACE as part of the ACEForward planning and environmental work to jumpstart their work and Michael Tree, the executive director the Authority, is with us today to provide an overview of the Valley Link Project. Michael.

Mr. Tree: Alright. Good afternoon. Everybody hear me okay?

Commission Chair Cutter: Yes, we can. Thank you.

Mr. Tree: Great. Listen, it's a pleasure to be with to talk about Valley Link. The first slide I have is a photo taken of the 580. It's traffic that's growing into the Tri-Valley where it's joined by the traffic from Livermore and then off into a more central part of the Bay Area and Oakland into San Francisco. Of course, you know the picture is pre-COVID-19, but as you've been reading in the media and even hearing about today, the traffic and congestion are expected to return in the near future. I think – you know, I think what's important to note about the congestion is that these are Bay Area workers. You know, these are your teachers, your healthcare workers, your police officers, your fire department personnel that are really struggling to get to work and are facing real impacts both individually and with the families. But as well, I think it's about the economy. You'll note in the first two lanes of traffic on the right hand side of the picture that it's all truck traffic and it's basically going, the majority of it, to and from the port of Oakland and it's crawling at a – you know, its speed is at a crawl. Next slide.

On this slide provided by the Bay Area Council Economic Institute, you can see that there's three primary commute sheds into the Bay Area. You note that the commute from the northern San Joaquin Valley is certainly the largest. In fact, it's more

than twice the volume of the other two commute sheds and the congestion is also growing at a higher rate from the northern San Joaquin Valley. An update to the slide's coming soon and it will show that the commute shed for northern San Joaquin Valley is now approaching 100,000 commuters a day. Next slide.

Slide 11 illustrates why the congestion in the 580 is so great and, in short, in times of prosperity, which we hope will return – it's important to all of us – that the Bay Area is generating approximately eight jobs for every housing unit constructed and that equates to unstable housing costs for Bay Area workers. In fact, housing prices for comparable homes are approximately three times higher in the Bay Area than in the northern San Joaquin Valley and that that leads to an increase in commuters and congestion on that 580. In fact, according to the Bay Area Council Economic Institute, traffic on the 580 that you just saw will increase 75 percent before 2040 and freight movement, according to Caltrans, will increase 60 percent on that corridor in the same time. Next slide.

As mentioned by Carolyn earlier and Tess in the presentation, AB 758 established the Tri-Valley San Joaquin Valley Regional Rail Authority. The 15 member agency features, you know, a real effective balance of policymakers from both sides of the Altamont Corridor to plan and construct the passenger rail service that will connect the northern San Joaquin Valley with the BART system, including connections with the ACE trains. Of course, you'd recognize certainly in the upper left Board Chair Supervisor Scott Haggerty and also you would certainly recognize Board Member Mayor John Marchand and certainly having a lot to do with the Valley Link, as well as Mayor Thorne and Mayor Haubert in their support and endorsement of the project. Next slide.

So here's a great snapshot of the Valley Link Passenger Rail Project. The first phase is from the Dublin-Pleasanton BART station and extends to the planned Ace North Lathrop station. A second phase extends the train system to Stockton. As noted on the map, Valley Link connects with BART, the Dublin-Pleasanton BART station, and

with ACE trains at the Greenville station and the planned ACE North Lathrop stations. The first phase is 42 miles long and features seven stations, and you can conveniently break up the first phase of the Valley Link System in the three rights-of-way, all of which are on current transportation corridors. The first section is from the Dublin-Pleasanton BART station to Greenville Station, which is just short of the Altamont Corridor. Within this 11-1/2 mile section, Valley Link travels at grade within the 580 medium. The second section is the Altamont corridor from Greenville to the Mountain House station. In this section, Valley Link operates on the former Southern Pacific Railroad right of away, which interestingly was part of the original transcontinental railroad right of away and is now owned by the County of Alameda. The third section is from Mountain House station to the planned ACE North Lathrop station, and in this section the train is traveling in the Union Pacific Railroad right-of-way. Per the feasibility report, Valley Link will carry between 26 and 28,000 rides a day by 2040, save 33,000 tons of greenhouse gas emissions a year in 2040. Next slide.

So this slide is from State Rail Plan. Improving statewide connectivity with rail is a high priority of the state and as you can see on the inset of the Bay Area on the slide, Valley Link closes critical transit gaps by connecting two designated state rail hubs: the Stockton Hub and the Tri-Valley Hub, located with the Dublin Pleasanton BART station. And Valley Link also provides early connection to high-speed rail as it connects with ACE which then connects with high-speed rail in Merced or is planned with high-speed rail in Merced. Next slide.

Here you can see the travel times between the seven Valley Link stations in Phase One. These travel times were calculated as part of the feasibility report and are competitive with commuter travel times on a normal commuter day. Of note is we've been doing additional operations modeling during the environmental work for Valley Link and have bettered these times by 10 minutes by improving the location and the length of the passing lines that are used by Valley Link. Next slide.

So slide 16 shows the headways of Valley Link. In short, headways of the frequency of the trains arriving at the stations. In the Tri-Valley, in Livermore, the trains will arrive every 12 minutes in the peak and every 30 minutes in the off-peak, and that's BART-like service, which is important for the residents in Livermore. And beyond Livermore, the trains will arrive at stations every 24 minutes in the peak and every 60 minutes in the off-peak. Next slide.

So here's an illustration of the train technology that was selected by the Valley Link board. It's a multiple unit train which looks very similar to eBART. These trains can travel at nearly 100 mph and the Authority is working towards zero emission trains. So these would be trains similar to the multiple-unit train you see in the picture, but powered by electricity through catenary lines in the Altamont Corridor to power the train and charge battery packs that will then power the train in Tri-Valley and northern San Joaquin Valley portions of Phase One. Next slide.

So the Board has spent a lot of time partnering with the communities within the Valley Link service area. We got lots of public meetings and discussions with policymakers and others, community partners in regard to developing the Valley Link stations. Several of the seven stations in Phase One offer really excellent transit-oriented development opportunities. Livermore's a great example with the Isabel Neighborhood Specific Plan expected to feature nearly 4000 housing units within a half-mile of the Isabel station. And another station in Livermore being studied in the EIR cleared at a project-level is the South Front Station, which similarly could offer an additional 4000 homes within a half-mile of that station.

So these stations are either in MTC's Priority Development Area or are being considered a Priority Development Area. And just quickly, that TOD opportunity really goes beyond Livermore. The train system really is becoming a catalyst for transit-oriented development in the San Joaquin Valley which is sorely needed for the Tri-Valley to have a backbone of the Valley Link system where they can organize development. In

downtown Tracy, for example, the city is undergoing transit-oriented development study or planning currently where they anticipate adding between 3500 and 4000 housing units within a half-mile of their station and almost that exact number is being developed for the River Islands development next to the train station that's scheduled for River Islands. Next slide.

So speaking, you know, of TOD potential, the Valley Link Board adopted a transit-oriented development policy in December of 2019 and it requires station area plans include zoning, design standards, parking policies, and station access plans. It mirrors MTC's TOD policy in that the Valley Link Plan holds that stations in the area, the planning area, must provide a corridor level threshold of 2200 housing units within a half-mile of the radius of the stations. Next slide.

Slide 20 is really about station access. It has been a big topic as well as we've met with community in many events and outreach opportunities. The board is working with local transit agencies to include feeder bus service into stations, to include complementary paratransit service, as well as even Shared Autonomous Vehicle technology. You'll see the SAV in the lower right of the pictures. That's actually a Shared Autonomous Vehicle that is being tested by Livermore Amador Valley Transit Authority and under the leadership of Supervisor Haggerty. That project is moving forward with AQMD funding as well as MTC funding. And then, I'd be remiss, certainly, if we didn't note that lots of bike and pad opportunities are being planned for the stations as first-last mile into the Valley Link Project.

So this slide is about sustainability. The Board very quickly, as they were organized, set a goal to be a hundred percent self-sufficient. That happens through the zero emission trains that are being planned into the project. It also happens through a large solar farm that's being planned on 200 acres where the O&M facility is located so that that facility can be powered by solar as well as solar opportunities in individual stations. And so, you know, the Agency is well on its way to that goal. Next slide.

So here's a look at the cost of the project in year of expenditure and also the funds that have been identified for the project. In current year dollars, the year of expenditure dollars that are noted there are $1.88 billion to $2.5 billion. Again, you'll note the $400 million that's available from Measure BB that this agenda item Is concerning. I think before we leave this sliding would be important to note that certainly transportation sales taxes are being planned in both the Bay Area with the Faster Bay Area and also in San Joaquin County, both now looking for November of 2022 as dates to go to the voters. And this, combined with state and federal funding sources, will be used to complete the project and provide operations and maintenance funding for Valley Link. Next slide.

So just two more slides here. I certainly couldn't get away without – in this in this presentation without noting important project partners. Alameda CTC is certainly one of the most important partners as we work on the 580 to build Valley Link up the median. Certainly Tess and her staff have been wonderful to work with and they are helping us with the design and also all the with the design and the and also the delivery of relocating the managed lanes. Other partners certainly is Caltrans in the widening of the 580 MTC and San Joaquin Council of Governments and ANCTC are important for funding and project delivery. CalSTA is very interested in this project as noted it helps for strong link of connectivity in the State Rail Plan. BART has been fantastic to work with. We've been working very closely to make sure that the Valley Link BART connection that will take place at the Dublin Pleasanton BART station is easy and convenient and well-constructed. San Joaquin Regional Rail Commission who operates ACE been very important in the connections and the station designs, and then certainly the Union Pacific has been helpful as we look to operate within the Union Pacific right-of-way in the San Joaquin section. Next slide.

And so this is the last slide for today. It's the project schedule. As noted, the information in my presentation is primarily come through the information that

feasibility report which was released in October of 2019 and it's available on the home page of the valleylinkrail.com website. The Valley Link EIR will be out for public comment towards the end of 2020 and we're anticipating that the Board will consider certifying and adopting the Valley Link Project by the end of 2020. And NEPA and 30% design will be completed in 2021, which sets up final design on this project really in like 2021 to early 2022. And so, you know, if everything goes about as well as can be expected we're working hard to be able to test trains in the latter part of 2027 begin revenue service sometime in 2028. So that completes my presentation and really the update on Valley Link and I'll turn it back over to Tess or Caroline and be available certainly for any answers you might have at the end of the presentation..

Ms. Lengyel: Thank you Michael. I'll take this now so you heard about the project and so I wanted to share a for a moment about what the TEP amendment process is. And this is a process that is detailed in the implementing guidelines of the 2014 Transportation Expenditure Plan. Any amendment to the plan does require a 2/3 vote by the Commissioners and before you actually act on this item, I'm going to have Zach Wasserman at the end of this presentation talk a little bit about what specifically that means. It requires a 2/3rds vote to initiate the 45-day period. And the Transportation Expenditure Plan implementing guidelines note that there is a 45-day comment period for jurisdictions in Alameda County to comment on the proposed amendment. Public comments can be made either at those jurisdictions or at future – today's meetings and future readings of Alameda CTC. So once that 45-day jurisdictional comment period happens, Staff will return to the Commission and we'll take all of the comments that we've received, we'll document all of those, we'll include them in a format where you can see the comments and the response to comment, and then we'll bring a recommendation to the Commission after that 45-day. And that will be in the fall time frame. Next slide.

For any project that is amended into the Transportation Expenditure Plan, it will have to adhere to all of the implementing guidelines just like all the other projects. To any sort of new project sponsor, similar to all the other projects including strict project deadlines. Each project in the implementing guidelines is given a period of seven years to receive environmental clearance and have a full funding plan for the project. That was included in the TEP because most of the projects that go into the Transportation Expenditure Plan have not cleared environmental clearance and so if this is amended, the initiation date of the seven-year period would be upon the actual Final amendment by the Commission. Commitments from fund recipients means that we would have to enter into an agreement, a Master Funding Agreement, and all the roles and responsibilities of a new agency such as the Tri-Valley San Joaquin Valley Regional Rail Authority would have to enter into all of the same funding commitments as all of our other project sponsors in Alameda County. That includes responsibilities for the sales tax, expenditures and hiring requirements and reporting requirements. No expenditures are allowed outside of Alameda County.

So next slide talks a little bit about what the very specific amendment request is that was submitted by the Tri-Valley San Joaquin Valley Regional Rail Authority. One is to acknowledge the Tri-Valley San Joaquin Valley Regional Rail Authority as a new agency eligible for Measure BB funds. This specific amendment requests is solely on the next two items. One is to remove the BART to Livermore Project as a named capital project and add the Valley Link Project as a named Capital Project for the $400 million, so that it could fulfill the rail connectivity that was in the 2014 Transportation Expenditure Plan in the Tri-Valley. This change would require some technical adjustments such as maps and tables throughout the Expenditure Plan. And those are shown in attachment C/seen. This slide is a slide that shows what the actual proposed language changes are for the addition of the Valley Link Project in Alameda County. You can see that red denotes language removed and blue denotes new language

added. So you can see the new language added is the name of the Valley Link Rail in Alameda County and it shows the first phase of an extension from the double Pleasanton BART station within the Tri-Valley and Altamont Pass. It further clarifies that the funds are for construction and only in Alameda County, and that all funding commitments must be identified and approved for any initial operating segment that most effectively means the adopted project goals. This project would be required to go through specific environmental clearance. And look at alternatives as part of the environmental process and the project must ultimately be consistent with the mandates, policies of local regional agencies that have jurisdiction over the environmental process as well as the project development process. Next slide. This simply shows the language of the incorporation of the blue additions. Next slide, please.

At the Planning Policy and Legislative Committee, there were several letters that were received and these are included in Attachment E in your packet and they are noted here. In addition, it was noted on the agenda for today's meeting that any written comments needed to have been received by 5:00 PM as of yesterday, and you did receive an e-mail out from Vanessa Lee earlier today, Attachment F, which includes all the additional letters that have been submitted to you as a Commission as you consider this item. Next slide, please.

So the recommendation today, as I mentioned before, came to you unanimously approved from the Planning Policy Legislation Committee and the recommendation is to initiate a 45-day comment period by the jurisdictions and after that comment period, we would come back to the Commission for any final action. So today's action requires 2/3rds approval here at the Commission meeting today to initiate the comment period and then you would need another vote when we come back in the fall to actually amend the plan. And with that, I'd like to ask Zach to just make sure that we have full clarification of what the 2/3rds of approval requirement is for this item and after that, we'd be happy to answer any questions.

Mr. Wasserman: Good afternoon all. Hi, this is Zack Wasserman and I'm General Counsel for the Alameda County Transportation Commission. The administrative code changes that you approved earlier in this meeting state clearly that the amendments to the 2014 TEP require 2/3rds of the Commission's authorized vote, which is the weighted vote of the members present at the time of the event. So it's 2/3rds by weighted vote of the members present today. That will be the same requirement when it returns to you, if you do approve this, in the fall for the final approval which you will make after considering the comments from the jurisdictions and any comments from the public. I'm happy to answer any questions .

Commission Chair Cutter: Okay. Thank you. So we have a lot leading up to that. I would like to – in looking at public comments, I don't think that there's any questions for you, Zach, as one of **Commissioners have had this handout and I acknowledge that and [1:24]** I'll call on him first after we get through with our public comment. So it looks like we do have at least two hands up, if Vanessa would like to call on them.

Ms. Lee: Yes, we have three hands raised currently. The first one is a 925-962-9643.

Mr. Bezis: Yes, good afternoon. Can you hear me?

Commission Chair Cutter: Yes.

Mr. Bezis: You can hear me?

Commission Chair Cutter: Yes.

Mr. Bezis: Good afternoon. My name is Jason Bezis and I'm calling, first of all. to find out if the letter that I submitted about 12:30 this afternoon has been received and distributed.

Commission Chair Cutter: Okay. Go on with your comments and I'll answer that at the end of your comments.

Mr. Bezis: Okay. Well, I'd like to say I don't know when my time's going to begin but I want to say just up front that I would like, despite the deadline yesterday, that's unusual. If someone comes into meeting they can usually count over letters, so I want to make sure that any public comments are included into the record and are distributed, maybe posted to the website or whatever it is that you did for the comments that were received, because there is no ability for anyone to hand you letters or anything – written communications, unlike a regular meeting.

Commission Chair Cutter: OK. Thank you. I am trying to go back and forth. I would ask – your comment period – could you freeze the countdown yet?. Thank you.

Mr. Bezis: And then I'm sorry. I'm sorry, what? What was that? I don't think my 3 minutes have begun yet, but OK, go ahead.

Commission Chair Cutter: So Vanessa, can you verify whether his comments were received or not and then he can continue with his two minutes of comment period?

Ms. Lee: Sure. We actually did receive a letter from Mr. Bezis. It was received after the 5:00 PM deadline, and I'm going to summarize that comment, the information in the letter, from once we get to that portion.

Commission Chair Cutter: OK, great.

Mr. Bezis: Ok, that's very good.

[Both talk at once.]

Commission Chair Cutter: Go ahead Mr. Bezis.

Mr. Bezis: Okay, and how much time? Is it three minutes or two minutes?

Commission Chair Cutter: Right now you have a one minute and 58 seconds left.

Mr. Bezis: Okay. I didn't realize that was going against my time. What is the time that's allocated for the – ?

Commission Chair Cutter: Three minutes.

Mr. Bezis: Okay. I was not aware that that there's – this is housekeeping in the front dealing with the COVID-19 issues up front. So can we phrase again how much time I have?

Commission Chair Cutter: OK, so now you're down to one minute. I'm going to count –

Mr. Bezis: OK, I'm going to have to object that this is a due process issue here about the –

Commission Chair Cutter: Mr. Bezis? Excuse me, Mr. Bezis.

Mr. Bezis: –during this COVID-19.

Commission Chair Cutter: Mr. Bezis, If you will stop talking for a moment I will figure this problem out. Alright? So Vanessa, can you restarted it at three minutes please. And now, Mr. Bezis, are you're aware that you're going to start at three minutes, right?

Mr. Bezis: Very good. Okay. Okay. Very good. Yes, thank you. Thank you. I'll try to use the little less of that. We'll see what happens. Basically I'm concerned on behalf of other Alameda County – part of Albany County Concerned Citizens who are opposed to this TEP amendment. This is a $400 million revision of the largest capital item in Measure BB. So this is a drastic change. This is an epic bait and switch against Alameda County voters while they're being distracted by a global state of emergency. My letter goes on to state that this is a major change. The voters were told back in 2014 in Measure BB that this would be funding BART to Western Livermore to Isabel Ave, but this amendment chooses this Valley Link Project and says it will go out in the Altamont Pass, which is way past Livermore and way into unpopulated area of the county. And so the concern is that, you know, it's going to be used for the benefit of San Joaquin Valley

residents and taxpayers, and not for the benefit of Alameda County, because I don't think there's going to be a station out in Altamont Pass and there's no one who lives out there. And so with such, you know – this needs – and also once you're dealing with this issue of reopening this $400 million, this raises the overall geographic equity provisions that you see in implementing guidelines #12 and #13 of the of the transportation – of Measure BB. And it raises questions if there's another trade off between this this money for this 400 million and the Tri-Valley. They gave extra local street and road funding to the North County cities and if this funding is going to be building a railroad right in Altamont Pass, that doesn't benefit to Tri-Valley. And if it argues benefiting the entire county, then you need to revisit these other funding formulas as part of this process. It's a drastic revision. There are many alternatives that should be considered. Everyone was talking about TBART about 20 years ago. The companion to EBART in Contra Costa. Why isn't TBART being considered? And TBART actually was cheaper. I believe that ran on the railway corridor and used, you know, the Iron Horse Trail corridor to get up to the Dublin-Pleasanton BART station – also the big issue, too, about the I -580 median. That's going to cost a lot of money to dig up the toll lanes, hot lanes that were just built. And you're going to – and so that's like another waste right there and there are issues too about whether it's even a right-of-way there to – that Caltrans has to accommodate the everything. I mean I was told in the public hearing 17 years ago, there's not enough right away to – you have a rail in the median and hot lanes you and an express bus options should be considered just like was considered back in 2003 with the I-580 widening. So that's one of my concerns. And I also think we should look to – at the people the Tri-Valley were not very supportive of measure BB. It didn't even get a majority in Livermore. They've been told they're going to get BART over and over again. They keep raising their taxes there, they don't get BART. And here, yet again, the people of Alameda County will subsidize a railroad in the middle of Altamont Pass, which is not benefiting Alameda County.

Commission Chair Cutter: Thank you for your comments, Mr. Bezis. I'll look forward to also if this does go to the comment period to making sure that your letter is incorporate in those comments. And with that, the next speaker, please.

Ms. Lee: The next public comment we have is John McPartland.

Director McPartland, you're going to have to go ahead and unmute yours.

Director McPartland: Can you hear me?

Ms. Lee: Yes, you can hear you now.

Director McPartland. Alright. As Board Director and member of the Tri-Valley Central Team, Valley Regional Rail Authority and representative for the municipalities, residents and taxpayers of the Tri-Valley area on the Highway 580 corridor, I support this Transportation Expenditure Plan Amendment proposal and I have provided all Commissioners with a detailed letter to this effect, and if I may, I'll continue to speak to help defuse the anxiety of the previous speaker. The amount of money for that $400 million that that will recover if this proposal is successful will, in effect, be used just between the existing East BART station in Dublin-Pleasanton and go towards the extension of rail transportation into Livermore at the previous location that it was identified for. It will not end up being expanded all the way to San Joaquin.

Thank you very much for your time and that extension of this from the existing March station to Isabel. Thank you very much for your time and I look forward to the results.

Commission Chair Cutter: Thank you for your comments.

Ms. Lee: `The next comment is by Pat Pairis of the Sierra Club.

Ms. Pairis: Can you hear me?

Commission Chair Cutter: Yes, we can. Thank you.

Ms. Pairis: Sometimes technology works. OK, thank you. This is Pat Pairis speaking on behalf of the Sierra Club and our more than 13,000 members who vote in Alameda County. The Sierra Club incorporates by reference our letter submitted [BTL

1:32:45] committee earlier this month, which is in your packet. We urge that all of the requested actions regarding Valley Link be deferred until there's much more information available as to the truth, usability, and impacts of the requests. However, assuming that the Commission will decide to proceed today anyway, we urge and request that all of the questions and concerns raised by the Sierra Club and other commenters need to please be fully responded to well in advance of the end of the 45-day comment period. Jurisdictions and other interested parties deserve the courtesy and due diligence to be able to comment from an informed perspective. We request that this added to any motions today.

There's no reason to rush into these actions. Even your earlier budget agenda item and every respected economic forecast makes, it's going to be years before we have any true recovery from the pandemic. We're concerned that your slide #30 about comment letters received by PPLC continues to ignore a significant implementing guideline in the TEP, #22, which clearly identifies there is no entitlement for either a rail project or for the Tri-Valley area of the money that's no longer needed BART to Livermore. However. the money can, when it's actually available, be used for any transportation project anywhere in the county. So one example would be to pay for all the all the BART fair gate retrofits in Alameda County and by a significant back payment on the zero mission bus fleet that carbon [no sound] is required. There's so many options and none of them are being even considered at this point. We – even the issue of making Valley Link as a new recipient needs to identify what impact it has on the existing trans- **[no sound] fees.** So there is also a significant issue as that this proposal would impact compliance with SB 375 and interregional commutes and MTC settlement agreement with the Building Industry Association. So thank you and I'm available for any questions.

Commission Chair Cutter: Alright, thank you Miss Paris for your comments. The next speaker, please, Vanessa.

Ms. Lee: We have one last public comment by phone number 510-208-5441. Can you please state your name for the record?

Mr. Carson: Yes, my name is Gerald Carson or Clawson. Can you hear me?

Commission Chair Cutter: Yes, we can.

Ms. Lee: Thank you.

Mr. Carson: First I just wanted to give you a little bit of his-, well a lot of you know it, but I want to repeat some history there about what was in people's minds when the idea of extending BART service out to Livermore was and that was basically that it was – remember they voted for the original BART system, but there were a lot of people felt that they didn't get an adequate return on their investment.

Now Livermore is a spread out community that spreads out to the south and it's 82,000 residents and those people really don't have very good access to date to the East Dublin station, partly because of parking restrictions and the weak bus system that doesn't really give you a decent alternative to driving, and there's not too much room around that station for parking. So that caused the idea of extending BART farther to the east.

But BART board wisely rejected that as being too expensive for the number of passengers it was going to be attracting. We – I'm with the Bay Area Transportation Working Group. I'm the president of that. We feel, and have long felt, that the best way of serving the people of Pleasanton and Livermore is to produce a very efficient bus connection on its own lanes during the peak hours, maybe not all day, but certainly during the peak hours and well-appointed such as the high tech buses are, so that people can be in the heat or whatever it is, they're conveyed comfortably by buses right to the Dublin BART station. This to us, this Valley Link, is a diversion. It is, as has been said before, it is primarily to benefit the people east of the Altamont Pass. It really doesn't do a lot for improving the access of the people of Livermore to BART. So for that reason, we oppose this $400,000 allocation. Thank you.

Commission Chair Cutter: Okay. Thank you so much for your comments, Vanessa. Is that the last public comment we have?

Ms. Lee: That was the last verbal public comment that we have for the day. Yes.

Commission Chair Cutter: OK, would you like to read the others?

Ms. Lee: Sure. There were several written comments submitted for this item, as noted in today's Commission meeting agenda. I'll summarize the comments as follows, in alphabetical order by entity or by group.

The first comment is from the Alameda County Taxpayers Association. They oppose the plan to transfer to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. For the present. Alameda CTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension rather than funding a multi-county project. The comment further states that if study of the Project and logical alternative show that Valley Rail is the best option for travel in the I-580 corridor into the Central Valley and is fair to the taxpayers and the traveling public, and it's feasible, then Alameda CTC should consider this $400 billion reallocation at that time.

The next comment is from BART General Manager Robert Powell. He states that BART staff has been engaged with the Tri-Valley-San Joaquin Valley Regional Rail Authority throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Project. BART supports the action to begin the public comment period for the amendment to the TEP naming the Tri-Valley-San Joaquin Valley Regional Rail Authority as an eligible recipient of Measure BB funds and specifically naming the Valley Link Project in place of BART to Livermore.

Next comment is from Jim Wunderman who writes on behalf of the Bay Area Council to support the approval of the request to initiate an amendment to the 2014

Measure BB Transportation Expenditure Plan for Valley Link. Valley Link will support the advancement of transit-oriented development adjacent to its stations which will further reduce BMT and greenhouse emissions and will benefit the entire Tri-Valley by reducing traffic over the Altamont pass and through the 580-680 corridor.

1:40:12

The next comment is from Andreas Culver who's the secretary/treasurer of the Alameda County Building and Construction Trade Council. The Council supports the staff recommendation. The comment further notes that Valley Link is a high priority project that will benefit the environment and economy and the quality of life and residents, and the Bay Area workers.

The next comment is from Ronald Gerhard, Chancellor of the Chabot-Los Positas Community College District. They write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority's request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan. The district urges approval of the Authority's request for a 2014 Measure BB Transportation Plan Amendment. The action will ensure that the vital project moves forward and that commitments to the Tri-Valley are at long last met.

Linda Smith, city manager of the city of Dublin writes, to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580-680 corridor and the city of Dublin urges approval of the request for 2014 Measure BB Transportation Expenditure Plan amendment.

John Marchand, on behalf of the city of Livermore, writes to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan. The action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail

connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART from many decades.

Nelson Fialho, City Manager of the city of Pleasanton writes to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan and urges approval of the request, which will provide environmental benefits, encourage smart growth, and ensure that commitments to the Tri-Valley are at long last met.

Tim Sobrante on behalf of the business and civil civic leaders who comprise the Innovation Tri-Valley Leadership Group urges support of staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace BART to Livermore Project with the Valley Link Project. The comment further states that amending the Measure BB Transportation Expenditure Plan to provide $400 million is extremely important at this time so that the Authority can leverage local funds with state, federal, and private funding to compete for the much needed project.

Rafael Gonzales, on behalf of Laborers Local 305, writes in support of the Valley Link Project and the proposed funding of the project. As a representative of thousands of workers who commute from the Central Valley to the Bay Area, and as someone who does that same commute, the comment author can attest to the importance of Valley Link rail system. The comments further request that the Tri-Valley-San Joaquin Valley Regional Rail Authority be recognized as an agency eligible for Measure BB funds and seeks to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore Project with the Valley Link Project.

David Haubert, on behalf of the Livermore Amador Valley Transit Authority.

Commission Chair Cutter: [unintelligible:

Ms. Lee: David Haubert, on behalf of the Livermore Amador Valley Transit Authority writes, to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority's request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan and urges approval of the Authority's request for a 2014 measure BB Transportation Expenditure Plan amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are at long last met.

Steven Dorn, President and CEO of the Pleasanton Chamber of Commerce, writes to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan. The comment states that after many decades of study, it will assure that residents will finally benefit from the taxes they have paid to BART many decades, and urges approval of the Authority's request for a 2014 Measure BB Transportation Expenditure Plan amendment.

David Schonbrunn, President of the Train Riders Association of California, writes to urge the Commission to defer action on amending the Expenditure Plan for Measure BB until Alameda CTC receives an environmental impact report for Valley Link. The comment further states that in EIR would provide the evidence to confirm that the Valley Link Project will provide meaningful benefits to Alameda County taxpayers as required by the Expenditure Plan guidelines, and would determine whether Valley Link would result in the construction of any infrastructure station that would be inconsistent with the land use constraining provisions of Alameda County. TRAC believes that alternative projects would be more cost effective.

We also received letters submitted from BART Director McPartland, which he's already summarized in his comment.

We also received a letter from Gerald Coffin, President and Co-founder of the Bay Area Transportation Working Group, which he is also already summarized

verbally and after the deadline date, we did receive a letter from Mr. Bezis and he's already summarized his comments as well.

That concludes our public comment.

Commission Chair Cutter: Alright, thank you. That was a lot of work. Thank you very much for keeping track and doing such a fine job doing it. We do have Commission member comments and with that, I'd like to ask not to make a motion until we can get through most of our comments, please. So with that, the first hand I saw was Commissioner Haubert, please. And if you –

Commissioner Haubert: Thank you very much. Yeah, thank you very much. First, I would like to commend staff for doing such a wonderful presentation, well-prepared, well thought out, articulately delivered and this is undoubtedly a very large and complex project which I am glad to fully support. I'd like to summarize my thoughts by saying, first of all, this is a very long established project that's been on the books for a long time. It's been coordinated with local effort and over 50 years of tax paid locally by the residents of the Tri-Valley, it's also a much needed project. Growth is expected to continue. The Bay Area is a very popular place to be. We are going to continue to be one of the world's largest economies and traffic will be continued to funnel through the 580. Lastly, to make everyone aware, remind everyone, these indeed are our people. They may live in San Joaquin, but they come and work and serve in our community. They are our police, our teachers, our firefighters. This is the corridor that moves our goods from the port of Oakland to the rest of California and the rest of the world. This project directly serves Alameda County tremendously.

It's the right thing to do. I've always supported transit-oriented development, smart growth. Lastly, this is not final approval but rather a 45-day comment period, so I look forward to hearing from everyone in the community what they would bring to us during that time frame and I would urge a unanimous support by my

colleagues on the Transportation Commission. If and when we're ready to make that motion, I'd be happy to do that, but I will refrain at this point. Thank you.

Commission Chair Cutter: Okay. Thank you so much. And next ,we have Commissioner Pilch, please.

Commissioner Pilch: Thank you. We're running up against time. I'll have to leave at 4:00, so I do not know if I'll be able to vote. By the way, Commissioner Kavanaugh is experiencing some technical difficulties, so behind the scenes, if folks can look into that, that would be great. I had some concerns that I expressed in the committee meeting. I'll try to quickly summarize those there and move on.

The placement of stations. I'd prefer that stations be placed more where there's existing density, rather than building new around new stations, but transit-oriented development is important. I have a concern about the new Transit Agency. Supervisor Haggerty expressed the idea that another agency besides this agency could actually run the rail. That would be great, but I wonder which agency would, if we actually have an agency that is expressing interest in in running that. And finally, for my concerns, I'm worried that this will bring more commuters, and it will encourage more long commutes and to the extent we can remove cars permanently and put those people on the rail permanently, that's great; but if we'll just get more people in cars as well as more people on the rail for long commutes, I'm concerned about that.

That said, I'm in favor of rail infrastructure. I think a good rail infrastructure is important. To the extent that this moves freight, that would be important or that it could move phrase that would be important. And what I've heard about the sustainability would be very important to my consideration of this project, that it be electric trains and that we encourage electric or zero-emission last mile alternatives to the stations or support them would be very important to my vote. And then finally, as someone pointed out, this is a vote to authorize a 45-day comment period. So if I get to vote, I would vote yes to authorize the comment period, and urge that we send the – make

sure that we communicate widely to solicit comments on this project. Thank you very much. That's it.

Commission Chair Cutter: Okay. Thank you so much and Commissioner Vella, please.

Commissioner Vella: Thank you, Madame Chair. Two questions for Mr. Tree. Is he there?

Commission Chair Cutter: I'm sorry. What did you – is who there?

Commissioner Vella: The gentleman that made the presentation.

Vice chair Bauters: Michael Tree. You're –

Commission Chair Cutter: Michael Tree.

Mr. Tree: Yep. I'm here.

Commission Chair Cutter: Okay, thank you.

Commissioner Vella: Mr. Tree, how many miles of rail in Alameda County and how many miles of rail in San Joaquin County?

Mr. Tree: You're talking about it in relation to the Valley Link Project, how many miles if rail?

Commissioner Vella: Yeah, I think we're all talking about the same thing.

Mr. Tree: Yeah, so there's 11-1/2 miles on the 580 section; there's 12-1/2 miles in the Altamont Corridor and there's 17-1/2 miles in the UP section, in the San Joaquin.

Commissioner Vella: And with regard to the San Joaquin Regional Valley Transit Authority, have they undertaken or are they currently undertaking a sales tax measure to help support their share of the project?

Mr. Tree: So similar to what Faster Bay Area is now looking toward San Joaquin Council of Governments is planning and looking at doing a sales tax measure, which include Valley Link in November of 2022.

Commissioner Vella: Good. I'm in favor of going forward with the hearing at this point. Thank you.

Commission Chair Cutter: Okay, thank you. Commissioner Vella. **[Unintelligible comment]**. Commissioner Arreguin.

Commissioner Arreguin: Thank you. I just wanted to clarify the requested action for today, which is to initiate a 45-day comment period on the requested amendment to the Transportation Expenditure Plan for this project. We're not approving the project today. So I'd add I support the action requested, but I actually do support amending the Transportation Expenditure Plan. I just want to state that for the record, because I think this is really replacing a rail project to serve the Tri-Valley with another and in reading the supplemental communications that we received this afternoon from the clerk, which were summarized verbally, I felt that the letter from Tim Sobrante really put things into perspective. You know, it was stated that in the development of Measure BB, that leaders in different geographic parts of the county were consulted about priority projects, and one of the main priority BART to Livermore. We know that the BART board directors sided not to proceed with the development of a project which then shifted the planning focus to this new agency. And ultimately, the goal was to build on the many years of discussion to have a rail connection to serve a greater portion of the Tri-Valley. I believe that this project ensures that the Tri-Valley can have greater access to the transit to address the growing gridlock that is not only harming our planet but is also having a negative impact on our regional economy. And my understanding is that this is funding the Alameda County portion of the project, so to address the concerns that have been expressed that we're spending Alameda County taxpayer dollars to fund a San Joaquin Project, well, this is funding a phase of the project that's going to be in Alameda County.

You know, I do think fundamentally we have to think about the megaregion. We can no longer think about the Bay Area as a nine country region, because increasingly, people are moving outside of the Bay Area due to rising housing

costs and either are moving to Tracy or other communities in San Joaquin Valley or are working in those communities and living in Alameda County. So we have to think about the transportation planning and connectivity on a much bigger scale, so I support the requested action, I support the amendment to the Transportation Expenditure Plan. I think it is clearly, as evidenced by the strong support from business leaders and leaders in the Tri-Valley, this is something that remains a priority and I think this is one way to create jobs at a time when we need to create jobs, when people are unemployed, but also, I think it's an important way to address our climate goals in our regional transportation goals. Thank you.

Commission Chair Cutter: Okay. Thank you so much. Commissioner Saltzman, please.

Commissioner Saltzman: Thank you. I have some questions and comments about timing and funding. So I'm trying to understand, is there an urgency to make this change now, when the project is only identified at most a quarter of the total capital funds needed and as I understand has not identified an operator or any operating funds. Is there some outside decision that hinges on us moving forward today? What is the urgency? Why are we bringing this forward right now with so much uncertainty on this project and I'd like to hear from Tess on that.

Ms. Lengyel: I'll just start off by saying that we've had this request in about eight months ago from the Tri-Valley-San Joaquin Valley Regional Rail Authority and we did a lot of due diligences in looking at the engineering aspects as it relates to the I-580 Corridor. And so over that eight-month period you had a chance to dive into the project. The project is in the early phases, just like many projects that were included in the Transportation Expenditure Plan. Most of the projects in the 2014 Transportation Expenditure Plan did not have full funding and they did not have environmental clearance. The nature of the Transportation Expenditure Plan is to be a down payment to be able to leverage money, and so as this project is moving forward through that

developmental process, this $400 million can be a powerful source of being able to leverage state money, federal money, and also to demonstrate commitment to other counties such as San Joaquin, that there is a strong commitment financially for this project.

I want to be clear that the money, the $400 million that is being requested this amendment, is only for the construction portion of the project. And so the project would have to have its full funding plan put together and those funds committed to before these funds could be used for construction.

Commissioner Saltzman: Thank you. So I do have concerns that we – if we move forward with this, we're going to tie up the $400 million. I understand it's not going to be spent right away and to that point, we're not going to have any jobs right away from this, from changing which project this goes to. And ultimately, the project might not be able to get funded. It hinges on a San Joaquin County measure, tax measure, which seemed really difficult to few months ago and now seems a whole lot harder. Even Faster Bay Area is very uncertain. I think most of us would agree that the process this year was very problematic. We sent, I think unanimously, a letter stating our concerns with the process and it's unclear if that would have moved forward with this year even without the pandemic. So we don't know where that's headed.

So I'm struggling to understand where the funding comes from. So we're going through this process and I just don't think we have a good idea. And again, no operator, no operating funds even if you get past the capital hurdle. Again, I don't understand the urgency. We're talking about potential ballot measures in 2022. So we have quite some time to prove to San Joaquin, to prove to the folks behind Faster. So I just don't understand the urgency.

So I want to ask one more question. If this is approved today and then when it comes back after the 45-day comment period it is approved, what happens in several years if the funding isn't identified? What is the process to undo this? How can

this then be spent and how much of a delay does this then cause to being able to spend this money for something else?

Ms. Lengyel: So this project, as I said during my presentation, will be required to follow all of the implementing guidelines as all of the other projects. If it is amended, it does have a timely use of funds requirement and it includes the environmental clearance and the full funding commitments. If the project is not able to meet either of those deadlines within a seven-year period, they have, according to the Expenditure Plan implementation guidelines, they have the ability to come back for one-year extension authorization by the Commission. If the project is not able to move forward and the project's sponsor determines that it's not able to move forward, then it is up to the Commission ultimately to make a decision about the use of the funds.

I will note that there was a comment about geographic equity and in the development of the Transportation Expenditure Plan, over hundreds of hours of meetings, there was a very delicate and deliberate approach in balancing the funding across the entire counties. So the Commission will have to look at geographic equity in any of its future considerations.

Commissioner Saltzman: Thank you. Today, I'm not going to vote to support this. My vote doesn't have to do with the project and whether it's worthy. It has to do with my concerns about whether there's any possibility to fund this and just based on the timing of when we're making this decision and my vote is not for BART and BART will continue to work very closely with Valley Link and I know that has been a good partnership and I appreciate that. So again, it's not a position of BART and it's really for me as a Commissioner here for the Transportation Commission, trying to be wise with our funding.

Commission Chair Cutter: Okay. Thank you so much. Commissioner Kaplan, please.

Commissioner Kaplan: Thank you very much. And thank you for the presentation and for the project. I did want to ask a question, probably of Tess, so you could redirect if you wanted someone else to answer. What would be the timeline and strategy for how we would do the evaluation of alternatives?

Ms. Lengyel: So the project is required to go through an environmental process and the environmental process that it's going through is twofold, as Michael mentioned. One is going through a CEQA analysis, and secondly, it will go through the federal environmental NEPA process, and it's required to look at alternatives in that environmental process. As Michael said, the environmental document is expected to be released later this year and there are alternatives that are being evaluated as part of that environmental document.

Michael, if you'd like to add anything about the question or alternatives, please do so.

Commissioner Kaplan: And then, I did want to request overtly on the record that I do want to make sure that we get responses on the record to the questions that were submitted by the Sierra Club. So Tess, I wanted to ask you if you would be willing to, you know, help make sure that that happens?

Ms. Lengyel: As directed by the Commission, we can certainly do that.

Commissioner Kaplan: And that those would be provided in time to have them in the advanced packet for when it comes back at the conclusion of the – when it would come back to the Commission, that we would be able to have that.

Ms. Lengyel: Yeah, Commissioner Kaplan, just on that note, certainly responses – so the public has opportunity to comment at the Alameda CTC meetings and then through whatever process each of the jurisdictions who will provide comment use in terms of providing comment to Alameda CTC. So the comments that we receive, we will incorporate into a table, and we will incorporate responses to all of those comments for the Commission, and so you'll see responses prior to your action on a final amendment.

Commissioner Kaplan: Cool, thank you. And could we have the map of the route up again in terms of the slides? I know it requires activating the screen share, but I did just have a question about the phasing and sort of the geographic scope. Will there be sort of a usable first leg prior to the further length? So I think you were describing the first phase as being one that went fairly far. Let's see, we'll get to the map, and in terms of the question of whether there will be like usability in Alameda County along the way.

Ms. Lengyel: So you to your question Commissioner, I'm going to actually turn it over to Michael Tree to provide you a response with the segments. There are different segments in terms of the infrastructure that's put in or where the project runs

Commissioner Kaplan: Right. And so my question is sort of at which point graphically do you then have a usable segment that would be operable even if the subsequent segments hadn't yet been built?

Ms. Lengyel: Right. And Michael, can you please provide an answer to that?

Mr. Tree: Yeah. And just as a –

Commission Chair Cutter: You're muted.

Mr. Tree: Am I good?

Ms. Lengyel: You're back now.

Mr. Tree: I'm back?

Commission Chair Cutter: Okay.

Mr. Tree: You hear me okay?

Commission Chair Cutter: Yes, we can right now.

Mr. Tree: Okay. Hey, just as a quick rewind button to the previous question, we are studying alternatives in the EIR. And to your question here about potential minimal operable segments or initial operating segments, the EIR is looking at potential initial operating segments to Greenville. So the train in that scenario would

operate from Dublin-Pleasanton to Greenville. We're also looking at an initial operating segment that could go to Mountain House. So from Dublin-Pleasanton up and over the Altamont into the Mountain House station.

Commissioner Kaplan: Thank you. Thank you. That's very helpful to know. And then just procedurally, back to Tess to clarify, so once a project is – if a project is added to the Expenditure Plan, that doesn't guarantee that it gets money, right? The decision to actually allocate money would still have to come back once those additional steps, such as the EIR, are taken?

Ms. Lengyel: Yes. Any final allocation of funds comes back to Commission and that's consistent with all of the funding that we do; and in fact, earlier today, you adopted the 2020 IP and it's through the comprehensive investment program that the Commission takes programming and allocation actions.

Commissioner Kaplan: Thank you very much. Thank you, Madame Chair.

Commission Chair Cutter: Okay. Thank you so much. Commissioner Dutra-Vernaci

Commissioner Dutra-Vernaci: Okay. Thank you. I had to unmute myself. It's been a very interesting conversation today. I appreciate it and I appreciate the comments, and as Commissioners before me have mentioned that really, what today is about is implementing a 45-day comment period to allow others to comment, and I did listen in on the Legislative committee meeting a couple weeks ago, particularly for this item, and I believe what I heard there as far as comments goes, that Alameda County Transportation Commission will be reaching out to all of the entities, I believe cities in the region for their comments as well. So that being said, Commissioner Arreguin did raise an issue I was going to raise because, as you may recall, I am Alameda County's representative on the Metropolitan Transportation Commission. So we have certainly been having conversations about Valley Link at that level as well. And as Commissioner

Arreguin pointed out, this is a megaregion project and one of the things that MTC have been struggling with is, what do we do when we're crossing the borders into a jurisdiction that's not ours? So there was this same concern in terms of monies as was mentioned here, this project, any monies that are expended will remain in Alameda County. And our goal is to get people out of their cars and into mass transit, which is what this project is. It may not be the BART to Livermore Project that voters were supporting, but it certainly is a project in that area that is much needed.

Somebody had made a comment that this does not benefit Alameda County, and I would beg to differ with that, because it's a tremendous benefit to Alameda County for the port of Oakland because, if people are getting out of their cars and on to this new line, that frees up much needed roadway for the trucks that are coming in and out of the port of Oakland and, therefore, improving the environment by not sitting there idling and polluting the environment.

And as well for the Dumbarton Corridor, because not everything goes north once they come out of the Valley; it goes south as well and that certainly impacts everybody that's traveling through the Dumbarton Corridor down 880 into Santa Clara Valley or crossing Dumbarton Bridge. So I see this as a very important project for several reasons listed above, and I certainly am supported with moving this forward for the 45-day comment period and ultimately, getting the project built, should the environmental impact report and all the other steps align in that direction. Thank you.

Commission Chair Cutter: Okay. Thank you, Commissioner Marchand, please.

Commissioner Marchand: There we go. Okay. Thank you. Well, I certainly appreciate the comments and I absolutely agree with the Mayors Talbert, Arreguin, and Dutra-Vernaci. You've heard from the cities that are along this corridor that are impacted. They all support it. BART supports it. This is something that's very, very important. There's been a lot of discussion about the benefit to Livermore or the

benefit to Alameda County. The model showed that 10,000 riders from Livermore will use Valley Link. That's going to be a tremendous benefit for the entire Tri-Valley corridor.

We heard from a few people, a couple of speakers today, saying that this is a bait-and-switch. What the voters of Alameda County voted for was rail connection, rail connectivity along the 580 corridor. A bait-and-switch is when somebody starts talking about, instead of the rail connection that people voted for, people are talking about using buses instead. That's a bate-and-switch. This, as Mayor Arreguin pointed out, this is about a rail project replacing a rail project. BART decided to not come out the Livermore. This is a rail project that's going to make that connectivity. Themes that we frequently hear on Alameda County Transportation Commission, we hear about equity and connectivity. When I first came on to the Commission in 2011, we were talking about geographic equity. Tess mentioned the idea. It was heavily discussed during the 2014 Expenditure Plan. So geographic equity, that rail connection, that connectivity along the 580 corridor, as Mayor Arreguin pointed out, that connecting the megaregion is so important now.

Other themes we've talked about are greenhouse gas reduction, reduction in vehicle miles traveled. This is going to reduce vehicle miles traveled by almost 100 million miles a year. It's tremendous. Thirty-three thousand metric tons of greenhouse gas is reduced. Transit-oriented development is another very important theme. This also accomplishes that. We're talking about the Isabel neighborhood plan. We've been talking about that for years. That was originally going to be for the BART connection. We've pivoted. That's going to be for Valley Link. That's going to be 4000 housing units at that station. Over 1000 will be affordable. So Valley Link will accomplish all of those things: geographic equity, connectivity, greenhouse gas reduction, everything I've just talked about, all the themes we find so important here at the Alameda County Transportation

Commission, Valley Link will help to accomplish all of that. And I absolutely support this and would vote in favor of it as well. Thank you.

Commission Chair Cutter: Thank you, Commissioner Marchand. Next up is Commissioner Ortiz, please.

Commissioner Ortiz: Thank you. Thank you, Madam Chair. First, I would like to thank Tess and Michael Tree for coming before the AC Transit Board last night and make a presentation about this proposal. As an appointed member to the ACTC, by my AC transit board members, I asked my colleagues for direction as how to vote on the 45-days comment period. I was authorized by my fellow board members, by my colleagues, to support the 45-days comment period. And so I will be voting yes on this. By the time that the final vote comes before us again, I will ask my colleagues again for direction, because I am their representative. So I will be supporting the 45-days.

Commission Chair Cutter: Alright, thank you Commissioner Orti., Commissioner Halladay, please.

Commissioner Halladay: Hi, thank you. Well, I think my questions have been answered, but particularly that the comments will be responded to and that will be part of the package we received when this comes back to us after the 45-day period in, I assume, July. I will just echo the comments of everyone else. Look, I have seriously considered the comments that were made and I think that this project is as close as we're probably going to come to actually meeting that will of the voters and you know, having BART connection to Livermore. We hear about that a lot from Mayor Marchand, the fact that that hasn't been done and I will follow his lead on this one and I just very much appreciate that this this does keep that commission commitment, it keeps the money in rail. It also sets it up for a more regional, for a more robust rail system in California, and I think that will come. How soon? I know we're in a period right now of, you know, major concern about our future, but we will have a future and we will get through this crisis. And I do think right now, as we all know, putting money on a project helps leverage

other funds to come into that project, So I will be supporting a motion approve, once one is made.

Commission Chair Cutter: Alright, thank you. And Commissioner Carson, please.

Commissioner Carson: Well, thank you very much. I've been listening to the presentation and the comments. There are some I want to associate myself with. Obviously, the area is growing and we do have to expand to kind of start looking at things from a megaregion kind of perspective. I do want to make sure that I'm clear that the 45-day comment period is open to the general public, not just to the jurisdictions that are impacted. I also want to kind of follow this. I don't have a problem with the 45-day comment period. I think we should make sure the democratic process is open as possible and we'll still have it coming back to make our final decision. And I was, again, following the conversation but since Measure BB doesn't provide or provides for no funds to be spent out of Alameda County, I just want to figure out how we account for that in this project. I want to make sure we [no sound] score that and have greater clarity about how Measure BB funds are being spent on this project. I know that it's been mentioned that Alameda County's portion of this construction development would be that part, but I'd like to kind of get a little bit more information on that. And then, since the funds are not totally secured at this time, I kind of also want to know the staging for when [**ATEA or ACTEA or APTEA 2:18:55**] funds will be allocated to the project.

Ms. Lengyel: Thank you, Commissioner Carson. I'd be happy to answer that. Regarding the point you made about funds being expended in Alameda County: through the very detailed funding agreement that we will establish with the Tri-Valley-San Joaquin Valley Regional Rail Commission, we will identify which portion of the construction project will be funded with this $400 million. As Michael Tree has mentioned, the project could use basically all of that $400 million in Alameda County for the Alameda County portion just because of the costs in Alameda County, but it's through

the funding agreement that we would define specifically which elements are eligible and we would only reimburse for those expenditures.

None of the funds can be expended until the full funding is identified and committed to. So none of the funding for construction will move forward until the project has been able to resolve its other funding needs.

Commissioner Carson: And then, the 45-day comment period is open to the public at large, correct?

Ms. Lengyel: The 45-day comment period, as specified in the Transportation Expenditure Plan, is for the jurisdictions. The jurisdictions will use whatever their processes is to provide us comments. For example, Commissioner Ortiz noted she took this item to her board last night. That was her process at AC Transit. Each of the jurisdictions have their own process for making comments and then certainly, at Alameda CTC, we received public comment today. We received public comment at the PPLC and we will receive public comment at the committee when it comes to the Commission in the fall, as well as that the full Commission.

Commission Chair Cutter: Commissioner Carson, you are still on mute, if you're talking.

Commissioner Carson: I'm not talking.

Commission Chair Cutter: Okay. There you go.

Commissioner Carson: I put myself back on mute.

Commission Chair Cutter: Is that the end of your comment? Please, Zach.

Mr. Wasserman: Commissioner Carson, as has been emphasized, but I want to make very clear, the public will have numerous opportunities to comment on this. They can obviously comment at any or all of the local jurisdictions that consider it. They have made comments today both in writing and personally, and will be able to do so when it's coming back to the committee and when it comes back to the Commission. So there will be very thorough and open opportunities for the public.

Commission Chair Cutter: Okay. Thank you. May I comment, then, that looking – I was just pulling out my calendar, looking at what this means to us. So if we do this today, when we have – through about the middle of July, the commend period would end and that gives a two week, a little bit less than two weeks for our staff – actually one week, for our staff to answer. So in all reality, perhaps it won't be coming back in what would be August, since we don't meet in August, so that would be September. Is that what you're envisioning, Tess?

Ms. Lengyel: Yes, we would need to bring it through both the committee and the Commission, so the earliest opportunity would be September.

Commission Chair Cutter: Okay, great. Yeah, I would like to give our community, not that I think we're going to have as many comments, but that gives us leeway that we need to be for a comment period. And also, as requested by Ms. Pairis about when the comment period is over, those will be published and then she will have every opportunity in the next month, actually, to make comments on those comments, if you will. So I think that that answers that question, too.

We have another – Commissioner Haggerty would like to speak now, please.

Commissioner Haggerty: Thank you. I want to thank Tess and Michael for really an excellent presentation on the project. You know, there's been a lot of things said that, you know, I don't necessarily agree with. But I'm going to do my best to stay positive here today.

It's been sent several times at this benefit San Joaquin County. I would submit to you that's woefully inaccurate. It represents the people in Alameda County and I would like you to really thank my co-Commissioner on the MTC who really hit the nail on the head with her comments. I think that she was very articulate in how this helps Alameda County in relationship to truck traffic that we suffer from that comes from the

port of Oakland. That is spot on, especially with truck traffic expected to increase by two-thirds by, I believe, it's 2030.

So I think that that's one reason. There are some that think that we can run an express bus in that corridor. If you take the ridership and you divide it out by what a bus can carry, you're looking at over 500 express buses. I don't think the Tri-Valley to add 500 more buses on our freeways that are already impacted. And I would ask you to watch Channel 2 tomorrow when they show the traffic. They're already showing the Altamont Pass on a daily basis in red. People are already coming through Alameda County. And quite frankly, they're not just going down the freeway; they're invading rural roads, which will make it hard for the people that we represent the more rural area to even get out of their home in the morning, starting at 3:30 in the morning. It's making it hard on the city of Livermore and the fact that these people bail off the freeway and that they then try to drive through the city of Livermore to maybe get somewhere three minutes faster.

You know, we have come up with what I believe is a program that works. BART said they didn't want to extend BART but yet, I do want I want to thank BART because the new general manager has been excellent for an excellent partner, an excellent partner, and, in fact, has restored by faith and maybe BART will run this when it's done, or the ACE train will run it. Who knows? I've been consistent in what I say that the last thing I want to do is start another transit agency in the Bay Area. I think we have 27 right now. I don't think we need any more. In fact, I'd love to see it get down to one. But we got a long way to go for that.

I think that the staff did a great job in articulating all the environmental benefits. Michael Tree did, too. And, you know, this project is much further along than any rail project that's been brought to this area in relationship to funding. We got together as a planning area. I think it's important to remember. It was a planning area that made the decision that they wanted to put their money in this corridor, and quite frankly, if the

money is taken from us, it doesn't go back to the rest of the country. It stays within the planning area. So, you know, this is what we're told this planning area they would get.

I'm going to let it go at that. I just really want to thank the colleagues that spoke in favor. I think that, you know, the 45-day comment period is important. I think it's good government and that's why we set it up when we set Measure BB up. So, you know, I can answer any questions or Michael can answer any questions. But if not Madame Chair, I'd like to make a motion to approve the staff recommendation.

Commission Chair Cutter: Alright, well, you are our last person to comment, but I'd like to hear the second. Commissioner Hubert?

Commissioner Haubert: Thank you so much. I'll second.

Commission Chair Cutter: Okay. So we do have a motion and I just want to – Sorry. Commissioner Haggerty, I want to make sure that —

Commissioner Ortiz: Madam Chair? Madam Chair? This is the vote to authorize the 45-days comment period, okay. Correct?

Commission Chair Cutter: Yes.

Commissioner Ortiz: Thank you.

Commission Chair Cutter: Yes, I'm just checking to make sure all of our Commissioners have had a chance to speak and we have gone through our public comments. So, Vanessa, would, you like to restate that so everyone is sure of what we are voting on?

Ms. Lee: Sure. The action in front of you today is to approve the Tri-Valley-San Joaquin Valley Regional Rail Authority's request for a 2014 Measure BB Transportation Expenditure Plan amendment.

Commission Chair Cutter: Thank you. And it's for a 45-day comment period which then will come back to the Commission for approval. So with that, can we have a recall? [laughs] Sorry, a roll call vote, please. It will be a recall!

Ms. Lee: Commissioner Ortiz.

Commissioner Ortiz: Yes.

Ms. Lee: Commissioner Haggerty.

Commissioner Haggerty: Yeah.

Ms. Lee: Commissioner Vella.

Commissioner Vella: Aye.

Ms. Lee: Commissioner Cox.

Commissioner Cox: Yes.

Ms. Lee: Commissioner Miley.

Commissioner Miley: Yes, for sure.

Ms. Lee: Commissioner Carson.

Commissioner Carson: Yes.

Ms. Lee: Commissioner Ezzy Ashcraft.

Commissioner Ezzy Ashcraft: Yes.

Ms. Lee: Commissioner Pilch is no longer on the call. Commissioner Saltzman.

Commissioner Saltzman: No.

Ms. Lee: Commissioner Arreguin.

Commissioner Arreguin: Yes.

Ms. Lee: Commissioner Haubert. Commissioner –

Commissioner Haubert: Yes.

Ms. Lee: Thank you. Commissioner Mai.

Commissioner Mai: Yes.

Ms. Lee: Commissioner Halladay.

Commissioner Halladay: Yes

Ms. Lee: Commissioner Marchand.

Commissioner Marchand: It's a big yes.

Ms. Lee: Commissioner Freitas.

Commissioner Freitas: Yes.

Ms. Lee: Commissioner Tao. I think Commissioner Tao is also left the call. Commissioner Kaplan.

Commissioner Kaplan: Aye.

Ms. Lee: Commissioner Kavanaugh.

Commissioner Ezzy Ashcraft: She may need you to unmute her if she can do that, Vanessa, she's having some laptop problems.

Ms. Lee: She's actually going to have to –

Commissioner Ezzy Ashcraft: Unmute herself?

Ms. Lee: Unmute herself, if she can.

Commissioner Ezzy Ashcraft: Okay, Jen, have you heard that?

Ms. Lee: I still see her in my in my attendee list. So we'll come back –

Commissioner Haggarty: Tell her to press her space bar on her computer.

Commissioner Ezzy Ashcraft: Did you hear that, Jen? Just to press and let go the space bar on your computer.

Commissioner Haggarty: No. Press and Hold.

Commissioner Ezzy Ashcraft: Press and hold. Okay. Press and hold. Mine is press and let go, but it's newer. She says not working.

Commission Chair Cutter: OK, is she on video? I don't know. Zach, can we take a thumbs up as a yes or a thumbs down as a no?

Ms. Lee: No, and she's also not on video right now. So I'm just going to go ahead and continue to go through the roll call and we'll come back and see if we can capture her both.

Ms. Lee: Commissioner Thorne.

Commissioner Thorne: Yes.

Ms. Lee: Commissioner Dutra Vernaci.

Commissioner Dutra Vernaci: Aye.

Ms. Lee: Vice-Chair Bauters.

Vice-Chair Bauters: Aye.

Ms. Lee: Commission Chair Cutter:

Commission Chair Cutter: Aye.

Ms. Lee: Just circle back to Commissioner Kavanaugh. It looks like we're unable to capture her vote, but the motion has passed with the votes that are recorded.

Commission Chair Cutter: And under the belief that even if she voted negatively, it would not affect –

Ms. Lee: The motion would still pass. Yes. Correct

Commission Chair Cutter: Thank you. All right. Well, that should make people feel a little better on that. I think Zach is getting some humor out of our technical things going on here. So with that, let's please have the federal update 8.2.

END OF TRANSCRIPT OF ALAMEDA CTC MEETING OF 5/28/2020, AGENDA ITEM 8.1

C E R T I F I C A T I O N

I, Jason Mundstuk, certify the following: I am a professional transcriptionist with 20 years experience that includes legal, medical and forensic transcriptions. I have extensive experience in preparing deposition summaries. I am a citizen of the United States. I am over 18 years of age. My business address is 5500 College Avenue, Oakland, CA 94618 dba Randy Black & Associates. This transcript was prepared from the video recording posted on the Internet.

I declare under penalty of perjury that I have truly, accurately, and completely transcribed the recording provided to me to the best of my ability and that the transcript is provided above. I further guarantee the confidentiality of this material.

Electronically signed on this day, the 20th of May, 2023 in the County of Alameda, California.

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

1. **Call to Order**

2. **Roll Call**
   A roll call was conducted. All members were present with the exception of Commissioners Carson and Ezzy Ashcraft.

   Subsequent to the roll call:
   Commissioner Carson arrived during item 3. Commissioner Ezzy Ashcraft arrived during item 5.2.

3. **Public Comment**
   Pat Piras, on behalf of the Sierra Club, commented on the Valley Link Project and the proposed 2014 Transportation Expenditure Plan amendment. Ms. Piras requested that Alameda CTC respond to questions raised by the Sierra Club, well in advance of the 45-day comment period that is required to amend the 2014 Transportation Plan. She requested to extend the 45-day comment period to end at a later date.

4. **Consent Calendar**
   - **4.1. Approve May 11, 2020 PPLC Meeting Minutes**
   - **4.2. Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments**

   Commissioner Cutter *moved to approve the Consent Calendar. Commissioner Halliday seconded the motion. The motion passed with the following votes:*

Yes:	*Arreguin, Bauters, Carson, Cutter, Haggerty, Halliday, Kaplan, Ortiz, Pilch, Valle,*
No:	*None*
Abstain:	*None*
Absent:	*Ezzy Ashcraft*

5. **Regular Matters**
   - **5.1. 2020 Countywide Transportation Plan: New Mobility Framework Update**

   Saravana Suthanthira and Chris Marks presented the Commission with an update on development of the New Mobility Framework (Framework), which will be a part of the 2020 Countywide Transportation Plan (CTP). The presentation covered the overall approach, key elements of the framework, goals, and next steps. Alameda CTC initiated the Framework to help the County prepare to leverage any potential benefits from new mobility technologies and services. The Framework was developed with a clear acknowledgement of the rapid and continuing change in new mobility technologies throughout the transportation industry and with an understanding that the Framework will need to be revisited and updated periodically. Ms. Lengyel requested feedback from the Commissioners on the goals.

Commissioner Kaplan wanted to include consideration of pricing to incentivize good transportation choices, and how pricing structures and policies could impact low income communities; Commissioner Kaplan also wanted to ensure that Transportation Network Companies (TNC) trip data was obtained, and that TNC's pay the same level of fees that taxis are paying to fund infrastructure. She stated that the goals should address the need to balance the benefits of TNCs in terms of increased access with the negative impacts on transit and parking in bike lanes and bus lanes.

Commissioner Halliday requested that the goals need to keep equity in mind and questioned if cap and trade funds for technology were considered.

Commissioner Ezzy Ashcraft wanted to know if technology can be used to help slow streets in the jurisdictions and if the goals included technical support for the County during and post COVID-19. She also requested that the goals include seamless connectivity throughout the County.

Commissioner Pilch stated that autonomous vehicle policies need to be developed and consider as well as economic incentives and disincentives.

Commissioner Ortiz stated that the goals should ensure equity is top of mind while considering accessibility for all people moving around the county; ensure that the Framework focuses on equity versus equitable, which is not the same as equity.

This item is for information only.

5.2. Federal, state, regional, and local legislative activities update

Carolyn Clevenger provided an update on federal, state, regional, and local legislative activities. She stated that the Governor released the May Budget Revise on May 14th, and the State fiscal outlook went from a surplus to a deficit. Ms. Clevenger noted that while the State economic downturn will impact transportation funding, overall many transportation programs were not heavily impacted at this date. The exception is the State Transit Formula Assistance Program, which helps fund transit operations; funding for that program decreased from approximately $800 million to $530 million. At the federal level there is no current update regarding another potential stimulus package related to COVID-19.

This item is for information only.

6. Committee Member Reports

There were no member reports.

7. Staff Reports

There were no staff reports.

8. Adjournment/ Next Meeting

The next meeting is: July 13, 2020 at 11:30 a.m.

1. **Call to Order**

2. **Roll Call**
A roll call was conducted. All members were present with the exception of Commissioners Carson, Haubert, Miley, and Valle.

Commissioner Cox attended as an alternate for Commissioner Chan. Commissioner Droste attended as an alternate for Commissioner Arreguin.

Subsequent to the roll call:
Commissioner Halliday left during Item 7.

3. **Public Comment**
Pat Piras commented on the proposed 2014 Transportation Expenditure Plan (TEP) amendment, on behalf of the Sierra Club. Ms. Piras requested that the 45-day comment period be extended and she requested that Alameda CTC respond to questions raised by the Sierra Club in advance of the comment period closing. Ms. Piras also noted that she was unable to locate a published notice on the comment period on Alameda CTC's website.

4. **Chair and Vice Chair Report**
Chair Cutter stated that Alameda CTC continues to deliver projects and implement programs despite the pandemic and she noted that the Commission will continue to do its part in the economic recovery by getting projects into construction and keeping a continued focus on project development and program delivery for on-going investments throughout the county. She concluded her report by congratulating Commissioner Haggerty for being selected by the California Transportation Foundation (CTF) for the Person of the Year award, which will honor his 24 years of leadership and accomplishments for transportation improvements in Alameda County and the Bay Area.

Vice Chair Bauters provided instructions to the Commission regarding technology procedures including instructions on administering public comments during the meeting.

5. **Executive Director Report**
Tess Lengyel also congratulated Commissioner Haggerty for being honored by CTF for the Person of the Year Award. Ms. Lengyel noted that during this time, where the health of the community, the economy, and transportation system are affected, staff is working on programs to be responsive to COVID-19. She affirmed that Alameda CTC staff is committed to continuing to support the promise to the voters for high quality planning and project delivery and for helping with economic recovery and access. Ms. Lengyel stated that staff will bring to the Commission programs that will help with economic

recovery and she highlighted progress and key efforts made by staff for projects that are currently in construction and/or moving into the construction phase.

6. Consent Calendar

6.1. Approve May 28, 2020 Commission Meeting Minutes

6.2. I-580 Express Lanes Operations Update

6.3. Adoption of Modified Business Rules/Toll Policies for the I-580 Express Lanes

6.4. Approve Cooperative Agreement with the Cities of Dublin and Livermore for the Dublin Boulevard – North Canyons Parkways Extension Project

6.5. Approve Conceptual Funding Plan for the I-680 Southbound Express Lanes from SR-84 to Alcosta Boulevard Project

6.6. Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments

6.7. Federal, state, regional, and local legislative activities update

Commissioner Marchand moved to approve the Consent Calendar. Commissioner Haggerty seconded the motion. The motion passed with the following votes:

Yes:	*Bauters, Cox, Cutter, Droste, Dutra-Vernaci, Ezzy Ashcraft, Freitas, Haggerty, Halliday, Kaplan, Marchand, McBain, Mei, Ortiz, Pilch, Saltzman, Thao, Thorne*
No:	*None*
Abstain:	*None*
Absent:	*Carson, Haubert, Miley, Valle*

7. Multi-Modal Committee (MMC)

7.1 2020 Countywide Transportation Plan: Multimodal Strategies

(This item was presented after 8.1)

Cathleen Sullivan stated that every four years, Alameda CTC prepares and updates the Countywide Transportation Plan (CTP), which is a long-range planning and policy document that guides future transportation decisions for all modes and users in Alameda County. Starting in 2012, the CTP has become increasingly multimodal and integrated with land use planning. Ms. Sullivan stated that the vision and goals emphasize creation of a connected and integrated multimodal transportation system that promotes sustainability, access, transit operations, public health and economic opportunities. As discussed in detail at the PPLC meeting earlier in the month, and with small groups of Commissioners in May, there are three primary multimodal outcomes of the CTP: 10-year Priorities, Strategies, and Long-Term Projects. Ms. Sullivan also noted that part of Alameda CTC's Strategies will be dedicated to COVID-19 risks and opportunities. Ms. Lengyel requested feedback from the Commission on the priority strategies or refinements to the strategies, and she noted that the Multi-Modal Committee provided feedback that staff will integrate into the plan and bring back to the Commission in July.

Commissioner Kaplan commented on car's parked in bicycle lanes and vehicles blocking bicycle and bus lanes. She noted that this is primarily done by the Transportation Network Companies and stated that the issue needs to be addressed.

Commissioner Ortiz emphasized that it's very important for cities and counties to work with AC Transit when they are planning Complete Streets in order to make the designs complete and efficient and safe for all modes.

Commissioner Bauters noted that prioritizing the high injury network is critical for safety and he stated that there needs to be a focus on providing resources for communities of concern that overlay with the high injury network.

This item is for information only.

8. Planning, Policy and Legislation Committee (PPLC)

8.1. 2020 Countywide Transportation Committee Plan: New Mobility Framework Update
(This item was presented before item 7.1)

Saravana Suthanthira and Chris Marks presented the Commission with an update on development of the New Mobility Framework (Framework), which will be a part of the 2020 CTP. Alameda CTC initiated the Framework to help the County prepare to leverage any potential benefits from new mobility technologies and services. The Framework was developed with a clear acknowledgement of the rapid and continuing change in new mobility technologies throughout the transportation industry and with an understanding that the Framework will need to be revisited and updated periodically. The presentation covered the overall approach, key elements of the framework, goals, and next steps.

Commissioner Pilch asked who was involved in the Technology Working Group (TWG). Ms. Suthanthira stated that staff from the following agencies comprised TWG: AC Transit, City of Dublin, City of Fremont, City of Oakland, City of San Leandro, County of Alameda, and Livermore Amador Valley Transit Authority.

Commissioner Pilch asked why the reference to equitable access was removed from the presentation. Ms. Suthanthira noted that the PPLC wanted to ensure the framework addresses equity proactively and appropriately so staff removed the word "equitable" from the presentation so as not to be confused with ensuring that we promote equity.

Commissioner Ezzy Ashcraft asked how the members of the TWG group were chosen. Ms. Suthanthira stated that members of the technical advisory committee, with expertise in new technology were requested to volunteer for the working group.

Commissioner Marchand noted that the new mobility goals mention equity, accessibility and connectivity and he urged the Commission to support the Valley Link project to meet those particular goals.

This item is for information only.

9. Programs and Project Committee

9.1. Approve FY 2018-19 Measure B, Measure BB and Vehicle Registration Fee Program Compliance Summary Report and Interim Policy Updates

John Nguyen recommended that the Commission approve the Fiscal Year 2018-19 Measure B, Measure BB, and Vehicle Registration Fee Program Compliance Report and Interim Policy Updates. He stated that Alameda CTC found nineteen of the twenty Direct Local Distribution (DLD) recipients in compliance with the DLD financial reporting and program compliance requirements for the FY2018-19 reporting period. He noted that the City of Union City remains the only DLD recipient that has not submitted reports to Alameda CTC due a citywide virus hindering Union City's ability to access the required financial data. Union City is currently resolving their data accessibility issues and intends to submit their reports in Fall 2020. Mr. Nguyen stated that as a result of the COVID-19 pandemic and the shelter-in-place order across the Bay Area Counties, Alameda CTC recommends a one-year extension of the current timely use of funds policy requirements. The recommended action also includes modifying the Seniors and People with Disabilities DLD implementation guidelines to allow for the cost eligibility for Meals on Wheel Delivery programs for the FY 20-21 period for transportation purposes.

Commissioner Cutter asked when the road condition PCI Index was done. Mr. Nguyen stated that it was done during the last fiscal year and he noted that the PCI scoring is a 3-year average so it will take three to five years to see the average increase for particular agencies. Mr. Nguyen stated that the City of San Leandro is implementing significant rehabilitations jobs to fix their roadways and bring up their PCI.

Commissioner Kaplan asked when will the expanded allowances be applicable. Mr. Nguyen stated that the Timely Use of Funds time extension is from June 30, 2019 through June 30, 2020 and that the modified Seniors and People with Disabilities DLD implementation guidelines will go into effect July 1, 2020.

Commissioners Bauters moved to approve this item. Commissioner Kaplan seconded the motion. The motion passed with the following votes:

Yes:	*Bauters, Cox, Cutter, Droste, Dutra-Vernaci, Ezzy Ashcraft, Freitas, Haggerty, Kaplan, Marchand, McBain, Mei, Ortiz, Pilch, Saltzman, Thao, Thorne*
No:	*None*
Abstain:	*None*
Absent:	*Carson, Halliday, Haubert, Miley, Valle*

10. Commission Member Reports

Commissioner Saltzman stated that Clipper Start, a means-based fare discount project done in partnership with MTC and other transit agencies launched on July 15, 2020. She stated that she will send information on the project to Alameda CTC to pass along to the Commissioners.

11. Adjournment

The next meeting is Thursday, July 23, 2020 at 2:00 p.m.

Memorandum

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

TO: Tess Lengyel, Executive Director

FROM: Programming and Allocations Team

DATE: August 5, 2020

SUBJECT: **Equity Analysis – Issues Identification and Approach**

The 2014 Transportation Expenditure Plan (TEP) implementation guidelines require Alameda CTC perform a geographic equity analysis to ensure Measure BB funds are distributed across the county in an equitable manner. In addition to the TEP equity analysis mandate, this memorandum also attempts to identify issues and an approach related to the Commission's interest in "Equity" as it pertains to planning and programming of Commission administered funds.

Alameda CTC disburses funding to its local jurisdictions via two distinct mechanisms. While part of the Local Sales Tax and Vehicle Registration Fee (VRF) are distributed via formula on a monthly basis, the Alameda CTC-administered discretionary funding are programmed and allocated via the biennial Comprehensive Investment Plan (CIP) process. These sources include sales tax programs, the Vehicle Registration Fee program, One Bay Area Grant Program, State Transportation Improvement Program, and Transportation Fund for Clean Air Program. This discretionary, competitive process is based on multiple planning efforts that have identified needs and benefits of transportation improvements, project readiness and funding availability. Although, funding considerations are not based on a prescribed formula for geographic equity, programming goals include investments in Communities of Concern, Modal and Geographic Equity. Ultimately, the CIP needs to be consistent with the identified needs of the county (as documented in the adopted Countywide Transportation Plan (CTP) and/or other relevant planning documents) at the time of the programming cycle.

The 2104 Measure BB TEP is a subset of the CTP and the TEP Implementation Guidelines suggest a more structured methodology for evaluating geographic equity for the Measure BB dollars.

Per the TEP's Implementation Guidelines #13

13. *Funding formulas for all programs will be revisited within the first five years of the Plan implementation to ensure overall geographic equity based on population and/or other equity factors. Funding for capital projects will be evaluated through*

the biennial capital improvement planning process which will include an evaluation of geographic equity by planning area. (2014 TEP, page 38)

While it is clear Implementation Guideline #13 requires examining funding equity of the Measure BB distributions in its entirety (including Direct Local Distribution, Capital Project Commitments, and discretionary funding), it is does not specify the parameters of the equity analysis.

Over the years, Alameda CTC's Commissioners have had a wide range of equity discussions including, methodology, and dialogue on factors of equity considerations ranging from social, economic, geographic area, population, modes, inclusion of particular fund sources, lane miles, etc. The complex discussion has often been left short of a decided approach, but a statement of Alameda CTC staff looking into an approach to bring back in the future.

Implementation Guideline #13 requires revisiting the TEP distribution funding formulas within five years after its implementation. Measure BB funds began distribution as of April 1, 2015. Thus, to satisfy the TEP requirement, an analysis must be completed by April 1, 2020. The TEP did not specify whether an analysis required public comment or Commission approval. Alameda CTC programming staff considers having met the overall intention of the TEP through its current programming and allocation processes. As mentioned previously, since 2015 Alameda staff have considered general equity of its Alameda CTC administered fund sources overall and to date the Commission has acknowledged the agency's ability to support local priority improvements that have been proposed through the Comprehensive Investment Plan (CIP) programming cycles.

However, with the continued lingering discussions on equity distributions, equity factor considerations, and requests for data showcasing countywide investments made and planned, it is time to thoroughly explore geographic equity, what it means, and define its parameters.

The following table depicts a list of known/anticipated challenges associated with performing this analysis. The issues identified are in no particular order of priority or magnitude.

#	Issue	Detailed Description
1	**Defining Geographic Equity Parameters**	Geographic equity may include any combination of factors such as: 1. Fund source specific, or in the totality of all Alameda CTC Administered Funds. 2. Modal Equity considerations (transit, bicycle/pedestrian, highway, freight/rail). 3. Population based equity by the four planning areas.

#	Issue	Detailed Description
		4. Lane miles and/or commute patterns such as Average Daily Traffic (ADT). 5. Population and lane miles by the four planning areas. 6. Communities of Concern within a jurisdiction/ planning area.
2	**Focusing on Measure BB equity alone**	Concentrating on Measure BB Funds exclusively presents complex challenges in defining analytical parameters for a single fund source 1. Measure BB is segregated into three categories of funding distributions: a. Fixed Capital Commitments established in the TEP i.e. "Named Capital Commitments", b. Direct Local Distribution (DLD) Program formulaic funds pass through to the local jurisdictions, and c. Discretionary program funds which includes large discretionary capital commitments to certain project types/ investment categories and more traditional competitive funds for bicycle/pedestrian, paratransit, and transit programs. What level of equity is to be considered for the Measure BB program? Does it include all of the above fund categories? Isolation of particular categories? Historically, Alameda CTC has relied on DLD's equitable distribution as a proven source of local funds when posed with inquiries on the considerations for awarding discretionary programming. Additionally, while the TEP Implementation Guideline #13 states reviewing equity across the entire Measure BB program, the TEP also specifically requires revisiting the DLD formula distribution for the Local Streets and Road program. "The Local Streets Maintenance and Safety program provides funds directly to local jurisdictions to be used on locally determined priorities. Twenty percent of net revenues will be allocated to local cities and the county based on a formula that includes population and road miles for each jurisdiction, weighted equally, consistent with the 2000 Measure B formula. The formula will be revisited within the first five years of the plan

#	Issue	Detailed Description
		to ensure overall geographic equity in the Plan." (TEP, page 22).
3	**Assigning Prime Beneficiary / Analyzing Project and Investment Benefits**	It can be difficult to assign projects to a single area primarily benefitting from the project for these key areas: 1. Jurisdictions/Planning Areas: Projects may benefit multiple jurisdictions and planning areas 2. Communities: Projects may benefit multiple communities within the county (low income/disadvantaged communities, seniors and people with disabilities, youth, commuters, etc.) 3. Transportation modes: Projects may benefit multiple modes, such as highways and local roads, transit bicycle/pedestrian, freight/rail, etc. Ideally, the assignment of a beneficiary type requires consistent assignments through all planning and programming efforts, in order to make an accurate assessment in a near term report and overall program wide progress reporting. An equity analysis that goes beyond reviewing formulas to confirm an equitable distribution has taken place, retroactively assigning each Alameda CTC project investment towards a particular area, community, or mode type may not accurately reflect the investment impacts, potentially over or under estimating the benefits attributed to a single jurisdiction or planning area.
4	**Data Gathering**	The discussion of geographic equity has evolved over the years, but not in a consistent manner. Due to this inconsistency of the parameters of geographic equity, once the final parameters are decided for the equity analysis, for some investments, Alameda CTC may not necessarily have all the data on hand. Currently the available data set for CIP programming investments is limited to Project Sponsor, Primary Project Mode, and Planning Area. To ensure availability of the requisite data, prior to conducting an equity analysis, Alameda CTC may have to revisit all of its investments, including requesting additional project data from project sponsors. Regarding issue #3 above, since data on sub-modes hasn't been requested of the sponsor an in-depth analysis would need to be

#	Issue	Detailed Description
		conducted by staff to see when and how projects should be assigned to multiple modes.
5	**Internal Roles and Responsibilities**	Geographic equity is not isolated to one particular department within Alameda CTC. The discussion is expounded within long-range planning efforts such as the Countywide Transportation Plan, as well as the near-term implementation of documents such as the Strategic Plan and CIP. It's assumed each document, and each responsible department would perform an equity analysis through a different lens and for varying and required purposes. The need to establish an overall agency approach and coordinated effort between departments is critical to have a unified approach to the equity analysis, including a consistent interpretation of any established data sets.

The issues and challenges presented here require more in-depth discussion between Executive Management and internal departments to identify and finalize an approach to conducting the geographic equity analysis required by the TEP= and requested by the Commission.

The below schedule outlines the timing and milestones required for an October 2020 Committee Item on TEP geographic equity, and is subject to change based on the decided scope of the desired analysis.

Time period	Milestone
By August 28th	• Internal Discussion and direction on an approach to equity methodology and parameters that would satisfy both the TEP requirement and Commission inquiries • Define the scope of the Fall Staff Report • Assign particular departments data collection/consolidation tasks based on above
By September 11th	• Draft Staff Report for circulation and discussion
October Committees and Commission (may float to November)	• Informational Item on funding equity specifically for Measure BB programming distributions to date with limited parameters. OR • Policy Recommendation on Geographic Equity parameters and methodology.

Memorandum

TO:	2014 Transportation Expenditure Plan Records Archive
FROM:	Programming and Allocations Team
DATE:	August 9, 2020
SUBJECT:	**Measure BB Geographic Equity Five-Year Technical Review**

Summary

The 2014 Transportation Expenditure Plan (TEP) implementation guidelines require Alameda CTC perform a periodic geographic equity analysis to ensure Measure BB funds are distributed across the county in an equitable manner. This memorandum serves to meet the geographic equity analysis requirement.

Background

Per the TEP's Implementation Guidelines #12 and 13 listed below:

12. *Capital Improvement Program Updates: Project descriptions will be detailed and fully defined for inclusion in the Alameda CTC Capital Improvement Program which will be updated every two years and will provide for geographic equity in overall funding allocations. All allocations will be made through a public process.*

13. *Geographic Equity: Funding formulas for all programs will be revisited within the first five years of the Plan implementation to ensure overall geographic equity based on population and/or other equity factors. Funding for capital projects will be evaluated through the biennial capital improvement planning process which will include an evaluation of geographic equity by planning area. (2014 TEP, page 38)*

In general, Alameda CTC programming staff considers meeting the overall intention of the TEP guidelines above through its programming and allocation processes. Geographic equity is considered at the time of programming any Alameda CTC's administered fund sources that are available during a programming event such as the agency's Comprehensive Investment Plan (CIP) programming cycles. Nonetheless, Implementation Guideline #13 requires revisiting the TEP distribution funding formulas within five years after its implementation. Measure BB funds began distribution in 2015. Thus, to satisfy the TEP requirement, an analysis must be completed by the end of 2020.

TEP Distribution Summary

Alameda CTC disburses Measure BB funding through two distinct distribution mechanisms.

1) Direct Local Distributions

The 2014 Measure BB Direction Local Distribution (DLD) funds are distributed directly to twenty local jurisdictions and transit operators as they are received by Alameda CTC in accordance with the provisions set forth in the 2014 TEP and the Master Program Funding Agreements between Alameda CTC and the local jurisdictions. Approximately 53.55 percent of total net Measure BB revenues are set aside for the DLD programs (Transit, Local Streets and Roads, Bicycle and Pedestrian, and Seniors and Peoples with Disabilities).

Each of the DLD programs have prescribed distribution formulas established by the TEP as described in detail by DLD program in Table 1 below,

Table 1: DLD Distribution Formula

No.	Program	% of Net MBB	Distribution Formula
1	Transit Operations, Maintenance, and Safety Program	21.55	• The 21.55% of net MBB revenues is shared across the five transit agencies based on agreed upon and set percentages for the transit agencies. o AC Transit (18.8%) o ACE (1.0%) o BART (0.5%) o LAVTA (0.5%) o Union City Transit (0.25%) o WETA (0.5%)
2	Local Streets Maintenance and Safety	20	• The 20% of net MBB revenues is proportionally shared using a prorated formula carried over from the 2000 Measure B Transportation Expenditure Plan to distribute the funds among Alameda County's four Planning Areas. • Each Planning Area allocation is then distributed to the jurisdictions within the planning area based on the jurisdiction's share of the population and lane miles for the planning area.
3	Bicycle and Pedestrian Infrastructure and Safety	3	• The 3% of net MBB revenue is shared through a population formula that identifies a jurisdictions proportional share based on a jurisdiction's population over the total population of all eligible jurisdictions.

4	Affordable Transit for Seniors and People with Disabilities	9	• The 9% of net MBB revenues is split between the following o Cities (3%) o AC Transit (4.5%) o BART (1.5%) • The Paratransit and Planning Advisory Committee (PAPCO) periodically recommends a distribution formula for the 3%. • Currently the distribution formula consists of a share-based population by planning area, and then within each planning area • Population is established by eligible seniors over a certain age and socio-economic status based on US Census data and or the America Community Survey.
	Total	**53.55**	

2) Reimbursements Basis (Capital Commitment Allocations and Grants Funds) Measure BB is dispersed on a reimbursement basis for specifically identified capital commitments in the TEP, and discretionary programs such as competitive bicycle/pedestrian grant programs or discretionary capital commitments such as the Three Major Trails commitment.

   Alameda CTC authorizes the programming and allocation of this category of funding through Comprehensive Investment Plan (CIP) process. Jurisdictions must submit project information that establishes the project need, benefits, and allocation readiness which may compete against other funding requests.

TEP Baseline Equity Distribution by Planning Area

Alameda CTC planning processes have broken up Alameda County into four distinct planning areas for planning purposes. The four planning areas, and the jurisdictions that make up the planning areas are defined in the following Table 2: Alameda CTC's Planning Areas.

Table 2: Alameda CTC's Planning Areas

Planning Areas	Jurisdictions
Planning Area 1 (PA1) North Area	• Alameda • Albany • Berkeley • Emeryville • Oakland • Piedmont
Planning Area 2 (PA2) Central Area	• Hayward • San Leandro

	• Unincorporated areas of Castro Valley and San Lorenzo, as well as other unincorporated lands in that area
Planning Area 3 (PA3) South Area	• Fremont • Newark • Union City
Planning Area 4 (PA4) East Area	• Dublin • Livermore • Pleasanton, and all unincorporated lands in that area

In November 2014, Alameda County voters approved the $7.8 billion TEP that established the baseline distribution of sales tax revenues by planning area based on 1) the geographic location of named capital commitments were geographically located, 2) the DLD formula allocation methodology noted earlier, and 3) a general assumed even distribution of competitive program funds.

Thus, in comparing the final TEP funding distribution to the population by planning area, the TEP indicates a consistent sales tax funding distribution by planning area population with an estimated +/- 1.7 percent variance as shown in Table 3 below.

Table 3: Baseline 2014 TEP Distribution by Planning Area Population Analysis

	PA 1	PA 2	PA 3	PA 4
TEP Distribution	42.5%	22.8%	19.9%	14.9%
Population Share	40.8%	24.2%	21.6%	13.4%
Variance	1.7%	-1.4%	-1.7%	1.5%

The TEP distribution percentage by planning area shown in Table 3 defines the TEP Baseline Equity Distribution over the entirety of the thirty-year expenditure plan. It is noted that PA1 and PA4 contain a slightly greater share of the TEP than PA2 and PA3. This equity difference is generally considered when programming other funding other than TEP funds.

Overall, the TEP Baseline Equity Distribution mirrors closely to the population share distribution by planning area.

Current Programming and Planning Area Equity Snapshot

Since the passage of Measure BB, Alameda CTC has programmed and distributed over $1.1 billion in sales tax revenues across the county from July 2015 thru June 2020.

This $1.1 billion includes $795 million programmed through the CIP (as of the 2020 CIP Update, approved May 2020) and $318 million in formulaic DLD funds.

Table 4 below compares the 2014 TEP baseline distribution targets with the actual programming distributions thru June 2020.

Table 4: 2014 TEP Baseline Distribution Comparison to Actual Programming (2015 to 2020)				
	PA 1	**PA 2**	**PA 3**	**PA 4**
TEP Baseline	42.5%	22.8%	19.9%	14.9%
Actual Program	39.9%	20.9%	15.9%	23.3%
Variance	-2.6%	-1.9%	-4.0%	8.4%

As it stands, the current Measure BB programming favors PA4 largely due to the immediate implementation readiness of those projects and programs within this planning area. As projects in other planning areas move further from project development phases and into higher dollar design and construction phases, Measure BB will be programmed accordingly to further achieve a balance and adherence to the TEP Baseline Equity Distribution targets.

Reviewing the TEP Equity Distribution

Per Implementation Guideline #13, Alameda CTC must review the TEP Equity Distribution. As such, this review examines the following

1. Alternative TEP Baseline Comparison that considers population alone, rather than 50% Population and 50% Lane Miles as the primary distribution by planning area.
2. DLD Formula Allocations and Named Capital Commitments by Planning Area
3. Other Equity Considerations

1. *Alterative TEP Baseline Comparison – Population Alone vs 50% Population and 50% Lane Miles*

   The TEP equity analysis considers population share by planning area which is a traditional means of isolating equity targets for jurisdictions/geographic areas. As an alternative, some local and state programs have adopted equity analytics that factors a 50% population and 50% lane mile formula. Table 5 below compares the two approaches for Alameda County.

Table 5: Population Only vs 50% Population/50% Lane by Planning Area				
	PA 1	**PA 2**	**PA 3**	**PA 4**
50% Pop. – 50% Lane Miles	41.1%	22.6%	19.4%	16.9%
Population only	40.8%	24.2%	21.6%	13.4%

There is a greater favorability of distributions (up to 3.8% percent) towards P2 and P3 when considering the population alone distribution.

Secondly, in comparing the TEP Baseline Equity Distribution to a distribution share based on 50% population and 50% lane miles, there is only a +/- 2.0 percent variance among the planning areas (see Table 6 below).

Table 6: 2014 TEP Baseline Distribution Comparison to 50% Population/50% Lane Factor				
	PA 1	**PA 2**	**PA 3**	**PA 4**
TEP Baseline	42.5%	22.8%	19.9%	14.9%
50% Pop. – 50% Lane Miles	41.1%	22.6%	19.4%	16.9%
Variance	1.4%	0.2%	0.5%	-2.0%

This variance is slightly higher than the population only factor analysis (shown in Table 3), but there is lesser variance between PA2 and PA3. On face value, the lesser variance indicates a more equitable distribution for PA2 and PA3. However, when considering numerical lane miles by planning area, this metric may not offer a full indication of usage of roadway corridors in a particular area such as commute patterns, traffic demand, and points of destinations. PA2 and PA3 lies in the heart of Alameda County's geographic layout with the I-880 serving as a major north-south commute corridor, and the daily pass-through traffic (which is difficult to ascertain) may be higher than the lane-miles alone show in these communities.

Therefore, the 50% population and 50% lane miles factorization remains the preferred mechanism to distribute the DLDs in order to maintain population equity over the entire TEP.

2. *DLD Formula Allocations by Planning Area*

The Measure BB DLD distribution funding formula is consistent with the 2000 Measure B Transportation Expenditure Plan as it considers population and lane mile (where applicable) distributions by planning area. and then a share by jurisdiction within the planning areas. However, a notable difference between the two expenditure plans is a lesser amount of sale tax dollars is carved towards formulaic DLD programs. The 2000 Measure B set aside close to 60% of net revenues for the DLD programs, where as the 2014 TEP set aside 53.55%. The Local Streets and Roads DLD program saw a notable percentage reduction from 22.73% to 20.0%, which reduced the annual amount typically received by a jurisdiction for their local transportation programs.

Generally, this reduction is "made up" as the named capital commitments and discretionary funds are factored into the overall distributions by planning area. As previously shown the share of the TEP overall, by population share shows an even distribution of the TEP with no planning area significantly earning more than its population share.

Table 3: Baseline 2014 TEP Distribution by Planning Area Population Analysis				
	PA 1	**PA 2**	**PA 3**	**PA 4**
TEP Distribution	42.5%	22.8%	19.9%	14.9%
Population Share	40.8%	24.2%	21.6%	13.4%

3. *Other Equity Considerations*

Besides funding equity by geographic location, there are other equity considerations that Alameda CTC reviews to ensure that the Measure BB dollars and all other Alameda CTC administered funds are distributed across the planning areas.
Alameda CTC traditional programming and allocation practices considers an array of equity considerations ranging from:

1. Fund source specific, or in the totality of all Alameda CTC Administered Funds
2. Modal Equity considerations (transit, bicycle/pedestrian, highway, freight/rail)
3. Population based equity by the four planning areas
4. Lane miles and/or commute patterns such as Average Daily Traffic (ADT).
5. Population and lane miles by the four planning areas.
6. Communities of Concern within a jurisdiction/ planning area.

These equity factors are included in project selection evaluation criteria specifically, or considered overall during the final proposal of a program of projects during a CIP programming cycle. Alameda CTC will continue to consider Measure BB funding distribution to support efforts to achieve the equity established in the TEP at the time of its passage.

Conclusion/Recommendation

In consideration of the above, it is not recommended to change the TEP funding formula, methodologies to determine the equitable share, or procedures to administered the DLD, named commitments, or the discretionary funds.

The original funding distribution in the TEP established a notably closely even distribution of sales tax dollars by planning area in terms of population share.

This analysis included a consideration on comparing the distribution share against 50-% population and 50%-lane miles distribution formula, instead of just population only. The difference between the two comparisons were very minimal, and it is recommended to continue to base an overall TEP equity analysis on population alone. Alameda CTC programming process that factor in other equity considerations help achieve efforts to make the sales tax dollars equity on a geographic, land use, socio-economic, and multi-modal scale.

Additionally, to adjust the TEP to get a net zero between the various between planning areas would require an amendment to the TEP. The amendment would include a change to the DLD funding distribution percentage share and formula methodology, or the amount of named commitments to projects in particular planning areas.

The +/-1.7% variance between the TEP distribution and the planning area population share does not merit a critical need to amend the TEP to reduce the variance share between the planning areas.

ALAMEDA County Transportation Commission

Planning, Policy and Legislation Committee Meeting Agenda
Monday, September 14, 2020, 11:30 a.m.

Due to the statewide stay at home order and the Alameda County Shelter in Place Order, and pursuant to the Executive Order issued by Governor Gavin Newsom (Executive Order N-29-20), the Commission will not be convening at its Commission Room but will instead move to a remote meeting.

Members of the public wishing to submit a public comment may do so by emailing the Clerk of the Commission at vlee@alamedactc.org by 5:00 p.m. the day before the scheduled meeting. Submitted comments will be read aloud to the Commission and those listening telephonically or electronically; if the comments are more than three minutes in length the comments will be summarized. Members of the public may also make comments during the meeting by using Zoom's "Raise Hand" feature on their phone, tablet or other device during the relevant agenda item, and waiting to be recognized by the Chair. If calling into the meeting from a telephone, you can use "Star (*) 9" to raise/ lower your hand. Comments will generally be limited to three minutes in length.

Committee Chair:	Elsa Ortiz, AC Transit	Executive Director:	Tess Lengyel
Vice Chair:	Barbara Halliday, City of Hayward	Staff Liaison:	Carolyn Clevenger
Members:	Jesse Arreguin, Keith Carson, Marilyn Ezzy Ashcraft, Scott Haggerty, Rebecca Kaplan, Nick Pilch, Richard Valle	Clerk of the Commission:	Vanessa Lee
Ex-Officio:	Pauline Russo Cutter, John Bauters		

Location Information:

Virtual Meeting Information:	https://zoom.us/j/94679338490?pwd=NENwNzBvN1RLV3YxcFlFRWNxTWhyZz09 **Webinar ID: 946 7933 8490** **Password: 671619**
For Public Access Dial-in Information:	**(669) 900-6833** **Webinar ID: 946 7933 8490** **Password: 671619**

To request accommodation or assistance to participate in this meeting, please contact Vanessa Lee, the Clerk of the Commission, at least 48 hours prior to the meeting date at: vlee@alamedactc.org

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

1. **Call to Order**

2. **Roll Call**
   A roll call was conducted. All members were present.

3. **Public Comment**
   There were no public comments.

4. **Consent Calendar**
   - **4.1. Approve June 8, 2020 PPLC Meeting Minutes**
   - **4.2. Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments**

   Commissioner Pilch wanted more information on the Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments. Ms. Lengyel stated that this is part of the CMP and staff assess plans and environmental documents based on established thresholds and reviews for potential impacts related to the CMP.

   Commissioner Pilch moved to approve the Consent Calendar. Commissioner Ezzy Ashcraft seconded the motion. The motion passed with the following roll call votes:

Yes:	*Arreguin, Bauters, Carson, Cutter, Ezzy Ashcraft, Haggerty, Halliday, Kaplan, Ortiz, Pilch, Valle*
No:	*None*
Abstain:	*None*
Absent:	*None*

5. **Regular Matters**
   - **5.1. 2020 Countywide Transportation Plan: Draft Recommendations and COVID-19 Strategies**

   Carolyn Clevenger and Kristen Villanueva presented an overview of the draft 2020 Countywide Transportation Plan (CTP) recommendations, including the draft final countywide 10-year priority project list, draft final strategies, draft near-term priority actions, long-term projects, and programmatic investment types, as well as the approach to addressing COVID-19 in the CTP. Ms. Clevenger asked the committee to discuss/answer the following:
   - Are there any final comments on the core recommendations?
     - Draft final countywide 10-year priority project list
     - Draft final strategies & near-term priority actions

- Are there any comments on the approach to addressing COVID-19 in the CTP and our interim actions?

Ms. Lengyel said Alameda CTC will get public comments that will be incorporated with the comments from the Committee and staff will bring the final CTP to the Commission for approval later this fall.

Commissioner Pilch commented on equity and expressed support for the efficient use of transportation funds to make sure that transit is a viable option for everyone that needs to use it. He noted that fare box recovery is difficult during the pandemic, and he also stated that bicycle and pedestrian projects are also an efficient use of funds. He suggested not incentivizing single occupancy vehicles and noted these vehicles should not be allowed in HOV lanes at all.

Commissioner Halliday commented on BART ridership and expressed concerns that more congestion on the highways may cause less focus and investment in transit. She asked that staff monitor the trends and identify ways to support transit. She also requested that staff focus on providing outreach to groups such as rotary clubs that are already meeting remotely during this time.

Commissioner Ezzy Ashcraft highlighted equity as a cross cutting strategy to reach all communities and she suggested working with transit agencies to protect riders. She noted that for BART and AC Transit specifically, the homeless situation during the time of COVID-19 is dire and she stressed the need to connect the homeless population with services.

Commissioner Arreguin commented on the need to provide ongoing operating funds in support of existing transit operators and to address an immediate issue of keeping transit agencies in operation and maintaining core service.

Commissioner Kaplan commented on equity and stated that the agency needs to support robust transit operations to allow for social distancing.

Commissioner Ortiz asked if fares for low income residents were mentioned in the presentation. Ms. Clevenger stated that she mentioned the Metropolitan Transportation Commission (MTC) Clipper START Program will kick off the week of July 13th. Commissioner Ortiz said that AC Transit would like to participate; however, the cost and reimbursement is an issue since most of AC Transit riders are low income.

This item is for information only.

5.2. Approve Updated Plan Bay Area 2050 Project List and Performance Strategies for Alameda County for Submittal to the Metropolitan Transportation Commission
Tess Lengyel noted that Plan Bay Area 2050 is Regional Transportation Plan (RTP) that is developed by MTC/ABAG. Alameda CTC needs to submit a final list of projects to feed into the RTP by the end of July. Carolyn Clevenger stated that the final list of projects will go to the full Commission for approval in July and Alameda CTC will submit to MTC/ABAG the final list of projects along with final commitments

for projects that MTC raised concerns about. Ms. Clevenger highlighted the key issues that staff is working on with MTC.

Commissioner Cutter asked why not make the Altamont Corridor Express (ACE) train a more robust system until Valley Link is onboard. Ms. Clevenger stated that Alameda CTC will continue to advocate for ACE service increases; however, MTC raised concerns about the ACE Service Increases based on results of the equity analysis.

Commissioner Haggerty commented that ACE is working closely with Valley Link and BART and he noted that since Valley Link will run largely on a rail line that Alameda County owns, ACE will need to negotiate traffic rights with Union Pacific Railroad.

Commissioner Halliday asked if there is a timing issue if MTC puts Valley Link in the 2035 to 2050 time frame. Ms. Lengyel stated that this is the first time the RTP has had to be broken up into two separate tranches of time. The California Air Resources Board has established a greenhouse gas (GHG) per capita reduction of 19 percent by 2035, and MTC is required to break the RTP into two tranches of time to evaluate and make sure they can meet the GHG reductions for each time period. Alameda CTC is looking for written clarifications from MTC to inform the agency of the implications of having projects in the second period.

Commissioner Halliday asked if there is a time limitation of Measure BB funds to be used for Valley Link. Ms. Lengyel stated that the 2014 Transportation Expenditure Plan (TEP) has implementing guidelines and one of the guidelines is the timely use of funds. Valley Link would be required to complete its environmental clearance and secure full funding within seven years of any TEP amendment.

Commissioner Haggerty thanked Alameda CTC, MTC, and Fremont for working together on the SR-262 Widening and Interchange Improvements project. In relationship to the Valley Link, the MTC Commission requested staff to bring options to the MTC Commission to include Valley Link in the first tranche of time of the RTP at its next meeting.

Commissioner Ezzy Ashcraft requested an update on Regional Measure (RM) 3 projects/funds. Ms. Lengyel stated said that the courts cleared RM 3 funding.

5.3. Federal, state, regional, and local legislative activities update
Tess Lengyel stated that in the interest of time, staff could refrain from presenting this item. Chair Ortiz agreed not to have this item presented by staff.

This item is for information only.

6. Committee Member Reports
There were no member reports.

7. **Staff Reports**
   There were no staff reports.

8. **Adjournment/ Next Meeting**
   The next meeting is: September 14, 2020 at 11:30 a.m.

DATE:	September 4, 2020
TO:	Planning, Policy and Legislation Committee
FROM:	Saravana Suthanthira, Principal Transportation Planner Chris G. Marks, Associate Transportation Planner
SUBJECT:	Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments

Recommendation

This item updates the Commission with a summary of Alameda CTC's review and comments on Environmental Documents and General Plan Amendments. This item is for information only.

Summary

This item fulfills one of the requirements under the Land Use Analysis Program (LUAP) element of the Congestion Management Program. As part of the LUAP, Alameda CTC reviews Notices of Preparations (NOPs), General Plan Amendments (GPAs), and Environmental Impact Reports (EIRs) prepared by local jurisdictions and comments on the potential impact of proposed land development on the regional transportation system.

Since the last update on July 13, 2020, Alameda CTC has not reviewed any environmental documents.

Fiscal Impact: There is no fiscal impact. This is an information item only.

This page intentionally left blank

DATE:	September 4, 2020
TO:	Planning, Policy and Legislation Committee
FROM:	Carolyn Clevenger, Deputy Executive Director of Planning and Policy Krystle Pasco, Associate Program Analyst
SUBJECT:	Approve issuance of a Request for Proposals for Paratransit Coordination Services

Recommendation

It is recommended that the Commission approve the issuance of a request for proposals (RFP) for Professional Services to provide Paratransit Coordination Services.

Summary

The Alameda County Transportation Commission (Alameda CTC) contracts on a periodic basis with a number of professional services consultant firms to assist staff in providing a range of types of general administration services, including, but not limited to, general counsel, media and public relations, outreach, technical assistance, and project and program management. The Paratransit Program similarly relies on professional services consultant firms to carry out the various programmatic activities noted in the 2000 Measure B and 2014 Measure BB Transportation Expenditure Plans (TEPs) for funding related to transportation for seniors and people with disabilities. The current Paratransit Coordination Services contract is due to expire at the end of fiscal year (FY) 2020-21; therefore, a release of an RFP in fall 2020 is necessary to ensure the uninterrupted continuation of professional services support for the paratransit program into FY 2021-22 and beyond.

Background

Alameda CTC has a robust and multi-faceted Transportation for Seniors and People with Disabilities (Paratransit) Program that funds and manages a range of services. The 2000 Measure B Transportation Expenditure Plan allocates 10.45 percent of net revenues and the 2014 Measure BB TEP allocates 10 percent of net revenues to the Paratransit Program. Approximately 9 percent of net revenues from each TEP is distributed to agencies on a monthly basis as Direct Local Distribution (DLD) funding for ADA-mandated services and City paratransit programs. The remaining funding is distributed as grants on a discretionary basis as part of the agency's Capital Improvement Program (CIP). As set forth in the expenditure plans, the Paratransit Advisory and Planning Committee (PAPCO), a 23-member committee of seniors and people with disabilities, is responsible for providing recommendations to the

Commission related to all funding for transportation for seniors and people with disabilities. The Paratransit Technical Advisory Committee (ParaTAC), comprised of City and transit operator staff, mostly program sponsors who receive funds, also provides input to Alameda CTC staff related to management of direct ADA-mandated services and City paratransit programs. Alameda CTC staff strategically collaborates and coordinates with PAPCO and ParaTAC with the support of the professional services consultant to deliver the full breadth of the paratransit program.

Professional Services Contract

Alameda CTC intends to retain a professional services consultant or consultant team with expertise in the management and oversight of transportation services and programs targeted towards seniors and people with disabilities, including: public meeting facilitation and coordination; administration and coordination of local, regional, state and federal grant funding; outreach and information services; coordination with partner agencies; development and management of countywide initiatives; and technical assistance.

Under the direction of and in close coordination with Alameda CTC staff, this consultant team, known as the Paratransit Coordination Team (Team), is responsible for a range of activities. The Team coordinates, monitors, conducts reporting activities, researches, and advises Alameda CTC on funding programs for seniors and people with disabilities, including Measure B and Measure BB Paratransit Program funding, and any other local, regional, state and federal funds or funding programs, including the Federal 5310 program. The Team is also responsible for facilitating, providing materials for and documenting Paratransit Program meetings (i.e., plans, coordinates, documents, and staffs PAPCO and ParaTAC meetings), as well as meetings with other organizations, as necessary. The Team is also responsible for performing technical studies, conducting research on best practices, and other technical assistance to support implementation of the Paratransit Program.

Fiscal Impact: The Paratransit Coordination Services contract will be negotiated and the final budget will be included in Alameda CTC's annual proposed budget for Commission approval.

DATE:	September 4, 2020
TO:	Planning, Policy and Legislation Committee
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Federal, state, regional, and local legislative activities update

Recommendation

This item is to provide the Commission with an update on federal, state, regional, and local legislative activities.

Summary

The September 2020 legislative update provides information on federal and state legislative activities. Given the dynamic nature of the state and federal government's responses to the COVID-19 pandemic and the timing of the end of the legislative session in Sacramento, additional updates will be provided at the Commission meeting.

Background

The Commission approved the 2020 Legislative Program in January 2020. The purpose of the legislative program is to establish funding, regulatory, and administrative principles to guide Alameda CTC's legislative advocacy.

Each month, staff brings updates to the Commission on legislative issues related to the adopted legislative program, including recommended positions on bills as well as legislative and policy updates. Attachment A is is the Alameda CTC adopted legislative platform.

State Update

The State legislature convened for a shortened session in August. Staff is currently reviewing final actions on bills and will provide an update by the Commission meeting.

Federal Update

There has been no progress on additional COVID-19 stimulus legislation or a new reauthorization of the surface transportation program. The House, Senate and White House are at an impasse and continuing resolutions for the surface transportation bill appear likely through the November elections. Staff continues to monitor potential infrastructure-related stimulus efforts but no significant action is anticipated. Any updates will be provided at the September meetings.

Fiscal Impact: There is no fiscal impact. This is an information item only.

A. Alameda CTC 2020 Legislative Program

2020 Alameda County Transportation Commission Legislative Program

The legislative program herein supports Alameda CTC's transportation vision below adopted for the 2020 Countywide Transportation Plan:

1111 Broadway, Suite 800, Oakland, CA 94607
510.208.7400
www.AlamedaCTC.org

"Alameda County residents, businesses and visitors will be served by a premier transportation system that supports a vibrant and livable Alameda County through a connected and integrated multimodal transportation system promoting sustainability, access, transit operations, public health and economic opportunities. Our vision recognizes the need to maintain and operate our existing transportation infrastructure and services while developing new investments that are targeted, effective, financially sound and supported by appropriate land uses. Mobility in Alameda County will be guided by transparent decision-making and measurable performance indicators. Our transportation system will be:

- ***Accessible, Affordable and Equitable*** *– Improve and expand connected multimodal choices that are available for people of all abilities, affordable to all income levels and equitable.*
- ***Safe, Healthy and Sustainable*** *– Create safe facilities to walk, bike and access public transportation to promote healthy outcomes and support strategies that reduce adverse impacts of pollutants and greenhouse gas emissions by reducing reliance on single-occupant vehicles.*
- ***High Quality and Modern Infrastructure*** *– Upgrade infrastructure such that the system is of a high quality, is well-maintained, resilient and maximizes the benefits of new technologies for the public.*
- ***Economic Vitality*** *– Support the growth of Alameda County's economy and vibrancy of local communities through an integrated, reliable, efficient, cost-effective and high-capacity transportation system."*

Issue	Priority	Strategy Concepts
Transportation Funding	Increase transportation funding	• Oppose efforts to repeal transportation revenues streams enacted through SB1. • Support efforts that protect against transportation funding diversions. • Support efforts to lower the two-thirds voter threshold for voter-approved transportation measures. • Support the implementation of more stable and equitable long-term funding sources for transportation. • Ensure fair share of sales tax allocations from new laws and regulations • Seek, acquire, accept and implement grants to advance project and program delivery.
	Protect and enhance voter-approved funding	• Support legislation and increased funding from new and/or flexible funding sources to Alameda County for operating, maintaining, restoring, and improving transportation infrastructure and operations. • Support increases in federal, state, and regional funding to expedite delivery of Alameda CTC projects and programs, including funding to expand the Affordable Student Transit Pass program. • Support efforts that give priority funding to voter-approved measures and oppose those that negatively affect the ability to implement voter-approved measures. • Support efforts that streamline financing and delivery of transportation projects and programs. • Support rewarding Self-Help Counties and states that provide significant transportation funding into transportation systems. • Support statewide principles for federal surface transportation reauthorization and/or infrastructure bills that expand funding and delivery opportunities for Alameda County.
Project Delivery and Operations	Advance innovative project delivery	• Support environmental streamlining and expedited project delivery, including contracting flexibility and innovative project delivery methods.
	Ensure cost-effective project delivery	• Support efforts that reduce project and program implementation costs. • Support funding and policies to implement transportation projects that create jobs and economic growth, including for apprenticeships and workforce training programs.
	Protect the efficiency of managed lanes	• Support HOV/managed lane policies that protect toll operators' management of lane operations and performance, toll rate setting and toll revenue reinvestments, deployment of new technologies and improved enforcement. • Support high-occupancy vehicle (HOV)/express lane expansion in Alameda County and the Bay Area, and efforts that promote effective and efficient lane implementation and operations. • Oppose legislation that degrades HOV lanes that could lead to congestion and decreased efficiency.
	Reduce barriers to the implementation of transportation and land use investments	• Support legislation that increases flexibility and reduces barriers for infrastructure improvements that support the linkage between transportation, housing and jobs.

Issue	Priority	Strategy Concepts
Multimodal Transportation, Land Use and Safety		• Support local flexibility and decision-making regarding land-uses for transit oriented development (TOD) and priority development areas (PDAs). • Support funding opportunities for TOD and PDA implementation, including transportation corridor investments that link PDAs.
	Expand multimodal systems, shared mobility and safety	• Support policies that provide increased flexibility for transportation service delivery through programs that address the needs of commuters, youth, seniors, people with disabilities and low-incomes, and do not create unfunded mandates. • Support policies that enable shared mobility innovations while protecting the public interest, including allowing shared and detailed data (such as data from transportation network companies and app based carpooling companies) that could be used for transportation and land use planning and operational purposes. • Support investments in active transportation, including for improved safety and Vision Zero strategies. • Support investments in transportation for transit-dependent communities that provide enhanced access to goods, services, jobs and education; and address parking placard abuse. • Support parity in pre-tax fringe benefits for public transit, carpooling, and vanpooling and other modes with parking. • Support legislation to modernize the Congestion Management Program, supporting the linkage between transportation, housing, and multi-modal performance monitoring. • Support efforts to increase transit priority throughout the transportation system, such as on freeway corridors and bridges serving the county.
Climate Change and Technology	Support climate change legislation and technologies to reduce greenhouse gas (GHG) emissions	• Support funding for infrastructure, operations, and programs to relieve congestion, improve air quality, reduce emissions, expand resiliency and support economic development, including transitioning to zero emissions transit fleets and trucks. • Support rewarding Self-Help Counties with cap-and-trade funds for projects and programs that are partially locally funded and reduce GHG emissions. • Support emerging technologies such as alternative fuels and fueling technology to reduce GHG emissions. • Support legislation and policies to facilitate deployment of connected and autonomous vehicles in Alameda County, including data sharing that will enable long-term planning. • Support the expansion of zero emissions vehicle charging stations. • Support efforts that ensure Alameda County jurisdictions are eligible for state funding related to the definition of disadvantaged communities used in state screening tools.
Rail Improvements	Expand goods movement and passenger rail funding and policy development	• Support a multimodal goods movement system and passenger rail services that enhance the economy, local communities, and the environment. • Support policies that enhance Bay Area goods movement and passenger rail planning, funding, delivery and advocacy. • Support legislation and efforts that improve the efficiency and connectivity of the goods movement system, including passenger rail connectivity. • Ensure that Alameda County goods movement needs and passenger rail needs are included in and prioritized in regional, state and federal goods movement planning and funding processes. • Support rewarding Self-Help Counties that directly fund goods movement and passenger rail infrastructure and programs. • Leverage local funds to the maximum extent possible to implement goods movement and passenger rail investments in Alameda County through grants and partnerships with regional, state and federal agencies.
Partnerships	Expand partnerships at the local, regional, state and federal levels	• Support efforts that encourage regional and mega-regional cooperation and coordination to develop, promote, and fund solutions to regional and interregional transportation problems and support governmental efficiencies and cost savings. • Partner to increase transportation funding for Alameda CTC's multiple projects and programs and to support local jobs.

Issue	Priority	Strategy Concepts
		• Support efforts to maintain and expand local-, women-, minority- and small-business participation in competing for contracts.

DATE:	September 4, 2020
TO:	Planning, Policy and Legislation Committee
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. The Commission Plan Amendment Resolution recommended for approval is included as Attachment B and the proposed 2014 Measure BB Expenditure Plan redline markups and technical amendments are detailed in Attachment C. This is an action item and requires majority approval at the Planning, Policy and Legislation Committee (PPLC) and 2/3 of the Authorized vote for approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created by the State Legislature in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in

July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link. The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link.

The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. The Commission approved initiation of the comment period on May 28, 2020. Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission of a 45-day comment period regarding the proposed amendment, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy through the US Postal Service on May 29, 2020. The comment period ended on July 13, 2020. Comments received by August 28, 2020 are included in the summary matrix of comments and responses included as Attachment D; full text of the comment letters are included in Attachment E. Any comments received thereafter and up to 5pm on September 11, 2020 will be included in a handout provided to the Commission and posted on the Alameda CTC website the day of the PPLC meeting.

Staff will present a summary of the comments received during the comment period to PPLC for its consideration. PPLC must approve by a majority vote to advance the item to the full Commission for final action on the proposed TEP amendment. A 2/3 Authorized vote by the Commission is needed to amend the TEP, per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Comments Received

Per the TEP Implementing Guidelines, the comment period for a TEP Amendment is a comment period for jurisdictions in Alameda County. Comments received by the public and advocacy organizations are also included for the Commission's consideration. All

comments received are included as Attachment E. The information below summarizes key themes and comments received; a complete documentation of comments and responses are included in Attachment D.

Table 1. Summary of Support or Opposition to TEP Amendment

Agency	**Support**	**Oppose**	**Questions/ concerns**

Key Themes from Comments

Support

Comments expressing support for the TEP Amendment focused on project benefits and the need for rail in the Tri-Valley. The three cities in the Tri-Valley, along with the Board of Supervisors, Union City, the BART Board representative, LAVTA and the San Joaquin Regional Rail Commission all submitted strong letters of support. In addition, chambers of commerce/business groups and labor expressed support for the TEP Amendment and the

Valley Link project. Full documentation of comments and responses are included in Attachments D and E; key benefits noted by commenters include:

- fulfills a commitment made to the Tri-Valley to advance rail connectivity to Livermore
- assures Tri-Valley residents will benefit from the taxes they have paid
- reduction of over 99.4 million Vehicle Miles Traveled
- reduction of over 33,000 metric tons of greenhouse gas emissions per year
- supports advancement of transit-oriented development
- protects open space
- supports businesses in the Tri-Valley by providing easy and convenient access
- provides an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues

Oppose/Concerns Raised

Comments in opposition of the TEP Amendment included a number of key themes that were repeated across multiple commenters, summarized below. Full documentation of comments and responses are included in Attachments D and E.

- Timing of Amendment and impacts of COVID-19: Commenters raised concerns that the TEP Amendment is being rushed. Commenters stated that there is no valid reason to amend the TEP at this point in time, and that the amendment should be delayed until the project's Environmental Impact Report (EIR) is available and the impacts of the COVID-19 pandemic on sales tax revenues and transit ridership are better understood.

  Response:
  - Overall timeframe: The TVSJVRRA submitted a request for the TEP Amendment in September 2019. Since that time, Alameda CTC staff has worked with TVSJVRRA staff as well as partner agencies to better understand the project, including detailed discussions regarding potential impacts on the I-580 Express Lanes and the potential funding plan. The ability to leverage local sales tax dollars to secure competitive regional, state and federal funds is a key principle of local sales taxes. By being able to show a commitment of local funding, the project will be more competitive for regional, state and federal funding.

  - EIR: As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal requirements. The TEP does not require that projects must complete an environmental document before being in the plan, nor does it require that full funding is required before being in the plan. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects.

Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters. The Draft EIR is anticipated to be released in fall 2020.

- COVID-19: The long-term travel impacts of COVID are unknown at this time. It is unclear when the region and country will start to have a better understanding of mid- and long-term impacts of the COVID-19 pandemic on travel patterns, and transit in particular. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early (first 10) years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan.

  Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues. Sales tax revenues are received from the California Department of Tax and Fee Administration (CDTFA) two months in arrears, and staff has been updating the Commission as data becomes available.

  Alameda CTC has not developed a 5-year sales tax revenue projection at this point given the large uncertainties regarding the depth and breadth of the recession and the lack of sales tax receipt data received to date. Revenue projections for FY2020-21 were included in the agency budget that was adopted in May 2020. The budget for sales tax revenues for FY2020-21 will be updated if and when appropriate based on data received from the CDTFA.

- Inadequate public noticing: Commenters raised concerns that the proposed TEP Amendment was not noticed to the public or posted on the Alameda CTC website. Requests were made for more time for the comment period, and for all comments to be posted by the end of July.

  Response: The comment period, per the TEP Implementing Guidelines for a proposed TEP Amendment, is a comment period for jurisdictions. As noted above, following the Commission's May 28, 2020 approval to initiate the comment period, Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy through the US Postal Service on May 29, 2020. Per the direction of the Commission at its May meeting, staff were directed to include the full set of comments received in the PPLC materials and distribute those in advance of the meeting per standard Commission processes.

- Insufficient alternatives analysis and interest in other transit investments in the corridor: Commenters stated that there had been insufficient analysis of alternatives, with specific focus on further analysis of a bus alternative in order to determine if there are better, more efficient uses of the funding. In addition, BART and other commenters raised concerns regarding ensuring full understanding of and eligibility for BART core system impacts as part of the project and potential uses of the $400 million. A few commenters specifically referenced TEP Implementing Guideline #22 as a reason other projects could be eligible for the funding.

  Response: Extensive alternatives analysis has been completed in the 580 corridor as part of previous BART studies and environmental impact reports. BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included and Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. Details of the alternatives can be found here. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled.

  In developing the Valley Link Feasibility Report, and continuing in the EIR, the TVSJVRRA is evaluating alternatives, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The Feasibility Report included analysis of express bus alternative that included operating as bus on shoulder to provide a more time-competitive service, and focused on a limited set of stations mirroring the proposed rail service. The Feasibility Report found, consistent with the BART findings, that while express bus alternatives could be delivered at a fraction of the cost, the potential ridership benefits and greenhouse gas emission reductions were significantly higher for the rail alternative. An additional evaluation of alternatives will be released as part of the Valley Link Draft EIR.

  The TEP #22 Guideline notes, "Fund Allocations: Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be reallocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC." The Valley Link project is a Transit project as is the

BART to Livermore Project and it is at the Commission's discretion to act on a plan amendment to use these funds for transit purposes.

Based on current ridership forecasts developed by the TVSJVRRA, it appears that there may be some degree of impact to the BART core system in the 2040 horizon. The TVSJVRRA has proposed to enter into an MOU with BART to address these future potential impacts. BART and the TVSJVRRA continue to work closely to fully identify and understand all potential impacts and benefits. Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project.

- Benefits to San Joaquin County and not Alameda County: A number of commenters raised concerns that Alameda County residents would not benefit from the project, but instead the project will primarily benefit San Joaquin County residents. In addition, concerns were raised that San Joaquin County has not committed funding to the project.

  Response: As required by the TEP, expenditures from Measure BB will only be spent on transportation improvements in Alameda County. The project as defined will benefit Alameda County residents and businesses as well as San Joaquin County. The Bay Area is part of an integrated mega-region, with people and goods regularly moving between the Bay Area, Central Valley, and Sacramento region. Providing a high-quality transit alternative over the heavily-traveled Altamont Pass will support both the Central Valley and Bay Area. Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop.

  - 10,137 daily boardings in the Tri-Valley in 2040
  - 32,993 daily boardings in the full corridor
  - Annual reduction of between 33,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration
  - Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040
  - Approximately 57% of the project track mileage is in Alameda County
  - Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative.

  Regarding funding, the proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment.

  The TVSJVRRA is working closely with cities in San Joaquin County, the San Joaquin Council of Governments (SJCOG), and the state to secure additional funding for the project. Thus far, the City of Tracy is anticipated to act in September 2020 to

donate a key 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including showing $163.9 million for the project in the plan from future measures and state funds, and SJCOG also contributed funding for the environmental document.

- Questions regarding how an initial operating segment would be determined: There were questions requesting more detail on how an initial operating (IOS) segment would be determined, given the proposed amendment language.

  Response: The Valley Link Feasibility Report identified two major phases of the project: Phase 1 from Dublin-Pleasanton to North Lathrop; and Phase 2 from North Lathrop to Stockton. Within Phase 1, the project could be delivered in phases, including an initial operating segment that would terminate before North Lathrop. As part of the analysis currently underway, the TVSJVRRA Board will consider potential IOSs in order to more quickly deliver service in the corridor. Options under consideration include service from Dublin-Pleasanton to Greenville, or from Dublin-Pleasanton to Mountain House. In addition, the TVSJVRRA is considering a Southfront Station in Livermore. Estimated ridership, emissions reduction and costs for two IOS under consideration are summarized in Table 2.

  Table 2. Potential Initial Operating Segments

Potential IOS	2025 Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

  * Range based on various technologies under consideration.
  **Costs do not include O&M facilities ($198.67 million) or vehicles ($508.82 million)
  ***Includes Southfront station

- Potential project impacts related to sprawl and interregional commutes: Commenters stated that the project will increase sprawl and further the distances between where people live and work. It was noted that this would violate the "inter-regional commuting" policy of Senate Bill 375 (SB 375) and Plan Bay Area.

  Response: SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations (MPOs) in the state of California. As it relates to this project, the two MPOs are the Metropolitan Transportation Commission (MTC) and the San Joaquin Council of

Governments (SJCOG). The MTC Commission recently voted to include Valley Link in Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region. SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project. MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.

The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:

- Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
- Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was submitted to MTC/ABAG earlier this year and approved in February 2020.

- Measure BB equity considerations: Commenters stated that the amendment would require the entire TEP to need to be reopened because it would dramatically change the distribution of benefits across the county. That would therefore require the basic allocation formula for local streets and roads to need to be reconsidered.

  Response: When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County. The $400 million was identified in the TEP for a rail extension in the Tri-Valley. The proposed amendment does not change the geographic distribution of the benefits of the overall TEP.

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend

the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.
- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties. The proposed Phase 1 project will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the North Lathrop ACE intermodal station. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

The TVSJVRRA has been updating the project costs as part of project development. The most current project cost estimates range from $2.81 billion to $3.18 billion in mid-point year of expenditure dollars for the Phase 1 project from Dublin-Pleasanton to North Lathrop. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $708 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds), $40 million in impact fees from the City of Livermore, $40 million from the Tri-Valley Transportation Council, and $40 million from the City of Tracy property contribution. The project is expected to compete for regional, state and federal funds to secure additional funding. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC, the California State Transportation Agency, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans. In June 2020, MTC allocated an additional $46.8 million to advance the project's environmental and design phases.

- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property was recently appraised and has an estimated value of $40 million.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

BART to Livermore ($400 M)

This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section "Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C. Blue denotes new language added; red denotes language removed.

~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a ~~BART~~ Valley Link Rail Extension from the existing Dublin/Pleasanton BART Station within the Tri-Valley and Altamont Pass in Alameda County ~~I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically,

for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

Alameda County Supervisor Scott Haggerty, Chair

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Tri-Valley ▲ San Joaquin Valley
REGIONAL RAIL AUTHORITY

~~BART to Livermore~~ Valley Link to Livermore ($400 M)
The project funds Valley Link ~~the first phase of a BART to extension~~ within the I-580 Corridor freeway alignment from the Dublin/Pleasanton BART station to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction of or any element of this ~~first phase~~ project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

In accordance with the Alameda County 2014 Transportation Expenditure Plan Implementing Guidelines, the Tri-Valley – San Joaquin Valley Regional Rail Authority understands and can fully comply with the requirements of recipients of Measure BB funds, including, but not limited to, annual audits and compliance reporting, the establishment of separate accounting funds for Measure BB funds, independent Watchdog reviews, performance measures, environmental clearance timelines, timely use of funds, contracting requirements, public reviews and approvals.

Thank you for your consideration,

Alameda County Supervisor Scott Haggerty, Chair

ALAMEDA COUNTY TRANSPORTATION COMMISSION
Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the TVSJVRRA has been updating the project costs as part of project development. The most current project cost estimates range from $2.81 billion to $3.18 billion in mid-point year of expenditure dollars for the Phase 1 project from Dublin-Pleasanton to North Lathrop. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $708 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds), $40 million in impact fees from the City of Livermore, $40 million from the Tri-Valley Transportation Council, and $40 million from the City of Tracy property contribution. The project is expected to compete for regional, state and federal funds to secure additional funding. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans. In June 2020, MTC allocated an additional $46.8 million to advance the project's environmental and design phases.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds, and SJCOG also contributed funding for the environmental document. In addition, the City of Tracy is

anticipated to act in September 2020 to donate a 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail project from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

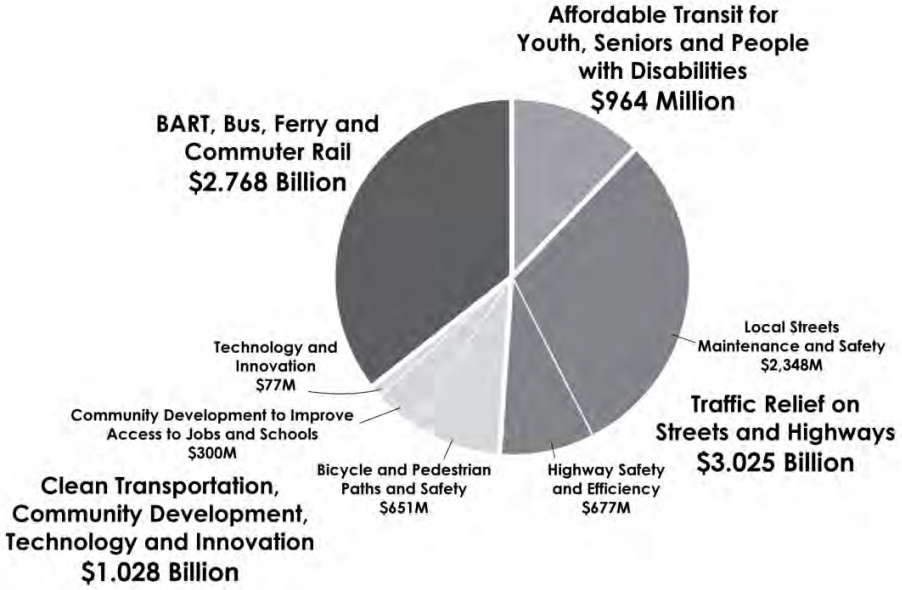
A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, September 24, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____



Pauline Russo Cutter, Vanessa Lee,

Chair, Alameda CTC Clerk of the Commission

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548

		Subtotal	**$35.0**	
	BART System Modernization and Expansion	Irvington BART Station	$120.0	
		Bay Fair Connector/BART METRO	$100.0	
		BART Station Modernization and Capacity Program	$90.0	
		~~BART to Livermore~~	~~$400.0~~	
		Subtotal	**$~~710.0~~310.0**	
	Major Transit Corridor Enhancements and Rail Connections	Dumbarton Corridor Area Transportation Improvements	$120.0	
		Union City Intermodal Station	$75.0	
		Railroad Corridor Right of Way Preservation and Track Improvements	$110.0	
		Oakland Broadway Corridor Transit	$10.0	
		Capitol Corridor Service Expansion	$40.0	
		Valley Link	$400.0	
		Subtotal	**$~~355.0~~755.0**	
	TOTAL		**$3,731.64**	**48%**

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2679

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

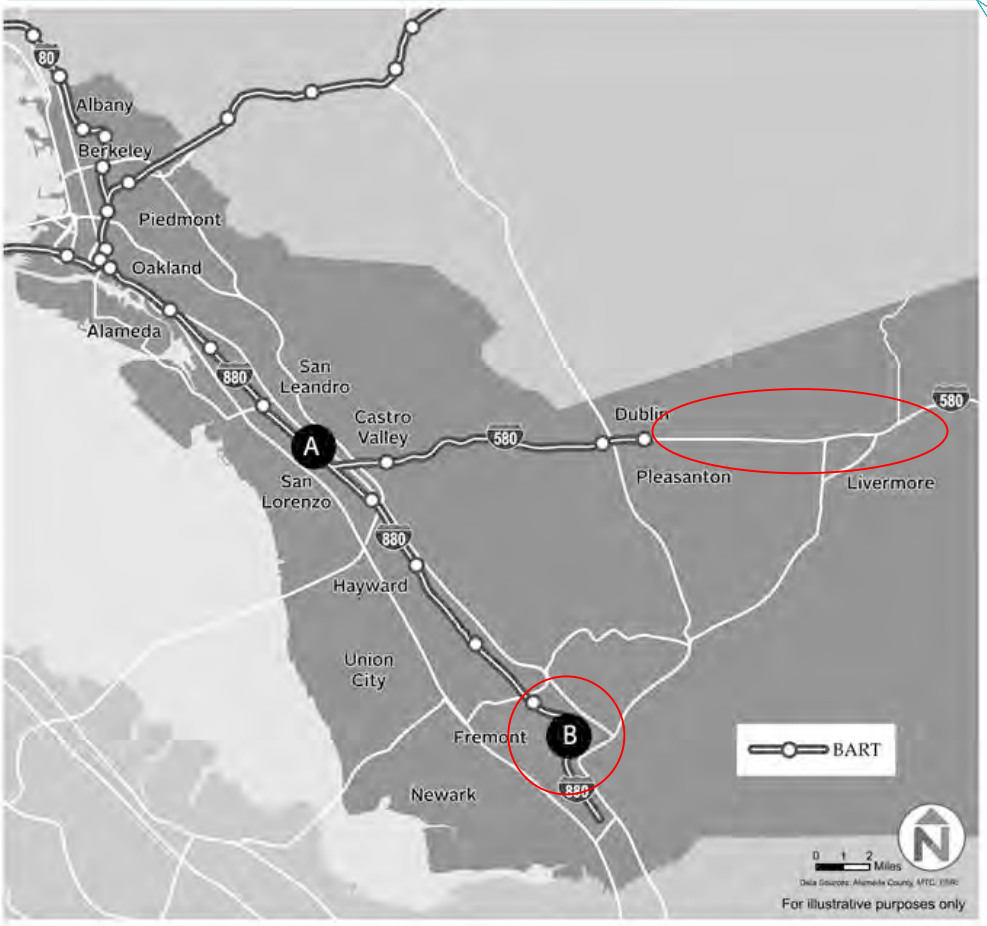
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

BART INVESTMENTS

A Bay Fair Connector / BART METRO

B Irvington BART Station

Not Shown:

- BART Station Modernization and Capacity Improvements
- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

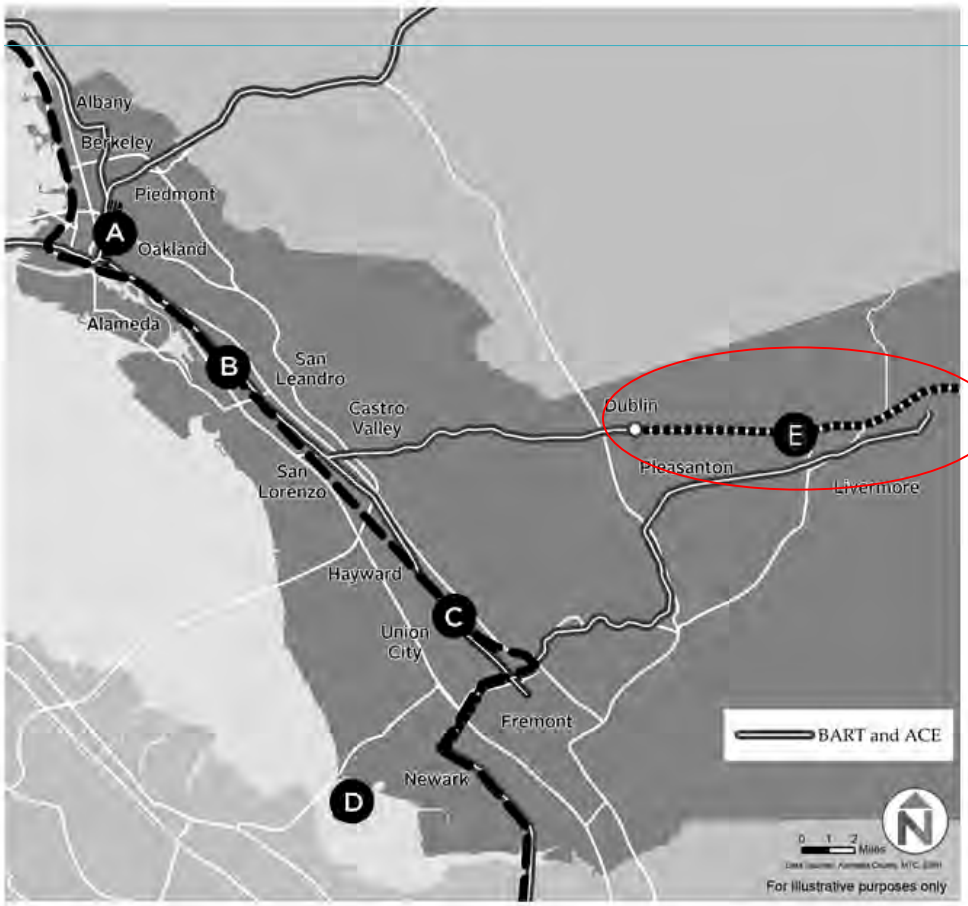
This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.



Oakland Broadway Corridor Transit ($10 M)

This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

TEP Amendment Comment Letters

Jurisdiction Comments

Agency	Date	Comments	Response
AC Transit General Manager	July 9, 2020	1. AC Transit's Board of Directors has not had the opportunity to provide official comment and position on the proposed amendment; this letter reflects the comments of AC Transit staff.	Noted.

ACTC_AR2685

		2. The Valley Link Rail project appears to have a primary purpose of transporting residents from San Joaquin County to Alameda County, with an ultimate destination in Santa Clara County, similar to existing ACE Train service. Alameda County taxpayers would not directly benefit as much as San Joaquin County residents, especially if there are no committed funds from San Joaquin County.	Expenditures from Measure BB will only be spent on transportation improvements in Alameda County. No expenditures may be made outside of Alameda County. Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop. o 10,137 Tri-Valley daily boardings in 2040 o 32,993 total daily boardings in 2040 o Annual reduction of 38,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration o Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040 o Approximately 57% of the project track mileage is in Alameda County o Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative. Valley Link will provide fast and frequent rail service to BART, operating 25 daily roundtrips a day with a focus on serving the Oakland and San Francisco commute. ACE currently operates 4 daily roundtrips with a focus on primarily serving Santa Clara County commuters. Expansion of ACE service is constrained due to operations on Union Pacific tracks in mixed freight.

		3. There are many transportation projects that could improve travel and commute for Eastern Alameda County and would have a better cost-benefit ratio than the Valley Link Rail project and thus, a better and more efficient use of funds. Possible projects such as express bus service and bus rapid transit would fall into this category. Implementing Guideline #22 – "Fund Allocations" under the TEP would allow for such projects to be funded with the allocation.	BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included an Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. Details of the alternatives can be found here. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. In considering the Project EIR in 2018, the BART Board could not reach consensus on which transit alternative to adopt as a preferred alternative. The BART Board acted to not advance an alternative. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled. The Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) was created by the State Legislature in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and

Agency	Date	Comments	Response
			San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. When the BART Board directed the General Manager to not advance an alternative, it effectively passed over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link. The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TVSJVRRA is currently evaluating alternatives as part of the Valley Link EIR, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The 2014 Transportation Expenditure Plan (TEP) #22 Guideline notes, “Fund Allocations: Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be reallocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.” The Valley Link project is a Transit project as is the BART to Livermore Project and it is at the Commission’s discretion to act on a plan amendment to use these funds for transit purposes.

Agency	Date	Comments	Response
		4. Given the current financial climate and the uncertainty that lies ahead, it is within reason for ACTC to also consider reallocating the $400 million to any number of under-funded capital projects throughout the county, including transit projects within the AC Transit service area.	The funds that were programmed to BART to Livermore must be used on Transit and the Commission programming actions are subject to geographic equity by planning area. Reprogramming $400M to other parts of Alameda County, rather than exclusively towards improvements built in East County, will impact the original TEP geographic funding distribution by planning area.
Alameda County Board of Supervisors	June 10, 2020	5. Expressed support for the amendment; will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and assure that our residents will finally benefit from the taxes they have paid.	Support noted.
		6. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space	Benefits noted.
BART General Manager	July 13, 2020 and May 27, 2020	7. Expressed support, with recommendations, of the TEP amendment.	Support noted.
		8. Staff believes this action is consistent with intent of Alameda County voters to invest in transit in the I-580 Corridor. It is important that the $400 M sales tax investment does accrue to Alameda County residents and businesses.	Noted.

Agency	Date	Comments	Response
		9. BART recommends that the amendment to the TEP clearly indicate that required improvements to the BART system in Alameda County resulting from the impacts of the Valley Link Rail project are priority components of the Phase 1 Valley Link Rail project. - Base Project: Impacts to the BART system including additional rail cars and the reconfiguration of the Dublin/Pleasanton station - Core Improvements: improvements to destination stations of Valley Link patrons - I-580 Corridor Faregate Modernization: modernize faregates for all stations in the I-580 Corridor (Castro Valley, West Dublin/Pleasanton, and Dublin/Pleasanton stations)	Valley Link and BART are working together closely to identify potential future impacts and benefits to the BART system, including both capital and operating impacts. Over the course of project development, it is anticipated that the benefits and impacts will be better defined. Based on current ridership forecasts, it appears that there may be some degree of impact to the BART core system in the 2040 horizon. The TVSJVRRA has proposed to enter into an MOU with BART to detail a process to identify and address these future potential impacts. Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project.
BART Director McPartland	May 27, 2020	10. Expressed support for the project approval of TEP amendment.	Support noted.
		11. Noted key benefits of project: to fulfil commitment made to Tri-Valley and reduce traffic on 580/680 corridor and VMT.	Benefits noted.
City of Dublin	May 25, 2020 and July 10, 2020	12. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure that residents will finally benefit from the taxes paid.	Support noted.

ACTC-AR2690

Agency	Date	Comments	Response
		13. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - connects Northern California Megaregion's workforce to affordable housing - will provide an estimated 22,000 jobs during construction and went operational support 400 jobs per year	Benefits noted.
City of Livermore	July 10, 2020 and May 28, 2020	14. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure that our residents will finally benefit from the taxes paid.	Support noted.
		15. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space - connects Northern California Megaregion's workforce to affordable housing - will provide an estimated 22,000 jobs during construction and went operational support 400 jobs per year	Benefits noted.

ACTC-AR2691

Agency	Date	Comments	Response
City of Pleasanton	May 26, 2020 and June 26, 2020	16. Expressed support for the amendment. The Valley Link Project will complete the regional rail concept initially envisioned for the Tri-Valley decades ago and meets the vision and goals of Measure BB by expanding regional rail, providing traffic relief, improving air quality by providing clean transportation.	Support noted.
		17. Noted key benefits of the project: - reduction of greenhouse gas emissions - included renewable energy sources and sustainable construction practices - supports transit-oriented development - protects open space	Benefits noted.
City of Union City	July 21, 2020	18. Expressed support for the amendment request.	Support noted.
		19. Noted benefits of the project: - mega-regional cooperation - provides connectivity to other transit providers - provides service between housing and job centers - facilitates the movement of goods - provides a transit alternative to reduce greenhouse gas emissions - supports transit-oriented development	Benefits noted.
LAVTA	May 25, 2020	20. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure residents will finally benefit from the taxes paid.	Support noted.

Agency	Date	Comments	Response
		21. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space	Benefits noted.
San Joaquin Regional Rail Commission	July 2, 2020	22. Expressed support for the amendment request.	Support noted.
		23. Noted key benefits of the project: - fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore - supports an intermodal connection between ACE and the BART system and the advancement of the Altamont Corridor Vision. - will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor - estimated 28,000 are projected to ride the Valley Link system in 2040 - reduction of over 99.4 million Vehicle Miles Traveled (VMT) - reduction of over 33,000 metric tons of greenhouse gas emissions per year	Benefits noted.

Public Comments

Organization/Individual	Date	Comments	Response
Bay Area Council	May 27, 2020	24. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure residents will finally benefit from the taxes paid.	Support noted.
		25. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports advancement of transit-oriented development - protects open space	Benefits noted.
Alameda County Taxpayers Association	May 22, 2020	26. Expressed opposition to transferring funds to Valley Link at this time.	Opposition noted.
		27. Encourages narrow reading of TEP as to intention of voters and sees need for full alternatives analysis completed including consideration of express bus. States that ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.	See response to Comment 3.

Organization/Individual	Date	Comments	Response
		28. Troubled by transferring funds before San Joaquin contribution is secured.	The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment. The TVSJVRRA is working closely with cities in San Joaquin County, SJCOG, and the state to secure additional funding for the project. Thus far, the City of Tracy has committed to donation of a key 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
Bay Area Transportation Working Group	May 11, 2020 and May 23, 2020	29. Expressed opposition to the project and amendment.	Opposition noted.

ACTC-AR2695

Organization/Individual	Date	Comments	Response
		30. A full unbiased feasibility study must be done, including assessment of projected ridership, cost-effectiveness, and funding opportunities of Valley Link and other transportation options for the corridor. Stated that the BART staff recommended a significantly upgraded bus option to its Board in 2017 that would better serve the transportation needs to Pleasanton and Livermore. Stated that the Bay Area Transportation Working Group conducted an extensive investigation of a bus alternative and concluded that in terms of improving the access of the people of Livermore to BART, well-appointed buses operating in bus-only lanes would be a far cheaper and better option.	See response to Comment 3. The BART staff did not recommend an alternative to the BART Board when considering the adoption of the Final BART to Livermore Environmental Impact Report on May 24, 2018.
		31. Valley Link primarily benefits non-Alameda County residents.	See response to Comment 2.

Organization/Individual	Date	Comments	Response
		32. Changes brought about by COVID must be considered.	The long-term travel and commute impacts of COVID are unknown at this time. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan.
Bike East Bay	May 11, 2020	33. Bike East Bay supports transit but has questions and concerns regarding the project.	Support with concerns noted.
		34. Concerned there was not sufficient public outreach in Livermore to generate support for the project. Where are the residents of Livermore on the project?	To-date there has been extensive public outreach in Livermore, first as part of the BART to Livermore project and subsequently when the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJRRA) developed the Project Feasibility Report. The TVSJVRAA documented outreach it conducted in Appendix B of the Project Feasibility Report. The City of Livermore also conducted significant outreach as part of the Isabel Neighborhood Specific Plan, which is closely tied to rail service in Livermore. Livermore also recently advanced an application to form a new Priority Development Area (PDA) by the proposed site for a future station, the Southfront Station PDA, which was approved by ABAG in February 2020.
		35. Hour headways off-peak is not high-quality transit. What can be done to convert this to good transit?	As the project development has advanced, the planning service frequencies have been updated. The TVSJRRA is currently planning for 12-minute frequencies in the weekday peak, 24-minute frequencies in the off-peak, and 36-minute frequencies on weekends and holidays by 2040.

Organization/Individual	Date	Comments	Response
		36. Requested information regarding the potential impacts of the current financial crisis on the project.	Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues. Sales tax revenues are received from the California Department of Tax and Fee Administration (CDTFA) two months in arrears, and staff has been updating the Commission as data becomes available. Alameda CTC has not developed a 5-year sales tax revenue projection at this point given the large uncertainties regarding the depth and breadth of the recession and the lack of sales tax receipt data received to date. Revenue projections for FY2020-21 were included in the agency budget that was adopted in May 2020, which can be found on Alameda CTC's website at the following link: https://www.alamedactc.org/wp-content/uploads/2020/05/7.1_COMM_FY2020-21_Proposed_Budget_20200528.pdf. The budget for sales tax revenues for FY2020-21 will be updated if and when appropriate based on data received from the CDTFA. Formulas used to calculate Direct Local Distributions (DLD) are not affected by increases or decreases in sales tax revenue collections. Alameda CTC's website also includes sales tax projections for DLDs for FY2020-21 here. Alameda CTC currently does not anticipate any impact to payments to jurisdictions for other grants nor specific projects or programs due to COVID-19.

Organization/Individual	Date	Comments	Response
Building and Construction Trades Council of Alameda County	May 26, 2020 (same as May 11 letter)	37. Expressed support for the project and amendment that has been under development dating back to the 1960s when the BART system was originally envisioned.	Support noted.
		38. Noted key benefits of the project: - cost effective and efficient in that it uses currently existing transportation rights of way - will provide transportation alternatives that will benefit the environment, economy and quality of life of residents and Bay Area workers - sustainable technology - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports transit-oriented development - will provide an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues	Benefits noted.

Organization/Individual	Date	Comments	Response
		39. Supports advancing the amendment now so the project can compete for additional funding.	Support noted. The ability to leverage local sales tax dollars to secure competitive regional, state and federal funds is a key principle of local sales taxes. By being able to show a commitment of local funding, the project will be more competitive for regional, state and federal funding.
Chabot-Las Positas Community College	May 25, 2020	40. Expressed support for the amendment and notes fulfilment of commitment to tri-valley and benefits for student population from both Tri-Valley and 580-880 corridors.	Support and benefits noted.
Innovation Tri-Valley Leadership Group	May 7, 2020	41. Expressed support for the amendment, which fulfills a long-standing vision for rail connections from Dublin/Pleasanton to Livermore, and is consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley.	Support noted.
		42. Noted congestion reduction benefits of the project and the need to provide transportation alternatives in the corridor to benefit the environment, the economy and the quality of life of residents and workers.	Benefits noted.
		43. Amending the TEP now is important to allow the Authority to leverage local funds with State, federal and private funding to complete the project.	Support noted.

Organization/Individual	Date	Comments	Response
Laborers' Local 304 (Rafael Gonzalez)	May 26, 2020	44. Expressed support for the project and amendment.	Support noted.
		45. Noted key benefits of the project: - cost effective and efficient in that it uses currently existing transportation rights of way - will provide transportation alternatives that will benefit the environment, economy and quality of life of residents and Bay Area workers - sustainable technology - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports transit-oriented development	Benefits noted.
Livermore Chamber of Commerce	May 8, 2020	46. Expressed support for the proposed amendment to provide an urgently needed and long-awaited effective rail connection between Livermore and the Dublin/Pleasanton BART station.	Support noted.
Hacienda	June 9, 2020	47. Expressed support for the project and amendment that advance long-held objectives of creating a viable rail connection between alameda and San Joaquin Counties.	Support noted.

Organization/Individual	Date	Comments	Response
		48. Critical employment centers, such as Hacienda, need to make sure that all corridors leading into the Tri-Valley provide easy and convenient access for businesses whose labor supply extends into outlying areas. Likewise, residents at Hacienda similarly need the ability to enjoy access to corridors connecting the Tri-Valley with the larger region.	Support noted. Valley Link would provide access to support businesses and residents at Hacienda.
		49. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports advancement of transit-oriented development - protects open space	Benefits noted.
Jon M Spangler	July 15, 2020	50. Expressed opposition to the project and amendment.	Opposition noted.
		51. Inadequate public noticing of the comment period: - The project was never on the 2014 Measure BB project list - Very limited public notice or input and almost no publicity - Process to submit public comment was not noticed on Alameda CTC's website	The following are amendment requirements as specified in the 2014 Transportation Expenditure Plan (2014 TEP) Implementing Guidelines: "4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment."

Organization/Individual	Date	Comments	Response
			The comment period is for jurisdictions in Alameda County. Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission of a 45-day comment period regarding the proposed amendment, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy through the US Postal Service on May 29, 2020. The public noticing process is consistent with what is required in the TEP Implementing Guidelines. The process was described at the May Alameda CTC Committee and Commission agenda materials and discussed at the meetings. Alameda CTC is responding to all public comments received. Comments were received by member jurisdictions as well as advocacy organizations and individual members of the public expressing a diversity of viewpoints on the proposed amendment.

Organization/Individual	Date	Comments	Response
		52. No environmental impact report is not complete so there is not detailed information available regarding the rail project's effects.	As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal requirements. There is no legal requirement and the TEP does not require that projects must complete an environmental document before being in the plan, nor does it require that full funding is required before being in the plan. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects. Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only four of the 21 named capital projects in the TEP had an approved EIR when the TEP was approved by voters. The Draft EIR is anticipated to be released in fall 2020.
		53. No detailed evaluation of other alternatives such as extending BART service to Livermore.	See response to Comment 3.

Organization/Individual	Date	Comments	Response
		54. Concerned with exurban sprawl and the need to re-establish patterns of living close to work. Before the Valley Rail project received any public funding, policies must be established to ensure that only higher-density, compact growth will be allowed in these outlying areas.	The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to: • Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations. • Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans. The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently added as a new PDA.
		55. The additional demand on BART and the mechanism for funding BART's added costs should also be detailed ahead of making large expenditures like this.	See response to Comment 9.

Organization/Individual	Date	Comments	Response
		56. Large-scale policy and planning decisions and clearer understanding of Valley Link's overall impacts on growth and additional sprawl in the exurbs and suburbs must be very carefully calculated before, not after, such a project is funded.	See response to Comment 52.
		57. With future sales tax revenues in doubt and existing transit systems in crisis, the funding should remain unspent, be allocated to other voter-approved Measure BB projects, or used to support existing transit agencies and services.	See responses to Comments 3 and 4.
Law Offices of Jason A. Bezis	May 28, 2020	58. Expressed opposition to the TEP Amendment.	Opposition noted.
		59. Stated that the Amendment would be a bait and switch while voters distracted by the COVID-19 pandemic and is a major decision that should not be made during an emergency.	The Alameda County Transportation Commission continues to operate during the COVID pandemic, including acting on advancing projects approved by voters in the 2014 Transportation Expenditure Plan.
		60. Stated that the Valley Link Rail project to Altamont Pass is a drastically different project than BART to Livermore and raised concerns about funding being spent outside of the county and for little to no benefit to Alameda County taxpayers.	See response to Comment 2.

Organization/Individual	Date	Comments	Response
		61. Stated that the Amendment upsets to overall geographic equity consensus that underpins the Measure BB TEP, as the benefits to the residents of the Tri-Valley are less than they would have been is BART to Isabel Avenue had advanced.	This Amendment preserves the original geographic funding distribution of the 2014 TEP. When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County. The Amendment does not propose redistributing funds outside of the East Planning Area.
		62. Stated that the Commission is acting prematurely, with too many unknowns, and highlighted the need for the EIR to be released and an implementation plan and funding plan to be complete.	See responses to Comments 3 and 52. The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved
		63. Raised concerns regarding potential impacts on crowded BART trains.	See response to Comment 9.
		64. States that alternatives need to be further evaluated. The commenter specifically advocated for an express bus alternative that was identified in the 2003 Caltrans I-580 widening study as a cost-effective alternative that could be implemented quickly, or for a t-BART proposal that would utilize existing rail corridors in the Tri-Valley.	See response to Comment 3. Conditions have changed since 2003 with the construction of the I-580 Express Lanes. BART did analysis in 2018 (Comment 3) and express bus was considered but not recommended to be advanced.
		65. Noted that voters in the Tri-Valley did not support Measure BB and suggested that voters in the Tri-Valley vote on whether or not to reallocate the $400 million.	Measure BB passed based on total votes in the county, not based on geographies within the county. The TEP Implementing Guidelines lay out the Amendment process. This proposed Amendment is following that process.

Organization/Individual	Date	Comments	Response
		66. Stated that the decision should not be made until after the fall elections, which will result in new mayors for all three cities in the Tri-Valley and a new county supervisor.	Actions taken at the Alameda County Transportation Commission are done based upon the 22 members representing the full Commission and are not made on a planning area basis.
		67. Stated that Livermore residents would be betrayed if the Amendment proceeds, as they would continue paying taxes with no BART service and diminished local streets and road funding.	The Valley Link project includes rail stations, and rail service connecting directly into the BART system. The City of Livermore submitted a letter of support for the project. See also response to Comment 34.
		68. Raised concerns regarding the Measure BB campaign.	See Memorandum, Attachment A to this Comment Matrix.
Sierra Club	May 11, 2020 and July 13, 2020	69. Expressed opposition to the proposed actions. Recommend that no action be taken for the foreseeable future, at least until after completion of a full Environmental Impact Report process and other related documentation, and until there is a return to financial stability for Measure BB sales tax funds.	See response to Comments 52 (regarding environmental analysis) and 36 (regarding sales tax).
		70. Expressed no current position regarding the project itself, pending much more documentation and analysis for both decisionmakers and the public.	Noted the desire for more documentation and analysis.

Organization/Individual	Date	Comments	Response
		71. Insufficient comment period: - No notice was provided to the public or posted on the Alameda CTC website - The public was not informed how to communicate with elected representatives so that timely and informed comments by the jurisdiction could be submitted	See response to Comment 51.
		72. Request that all comments by jurisdictions be posted on the Alameda CTC website by the end of July 2020 so that the public can communicate on this matter with their elected officials.	Per direction of the Commission in May 2020, all comments will be posted with the September materials for the Planning, Policy and Legislation Committee (PPLC) along with a comment and response matrix.
		73. Request information regarding the potential/expected impact on other transit recipients if Valley Link is approved as a new agency that is eligible for Measure BB funds, including for operations? Does the selective omission of Valley Link in the "redlined" Appendix C of the May 28 materials mean that Valley Link will not be an eligible recipient under the Category of "Transit: Operations, Maintenance, and Safety Program"?	The TEP amendment request did not include a request for operating funds and, therefore, consideration for operating funds is not subject to this amendment. Redistribution of funds for operations would require a separate amendment, which has not been requested.

Organization/Individual	Date	Comments	Response
		74. The entire package of proposed actions is premature before completion of a full Environmental Review process, which is necessary to determine the viability, appropriateness, and environmental impact of the proposed project.	See response to Comment 51.
		75. Concerned the actions are being rushed, especially given the magnitude of current revenue uncertainties.	The TVSJVRRA submitted its request for the TEP Amendment to Alameda CTC in September 2019. Over the past year, Alameda CTC has participated on a project Executive Steering Committee with MTC, BART, SJRRC, Caltrans, and the California State Transportation Agency to provide input on the development of the feasibility report and project development. Alameda CTC also evaluated initial project designs related to potential impacts on the I-580 Express Lanes; those discussions will continue as the design progresses. See response to Comment 36 regarding sales tax.

Organization/Individual	Date	Comments	Response
		76. Current financial projections and analyses identify significant shortfalls in sales tax revenues at all levels for the foreseeable future. Please identify your responses below both with, and without, the impact of ACTC approval of the proposed Valley Link actions: - What are the current estimates and projections for Measures B and BB revenues (for at least the next 5 years), and as compared to previous actuals? - How will these changes in revenues affect DLD formulas, as well as other anticipated payments to jurisdictions and/or projects or programs?	See response to Comment 36.

		77. There is no "entitlement" for Measure BB funds from the cancelled "BART to Livermore" project for either the Tri-Valley planning area or even for a rail project, and the voters who actually approved Measure BB, with the "BART to Livermore" project, were, in large part, not primarily from the Tri-Valley. There should be an open, full and fair competitive assessment to determine any re-programming of that project's successor, per Implementing Guideline 22 from the TEP. ***22. Fund Allocations****: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, 4 Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.*	See responses to Comments 3 and 4.

Organization/Individual	Date	Comments	Response
		78. Valley Link violates the "inter-regional commuting" policy of SB 375 and Plan Bay Area.	SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations (MPOs) in the state of California. As it relates to this project, the two MPOs are the Metropolitan Transportation Commission (MTC) and the San Joaquin Council of Governments (SJCOG). The MTC Commission recently voted to include Valley Link in Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region. SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project. MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.
		79. Valley Link would disadvantage Alameda County residents, taxpayers, and transit riders to the benefit of inter-regional travelers from San Joaquin County.	See response to Comment 2.
		80. ACTC should not act until there is at least a matching financial commitment from San Joaquin County. Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and continuing operations for this multi-county project.	See response to Comment 28.

		81. The ACTC meeting materials from May 28th show the proposed project description only as it would be amended, without including the carefully negotiated original terms – approved by the voters – that are proposed for omission or change now. - What difference does the "initial operating segment" make to the proposal's potential draw on Alameda County funds? - What criteria will be used to assess whether the initial operating segment "most effectively meets" the adopted project goals, and which agency will make that determination? - When will "full funding commitments" be identified and approved for the full project? - Please also explain why the references to "detailed" analysis and "all" alternatives are being deleted.	No Measure BB funds may be expended outside of Alameda County. Measure BB funds could be used for an Initial Operating Segment that would be adopted by the TVSJVRRA Board, which has established project goals against which the proposed project and project alternatives will be measured and considered when considering project adoption. The TVSJVRRA-adopted project goals are: • Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs. • Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service. • Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve. • Be a model of sustainability in the design, construction, and operation of the system. • Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system. Currently the TVSJVRRA is considering two different potential initial operating segments: an extension from Dublin-Pleasanton BART to Greenville, or an extension from Dublin-Pleasanton BART to Mountain House. As stated in the proposed TEP Amendment language, a full funding plan must be identified before Alameda CTC would release Measure BB funds. In addition, Measure BB funds are only allowed to be used for construction. References to "detailed" and "all" are proposed to be removed for clarity and to remove vague qualifying statements. The BART

Organization/Individual	Date	Comments	Response
			to Livermore Project EIR evaluated a number of alternatives, and the Valley Link EIR is also evaluating a number of alternatives.
		82. Several places in the proposed "amendments" describe Valley link as "Commuter Rail," despite the fact that it is proposed to operate throughout the day. Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?	Valley Link will comply with all ADA regulations and will work with local transit operators to assure equitable access to the system. Under those regulations, Valley Link clearly falls within the definition of "commuter rail" as it will not operate in exclusive right-of-way and is not a light rail (street car) system by definition. See 49 CFR §37.3, §37.121(c).
		83. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?	See response to Comment 36.
Pleasanton Chamber of Commerce	May 27, 2020	84. Expresses support for amendment. Cites traffic reduction benefits, fulfilment of voter promise, reduction in VMT.	Support noted. Benefits noted.

Organization/Individual	Date	Comments	Response
Train Riders Association of California	May 26, 2020	85. Urge the Commission to defer action until an Environmental Impact Report is completed.	Comment noted.
		86. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines: - No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County.	No Measure BB funding may be spent outside of Alameda County. See response to Comment 2.
		87. Valley Link may result in overcrowding on the BART system that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.	See response to Comment 9.

Organization/Individual	Date	Comments	Response
		88. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use constraining provisions of Alameda County year 2000 Measure D. An EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.	The "gateway policy" is part of the Alameda County East County Area Plan - as amended by Measure D. The policies identified in the Plan (as noted in italics below) do not preclude the advancement of Valley Link. The Valley Link project will both facilitate the movement of commercial goods and improve safety in the corridor. • *The County shall assign priority in funding decisions to arterial and transit improvements that would improve local circulation, and to improvements that would facilitate movement of commercial goods.* • *This policy shall not preclude the County from supporting or approving any rail projects or improvements required for roadway safety*.
		89. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment.	The TEP implementing guidelines do not include any special requirements for specific projects. The TEP implementing guidelines specifically state: "4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment."
		Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.	See response to Comment 4.

Organization/Individual	Date	Comments	Response
		90. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer.	See response to Comment 3.

Verbal Comments & Letters Received for PPLC and Commission Meetings

May 11, 2020 Alameda CTC Planning, Policy and Legislation Committee meeting

The following public comments were heard during the 5/11 PPLC meeting:

- Pat Piras, on behalf of the Sierra Club, spoke during public comment noting that there were too many issues andquestions that should be addressed before the recommended actions move forward. Ms. Piras specifically questioned the lack of funding from San Joaquin County, consistency with SB 375, and the financial impact of COVID-19.

The following letters were received for the 5/11 PPLC Meeting and received by Commissioners:

- Gerald Cauthen on behalf of **Bay Area Transportation Working Group** – expressing concern about reallocation, advocating for buses in bus-only lanes as a superior alternative.
- Dave Campbell on behalf of **Bike East Bay** – Raised questions about the lack of outreach in the City of Livermore. He mentioned concerns regarding how the financial crisis will impact the proposed project
- Kelly Ellen Marshal on behalf of **Building and Construction Trades Council of Alameda County**, AFL-CIO – Support of staff's recommendation
- Tim Sbranti on behalf of **Innovation Tri-Valley Leadership Group** – Support of staff's recommendation
- Dawn P. Argula on behalf of **Livermore Chamber of Commerce** – Support of staff's recommendation

- **Sierra Club** (San Francisco Bay Chapter) (Matt Williams, Dick Schneider, Eric Parfrey) – Noted too many issues and questions that should be addressed before the recommended actions move forward; and questioned the lack of funding from San Joaquin County, consistency with SB 375, and the financial impact of COVID-19

May 28, 2020 Alameda CTC Commission meeting:

The following public comments were heard during the 5/28 Commission meeting:

- Jason Bezis stated he did not support staff's recommendation and noted his concerns about the $400 Million being used by San Joaquin residents and not Alameda County residents.
- BART Director John McPartland stated that he supports staff's recommendation.
- Pat Piras, on behalf of the Sierra Club, urged Alameda CTC to defer this action and requested Alameda CTC respond to the letters and comments before the end of the 45-day comment period.
- Gerald Cauthen (President of Bay Area Transportation Working Group) expressed his opposition to staff's recommendation.

The following Public comment letters were received by the noticed deadline for the 5/28 Commission Meeting and provided to Commissioners:

- **Alameda County Taxpayers Association** – Oppose staff's recommendation
- **BART Director John McPartland** – Support of staff's recommendation
- **BART** General Manager Robert Powers – Support of staff's recommendation
- Jim Wunderman writes on behalf of the **Bay Area Council** – Support of staff's recommendation
- Gerald Cauthen, President and co-founder of the **Bay Area Transportation Working Group** – Oppose staff's recommendation
- Andreas Culver, Secretary-Treasurer, of the **Building and Construction Trades Council of Alameda County** – Support of staff's recommendation
- Ronald P. Gerhard, Chancellor of the **Chabot-Los Positas Community College District** – Support of staff's recommendation
- Linda Smith, City Manager of the **City of Dublin** – Support of staff's recommendation
- John Marchand, Mayor of the **City of Livermore** – Support of staff's recommendation

- Nelson Fialho, City Manager of the **City of Pleasanton** – Support of staff's recommendation
- Tim Sbranti, on behalf of the business and civic leaders who comprise the **Innovation Tri-Valley Leadership** Group – Support of staff's recommendation
- Rafael Gonzalez on behalf of **Laborers' Local 304** – Support of staff's recommendation
- David Haubert on behalf of the **Livermore Amador Valley Transit Authority (LAVTA**) – Support of staff's recommendation
- Steve Van Dorn, President and CEO of the **Pleasanton Chamber of Commerce** – Support of staff's recommendation
- David Schonbrunn, President of the **Train Riders Association of California**, writes to urge the Commission to defer action on amending the Expenditure Plan for Measure BB until Alameda CTC receives an environmental impact report for Valley Link

June 8, 2020 Alameda CTC Planning, Policy and Legislation Committee

1. **Public Comment**
   Pat Piras, on behalf of the **Sierra Club**, commented on the Valley Link Project and the proposed 2014 Transportation Expenditure Plan amendment. Ms. Piras requested that Alameda CTC respond to questions raised by the Sierra Club, well in advance of the 45-day comment period that is required to amend the 2014 Transportation Plan. She requested to extend the 45-day comment period to end at a later date.

MEMORANDUM

September 3, 2020

TO: Alameda County Transportation Commission

FROM: R. Zachary Wasserman

RE: Comments from Jason Bezis regarding the 2014 campaign to approve Measure BB as part of Valley Link comments

---

Jason Bezis submitted a number of comments on the Valley Link amendment which are addressed as part of the Comment Matrix. In addition to comments about both the substance and the process for this amendment, he added irrelevant comments about the 2014 election that approved the extension and increase of the sales tax supporting transportation projects and programs in Alameda County. Mr. Bezis raised these issues in 2014 and 2015 with the Commission and with the State Fair Political Practices Commission ("FPPC"). The Commission retained an independent law firm, Renne Sloane Holtzman Sakai to investigate the issues he raised. Randy Riddle of that firm conducted a thorough factual investigation and legal analysis, resulting in a 62-page report. The report concluded that no laws were violated, that no public funds were improperly used and that no conflict of interest rules were violated by any of the actions raised by Mr. Bezis. Mr. Riddle did recommend that Commission staff receive formal ethics training about campaign rules. That training has been provided as part of a broader ethics training program.

Mr. Bezis made a complaint to the FPPC with similar issues. The FPPC reviewed the complaint and a response from ACTC and declined to investigate those complaints. A similar, but more vague complaint was made by Jerry Cauthen to the FPPC. After reviewing the report by Randy Riddle, the FPPC also declined to investigate that complaint.

These issues are entirely irrelevant to the Valley Link amendment and as noted have been thoroughly investigated and rejected by both the Commissions independent investigator and the FPPC. No further response is necessary.

Alameda-Contra Costa Transit District

July 9, 2020
Mayor Pauline Cutter
Alameda County Transportation Commission Chair
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Valley Link TEP Amendment

Dear Chair Cutter,

Thank you for providing AC Transit and other jurisdictions in Alameda County the opportunity to comment on the Alameda County Transportation Commission (ACTC) and Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJVRRA) proposed amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to reprogram $400 million in the Measure BB funds from the BART to Livermore project to the Valley Link Rail project. Please note that AC Transit's Board of Directors has not had the opportunity to provide official comment and position on the proposed amendment and AC Transit's Board representative has indicated she will be guided by the board's direction. Therefore, this letter reflects the comments of AC Transit staff.

As a primary transportation provider in Alameda County, AC Transit has interest in the county's transportation services and the establishment of a comprehensive, multi-modal transit network. As a result, staff has the following comments with regard to the proposed amendment:

- Though the BART to Livermore project did not align with BART's service priorities, the project was primarily intended for Alameda County residents, employees and taxpayers. Any alternate use of the funding allocation should benefit the same population in the county. This is consistent with Implementing Guideline #14 - "No Expenditures Outside of Alameda County" under the TEP.

  The Valley Link Rail project appears to have a primary purpose of transporting residents from San Joaquin County to Alameda County, with an ultimate destination in Santa Clara County, similar to existing ACE Train service. ACTC Staff and Valley Link Project staff were unable to clarify this issue when asked by the AC Transit Board. If the funding allocation is transferred to this project, Alameda County taxpayers would not directly benefit as much as San Joaquin County residents, especially if there are no committed funds from San Joaquin County.

- Appropriate use of the $400 million in funding should be to help create a comprehensive multimodal transportation network that serves the residents, employees and taxpayers of Alameda County. There are many transportation projects

that could improve travel and commute for Eastern Alameda County and would have a better cost-benefit ratio than the Valley Link Rail project and thus, a better and more efficient use of funds. Possible projects such as express bus service and bus rapid transit would fall into this category. Implementing Guideline #22 – "Fund Allocations" under the TEP would allow for such projects to be funded with the allocation.

- Given the current financial climate and the uncertainty that lies ahead, it is within reason for ACTC to also consider reallocating the $400 million to any number of under-funded capital projects throughout the county, including transit projects within the AC Transit service area that are identified in multiple countywide plan documents. Per Implementing Guideline #4 – "Amendments Require 2/3 Support" of the TEP, ACTC could amend the plan with a 2/3 supporting vote of the commission and distribute funds to existing planned or proposed projects.

Again, thank you for giving AC Transit the opportunity to comment on this proposed amendment to the TEP. Should you have any questions or need clarification on the above comments, please do not hesitate to contact AC Transit staff.

Sincerely,

Michael Hursh
General Manager

BOARD OF SUPERVISORS

June 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

RE: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services – firefighters, police, nurses, and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

1221 OAK STREET • FIFTH FLOOR • OAKLAND, CALIFORNIA 94612 • 510 272-6984 • FAX 510 272-3784

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Richard Valle, President
Alameda County Board of Supervisors

CC: Alameda County Transportation Commissioners

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

I urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John McPartland

RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

RE: Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Ms. Lengyel,

Thank you for the opportunity to comment on the above referenced item as part of the 45-day comment period that began following the Alameda County Transportation Commission's (Alameda CTC) initial action on May 28, 2020. On behalf of the staff of the San Francisco Bay Area Rapid Transit District (BART), I am writing to express my support, with recommendations detailed below, of the proposed amendment of the 2014 Transportation Expenditure Plan, specifically on the $400 million (M) of the 2014 Measure BB funds identified for the BART to Livermore extension project.

The 2014 Transportation Expenditure Plan (TEP) that was approved by Alameda County voters did specify "a BART Extension within the I-580 Corridor … using the most effective and efficient technology." In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Because of the BART Board's decision to not advance a project in the corridor, and TVSJVRRA's subsequent assumption of the lead for rail planning in the Tri-Valley, BART staff supports (with recommendations below) the proposed action to amend the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. Staff believes this action is consistent with intent of Alameda County voters to invest in transit in the I-580 Corridor. It is important that the $400 M sales tax investment does accrue to Alameda County residents and businesses.

Since the TVSJVRRA assumed responsibility for a rail project in the Tri-Valley, BART staff have been engaged with the Authority during project feasibility and initial design of the proposed Valley Link Rail project, and this coordination continues as the project undergoes environmental review and design refinement. This coordination has been key to BART's review of the potential impacts that the Valley Link project is projected to have on riders of the BART system.

To ensure a safe, comfortable and seamless journey for transit riders, BART recommends that the amendment to the TEP clearly indicate that required improvements to the BART system in Alameda County resulting from the impacts of the Valley Link Rail project are priority components of the Phase 1 Valley Link Rail project. These fall into three areas of investments:

1) **Base Project:** As a result of our initial analysis of these impacts, BART projects that the increased ridership driven by the Valley Link Rail project will result in impacts to BART (including the need to acquire additional rail cars), station capital improvement needs (to accommodate safe and smooth passengers flows), and reconfiguration of the Dublin/Pleasanton station (to facilitate transfers between the two systems). These analyses will be further revised as coordination continues, in preparation for the release of the Draft Environmental Impact Report for the Valley Link Rail project scheduled for later this year
2) **Core Improvements:** Initial analysis indicates that many future Valley Link patrons would transfer to the BART system, and that capacity improvements of varying cost may be required at destination stations, such as the 12th St Oakland, 19th St Oakland, Castro Valley, Lake Merritt, and West Dublin / Pleasanton BART stations (i.e., platform width, emergency egress, vertical circulation). Measure BB funding eligibility must reflect the potential that expenses related to the Valley Link Phase 1 project may occur outside the I-580 corridor itself, but still within Alameda County.
3) **I-580 Corridor Fare Gate Modernization:** Funding is required to modernize faregates for BART stations within the I-580 Corridor (Castro Valley, West Dublin/Pleasanton and Dublin/Pleasanton stations) to the revised standard adopted by the BART Board of Directors. These new faregates address fare evasion at these stations and provide current and future travelers within the I-580 Corridor a safer and more secure experience.

The Valley Link project will not be successful for our riders and Alameda County taxpayers if the system does not adequately accommodate these new passengers. BART does not have funding to mitigate these impacts, which are critical to the overall success of this project. Therefore, BART anticipates that the close coordination with the Valley Link Rail project team will continue as the project advances. While ultimately other fund sources may be used for the core system BART impacts noted above, at this early phase it is important to maintain maximum flexibility of local funding so that they can be used to leverage additional region, state, and federal funding sources.

Thank you again for this opportunity to comment on this proposed action. Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

Sincerely,

Gerald Cauthen

Oakland, California 94607

via: e-mail to Clerk of the Commission

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

Subject: Bike East Bay comments on Valley Link

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Ronald P. Gerhard

Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

July 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment.

On May 28, 2020, the Alameda County Transportation Commission (ACTC) approved the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP) to add the Authority's Valley Link project into the TEP, remove the BART to Livermore project from the TEP, and to move $400 million from the BART to Livermore TEP project to the Valley Link project. ACTC's action initiated 45-day comment period for all jurisdictions in Alameda County to comment on the proposed amendment. On behalf of the City of Dublin and as an ACTC member jurisdiction, I write to strongly support the amendment of the TEP to include Valley Link and to move $400 million of Measure BB funding to Valley Link. The Valley Link project will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, it will assure that our residents will finally benefit from the taxes they have paid.

An estimated 28,000 people are projected to ride the 42-mile, 7-station Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. Valley Link will connect Northern California Megaregion's workforce to affordable housing, will provide opportunities for compact transit-oriented development, and will significantly reduce greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, Valley Link is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

I support ACTC's approval of the 2014 Measure BB Transportation Expenditure Plan Amendment to include the Valley Link project. This action will ensure that this vital project moves forward.

Sincerely,

Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Oakland, CA 94607

Subject: Support for Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Cutter:

On behalf of the City of Livermore and as a member jurisdiction of the Alameda County Transportation Commission, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and after many decades of study, it will assure that our residents will finally benefit from the taxes they have paid.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

An estimated 28,000 commuters are projected to ride the 42-mile, 7-station Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. An example of Valley Link supported TOD is the proposed Isabel Neighborhood Plan in Livermore, which includes 4,095 new housing units with a 20% minimum affordable inclusionary requirement per project with overall 25% affordability goal for the plan area.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Subject: Support for 2014 Measure BB Transportation Expenditure Plan Amendment – Valley Link

Dear Chair Cutter:

Thank you for the opportunity to comment on the proposed 2014 Transportation Expenditure Plan Amendment.

The Alameda County Transportation Commission (Alameda CTC) discussed and approved the request from the Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJVRRA) request for an amendment of the 2014 Measure BB transportation Expenditure Plan on May 28, 2020. The amendment proposes to complete several actions: 1) recognize the TVSJVRRA as a new agency that is eligible to receive Measure BB funds; 2) Replace the BART to Livermore project with the Valley Link project and retain the $400 million in Measure BB funding for the Valley Link project.

The City of Pleasanton strongly supports the amendment to the 2014 Measure BB Transportation Expenditure Plan. As stated in the City's previous letter dated May 26th, 2020, the Valley Link Project will complete the regional rail concept initially envisioned for the Tri-Valley decades ago. The TVSJVRRA was created in 2017 to expedite the planning, development and construction of a rail service that connects BART to the Altamont Commuter Express. Valley Link not only benefits the Tri-Valley in creating regional mobility and reducing traffic along the 580 corridor; the project will connect San Joaquin County to the Bay Area servicing up to 28,000 riders per day.

The congestion reduction also provides numerous environmental benefits. Valley Link will reduce GHG emissions, pursue renewable energy sources, strive to attain 100 percent self-sufficiency, and apply global best practices to design and construct sustainable infrastructure. Valley Link will reduce GHG emissions by 24,000 metric tons of CO_2 emissions annually in

P.O. Box 520, Pleasanton, CA 94566-0802 **123 Main Street**

Economic Development (925) 931-5038 Fax: 931-5485
City Clerk (925) 931-5027 Fax: 931-5492

DocuSign Envelope ID: BC1D21C3-AE51-4CF8-BAEB-804A01C5C672

2025, and 33,000 metric tons of CO2 emissions annually in 2040. The vehicle technology will provide additional environmental benefits by using Multiple Units featuring hybrid technology with the ability to convert to a fully-electric operation in the future.

Valley Link will also support the advancement of Transit Oriented Development by supporting MTC's Plan Bay Area; having four PDAs located along the Valley Link alignment will support more than 2,200 homes, all located within ½ mile of the stations. Housing and jobs in these areas will be within walking distance to regular Valley Link service, providing access throughout the day in both directions, and connecting with the Bay Area's BART system.

The project meets the vision and goals of Measure BB by expanding regional rail, providing traffic relief, improving air quality by providing clean transportation. The City of Pleasanton is encouraged by the TVSJVRRA's progress on the Valley Link Project and looks forward to the approval of the use of the Measure BB funds to assist in the completion of this vital project.

Sincerely,

Re: Comments on ACTC 2014 Measure BB Expenditure Plan Amendment

Dear Chair Cutter:

I am pleased to support the Tri-Valley San Joaquin Valley Regional Rail Authority request to amend the 2014 TEP to replace the BART to Livermore project with the Valley Link rail project.

The project is an excellent example of mega-regional cooperation to facilitate the construction of key infrastructure improvements and leveraging different funding resources to enable more frequent passenger rail serve between the Central Valley, the Tri-Valley, and the San Francisco Bay Area; provide connectivity to other transit providers, provide service between housing and job centers, and facilitate the movement of goods.

- The Stockton Diamond Grade Separation project facilitates the Phase 2 Valley Link connectivity to Stockton, will enable ACE to dispatch more passenger trains, and eliminates a choke point for fright movement on Union Pacific and BNSF rail lines.
- Valley Link will provide local service to several communities in the Tri-Valley and Central Valley while ACE provides express service to transit hubs in Alameda and Santa Clara counties.
- Union City looks forward to ACE providing service to Union City BART and our Station District.
- Greenhouse gas generation and Vehicle Miles Traveled will be reduced when automobile commuters are provided a rail alternative and additional rail capacity becomes available to automobile commuters.
- Transit Oriented Development (TOD) policies along the Valley Link Corridor will mirror MTC Resolution 3434 policies to exceed 2,200 housing units within ½ mile radius of stations.

I look forward to supporting projects that leverage funding sources to benefit multiple rail providers and provide seamless connectivity to transit hubs.

Sincerely,

Carol Dutra-Vernaci

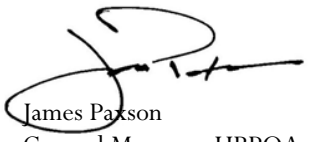
Re: Measure BB Amendment for Tri-Valley-San Joaquin Valley Regional Rail Authority

Dear Chair Cutter:

Hacienda is located near the geographic center of the San Francisco Bay Area and, at 875 acres, is the largest development of its kind in Northern California. Over 10 million square feet of existing, mixed-use space is occupied by some 700 companies that locally employ approximately 20,000 people. Key tenants include Kaiser Permanente, Oracle, Roche Molecular Systems and Gap who have all made substantive investments in their presence within Hacienda. In addition, Hacienda features homes to some 5,600 residents and is in the active planning and construction phase for as many more. Our facilities thrive because of the state-of-the-art working and living environments that have been developed which are in large part due to an ongoing commitment to providing comprehensive approaches to commute choices and community development.



Hacienda is pleased to provide this letter to strongly support the approval sought by the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. With the decision made not to pursue traditional BART rail service beyond its current eastern Alameda County terminus at the East Dublin/Pleasanton station, Valley Link offers a critical opportunity to advance long-held objectives of creating a viable rail connection between Alameda and San Joaquin Counties.

As you are aware, the Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the Interstate 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars and confronting an average 78-minute commute each way. Critical employment centers, such as Hacienda, need to make sure that all corridors leading into the Tri-Valley provide easy and convenient access for businesses whose labor supply extends into outlying areas. Likewise, residents at Hacienda similarly need the ability to enjoy access to corridors connecting the Tri-Valley with the larger region.

An estimated 28,000 are projected to ride the Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Transit Oriented Development Policy adopted by the Authority's Board, Valley Link will support the advancement of transit-oriented projects, such as Hacienda, adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. Hacienda's existing and proposed development along with the proposed Isabel Neighborhood Plan are examples of how this can happen throughout the system.

The Valley Link project is critical for the equitable and sustainable future of the Tri-Valley and Bay Area. We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment in support of moving this vital project forward and making a significant improvement to the quality of life and commutes in Hacienda, the Tri-Valley and the region.

Sincerely,

James Paxson

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

RE: Oppose Reallocating $400 Million of Measure BB Funds to Valley Link Rail Project (TVSJVRRA)

The “Valley Link” rail connector project is an intriguing effort to connect the far-flung San Joaquin Valley and Tri-Valley areas with the San Francisco Bay Region’s urban core. Any project that gets more commuters out of automobiles is usually worthy of the Alameda County Transportation Commission’s (ACTC’s) consideration — butnot this one. Not now.

I am a Bay Area native. I grew up in Redwood City with steam-powered Southern Pacific commute trains. I have served on the BART Bicycle Advisory Task Force (BBATF) since 2011 and now serve as its Vice chair — although these comments are mine alone and are not made on behalf of the BBATF. I have been active in City of Alameda transportation and planning issues for 22 years and worked on regional transportation solutions.

INADEQUATE PUBLIC NOTICING FOR THIS COMMENT PERIOD

First, proponents of the relatively new Valley Link rail connector project are asking ACTC to reallocate $400 million for a project that was never even on the 2014 Measure BB project list — or on any transit funding ballot measure. This alone is troubling to someone like me who worked hard to pass Measure BB.

Secondly, this request is coming before you with very limited public notice or input and almost no publicity — a glaring omission. Had I not stumbled on discussions of this ACTC reallocation and the Valley Rail project — on Twitter — within the past week I would not have known that $400 million in Measure BB funds were about to be reallocated for a project I had never heard of before. Where did this come from? Frankly, it reminds me of the mid-19th-century promoters who built rail lines across the United States (and across the island of Alameda) in pursuit of real estate profits.

Thirdly, I was unable to find a way to submit public comment on the ACTC website. For that, I had to ask others who knew about the project and the looming close of public comment that opened May 28 — in the midst of the pandemic's shutdown. What happened to the ACTC's once-effective and hard-to-miss public noticing process? And where is the careful consideration of the Valley Link project's potentially massive negative impacts on the region, including sprawl, energy use, and global climate change that should precede major funding?

NO ENVIRONMENTAL IMPACT REPORT, TOO MANY SPRAWL-RELATED RISKS

Valley Link has not undergone a full environmental analysis: there is no Environmental Impact Report (EIR) on the rail project's effects on exurban sprawl, climate change, or its potential harm to open space and agricultural land by stimulating the building of more McMansions on the San Joaquin Valley farmlands. Nor is there any detailed evaluation of other land use, transportation, and economic alternatives, such as extending some form of BART service to Livermore — much less re-focusing on building affordable, high-density housing in the urban core areas where the jobs exist.

Does the Alameda County Transportation Commission (ACTC) want to accelerate exurban sprawl? This project appears to guarantee that much more housing will be built on what is now open space and agricultural land, further diminishing those resources. To significantly improve sustainability and create a greener California while reducing energy use, global warming, and sprawl, we would halt home construction so far from our workplaces and re-establish traditional patterns of living close to work and stop enabling more super-commuting road warriors — or even rail warriors.

Before the Valley Rail project received any public funding, policies must be established to ensure that only higher-density, compact growth will be allowed in these outlying areas: it is fruitless to build a transit system to serve sprawling tracts of McMansions whose low densities do not support transit.

The additional demand on BART and the mechanism for funding BART's added costs should also be detailed ahead of making large expenditures like this.

These broad policy and priority discussions need to take place before public funds are committed to any transit project that promises to blow up what remains of "compact growth" initiatives throughout the Bay Area and the mega-region. The Valley Rail project's overall impacts on growth and additional sprawl in the exurbs and suburbs must be very carefully calculated <u>before</u>, not after, such a project is funded.

A QUESTIONABLE FUNDING STREAM: SALES TAX REVENUE IN THE PANDEMIC AND ONLINE SHOPPING ERA

We are in the middle of a viral pandemic with no end in sight — partly because of federal failures in leadership.This new Valley Link project is asking for $400 million in sales tax revenue that may never exist because of the pandemic-caused economic crisis on top of a long-term drop in “brick and mortar” retail sales.

With future sales tax revenues in doubt and our existing metropolitan transit systems already in crisis, the $400 million should remain unspent, be reallocated to support other voter-approved Measure BB projects, or be used to support existing transit agencies and service. For decades, BART pursued an ”expansionist” policy to the detriment of maintaining and improving its core system and original infrastructure: ACTC and other transportation stakeholders should learn from BART’s strategic mistake. In conclusion, there are too many questions about the overall costs and environmental effects of the Valley Rail (TVSJVRRA) proposal, especially the great likelihood of sharply increasing exurban sprawl far beyond the nine-county Bay Region. Many more large-scale policy and planning decisions need to be made before we further expand the costly and unsustainable mega-commute. And without a stable local retail economy or stable existing transit agencies, ACTC should not engage in expansionist, sprawl-inducing projects.

Please do not reallocate Measure BB funds to Valley Link/TVSJVRRA at this time.

Respectfully submitted,

Jon M. Spangler

From:	Rafael Gonzalez
To:	Vanessa Lee
Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Rafael Gonzalez

Livermore Amador Valley
TRANSIT AUTHORITY

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

David G. Hudson

Re: May 28, 2020 Meeting: Agenda Item 8.1: Opposition to Measure BB TEP Amendent

To Chair Cutter and Commissioners:

This office represents Alameda County citizens opposed to a request by the Tri-Valley-San Joaquin Valley Regional Rail Authority for a 2014 Measure BB Transportation Expenditure Plan Amendment.

This $400 million revision of the Measure BB TEP would completely change the largest capital expenditure in Measure BB. It is an epic "bait-and-switch" against Alameda County voters while they are distracted by a global state of emergency.

A major amendment of a voter-passed ballot measure is a major decision that should not be made during the COVID-19 emergency. Commissioners should carefully consider the Statement on Government Coronavirus Emergency Transparency by 140-plus organizations:

> Government bodies should not opportunistically take advantage of the public's inability to attend large gatherings to make critical decisions affecting the public's interest if those decisions can reasonably be postponed. Just as citizens are being asked to defer nonessential travel and errands, so should government agencies defer noncritical policy-making decisions until full and meaningful public involvement can be guaranteed.

The voter-approved text of Measure BB Transportation Expenditure Plan (TEP) states, "BART to Livermore ($400 M) This project funds the first phase of a BART Extension within the I -580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology."

This proposed amendment would substantially revise the TEP to state, "Valley Link Rail in Alameda County ($400 M) This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology."

"Valley Link Rail" to Altamont Pass is a drastically different project than BART within I-580 to western Livermore. Your Commission is constrained by this implementing guideline: "Under no

circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County." Alameda County receives little or no benefit by paying for a very costly rail line through Altamont Pass. Very few people live in Altamont Pass. There will be no station in Altamont Pass. A rail line funded by Alameda County taxpayers through Altamont Pass effectively is a gift of Alameda County funds to San Joaquin Valley real estate development interests. This is not what Alameda County voters contemplated in the 2014 election. Valley Link is a much different project than was sold to voters in 2014 – a BART line that ends in western Livermore. As such, it is akin to a "revision" of Measure BB, not a mere "amendment."

Moreover, this proposed $400 million amendment upsets the "overall geographic equity" consensus that underpins the Measure BB TEP. Measure BB spending on Valley Link in Altamont Pass does not "benefit" the Tri-Valley to the same extent that BART to Isabel Avenue would. Measure BB claims to distribute local street and road funding based on population and road miles, but ACTC manipulates the formula to reward certain cities and punish others based on other parts of the TEP. This $400 million amendment affects other funding formulas in the TEP and effectively revises them. The "geographic equity" is thrown off. To ensure "overall geographic equity," local street and road funding and other formulas need to be re-visited as part of this amendment process, pursuant to Implementing Guideline Nos. 12 and 13 and other authorities.

Your Commission would acting prematurely if it were to undertake this drastic revision of the Measure BB TEP today. "Valley Link" is an unproven and unknown project in many respects. Too little is known about it. A much-anticipated environmental impact report is not yet released. A 2003 Caltrans I-580 widening analysis stated that there is insufficient existing right-of-way to accommodate both a rail line and HOV lanes. Even if more freeway right-of-way were obtained, the new HOT lanes would need to be destroyed. The financing of Valley Link is questionable, which likely is why Valley Link wants to use this $400 million for construction in the Altamont Pass, which would not benefit Alameda County.

Before approving the TEP amendment, careful consideration also must be made about the impacts on BART. Before the COVID-19 emergency, the Dublin/Pleasanton BART line trains had been packed during commute hours. During the morning commute, many passengers board at West Dublin/Pleasanton, ride backwards to (East) Dublin/Pleasanton, and then jockey for space in the crowded trains.

Your Commission first should consider alternatives to Valley Link. The 2003 Caltrans I-580 widening study included an express bus alternative that deserves careful consideration. That 2003 analysis considered an express bus connection directly from I-580's HOV lanes to and from (East) Dublin/Pleasanton BART station. That likely would be the most cost-effective solution and could be implemented many years before an I-580 rail concept.

Your Commission also should re-consider the "t-BART" proposals that were much discussed in the early 2000s (sister project to "e-BART" in eastern Contra Costa County). There was a "t-BART" proposal that utilized the existing rail corridor in the Tri-Valley with a link to (East) Dublin/Pleasanton BART via Hacienda Business Park and the former Southern Pacific (Iron

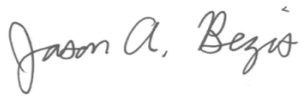
Horse Trail) corridor, with a possible extension to Bishop Ranch in San Ramon. The "t-BART" proposals could be less costly and more effective to solving Tri-Valley transportation challenges than Valley Link. Your Commission should not rush into giving $400 million to Valley Link.

Voters in the Tri-Valley communities of Livermore, Pleasanton and Dublin did not support the Measure BB sales tax increase in the November 2014. Attached please find a map generated by the County Registrar of Voters that illustrates the depth of disapproval of Measure BB in eastern and southern Alameda County. The Tri-Valley is a sea of red. Measure BB won in just one precinct in Livermore, one precinct in Pleasanton, and maybe one or two precincts in Dublin. Measure BB won just 49 percent of the vote in Livermore. One solution could be for voters in the Tri-Valley to vote on whether or not the $400 million should be reallocated.

This major $400 million revision should not be decided by "lame duck" ACTC commissioners. A new county supervisor will be elected in November in eastern Alameda County. All three Tri-Valley cities could have new mayors after November. Let this controversial issue be publicly debated during these campaigns.

Livermore voters should feel especially betrayed. They have paid BART property taxes since circa 1962. They have paid the BART sales tax since circa 1970. They have paid a special Alameda County transportation sales tax since 1987. In 2014, after all those years of paying for BART service everywhere else, they were promised $400 million for BART to Livermore through Measure BB. Livermore got stuck with yet another ½ percent sales tax increase through Measure BB. Then ACTC manipulated the Measure BB local street and road funding formula to give Livermore much less than its "fair share" of funds based on population and road miles. Now Livermore would be stuck with higher taxes, no BART, diminished local street and road funding, and a forced subsidy of a costly and ineffective railroad through Altamont Pass.

Alameda County Transportation Commission and Measure BB beneficiaries jointly engaged in one of the most sordid political campaigns in county history to persuade voters – especially Tri-Valley voters – to support the Measure BB in 2014:



- The "Yes on BB" campaign literally was headquartered out of your general counsel's law office. ACTC more than doubled the size of your general counsel's contract after the "BB" passed.
- Another ACTC attorney was married to the Yes on BB campaign manager, who had earlier received a special ACTC consulting contract to develop Measure BB.
- Tess Lengyel, ACTC's current executive director, managed ACTC's supposedly neutral "public information" efforts concerning Measure BB. Ms. Lengyel was unavailable during the final weeks of the Measure BB campaign to fulfill her official duties. She failed to answer Public Records Act and other inquiries about Measure BB before the election. It was later revealed that Ms. Lengyel had been preoccupied with engaging in partisan, pro-BB propaganda. Video of a "Yes on BB" campaign fundraiser shows Ms. Lengyel openly participating in pro-BB election activities. The video shows Ms. Lengyel leading "Yes on BB" campaign donors in a pro-BB cheer. See: https://www.youtube.com/watch?v=GdjuU6DrURs

- With ACTC's legal advisors and ACTC's "Public Information" officer (Ms. Lengyel) working for the "Yes on BB" campaign, ACTC effectively (and illegally) became an arm of the "Yes on BB" campaign.
- ACTC used public funds to hire the Bay Area Council Economic Institute to conduct a supposedly "independent" economic analysis of Measure BB benefits. The Bay Area Council endorsed Measure BB.
- In August 2014, an official dedication ceremony for the ACTC Iron Horse Trail project in Pleasanton was inappropriately transformed into a "Yes on BB" campaign rally. Speeches expressly advocated for passage of Measure BB. A "Yes on BB" campaign sign was hung prominently behind the dais and at the ribbon cutting location.
- In October 2014, just a few days before the Measure BB election, ACTC's official dedication ceremony for the State Route 84 widening project in Livermore was inappropriately transformed into a "Yes on BB" campaign rally. As the ribbon was cut, the backdrop was a crowd of Building and Construction Trades union members waving "Yes on BB" campaign signs.
- Any semblance of a "firewall" between ACTC and the "Yes on BB" campaign was demolished. Just before election day, "Yes on BB" transferred thousands of dollars to arms of the Democratic Party to aid distribution of "slate cards" that not only boosted Measure BB, but also "picked winners" in mayoral and city council races around the county. This raises the concern the ACTC staff and contractors engaged in partisan political activities that altered the composition of ACTC itself.

Many of these same parties, including the Bay Area Council and Building and Construction Trades unions, are today advocating for amendment of Measure BB.

For these reasons, your Commission should not take this major action today to reallocate $400 million to a controversial, unproven project that voters have not approved.

Sincerely,

JASON A. BEZIS

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,
Dawn P. Argula

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove “BART to Livermore” from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of “BART, Bus, Senior, and Youth Transit” options identified as the relevant “Type” on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the “superseded” request dated September 11, 2019, recognized that there was no entitlement to the “local funds controlled by the Alameda County Transportation Commission.”

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be “used.” The text below sets forth full “before and after” language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds. **(emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

RE: Sierra Club Comments in Opposition to Proposed ACTC TEP Amendment and Actions regarding "Valley Link" Rail

Dear Chair Cutter and Commissioners:

Based on the reasons outlined in this letter and in our previous correspondence and public comments, the Sierra Club opposes the actions proposed by the Alameda County Transportation Commission (hereinafter ACTC or Commission) at your meeting of May 28, 2020, regarding the "Valley Link" rail project. We further recommend that no action be taken on these matters for the foreseeable future, at least until after completion of a full Environmental Impact Report (EIR) process and other related documentation, and until there is a return to financial stability for Measure BB sales tax funds.

Given the dearth of substantive information on the proposed project itself, and the uncertainty regarding local, regional, and state financial revenues, the Sierra Club does not currently express a position regarding the actual project, since that would be objectively premature pending much more documentation and analysis for both decisionmakers and the public. We urge the Commission to follow this example. In the meantime, on behalf of our more than 13,500 members in Alameda County, we offer the questions and concerns below.

How can there be a "comment period" without published public notice, especially given the critical information that ACTC has omitted from sharing with its Commissioners?

Implementing Guideline #4 of the 2014 Transportation Expenditure Plan (TEP) for Measure BB states in part "All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment." We understand that

information regarding the proposed amendments and process was sent to Alameda County jurisdictions, but we have been unable to find any notice, anywhere on the ACTC website, notifying the public of this voter-approved opportunity, or of its parameters. How are members of the public supposed to know how to communicate with their elected representatives so that timely and informed comments by the jurisdictions can be submitted?"

This appears to be a serious breach of the intent of proper government procedure, even during the current pandemic circumstances. Such an apparent opposition to public transparency is not likely to engender taxpayer support for any future requests by ACTC to voters. We have tried in this letter to identify several key issues that are not addressed adequately, if at all, in the ACTC correspondence, so that Commissioners can have a more informed basis for their consideration when they are requested to act.

Further, we request that all comments by jurisdictions be posted on the ACTC website by the end of July 2020, so that the public can communicate on this matter with their elected officials.

What is the potential/expected impact on other transit recipients in Alameda County if Valley Link is approved as a new agency that is eligible for Measure BB funds, including for operations?

We have previously asked this question, but received no response. It must be answered with regard to the "Direct Local Distribution" (DLD) formula, as well as for the capital request. Director Joel Young of the AC Transit Board asked a similar question during an ACTC presentation to their agency, but unfortunately, a direct response was not provided then either. Does the selective omission of Valley Link in the "redlined" Appendix C of the May 28 materials mean that Valley Link will <u>not</u> be an eligible recipient under the Category of "Transit: Operations, Maintenance, and Safety Program"? Please respond directly to this question.

The entire package of proposed actions is premature before completion of a full Environmental Review process, which is necessary to determine the viability, appropriateness, and environmental impact of the proposed project.

This essential analysis is already a year delayed in its schedule, so neither the public nor regulatory agencies can identify the potential impacts of the proposed project, any mitigations needed, or any potential benefits or harms.

The 2019 "Feasibility Report" required by AB 758 (Eggman/Baker) was little more than a compilation of previous presentations to the Valley Link Board, with no independent analysis, and seriously lacking in objectivity. <u>The "Feasibility Report" is not a "Viability Report</u>." We note that current financial reports and projections for two of the most recent new rail systems in the country (SMART and Sound Transit), which were implemented with assistance of Valley Link's consultants, have identified significant shortfalls into the foreseeable future. What reason is there to believe that Valley Link will fare any differently?

There is no valid reason for ACTC Commissioners to rush into the proposed actions until the project is better understood and documented for the County's voters, and for ACTC itself.

Current financial projections and analyses identify significant shortfalls in sales tax revenues at all levels for the foreseeable future – How can ACTC responsibly commit $400 million under these circumstances?

ACTC's Finance and Administration Committee most recently met on May 11th, with sales tax revenue data as of March and thereby not reflecting coronavirus and related "shutdown" conditions and impacts. Presentation materials from that meeting project only modest reductions in sales tax revenues, and clearly need updating.

Please identify your responses below both with, and without, the impact of ACTC approval of the proposed Valley Link actions:

- What are the current estimates and projections for Measures B and BB revenues (for at least the next 5 years), and as compared to previous actuals?
- How will these changes in revenues affect DLD formulas, as well as other anticipated payments to jurisdictions and/or projects or programs?

Recently "60 Minutes" reported that the non-partisan Congressional Budget Office is predicting that it will take up to 9 years for a full recovery from the financial effects of the Coronavirus pandemic. MTC staff reports are a bit more optimistic, but still do not predict financial recovery until approximately 2024 or 2025. Any current revenue predictions are speculative at best. If ACTC finds itself short of funds, how will decisions be made, and what will be cut? Please identify how impacts on social equity will be addressed.

What is the rush to commit $400 million in hypothetical revenues from the public trust? This is more than a rhetorical question – Why now, given the magnitude of current revenue uncertainties?

There is no "entitlement" for Measure BB funds from the cancelled "BART to Livermore" project for either the Tri-Valley planning area or even for a rail project, and the voters who actually approved Measure BB, with the "BART to Livermore" project, were, in large part, not primarily from the Tri-Valley. There should be an open, full and fair competitive assessment to determine any re-programming of that project's successor.

Documentation from ACTC has notably failed to mention even the existence of Implementing Guideline #22 from the TEP:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets,

> Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

This policy clearly identifies that there is no entitlement or guarantee, for either a rail project or for the Tri-Valley area, of the money that is no longer needed for BART-to-Livermore. Rather the money can – when it is actually available – be used for any transit project anywhere throughout the County. Why not act as responsible stewards of the public trust, and study what might be the highest and best use of the funds? Examples might include funding BART faregates and the enclosing of cross-paid-area elevators throughout Alameda County stations, and/or providing a strong down-payment for vehicles and infrastructure for a large portion of the CARB-required Zero Emission Bus fleets for all of the public transit bus systems in the County. Another option would be to help backfill the loss of fare revenues for all transit agencies. How might BART "development" projects on their property help to achieve other ACTC and Sierra Club goals, such as enhancing success of Priority Development Areas (PDAs) for Plan Bay Area?

Valley Link violates the "inter-regional commuting" policy of SB 375 and Plan Bay Area.

According to MTC's *Frequently Asked Questions* | *Plan Bay Area:*

> "Regions also must demonstrate that their plans accommodate all future projected households <u>without further growth in in-commuting</u>, or the amount of people traveling from neighboring areas to the region (i.e. from outside of the Bay Area to the Bay Area)." *(emphasis added)4*

Not only does Valley Link violate the premise of discouraging inter-regional commutes – and reliance on a "Mega-Region" is not relevant or applicable under current law -- but the public descriptions indicate that Valley Link would disadvantage Alameda County residents, taxpayers, and transit riders to the benefit of inter-regional travelers from San Joaquin County. In a return to pre-pandemic BART service and ridership, trains arriving at Bayfair station on the Blue Line are often full already – will local passengers have any chance of a seat after Valley Link passengers get first choice? ACTC officials should not approve such a disservice to your constituents without much more explanation.

ACTC should not act until there is at least a matching financial commitment from San Joaquin County.

The proposed resolution provided by Valley Link does not present adequate commitment from San Joaquin County as a funding partner for this potentially massive proposal to benefit their commuters. It merely states that

> "SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures

and state funds." ***(emphasis added)***

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and continuing operations for this multi-county project. A one-sided "leveraging" of funds is not prudent public policy.

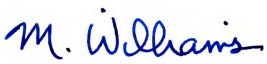
The "technical amendment" to the Valley Link project description is disingenuous if not misleading, and changes the conditions approved by voters.

The ACTC meeting materials from May 28th show the proposed project description only as it would be amended, without including the carefully negotiated original terms – approved by the voters – that are proposed for omission or change now. The excerpt below tries to more transparently and concurrently portray the full language under consideration (with additions underlined and deletions ~~crossed out~~). Commissioners are urged to please seriously consider what is intended by the changes, and what might be unintended consequences.

"~~BART to Livermore ($400 M)~~
Valley Link rail in Alameda County ($400 M)

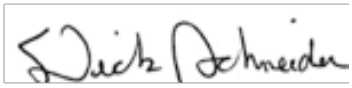
This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process."



Among other questions, what difference does the "initial operating segment" make to the proposal's potential draw on Alameda County funds? What criteria will be used to assess whether the initial operating segment "most effectively meets" the adopted project goals, and which agency will make that determination? When will "full funding commitments" be identified and approved for the full project? Please also explain why the references to "detailed" analysis and "all" alternatives are being deleted.

In conclusion --



For these reasons, the Sierra Club strongly opposes all of the proposed actions laid out in your Commission materials of May 28, 2020. We further urge no further consideration on these matters until our concerns have been resolved.

If you have any questions regarding these comments, or wish further information, please do not hesitate to contact Matt Williams at mwillia@mac.com .

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission (ACTC)
1111 Broadway, Suite 800
Oakland, CA 94607

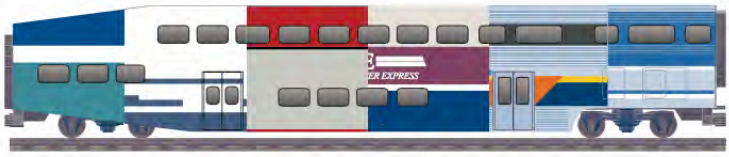
Dear Chair Cutter:

Subject: Support for ACTC Action to allocate $400 million in Measure BB funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority for the Valley Link Project

San Joaquin Regional Rail Commission (SJRRC) is a project partner and member of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority). The Authority is requesting that the Alameda County Transportation Commission (ACTC) take action to allocate $400 million Measure BB funding to the Valley Link Project that is currently identified for the BART to Livermore Project. This action is consistent with Assembly Bill 758 (AB 758), the Authority's enabling legislation. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between ACE and the BART system and the advancement of the Altamont Corridor Vision.

The Authority was created in 2017 by AB 758 for the purpose of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the ACE commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. An estimated 28,000 are projected to ride the Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

SJRRC urges approval of the ACTC Action to allocate $400 million in Measure BB funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority for the Valley Link Project. This action will ensure that the Valley Link project moves forward and it supports the Altamont Corridor Vision that SJRRC and the Authority are diligently working jointly to advance.



Sincerely,

Christina Fugazi, Chair
San Joaquin Regional Rail Commission

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Valley Link: TEP Amendment

A presentation to the Planning, Policy and Legislation Committee

September 14, 2020

Overview

- Project Background
  - BART to Livermore
  - Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA)
- Project Briefing: Michael Tree, Executive Director TVSJVRRA
- Draft 2014 Measure BB Amendment Process
- Comments Received
- Proposed Amendment

Rail in the Tri-Valley

- Long-standing commitment to rail service and connectivity
- **Planning and policy priority:** identified in state and regional rail planning
  - Alameda CTC Countywide Transportation Plans
  - 2007 MTC Regional Rail Plan
  - 2018 California State Rail Plan
- **Local land use planning:** Isabel Neighborhood Plan completed in May 2018 for development around a new rail station

2018 California State Rail Plan

Funding for Rail in the Tri-Valley

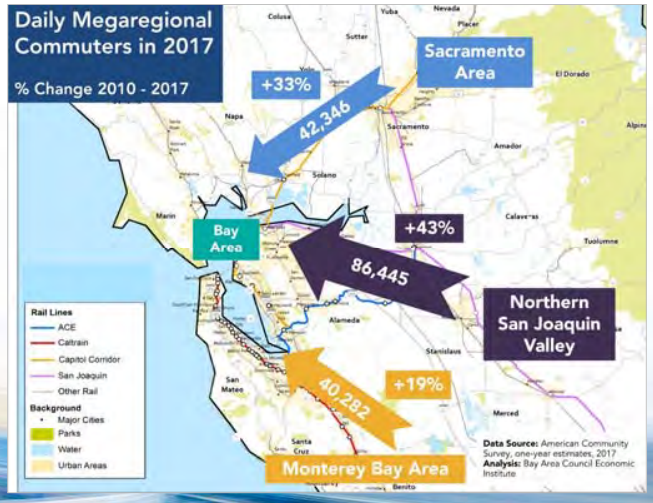
- **Financial commitment:** Voters consistently supported funding
  - 1986 Alameda County Measure B
    - $170 million for a "Rail extension to Dublin Canyon"
  - 2000 Transportation Expenditure Plan
    - $8.7 million for I-580 Corridor/BART to Livermore Studies
  - 2014 Alameda County Measure BB
    - $400 million for BART to Livermore
  - Regional Measures (RM)
    - RM 1 bridge toll funding to advance planning, environmental and design work
    - RM 3 (2018) included $100 million for Tri-Valley Transit Access Improvements

BART to Livermore

- 1980s: BART purchased a potential sites near I-580 and Isabel Avenue and Greenville Road to preserve land for extension
- 2010: BART completed a Program EIR evaluating station sites and alignments
- 2012: BART advanced conceptual engineering and environmental review of extension to Isabel Avenue
- 2017: BART released Draft Project EIR
- 2018: BART certified Final Project EIR and directed staff to not advance an alternative

Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA)

- Assembly Bill 758 created the TVSJVRRA for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County
- TVSJVRRA assumed responsibility to advance rail project in 2018 when the BART Board declined to advance the project
- TVSJVRRA leveraged significant amount of previous work:
  - BART to Livermore
  - ACE*Forward* planning and environmental work
- MTC Commission has included the Valley Link project in the Draft Plan Bay Area 2050



Valley Link

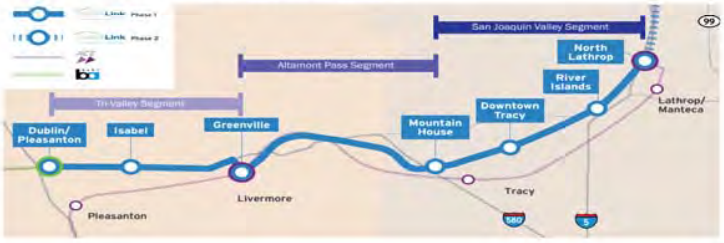
Valley Link Project



Proposed Project

Phase 1:
Rail service from the existing Dublin/Pleasanton BART Station to the proposed North Lathrop ACE Station, utilizing existing transportation rights-of-way where feasible.

Phase 2:
Rail service extended from the North Lathrop ACE Station to the existing Stockton ACE / San Joaquins Station.

Alignment

Rail service from Dublin/Pleasanton BART Station to the proposed ACE North Lathrop ACE Station, utilizing existing transportation rights-of-way where feasible. Development of the three segments in the Valley Link alignment, and future visionary and universal alignments in the Altamont Corridor separate from freight, will offer improved opportunities for future collaboration and unification for both ACE and Valley Link service.

Tri-Valley ⁂ San Joaquin Valley
REGIONAL RAIL AUTHORITY

9

Improving Statewide Connectivity

Key Policy Objective
Support the vision of California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link closes critical transit gaps and improves connectivity within the Bay Area Megaregion by connecting two designated State Rail Hubs and providing a connection to High Speed Rail.

10

Transit Oriented Development Policy

ADOPTED DECEMBER 11, 2019

- Station area plans required that include zoning, design standards, parking policies and station access plans
- Station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within ½ mile radius of stations

Project Benefits to Alameda County

- Phase 1, D-P to North Lathrop: 33,000 daily riders in 2040
  - Tri-Valley Segment: 10,137
  - San Joaquin County Segment: 22,856
- Overall project benefits
  - Annual reduction of between 33,880 and 42,650 metric tons of GHG emissions in 2040
  - Reduction of approximately 570,000 average weekday vehicle miles traveled in 2040
- Alameda County benefits: 57% of mileage is in Alameda County

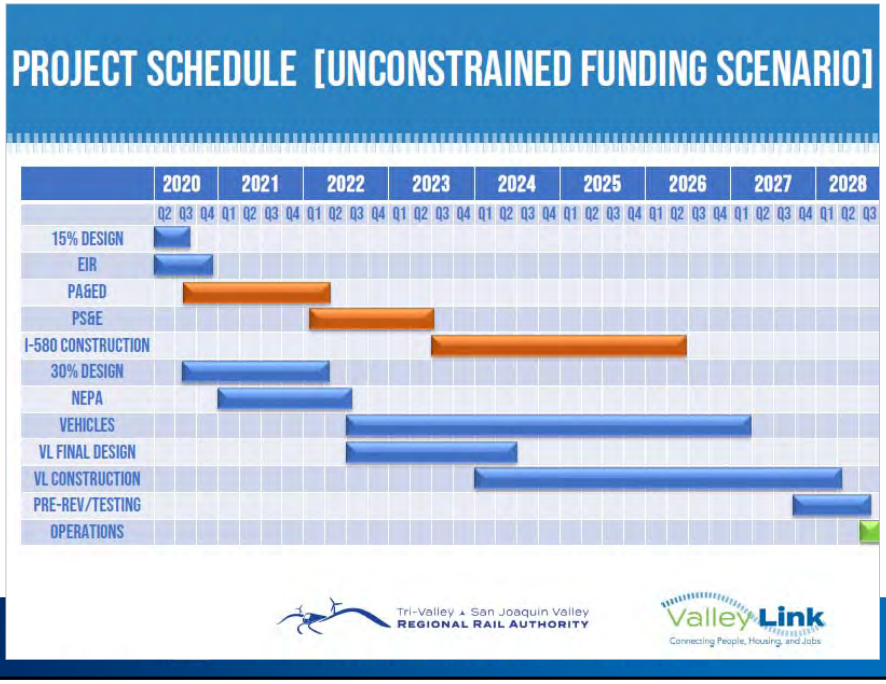
Project Costs

- 2020 Capital Cost Estimate (mid-point YOE)
  - Phase 1: Dublin Pleasanton to North Lathrop
    - $2.81 B to $3.18 B
  - By segment (mid-point YOE)
    - D-P to Greenville: $1.61 B
    - Greenville to Mountain House: $424.97 M
    - Mountain House to North Lathrop: $429.27 M
    - Segment costs exclude O&M facilities ($198.67 M) and Vehicles ($508.82 M)

Draft Funding Plan

Fund Source	Estimated Amount
Alameda CTC Measure BB	$400 M
Regional Bridge Tolls	$188 M
City of Livermore Impact Fees	$40 M
Tri-Valley Transportation Council	$40 M
City of Tracy Property Contribution	$40 M
TOTAL	**$708 M**

Additional Potential Sources



- San Joaquin COG exploring a 2022 Transportation Sales Tax that could contain the Valley Link project
- City of Lathrop impact/developer fees and tax increment financing
- San Joaquin Valley Pollution District
- State funding: TIRCIP or Congested Corridors

Potential Project Phasing

- Phase 1: D-P to North Lathrop
- Phase 2: North Lathrop to Stockton
- Project could be delivered in phases, including an initial operating segment. Options under consideration include:

Potential IOS	2025 Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

***Range based on various technologies under consideration**
****Costs do not include O&M facilities ($198.67 M) and Vehicles ($508.82 M)**
*****Includes Southfront station**

TEP Amendment Process

- TEP amendment process from the 2014 TEP
  - Amendments Require 2/3rds Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners
  - Comment Period: All jurisdictions within the County were given 45 days to comment
- Staff returning to Commission to report on the comments received

Comment Period

- Commission approved initiation of the comment period on May 28, 2020
- Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission on May 29, 2020
- Comment period ended on July 13, 2020
- Comments received by August 28, 2020 are included in the summary matrix of comments and responses included as Attachment D with the full comment letters included in Attachment E
- All comments received between August 29, 2020 and 5 p.m. on September 11, 2020 were distributed as Handout, Attachment F and posted to the Alameda CTC website

Key Themes - Support

- **Support:** Comments expressing support for the TEP Amendment focused on project benefits and the need for rail in the Tri-Valley
  - Fulfills a commitment made to the Tri-Valley to advance rail connectivity to Livermore
  - Assures Tri-Valley residents will benefit from the taxes they have paid
  - Reduction of over 99.4 million Vehicle Miles Traveled
  - Reduction of over 33,000 metric tons of greenhouse gas emissions per year
  - Support advancement of transit-oriented development
  - Protects open space
  - Supports businesses in the Tri-Valley by providing easy and convenient access
  - Provides an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues

Key Themes – Oppose/Concerns

- Timing of the amendment
- Inadequate public noticing
- Insufficient alternatives analysis
- Interest in other transit alternatives in the corridor
- Benefits to San Joaquin and not Alameda County
- How an initial operating segment would be determined
- Potential project impacts related to sprawl and interregional commutes
- Measure BB equity considerations

Timing of the Amendment

- Commenters raised concerns that the TEP Amendment is being rushed. Commenters stated that there is no valid reason to amend the TEP at this point in time, and that the amendment should be delayed until the project's Environmental Impact Report (EIR) is available and the impacts of the COVID-19 pandemic on sales tax revenues and transit ridership are better understood.

Response: Timing of the Amendment

- Overall timeframe
  - Initial request was submitted in September 2019
  - Demonstrating a local funding commitment allows projects to be more competitive when seeking regional, state and federal funding
- Environmental Impact Report
  - The project must meet specific environmental deadlines and comply with regional, state and federal requirements
  - The TEP does not require that projects have completed an environmental document or have full funding plans before being in the TEP
  - Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters
- COVID-19 impacts
  - Long-term travel impacts of COVID-19 are unknown at this time
  - Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues

Inadequate Public Noticing

- Commenters raised concerns that the proposed TEP Amendment was not noticed to the public or posted on the Alameda CTC website. Requests were made for more time for the comment period, and for all comments to be posted by the end of July.
- Response
  - TEP Implementing Guidelines for a proposed TEP Amendment requires a comment period for jurisdictions
  - Following the Commission's May 28, 2020 approval to initiate the comment period, Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission
  - Staff were directed to include the full set of comments received in the PPLC materials and distribute those in advance of the meeting per standard Commission processes

Insufficient Alternatives Analysis

- Commenters stated that there had been insufficient analysis of alternatives, with specific focus on further analysis of a bus alternative in order to determine if there are better, more efficient uses of the funding
- BART and other commenters raised concerns regarding ensuring full understanding of and eligibility for BART core system impacts as part of the project and potential uses of the $400 million
- A few commenters specifically referenced TEP Implementing Guideline #22 as a reason other projects could be eligible for the funding

Response: Insufficient Alternatives Analysis

- BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018
  - 2010 Program EIR included analysis of 10 alignment alternatives
  - 2018 Project EIR included extensive analysis of four alternatives plus a no project alternative
- Valley Link Feasibility Report further evaluated alternatives and continues to do so as part of the environmental document
- TEP Guideline 22

Response: Other Transit Investments

- TEP Guideline 22
  - Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen…funding for that project will be reallocated to another project or program of the same type
  - The Valley Link project is a Transit project as is the BART to Livermore Project and it is at the Commission's discretion to act on a plan amendment to use these funds for transit purposes
- BART Core impacts
  - The TVSJVRRA has proposed to enter into an MOU with BART to address these future potential impacts
  - BART and the TVSJVRRA continue to work closely to fully identify and understand all potential impacts and benefits
  - Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project

Benefits San Joaquin County Not Alameda County

- Concerns were raised that Alameda County residents would not benefit from the project, but instead the project will primarily benefit San Joaquin County residents. In addition, concerns were raised that San Joaquin County has not committed funding to the project
- Response: Measure BB funds will only be spent on transportation improvements in Alameda County

Response: Benefits to Alameda County

- Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop.
  - 10,137 daily boardings in the Tri-Valley in 2040
  - 32,993 daily boardings in from Dublin-Pleasanton BART to North Lathrop in 2040
  - Annual reduction of between 33,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration
  - Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040
  - Approximately 57% of the project track mileage is in Alameda County
  - Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative

Response: San Joaquin Funding

- Funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment
- TVSJVRRA is working closely with cities in San Joaquin County, the San Joaquin Council of Governments (SJCOG), and the state to secure additional funding for the project
- In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including showing $163.9 million for the project in the plan from future measures and state funds
- SJCOG also contributed funding for the environmental document

Determination of Initial Operating Segment

- Requests for more detail on how an initial operating segment would be determined
- Response: the TVSJVRRA Board is considering potential initial operating segments in order to more quickly deliver service

Potential IOS	2025 Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

***Range based on various technologies under consideration**
****Costs do not include O&M facilities ($198.67M) and Vehicles ($508.82M)**
*****Includes Southfront station**

Potential Impacts to Sprawl and SB 375

- Commenters stated that the project will increase sprawl and further the distances between where people live and work. It was noted that this would violate the "inter-regional commuting" policy of Senate Bill 375 (SB 375) and Plan Bay Area
- Response:
  - SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations (MPOs) in the state of California
  - MTC Commission recently voted to include Valley Link in Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region
  - SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project
  - MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.
  - The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the advancement of transit-oriented development (TOD) in Valley Link station areas.
  - The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines

Measure BB Equity Considerations

- Commenters stated that the amendment would require the entire TEP to need to be reopened because it would dramatically change the distribution of benefits across the county. That would therefore require the basic allocation formula for local streets and roads to need to be reconsidered
- Response:
  - When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County
  - The $400 million was identified in the TEP for a rail extension in the Tri-Valley so the proposed amendment does not change the geographic distribution of the benefits of the overall TEP

Today's Action

TEP Project Requirements

- All implementing guidelines will be applicable to the project and project sponsor, similar to all other TEP projects
- Strict Project Deadlines: Each project will be given a period of seven years to receive environmental clearance approvals and to have a full funding plan for each project
- Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds, and includes local hiring requirements
- No expenditures outside of Alameda County

Proposed Changes

~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a ~~BART~~ Valley Link Rail Extension from the existing Dublin/Pleasanton BART Station within the Tri-Valley and Altamont Pass in Alameda County ~~I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

- Blue denotes new language added
- Red denotes language removed

Today's Action

- It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to:
  1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds;
  2) remove the BART to Livermore project and associated $400 million Measure BB funding;
  3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and
  4) make associated technical amendments.
- The Commission Plan Amendment Resolution recommended for approval is included as Attachment B and the proposed 2014 Measure BB Expenditure Plan redline markups and technical amendments are detailed in Attachment C.
- This is an action item and requires majority approval at the Planning, Policy and Legislation Committee (PPLC) and 2/3 of the Authorized vote for approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

RE: Valley Link Transit Rail Project

Dear Ms. Lengyel:

I am aware that the Alameda County Transportation Commission (ACTC) Planning, Policy and Legislation Committee is taking up an amendment to the 2014 Measure BB expenditure plan (item 5.1) at its September 14, 2020 meeting. As you know, MTC has long supported actions to build the Tri-Valley Link Project and has committed over $60 million dollars since 2018 to bring this project forward. Most recently, at our June 24, 2020 meeting the Commission discussed the project at length and acted to allocate $46.8 million to the Tri-Valley - San Joaquin Valley Regional Rail Authority for completion of 30% design, environmental review documents and for various operations and technical reports/studies on the Valley Link project. The action your committee is contemplating to amend the expenditure to direct $400 million to the project is an important part of the overall financial plan for the project.

As well, the Valley Link project is featured as a higher preforming, early implementation transit expansion project for inclusion into Plan Bay Area 2050. MTC approved the transportation element of Plan Bay Area 2050 that included Valley Link, in July. Known as the 'Blueprint' at this point in the process, the Joint MTC Planning/ABAG Administrative Committee took action on Friday, September 1, 2020 to forward Valley Link among other projects, as part of the larger transit investment and GHG reduction strategy to the Commission and ABAG Executive Board for their approval this month.

When integrated with the Plan Bay Area 2050 Regional Growth Forecast the Blueprint will be further analyzed this fall in advance of approval of the Preferred Alternative for the Plan Bay Area 2050 EIR.

Please contact me if you have further questions.

Sincerely,

Therese W. McMillan
Executive Director, MTC

cc: Scott Haggerty, MTC Chair

1. **Call to Order**

2. **Roll Call**
   A roll call was conducted. All members were present with the exception of Commissioners Carson and Valle.

   Subsequent to the roll call:
   Commissioner Carson arrived during item 4.

3. **Public Comment**
   There were no public comments.

4. **Consent Calendar**
   - **4.1. Approve July 13, 2020 PPLC Meeting Minutes**
   - **4.2. Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments**
   - **4.3. Approve issuance of a Request for Proposals for Paratransit Coordination Services**
   - **4.4. Federal, state, regional, and local legislative activities update**

   Commissioner Halliday pulled item 4.4 from the Consent Calendar and asked if the Committee will receive a report on state legislative activities. Ms. Lengyel stated that more information will be provided at the September Commission meeting.

   Commissioner Ortiz requested an update on the stimulus bill in Congress. Ms. Clevenger stated that there is no movement at the federal level in terms of a COVID-19 relief stimulus or the transportation bill. A COVID-19 package, that did not include additional transit assistance or relief assistance, was discussed the week of September 7, 2020, but it did not advance. Ms. Clevenger noted that the extension of the FAST Act is an ongoing point of discussion, as is the upcoming federal fiscal year appropriation. Any updates will be provided at the Commission meeting.

   Commissioner Haggerty expressed his appreciation that the request for proposals for paratransit coordination services was coming forward and he suggested streamlining the process in order to get the funding allocated quickly.

   Commissioner Halliday moved to approve the Consent Calendar. Commissioner Ezzy-Ashcraft seconded the motion. The motion passed with the following roll call votes:

Yes: *Arreguin, Bauters, Carson, Cutter, Ezzy Ashcraft, Haggerty, Halliday, Kaplan, Pilch, Ortiz*
No: *None*
Abstain: *None*
Absent: *Valle*

5. Regular Matters

5.1. Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Tess Lengyel stated that staff is recommending that the Commission approve an amendment to the 2014 Transportation Expenditure Plan (TEP), following the Implementation Guidelines that are incorporated in the TEP. Ms. Lengyel stated that in September 2019, the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) submitted a request for an amendment. In May 2020, the Commission approved initiation of the 45-day comment period by jurisdictions in Alameda County, which ended in mid-July 2020. Alameda CTC staff documented and responded to all comments received from jurisdictions and the public as received by the packet mailout. Carolyn Clevenger summarized the comments and the recommended actions. Michael Tree, Executive Director of the TVSJVRRA, provided an overview of the project status and current funding. Ms. Clevenger recommended that the Commission approve the TVSJVRRA request for an amendment to the 2014 Measure BB TEP to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. It was noted that this is an action item and requires majority approval at the Planning, Policy and Legislation Committee (PPLC) and 2/3 of the Authorized vote for approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Vanessa Lee, Clerk of the Commission, informed the Committee that 37 public comment letters of support were received subsequent to the mail-out of the PPLC packet. Ms. Lee noted that Attachment F containing the 37 letters was emailed to the Commission in advance of the meeting and placed on the Alameda CTC website. She stated that the following public comment letters were received after the the mail-out for the PPLC meeting and noted that all letters were comments of support:

- Alameda County Board of Supervisors
- Alameda County Fairgrounds
- Assemblymember Bauer-Kahan
- Bay Area Council
- Building & Construction Trades Council of Alameda County
- California Automotive Retailing Group, Inc.
- CEMEX
- City of Pleasanton
- City of San Ramon

- Dublin Chamber of Commerce
- East Bay Economic Development Alliance, East Bay Leadership Council, Innovation Tri-Valley Leadership Group joint letter
- GILLIG
- Hacienda Business Park
- Innovation Tri-Valley Leadership Group
- International Association of Sheet Metal, Air, Rail and Transportation Workers Local 104
- International Brotherhood of Electrical Workers Local 595
- Livermore Valley Chamber of Commerce
- Livermore Valley Winegrowers Association
- MAG Trucking
- Marshall Brothers Enterprises, Inc.
- Northern California District Council LiUNA
- Pleasanton Chamber of Commerce
- Pleasanton City Councilmember Pentin
- Ponderosa Homes
- Robert and Cynthia Panas
- San Joaquin Council of Governments
- San Joaquin Regional Rail Commission
- Senator Steve Glazer
- Sensiba San Filippo CPAs and Business Advisor
- TopCon
- Trish Munro
- Tri-Valley Conservancy
- Tri-Valley San Joaquin Valley Regional Rail Authority
- Tri-Valley Transportation Council
- US Representative Eric Swalwell
- Wente Family Estates

The following public comments were heard during the meeting:

- Marc Roberts, City Manager for the City of Livermore – Support of staff's recommendation
- Guisselle Nunez, public relations, and on behalf of the Chancellor of Chabot Los Positas Community College – Support of staff's recommendation
- Evan Brennan, founder of the Tri-Valley Transit Coalition and a local teacher – Support staff's recommendation
- Mark Trista, on behalf of the Tri-Valley Conservancy – Support staff's recommendation
- Dan Levitt, San Joaquin Regional Rail Commission – Support staff's recommendation
- John McPartland, BART Director for the Tri-Valley Area – Support staff's recommendation
- Steve Dunbar, Livermore resident – Support staff's recommendation
- Jennifer, Livermore resident – Support staff's recommendation

- Linda Smith, City Manager for the City of Dublin – Support staff's recommendation
- John Belperio, representative of Northern California Carpenters Regional Council and The Building and Construction Trades Council of Alameda County – Support Staff's recommendation
- M. Santa Cruz, field representative and part of the Carpenters Union – Support staff's recommendation
- Regina, Livermore resident – Support staff's recommendation
- Mark Espinoza, field representative of pile drivers – Support staff's recommendation
- Candace, Alameda County resident – Support staff's recommendation
- Pat Piras, on behalf of the Sierra Club – Reinforced the Sierra Club comment letter included in the PPLC packet. She noted that the response in the packet is incorrect because it stated that MTC included Valley Link in Plan Bay Area 2050
- Val Menotti, Chief Development Officer at BART, noted that the BART Board has not taken a formal position and BART staff comments are included in the letter in the PPLC packet from General Manager Bob Powers – Support staff's recommendation

Commissioner Bauters stated that he understands the importance and significance of amending a voter-approved measure and his following comments were focused on the comments made by the Sierra Club and Bike East Bay in the comment letters:

- The insufficient comment period: Commissioner Bauters stated that the 45-day comment period is not the same process as an Environmental Impact Report (EIR). The jurisdictions and transit agencies have processes in place to provide comments within the 45-day period if they so choose and Alameda CTC does not get involved in their processes. The Commission directed staff to receive the comments from the jurisdictions and the public and to respond and place all comments/responses on the Alameda CTC website by September 2020. He noted that if the Valley Link amendment is approved, the Independent Watchdog Committee will review the project annually.
- Impact on the Direct Local Distribution (DLD) funding and whether or not the transit agencies in Alameda County will have a loss of DLD funding: Commissioner Bauters stated that this will not happen because Valley Link is not inserted in the DLD funding formula process with this amendment. The allocation of the DLD funding is specified in the TEP and a separate amendment would be required to the TEP to include Valley Link in the DLD formula. The DLD funds are protected.
- Why is there a rush to do this project and the suggestion to wait for the EIR to be completed: Commissioner Bauters stated that he would be concerned about the precedent that this would set. Each project has seven years from the first year of revenues to draft an EIR and there are 22 capital projects in the 2014 TEP and seven of the projects do not have an

EIR completed. To complete the EIR first would be putting Valley Link to a higher standard than other Measure BB projects.

- The $400 million in sales tax revenue: Commissioner Bauters stated that every prior measure has experienced a recession over the course of the measure, and Measure BB is experiencing one now. Alameda CTC has budgeted conservatively and historically has exceeded the anticipated sales tax revenue.
- Alternative projects in East County: Commissioner Bauters stated that BART went through an EIR for this project and decided to not do the project nor any other alternative. Valley Link is legally the next entity in line to develop and deliver a rail project. System integration is imperative between BART and Valley Link and some of the ideas that the Sierra Club brought forth could be addressed as the project design and analysis advances.
- Inconsistency with Sustainable Communities Strategy (SCS): Commissioner Bauters stated that this applies to MTC and that Alameda CTC does not approve Plan Bay Area 2050 (PBA 2050). The San Joaquin COG has approved the project as part of its RTP/SCS.
- What is the matching commitment from San Joaquin County and the initial operating segment: Commissioner Bauters requested that to ensure San Joaquin County is a partner, clarify that the initial operating segment is implemented from Dublin to Mountain House.

Commissioner Bauters stated that if the Commission moves forward with the project, it should include the clarifying language as part of the motion.

Commissioner Pilch commented that he's a huge fan of rail infrastructure and the fact that Valley Link will be zero greenhouse gas (GHG) emissions is great. He expressed concerns regarding mega-commutes, reiterated his worry about the incentive for commuting, and expressed concerns that the cities where people are commuting to are not creating housing. Commissioner Pilch also stated that the BART Board has not taken a formal position on the project and he noted that he is concerned with the change in the commute patterns due to COVID-19.

Commissioner Pilch asked why the 45-day public comment period was not extended and he questioned why the Commission needs to approve the request now. Ms. Lengyel stated that Alameda CTC followed the TEP Implementing Guidelines for the minimum comment period to ensure that jurisdictions had an opportunity to submit their comments and staff had an opportunity to review them. She noted that the comment period was approved by the Commission and staff felt the 45-day comment period was adequate for people to review the materials and submit comments to the Commission.

Commissioner Cutter stated that this project is final only if it meets all of the guidelines and requirements. She noted that should San Joaquin County not pass a measure or if other requirements are not met, Alameda CTC would then figure out what to do with the funds. Commissioner Cutter agreed to the clarifying language as proposed by Commissioner Bauters.

Commissioner Ezzy Ashcraft asked when the draft EIR will be released. Mr. Tree stated that the draft EIR will be released in October or early November of 2020.

Commissioner Ezzy Ashcraft expressed concerns about the long mega-commutes and the housing problems. Ms. Lengyel stated that in the Bay Area overall, the fastest growth area is in the East Bay with the highest-level residential growth occurring in the Tri-Valley. The TVSJVRRA has adopted a TOD policy, which is a similar policy adopted by MTC, and the cities are focusing on expanding and developing new Priority Development Areas (PDAs).

Commissioner Ezzy Ashcraft stated her concerns about the effect of the post COVID-19 landscape. Ms. Lengyel stated that the long-term effects of COVID-19 are uncertain and she stated that the agency has seen a rise in people using their vehicles and traffic is pushing towards pre-COVID-19 numbers.

Commissioner Halliday asked about the strict project deadlines and if a full funding plan for a segment to Mountain House would be sufficient, without having a full plan for every phase of the project. Ms. Lengyel said the funding plan requirement would be for the first phase, and if the clarification is added that would be for service to Mountain House at a current capital cost of approximately $2 billion.

Commissioner Haggerty stated that he supports the clarification and also supports going to Mountain House. He noted that it is appropriate and it saves the project approximately $100 million by not having to build an additional maintenance facility. He thanked staff and the Commission Chair and Vice Chair for the effort put into this project.

Commissioner Arreguin stated that he supports the clarification. He noted that it's important to reduce single occupancy vehicle trips and GHG emissions and this project will accomplish this. Commissioner Arreguin noted this project is important to the region and it moved to Tier 1 in the PBA 2050 because of its transformative benefits.

Commissioner Ortiz stated that she asked her AC Transit colleagues on how to vote on this amendment and they directed her to oppose the item.

Commissioner Bauters stated that the cities collectively do not do enough about housing and commented that Dublin is the fastest growing city in terms of providing housing in the last 10 years. He also noted that the EIR is not a threshold for moving forward with the project.

Commissioners Bauters moved to approve the staff recommendation and insert the clarifying language "… the initial operating segment, defined as from the Dublin/Pleasanton BART Station to the proposed Mountain House Station, that …"

Commissioner Halliday seconded the motion. The motion passed with the following roll call votes:

Yes:	*Arreguin, Bauters, Carson, Cutter, Ezzy Ashcraft, Haggerty, Halliday, Kaplan*
No:	*Ortiz*
Abstain:	*Pilch*
Absent:	*Valle*

6. Committee Member Reports
There were no member reports.

7. Staff Reports
Tess Lengyel stated that a full report on sales tax collection will be presented at the September Commission Meeting. She noted that the sales tax revenues are coming in stronger than anticipated.

Ms. Lengyel acknowledged Alameda CTC's Finance team on being awarded the Certificate of Achievement for Excellence in Financial Reporting for its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2019.

8. Adjournment/ Next Meeting
The next meeting is: October 12, 2020 at 11:30 a.m.

Ortiz: We move then to regular matters. The next one is approve Tri-Valley-San Joaquin Valley Regional Rail Authority request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Uh, colleagues, uh, this -- there will be a presentation and then I will move for first to receive public comments and then I will move with commissioner comments.

Lengyel: Thank you, Madam Chair. Um, I'll go ahead and start off this item. This item, as you noted, is, um, an action item and it's an item for an amendment to the 2014 voter approved Transportation Expenditure Plan following the implementation guidelines that, uh, are incorporated into the voter approved plan. Uh, in September of 2019, the Tri-Valley-San Joaquin Valley Regional Rail Authority, which is a public agency created by, uh, state law, um, submitted a request for an amendment, uh, back in September 2019. Alameda CTC and the Authority have been working together to understand, um, the effect of the proposed project on I-580, and to, um, understand the full overall project. In May, this item was brought before the Commission to release, um, for jurisdiction comment for a 45-day period for jurisdictions, as is directed in the 2014 TEP guidelines. That 45-day period, um,

was concluded in mid-July. And per the direction of the Commission, uh, staff accepted and documented and responded to all comments that were submitted both by jurisdictions, as well as by the public, and those comments are incorporated in your, uh, the memo and the agenda item. And this is an action item to recommend to the full commission the TEP amendment to, uh, add the Valley Link Project into the Transportation Expenditure Plan. I'm gonna turn it over to Carolyn Clevenger who, along with Michael Tree, who's the Executive Director of the Tri-Valley-San Joaquin Valley Regional Rail Authority, will provide you an overview of the project. Um, we'll go through the comments and responses to comments, and then present you with the recommended action today. So with that, I'd like to turn over to Carolyn Clevenger, our Deputy Executive Director of Planning and Policy. Carolyn?

Clevenger: Thank you, Tess. Uh, go ahead, next slide please. Rail service and connectivity in the Tri-Valley has been under discussion for a very long time. Um, from the planning perspective, rail improvements have been identified in a series of local, regional, and state planning efforts over the years. And cities in Alameda County and San Joaquin County have also been

doing local land use planning to focus growth around potential stations, including Livermore, which completed the Isabel Neighborhood Specific Plan in 2018. Next slide. Voters have made longstanding commitments that include funding for transit in the Tri-Valley dating back to the 1986 Measure B and the 2000 Expenditure Plans which included funding for rail, to the 2014 Measure BB Expenditure Plan that included $400 million for BART to Livermore. In addition, Regional Measures 1 and 3, which were approved by voters throughout the region included funding, some of which BART and now the Tri-Valley-San Joaquin Valley Regional Rail Authority have used to advance the initial phases of project development for the Valley Link project. This included $46.8 million allocated by MTC in June of this year to advance environmental and design work. Next slide. As many of you know, BART was, for a long time, the lead on the project. Between 2010 and 2018, BART advanced a significant amount of planning and environmental work, including analysis of multiple station sites and alignments, as well as different rail technologies and express bus alternatives. That work culminated in May 2018 certification of a project level EIR. After extensive discussion and debate, the BART board

finalized the EIR without selection of a preferred project to advance. Next slide. As Tess mentioned, in 2017, the legislature approved AB 758, which created the Tri-Valley-San Joaquin Valley Regional Rail Authority, for the purposes of planning, developing, and delivering cost-effective and responsive transit connectivity in the Tri-Valley and San Joaquin County. When the BART board voted not to advance the project, the Authority, as defined in AB 758, assumed responsibility to advance the project. The Authority utilized a significant amount of work that had already been completed by BART, as well as ACE, to jumpstart their work. Uh, Michael Tree, the executive director of the authority will now provide an overview of the Valley Link project. Michael?

Tree: All right, I, uh -- I appreciate the opportunity to comment this morning. If we could go to the next slide, that'll work out perfect. All right, so, um, the first slide is, uh, a pre-COVID slide, obviously. Uh, and it's provided by the Bay Area Council Economic Institute. And, uh, in the slide, you can see the three primary commute sheds into the Bay Area. You'll note that the commute, uh, from the Northern San Joaquin Valley, which includes the, uh, Tri-Valley in the Bay Area is the largest of the three. In fact,

it's, uh -- it's more than twice the volume of the other commute sheds, and it's also growing at a higher rate. Um, an update to this slide, uh, I think is coming soon. It shows pre-COVID conditions, uh, just before March where the commute shed from the Northern San Joaquin is now approaching 100,000 commuters a day. Um, according to the, uh, Bay Area Council Economic Institute, the congestion on this, uh, commute shed is about to get much worse, with congestion anticipated to grow 75 percent between 2016 and 2040. And truck traffic, uh, much of which is going to and from the Port of Oakland, increasing 58 percent during the same time period. Next slide. Here's, uh, an illustration of the Valley Link system map. Uh, the first phra- -- the first phase, excuse me, is from the, uh, Dublin-Pleasanton BART station, which is on the left-hand side of the, uh -- the map. And, uh, it extends, uh, to the planned ACE North Lathrop station, so everything in solid blue. A second future phase, uh, would extend into Stockton. Uh, as noted, uh, Valley Link connects with BART at the Dublin-Pleasanton BART station, and with the ACE trains at Greenville, and the planned ACE North Lathrop stations. Uh, the first phase, which you see in the solid blue, is 42 miles long and features seven

stations. And you can easily break up the, uh, first phase of this project into three segments or rights-of-way, all of which are currently on transportation corridors, which will allow for a quicker, more efficient project delivery. The first section is from the Dublin-Pleasanton BART station to the Greenville station, which is just short. I- -- if you're look -- if you know your geography of, uh, climbing into the Altamont, uh, Corridor. Uh, within this, uh, 11-1/2-mile section, Valley Link, uh, travels a grade, uh, within the 580 median. The, uh, second section is a 12-1/2-mile Altamont section, and in this section, Valley Link operates on the former Southern Pacific Railroad right-of-way, which, uh, is part of the original Transcontinental Railroad, and is now owned by the County of Alameda. The third and, uh, final section is from the Mountain House station, uh, to the planned ACE North Lathrop station, and this section is 17-1/2-miles long and is within the Union Pacific Railroad, uh, right-of-way. The, uh, Valley Link trains are planned to operate throughout, uh, the day with 12-minute headways in the Tri-Valley during commute times. So, uh, residents boarding, uh, within the Tri-Valley will be meeting every BART train. Uh, Valley Link will feature 36-minute headways during the

off-peak. And beyond Livermore, the trains operate on a 24-minute free headway, uh, in the peak, and every 72 minutes in the off-peak. Uh, briefly speaking, the Valley Link Board, uh, is looking at three types of technology for the trains: hybrid diesel, uh, electric battery, which would feature catenary on the Altamont, and battery -- battery operation, uh, on the 580 section, and within the Union Pacific section, and we're also looking at hydrogen. Uh, lots of, uh, promising, uh, work being done with the hydrogen in regard to this project. So it's anticipated that the Board will select a zero-emission technology as they more -- more fully explore the, uh, electric battery and the emerging hydrogen. Uh, the Valley Link trains, if you're wanting to visualize them, uh, their appearances would be very similar f- -- f- -- uh, to the, uh, eBART trains. Next slide. So this slide is from the State Rail Plan. And improving statewide connectivity with rail is a high priority for the state. Although the State Rail Plan was created before the Rail Authority actually named the train Valley Link, so hence the name of Valley Link isn't, uh, per se in the State Rail Plan. The plan does describe, uh, frequent passenger rail service between the Stockton Hub and the Tri-Valley Hub, located at

the Dublin-Pleasanton BART station, uh, as you see in the inset of the map. And so, uh, Valley Link, uh, very much so is part of the, uh, State Rail Plan, and the state has a -- a very big interest in Valley Link as a Northern California mega-regional train system. Next slide. So in December of, uh, 2019, the Rail Authority adopted a transit-oriented development policy. Uh, the policy requires that station area plans be developed that includes zoning, design standards, parking policies, and station access plans. Importantly, the, uh, policy requires that station area plans meet or exceed a corridor-level threshold of 22 housing -- 2,200, uh, housing units within a half-mile radius of the stations, which is consistent with MTC's transit-oriented development policy. Currently, uh, TOD planning is underway at five of the seven Valley Link stations. The, uh, Isabel station in Livermore is a great example. Uh, here, the TOD planning includes nearly 4,000 homes within a half-mile of the station. Another example is the, uh, South Front station in Livermore. It's also being considered, uh, for a Valley Link station, and will offer another 35 to 4 -- 3,500 to 4,000 housing units within a half-mile of that station. Uh, the next slide. So, there -- there's lots of project benefits

to Alameda County with the Valley Link project. Of the 33,000, uh, rides a day estimated in 2040, more than 10,000 are riders, uh, in the Tri-Valley segment. Additionally, uh, Valley Link has a benefit of reducing between 33,880 and 42,650 metric tons of greenhouse gas emissions in 2040, uh, again, depending on the technology of the train that's selected. Uh, further GHG reductions will happen at communities -- as communities continue to, uh, engage in transit-oriented development around the Valley Link station. Uh, on average, there's a weekday reduction of 570,000 vehicle miles traveled that are attributable to the Valley Link project, and that's a, uh, 2040 number. And finally, I think it's, uh, important to have noted the majority of the Valley Link train system is in Alameda County. Uh, next slide. So slide 13, uh, features the project costs. Uh, in short, the full 42-mile phase one with the seven stations, the cost between, uh, two point eight-one billion and three point one-eight billion in the midpoint of the, uh, year of expenditure. And on this slide, I've also included, uh, a few cost estimates for the various segments of the Valley Link system, and, uh, I'll talk more about them in just a few minutes. Next slide. So this slide shows the, uh, funding sources that are

a high probability for the Valley Link project. The Measure BB funds, of course you are considering amendments, uh, for, uh -- for the Valley Link, uh, system today. The regional bridge toll funding, uh, that's been allocated to the corridor and available to this project. Uh, you can also see a total of $80 million in developer fees from the City of Livermore and the Tri-Valley Transportation Council that are anticipated. In addition to the, uh, 200-acre property from the City of Tracy for the operations and, uh, maintenance facility, which carries a value of $40 million. Uh, San Joaquin has, uh, been very active at identifying, uh, potential funding sources for Valley Link. Uh, in addition to the $40 million property by the City of Tracy, uh, which you see in the chart, they're planning for a potential transportation sales tax in 2022, uh, that would include the Valley Link project. Uh, the City of Lathrop is considering $86 million in developer fees and tax increment funding. And finally, San Joaquin Council of Governments has included Valley Link in their congested corridors planning, which could result in significant state funding. Uh, other potential, uh, funding sources, as noted in the slide, include funding from the state for, uh, their Transit and

Intercity Rail Capital Improvement Program or TIRCP. Uh, next slide. So the, uh -- the second to the last of my slides includes potential project phasing of Valley Link. Uh, we've already talked, uh, or discussed that, uh, phase one is from the Dublin-Pleasanton BART station to the ACE North Lathrop station. There's also opportunities to do an early phase one, or what's known as an initial operating segment or an IOS. Uh, the most likely initial operating segment is from Dublin-Pleasanton BART station to the Mountain House station. Uh, this IOS would provide for more than 11,000 rides per day in the initial year of service, and GHG reductions of up to 7,172 annual metric tons, uh, with a capital cost of just over $2 billion. The benefits of this IOS would be numerous, including the ability to build a permanent O&M fac- -- uh, operations and maintenance facility next to the Mountain House station. Uh, if you were to, or if the board were to choose an IOS to Greenville, for example, the authority would need to build a, uh, temporary O&M facility. Uh, building the permanent O&M facility would create more efficiency obviously, uh, when the trains are up and running, and also sustainability as the, uh, property includes space for solar generation that would power that O&M

facility. Uh, as mentioned, the IOS to Mountain House would also increase ridership, uh, GHG emission reductions, and increase the interest, uh, from the County of San Joaquin obviously, and the state, uh, and the -- and the, uh, federal government in funding the project. Next slide. So my last slide, uh, has a fairly detailed project schedule, uh, for Valley Link. Uh, I think the key milestones to keep in mind as you look at this schedule is the completion of 30 percent design in early 2022, uh, the beginning of construction as early as 2023, uh, using design build in -- in areas of the project, and then revenue service that could begin as early as, uh, 2028. And so that, uh, concludes my slides. And, uh, I'll turn the, uh, presentation back over to Tess and Carolyn.

Clevenger: Thank you, Michael. Next slide, please. And so now we will remind you, um, the overall amendment process just to bring everyone back up to speed on that, and then go through the comments that we received. Uh, since May, um, I'm sorry. Um, the amendment requires two-thirds vote of the full commission. In May, the Commission initiated the amendment process by opening the comment period, 45-day comment period for jurisdictions in Alameda County closed on July 13th. And today we'll report back on

the comments received. Next slide. Following the Commission's vote on May 28th to initiate the comment period, notice was sent to the governing boards of all cities, the county, and transit operators in Alameda County who are represented on the Commission. Comments received by August 28th are included in the summary matrix of comments and responses included as attachment D, with the full comment letters included in attachment E. All comments received between August 29th and Friday the 11th were distributed as a handout and email to the commissioners this morning as attachment F and posted to the Alameda CTC website. Next slide. The next four slides note the comments received as of September 10th. This table summarizes the public agencies that submitted comments. Um, we received comment letters from the AC Transit and BART general managers, as well as from one BART board member. We received comments from the cities of Dublin, Livermore, Pleasanton, San Ramon, and Union City, as well as the transit agencies LAVTA and the San Joaquin Regional Rail Commission, as well as the Alameda County Board of Supervisors, um, that submitted a letter of support. Next slide. The Alameda County Taxpayers Association and the Bay Area Transportation Working Group submitted -- submitted

letters opposing the amendment. Bike East Bay submitted questions, and the letters of support were submitted by Assemblymember Bauer Kahan, the Bay Area Council, the Building and Construction Trades Council, the California Automotive Retailing Group, Chabot-Las Positas College, and a joint letter of support was submitted by East Bay EDA, the East Bay Leadership Council, and Innovation Tri-Valley Leadership Group. Next slide. Letters opposing the amendment were submitted by Jon Spangler and the Law Offices of Jason Bezis. Letters of support were submitted by GILLIG, the Hacienda Business Park, Innovation Tri-Valley, Inter- -- International Association of Sheet Metal, Air, Rail and Transportation Workers Local 104, Laborers' Local 304, the Livermore Chamber of Commerce, Marshall Brothers Enterprises, Pleasanton Chamber of Commerce, and Ponderosa Homes. Next slide. Letters of opposition were submitted by the Sierra Club and the Train Riders Association of California, and letters of support were submitted by U.S. Representative Eric Swalwell, Robert and Cynthia Panas, Sensiba San Filippo CPAs, the Tri-Valley Conservancy, the Tri-Valley Transportation Council, and Wente Family Estates. In addition, since the commission item was posted and this presentation was

finalized, 15 additional letters of support were submitted. And I'm gonna read to you briefly the 15 additional letters of support came in from the Alameda County Fairgrounds, um, CMEX, the Dublin Chamber of Commerce, the International Brotherhood of Electrical Workers, Local 595, the Livermore Valley Wine Growers Association, MAG Trucking, Northern California District Council, LIUNA, Pleasanton, um, City Council Member Pentin, the San Joaquin Council of Governments, Senator Steve Glazer, Topcon, Trish Monroe, the Tri-Valley-San Joaquin Valley Regional, uh -- Valley Regional Rail Authority, as well as the MTC. Next slide. The support letters highlighted the benefits of the project and the need for rail, sorry, previous slide, and the need for rail in the Tri-Valley. Benefits cited included the reduction of vehicle miles traveled and greenhouse gas emissions, support for transit-oriented development, protection of open space, supporting the businesses in the Tri-Valley, and that the project provides an estimated 22,000 jobs during construction. Next slide, please. This slide summarizes the key themes repeated in comment letters that oppose the amendment, and/or asked questions about the amendment. I will go through each of these individually in the next series of slides. An

attachment D in your packet starting on page 47 of the PPLC packet details the comments and responses, um, to those comments received. Next slide. Commenters raised concerns that the amendment is being rushed and that it should be delayed until the environmental impact report is available. And concerns were also raised about the impact of CO- -- the COVID-19 pandemic on sales tax revenues and transit ridership. Next slide. The initial request to amend the TEP was submitted in September of 2019. The TEP does not require that projects have a completed environmental document or have full funding plans in place before being in the TEP. In fact, only four of the 21 main projects had completed their environmental document when the TEP was approved by voters. In terms of COVID, Alameda CTC is carefully monitoring the impact of COVID-19 as we discussed at this morning's FAC committee meeting, and the long-term travel impacts are unknown at this time. Next slide. Commenters raised concern regarding the comment period. Alameda CTC followed the TEP implementing guidelines requirement for a comment period for jurisdictions, which were all properly noticed. All comment letters received during the comment period and responses to those comments were posted on September 4th, and the

additional comment letters received were emailed out this morning. Next slide. This summarizes comments that were submitted regarding, um, alternatives, as well as other transit considerations. There were criticisms that there has been insufficient analysis of alternatives done for the project, questions regarding potential impacts to BART's core system, and comments stating that other projects could be eligible for the funding. Next slide. BART conducted extensive and alternatives analysis both in 2010 and in 2018, which Valley Link is further evaluating, um, both as part of its feasibility report that was completed last year, as well as part of the EIR that's under development and anticipated to be released this fall. Next slide. TEP guidelines states that if a project becomes undeliverable, infeasible, or unfundable, funding will be reallocated to another project or program of the same type. The Valley Link project is a transit project, as was the BART to Livermore project, and so it is at the Commission's discretion to act on a plan amendment to use the BART to Livermore funds for transit purposes. In terms of BART core capacity impacts, BART and the Role -- Rail Authority have been coordinating closely to fully identify all potential impacts and benefits of the

project, and the authority has proposed to enter into an MOU with BART to address potential future impacts. Next slide. A number of commenters raised concerns that Alameda County residents would not benefit from the project and instead would primarily benefit San Joaquin County. Uh, Measure BB funds will only be spent and are only allowed to be spent on transportation improvements within Alameda County. Next slide. The project benefits both Alameda and San Joaquin counties. Um, data from Valley Link, um, some of which Michael covered in the earlier slides, identifies benefits, um, to residents of the Tri-Valley and Alameda County, including over 10,000 daily boardings in the Tri-Valley. So roughly a third of the total boardings anticipated by 2040 would occur in the Tri-Valley, reductions in greenhouse gas emissions, as well as reductions in vehicle miles traveled. And the project helps support transit-oriented development in the Tri-Valley, including developments at the proposed Isabel Station and the new South Front Station, which is under consideration and for which the City of Livermore recently created a priority development area around. Next slide. Regarding funding, Measure BB shall only be used in Alameda County, and the amendment language before you

today notes that it will only be used for construction, and shall not be used until full funding commitments are identified for an initial operating segment. The Rail Authority is working closely with the San Joaquin Council of Governments and the state to pursur -- pursue additional funding for the project, which would be necessary for the project to be fully funded in advance. Next slide. There were questions regarding how an initial operating segment would be defined. The Rail Authority board is considering potential i- -- initial operating segments, as Michael discussed, to either Greenville or to Mountain House. Ridership for the alternative ending at Mountain House with two stations in Livermore, one at South Front and one at Isabel, has shown higher ridership numbers. Emissions vary based on the technology used, which is still being explored by the authority. Um, and the Rail Authority is considering advancing in IOS in order to more quickly deliver service. They do still anticipate service starting in 2028. So the 2025 year noted here is because the forecast and modeling work was done for 2025. Um, but I do wanna just clarify that the anticipation still would be, um, that service could begin in 2028. Next slide. Some commenters raised

concern around sprawl and if the project is inconsistent with SB 375. SB 375 is a state law that applies to regional transportation plans and sustainable community strategies that are adopted by MPOs in the state of California. So in our case, that's MTC and the San Joaquin COG, which are the two agencies that r- -- approve RTP SCSs, um, that are related to this project. MTC recently voted to include Valley Link in Plan Bay Area 2050's transportation element, which will be approved in final form next year. The project went through extensive performance analysis as part of Plan Bay Area 2050, and no concerns were raised by MTC as part of that analysis regarding the benefit co- - -cost performance of the project or consistency with the RTP SCS policies and goals. San Joaquin COG amended its RTP this last year to add the Valley Link project to its, um, RTP. The Rail Authority has adopted transit-oriented development policy, um, that mirrors MTC's Resolution 3434 guidelines. Next slide. Questions were raised regarding if the amendment would change equity considerations in Measure BB. The $400 million was identified in the TEP for a rail extension in the Tri-Valley, so the proposed amendment does not change the geographic distribution of the benefits of the

overall TEP. Next slide. So today's action. Uh, next slide. All of the TEP project requirements that apply to all projects in the TEP would apply to the Valley Link project. This includes strict project deadlines. So seven years after the approval of any amendment, Valley Link would need to have received environmental clearance approvals and have a full funding plan in place. All recipients of funds allocated in the expenditure plan are required to sign a master funding agreement, which details their roles and responsibilities to spending sales tax funds and includes local hiring requirements. And no expenditures are allowed outside of Alameda County. Next slide. This slide details the proposed amendment language. Blue denotes new language added and red denotes language removed from the TEP. Next slide. So for today's action, it is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority request for an amendment to the 2014 TEP. To one, acknowledge the Rail Authority as a new agency in Alameda County that can be an eligible recipient for Measure BB funds. Two, to remove the BART to Livermore project and the associated $400 million in Measure BB funding. Three, add the Valley Link project with $400 million in

Measure BB funding. And four, make the associated technical amendments. The Commission Plan Amendment resolution recommended for approval is included as attachment B, and the proposed 2014 Measure BB expenditure plan, red line markups, and technical amendments are detailed in attachment C. This is an action item that requires majority approval of the PPLC Committee, and a two-third approval, um, of the authorized vote at the commission meeting per the implementing guidelines of the 2014 TEP. So with that, I'll turn it back over to the chair.

Ortiz: Thank you, Carolyn. Um, now, as I said earlier, we're gonna, uh, do public comments first. So Vanessa, would you bring forward those who have signed up for public comment?

Lee: Uh, sure, so just to note for the committee members, following mail out of the PPLC packet, uh, 37 comment letters were received. A supplemental handout, um, attachment H includes the full, I'm sorry, attachment F, includes the full text of the letters and was distributed to the committee members this morning, as well as posted on the Alameda CTC website. The 37 letters were all letters of support for the TEP amendment and the Valley Link project. Uh, letters submitted include letters from the Alameda County

Board of Supervisors, Alameda County Fairgrounds, Assemblymember Bauer Kahan, Bay Area Council, Building and Construction Trade Council of Alameda County, California Automotive Retailing Group, CMEX, City of Pleasanton, City of San Ramon, Dublin Chamber of Council, uh, Commerce, East Bay Economic Develop Alliance, East Bay Leadership Council, Innovation Tri-Valley Leadership Group submitted a joint letter. Um, GILLIG, Hacienda, Innovation Tri-Valley Leadership Group, International Association of Sheet Metal, Air, Rail and Transportation Workers, uh, Local 104, International Brotherhood of Electrical Workers, Local 595, Livermore Valley Chamber of Commerce, Livermore Valley Wine Growers Association, MAG Trucking, Marshall Brothers, Northern California District Council, uh, Pleasanton Chamber of Commerce, Pleasanton Council Member Pentin, Ponderosa Homes, Robert and Cynthia Panas, San Joaquin Council of Governments, San Joaquin Regional Rail Authority, Senator Steve Glazer -- Glazer, Sensiba San Filippo CPAs, Topcon, Trish Monroe, Tri-Valley Conser- -- Conservancy, Tri-Valley-San Joaquin Valley Regional Rail Authority, Tri-Valley Transportation Commission, U.S. Representative Eric Swalwell, and Wente. Uh, you also currently have eight hands raised, um, for public

comment. Um, I'm gonna go ahead and, I don't know if you wanna take the commissioners' comments first, you wanna go ahead for public?

Ortiz: No, um, go with the public comments first.

Lee: Okay, I'm gonna go ahead and just call them one by one, um, and unmute. Um, Mark Roberts.

Roberts: Good morning. My name is Mark Roberts. I am the city manager for the City of Livermore. I wanna thank you for the opportunity to offer some comments this morning, um, on the proposed amendment. Livermore will have more than 10,000 boardings a day in 2040, with Valley Link, uh, having more than 74 round trips with a total of 33,000 boardings a day throughout the entire Valley Link system in 2040. Valley Link trains will remove congestion from the I-580 corridor in the Tri-Valley. Rejection and congestion on the 580 will create room for trucks traveling to and from the Port of Oakland, improving our overall economy. Valley Link trains, as you heard earlier, are planned, uh, to be zero emission. We expect the Board to act on that in the coming months, either electric or hydrogen. And as such, zero emission trains will be responsible for eliminating more than 40,000 metric tons of greenhouse gas emissions each year. The Bay Area is experiencing housing crisis that won't go away anytime

soon. Valley Link provides a catalyst for the City of Livermore to develop two TOD developments at stations that are likely to create over 3,500 homes and just over 4,000 homes, the 3,500 at the South Front Station and over 4,000 homes at the Isabel Station. Those homes just won't happen without a rail link. Um, they are built and designed to be essentially rail-centric, and to actually take advantage of a TOD. Um, buses or hitchhiking or any of the other proposals, um, won't ultimately result in those homes being developed in a compact transit-oriented development. In the Plan Bay Area 2050 plan, the Valley Link project was evaluated for cost and benefit to the region and scored, uh, among the highest of the rail projects analyzed. It is among the few transportation projects selected for period one of the plan. Um, the, uh, overall plan, uh, here is to deliver rail transit both within the Tri-Valley and connecting to the surrounding region, um, in a cost-effective manner. Um, essentially more cost-effective with the same level of service that we were getting from, uh, BART. Uh, it is a rail transit project, which is consistent with the overall, uh, intent of the, uh, ballot measure. Um, this not only moves things forward, it moves things forward faster, more efficiently, more effectively, allowing us to

move people and provide more housing within the region as desperately is needed. Thank you very much.

Lee: The next public comment is, um, from Val Menotti. Val, if you wanna go ahead and unmute yourself. Uh, I'm gonna come back to this commenter. I'm gonna, uh, go on to the next one. Uh, Guisselle, uh, Nuñez. Guisselle Nuñez.

Nuñez: Oh, uh, darn.

Lee: We can actually hear you if you --

Nuñez: Okay, okay, good.

Lee: Yes.

Nuñez: Thank you.

Lee: Okay.

Nuñez: Thank you. So thank you so much. You never know. So my name is Guisselle Nuñez. I'm the Director of, uh, Public Relations, Marketing and Government Relations for Chabot-Las Positas Community College District with you here this afternoon, Commissioners, on behalf of our chancellor and our board of trustees to, again, underscore the strong support for the Tri-Valley-San Joaquin Regional Rail Authority, uh, and the amendment for the 2014 measure BB TEP. As many of you know, our, you know, community college district serves approximately 29,000 students and more. Our employees and our students use public transportation to get to

and from their homes to our places of work. Our research shows that our public transportation usage average is about tw- -- 10,000 individual rides per month, and more than 500 of our students take the bus and/or other modes of transportation each business day. Of our total student population, 20 percent take classes at both campuses, at both Hayward and Livermore. Valley Link to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and the 880 and 580 corridors. So with that said, I think it's -- I think it's evident that for us, this is a key project to not only enable our employees to get to and from their homes to our, you know, different places of work, but also to help our students, uh, especially now, uh, which we need to be even more sensitive about equity and access to all of our students that really come from a number of places in the Tri-Valley and Alameda County. So with that said, uh, on behalf of the chancellor and the board -- and our board of trustees, we urge the Commission to consider the approval of Measure BB Transportation Expenditure Plan Amendments for Valley Link. Thank you so much.

Lee: The next public comment is, uh, from Evan Branning.

Branning: Good evening, or good afternoon. Thank you very much

for allowing me to speak. Uh, I wanna thank all of you for considering this amendment. Uh, my name is Evan Branning, and I'm a founder of the Tri-Valley Transit Coalition, formerly the BART to Livermore Coalition, and also a local teacher. There's already been a number of speak, uh, speakers, as well as comments, as well as, um, the public, um -- the public comment period that mentioned all of the reasons why Valley Link is the right project to fulfill the promise that Measure BB made. It is absolutely the way we should go, is with Valley Link, um, and I'm strongly in support of this. But I mainly wanna speak as a teacher. As a teacher, I'm seeing more and more that my coworkers have to move further and further east. It is becoming almost impossible for a new teacher to find housing anywhere in the region. And Valley Link provides both a means of transportation for teachers who are forced to wor- -- to work locally and live outside of the area. Um, many of my coworkers live in the Central Valley. Many others are commuting from the Tri-Valley into the Oakland, uh, San Francisco area. Valley Link will help make their life so much easier by providing them a means of transportation to and from work to provide the education that our students so sorely deserve.

Additionally, because of the transit-oriented development attached to Valley Link, it will provide housing options for teachers to live locally in their communities. Many of our new teachers simply do not make enough to even rent in our -- in our communities. This is an opportunity to provide for them, as well as our first responders, as well as our essential workers. This truly is an excellent project. I am a hundred percent in support of this amendment. I thank you for taking it up, and, uh, I thank you for taking the time of making such a wonderful project.

Lee: Your next public comment is by Mark Trista.

Trista: Good morning, or good afternoon. This is Mark Trista, and I'm speaking on behalf of the Tri-Valley Conservancy. I'm on the Board of Directors with the Tri-Valley Conser- -- Conservancy, and I chair the Committee for Land Conservation. The Tri-Valley Conservancy's mission is to protect agriculture, plant and wildlife habitat, and scenic lands, while promoting opportunities for public recreation, agritourism, and wildlife protection. Since our founding 25-plus years ago, we have protected more than 40 -- 4,200 acres of agricultural and open-space land, together with connecting over 50 miles of hiking and walking trails. I'm speaking on behalf of our

board to say that we strongly support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority request to amend the 2014 Measure BB Transportation Expenditure Plan. This action will fulfill the commitment made to the Tri-Valley to advance rail connectivity to Livermore and the Tri-Valley, and support our economy b- -- by providing Bay Area workforce with a chance to have safe and affordable choices about where they can live and work. The quality of life it affords its residents is considered to be a large part of its competitive advantage. The growing congestion and skyrocketing Bay Area housing costs put this all at risk. Valley Link will provide an estimated 33,000 daily rides on the 42-mile seven-station system in 2040. This will result in a -- in the reduction of over 99.4 million vehicle miles traveled, and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gases -- gas emissions per year. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a half mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. In short, it is vital to our environment and the quality of life in

our communities, now even more vital to our economy, given the recovery of the needs we are now facing. Thank you.

Lee: The next public comment is from Dan Leavitt.

Leavitt: Leavitt, thank you.

Lee: Leavitt.

Leavitt: Yes, good afternoon. I'm Dan Leavitt. I represent the San Joaquin Regional Rail Commission. We are the owner-operator of the ACE Rail Service. And as reported by your staff, my agency has submitted letters of support for the approval of this item. I just wanted to highlight a few key points. The Rail Commission is working in partnership with the Tri-Valley-San Joaquin Valley Regional Rail Authority on the Valley Link project. Valley Link and ACE services are complementary services and are not in competition with each other. Our primary ACE services are serving Bay Area workers going to the South Bay, whereas Valley Link's primary markets connect Bay Area workers and residents to Oakland and San Francisco areas. ACE trains also run on freight rail track, which greatly limits the frequency we can run our ACE trains on. The Rail Commission urges the approval of the Authority's request for the -- for a 2014 Measure BB Transportation Expenditure Plan amendment. This

action will ensure that the Valley Link project moves forward, and supports the Altamont Corridor vision that our two agencies are working jointly to advance. Thank you very much for your time.

Lee: The next public comment is from BART Director McPartland.

McPartland: Thank you very much for, um, can, uh -- can the Board hear me? Commission hear me?

Lee: Yes, we can hear you.

McPartland: Okay. Uh, thank you very much for giving me the opportunity to speak. I am the BART Director for, uh, the Tri-Valley area, and the vast majority of my 130,000 constituents are within that area. And so I speak for, on behalf of them. And, uh, I'm responsible for their safety, welfare, and, uh, transportation. And as such, uh, I fully support, uh, this measure in order to be able to provide the transportation that is needed to reduce the greenhouse gases, uh, relieve the congestion on Highway 580, as well as provide to the, uh, housing, affordable housing for the population that will also end up, uh, being able to reduce the traffic that we have on that 580 corridor. Thank you, that's all I have.

Lee: The next public comment is, um, a phone number ending in 1600. Can you please make sure to state your name

and organization for the record? Uh, phone number ending in 1600. I'm gonna go ahead and go to the next comment. Uh, Steve Dunbar.

Dunbar: Hello, can you hear me?

Lee: Yes, we can hear you.

Dunbar: Great. Hello, committee members. Uh, I wear a number of hats these days, but I'm speaking solely for myself here as a resident of Livermore. I am asking for your support for Valley Link. I do this knowing the considerable discussion that has gone on around equity. I do this as someone who loves and actively works on transit buses. The staff report lays out the facts, but I focus here on my personal experience. I have personally seen the dedication Mr. Tree and the LAVTA team, Valley Link team have in providing the best possible project, having collaborated with him on a biweekly basis for the last few months on both the existing system and the future Valley Link project. Livermore staff has continued to improve the Isabel neighborhood plan in response to the feedback of the community with high quality transit-oriented development, not merely transit adjacent. They've already started to work on development agreement of the prime parcel and committed to protected bike lanes, better bu- -- bus access and bus signal

priority, and making sure a high amount of affordable housing comes from the value capture on that investment. Livermore has a significant low income population, and these communities tend to live in areas that will be accessible to both the pl- - -both planned Livermore stations without being under directive redevelopment pressure. Yes, we should continue to monitor the station area commitments of the San Joaquin cities as we move forward. Yes, we should make sure our communities understand that this money is being spent within Alameda County. Yes, we should continue to be cautious during and after COVID so that our system is fiscally sustainable. Nothing is perfect, and I will continue to improve this project. But to me, this project clears the cost benefit ratio bar with room to spare and room to continue to improve. It fills the Measure BB requirements and is a worthy project. I ask you for your support. Thank you.

Lee: The next public comment is phone number ending in 7965. Uh, please state your -- your name and organization for the record.

Jennifer: Hi, my name's Jennifer and I'm a Livermore resident. I've lived in Livermore since 2004 and would like the 400 million in tax dollars collected for BART to build

rail to Livermore be passed to a project that will alleviate traffic on our freeways. The Valley Link Rail project will provide a good alternative for commuters who currently use I-580 and will also assist in slowing air pollution. I feel it's very important to provide a transit link between BART and ACE, and I support the Valley Link project a hundred percent, and encourage you to approve the transfer of these Measure BB funds to the Valley Link project. Thank you for your time.

Lee: The next public comment is, uh, from Linda Smith.

Smith: Uh, g- -- good morning, this is Linda Smith, city manager of the City of Dublin. I'm calling in to just, uh, reiterate the City of Dublin's support for the staff recommendation. Valley Link, as you know, will have many benefits to Alameda County, including c- -- removing congestion on 580. Valley Link, uh, will help people who live in their communities, and freight movement in Alameda County will also see an increase over the next, uh, 20 plus years. About 58 percent increase, uh, on I-580 and Valley Link will help to reduce that conjection (sic) and create rooms for trucks traveling to and from the Port of Oakland. It's ironic to me that I'm bringing forward the city's climate action plan to the city council on Tuesday

night. Um, Valley Link trains will -- are planned to be zero emission trains and that's huge benefit to this region, and eliminating more than 40,000 metric tons of greenhouse gases emissions per year. It also will go a long way in assisting with our housing crisis. As you know, the Bay Area is experiencing, um, one of the most severe housing crisis across the country. Valley Link will be a catalyst for the City of Livermore, my -- my partners next door, to develop two TOD developments that will create up to 4,000 housing units within a half mile of this new station. It will further reduce greenhouse gas emissions to have this in place, and provide more variety of housing availability in the Bay Area for essential workers and those that can continue to live in Alameda County and have access to quality public transportation. And I think it goes without saying, but I will say it, that this pl- -- Valley Link project was evaluated for cost benefits to the region and scored amongst the highest of the real projects analyzed, and it was one of the few transportation projects that was selected for period one of the plan Bay Area 2050. I urge the Committee to support the staff recommendation. Thank you.

Lee: The next public comment is by John Belperio.

Belperio: Hi, can you hear me?
Lee: Yes, we can hear you.
Belperio: Hi, everybody. Uh, thank you for letting me speak. My name is John Belperio and I'm wearing two hats today. Um, I'm representing the Northern California Carpenters Regional Council on one hand, and then, um, I'm an executive board member to the Alameda County Building and Construction Trades Council. Um, we support, uh, taking the measure BB transportation TEP and moving it to the, uh, Valley Link project. Um, our members came out and we supported Measure BB. Uh, we precinct walked, we got the vote out, we phone banked. Um, a- -- and in hopes that one day those funds would be used on a project just like this. Something that's going to bring quality of life to, uh, not only our members, but all the folks that have been displaced over the last decade or two from the Bay Area. Um, it's no secret that housing is next to impossible to find in the Bay Area. It's expensive. People keep moving out towards the Valley. And those commute times are only getting longer and longer. Um you know, so there's -- there's a lack of quality of life for folks who've had to move out to the Valley and commute to the Bay Area every day. Um, you know, I -- I don't need to -- I don't need to even comment

on -- on, uh -- o- -- on how important it is to the environment. We see all the wildfires right now. We see what global warming is doing, what climate change is doing. A- -- and a project like this can, you know, help us do our part to try to limit that. Right now we have smoke in the sky, but what's it gonna look like in 20 years if we don't, um, get rid of all this exhaust? A- -- and this is a step in the right direction in doing that. Um, so again, the Northern California Carpenters a- -- and the Alameda County Building and Construction Trades fully support this. And we would ask all of you commissioners to support it as well. Um, it -- it's long overdue, this project. If built 20 years ago, it would have been half the cost. We can't afford to kick the can down the road any longer. We have to build this now, because if we wait another 10 years, it's gonna be even more to build. And the longer we wait, the more expensive a- -- and the less chance that it's even gonna get built. So please, let's do the right thing today. Let's move that money over to Valley Link. Let's get this built. Thank you.

Lee: The next comment in the queue is, uh, someone named M. Santa Cruz. Can you please state your name and organization for the record?

Cruz: Uh good afternoon. Can you hear me?

Lee: Yes, we can hear you.

Cruz: My name is Mario Santa Cruz. Um, I'm a field representative with Millwrights Local 102, which we are part of the Carpenter Union. Um, I don't live in Livermore. I do live in Stockton, but my office is here in Livermore. So I commute every day to Livermore. Um, I go to lunch here in Livermore. I spend my money in Livermore. I do my purchase in Livermore, uh, Christmas, year round. And not only that, my daughter is a college student in Livermore and she commutes here and she works in Livermore. Um, she's 22 years old. I got a son that this year, he's 18. He joined the apprenticeship and he works in the Bay Area. So his commute, he has to live home at 3:30 in the morning because of th- -- th- -- the commute through the Altamont. So this is, you know, as a family member, I see an advantage for me, my kids, and everybody around me. I represent over 30,000 members in Northern California. And a lot of those members, they do the commute through -- throughout th- -- the Valley a- -- and the Altamont. So th- -- the benefit for this is -- is amazing. It's gonna be amazing. I'm in support of the Tri, uh, Valley -- Valley Link. Just 'cause, um, you're gonna be able to spend more

time -- time with your family, have a better quality life, and you're gonna remove, uh, th- -- the pollution in a great, great, um, amount. So I'm in support of the Valley Link. Thank you for your time. I appreciate it.

Lee: The next public comment is from, uh, we're going back to Val Menotti from BART. Val, you're gonna need to, um, unmute yourself. Uh, I'm gonna go to the next public comment in line. It's a phone number ending in 6510. Uh, can you please state your name for the record?

Regina: Hi, my name is Regina. I live in Livermore, and my husband and I have been paying taxes to support -- support getting commuter rail into our city. We support the Valley Link project, and we're very anxious to see this get off the ground. Please vote yes so that we can benefit this before we retire. Thank you for your time.

Lee: The next public comment is from Pat Piras.

Piras: Trying to -- okay.

Lee: Uh, yes, we can hear you, Pat.

Piras: Okay. Thanks, sorry. Um, Pat Piras (inaudible - 02:23:43) Club.

Lee: Pat, we're having a really -- Pat, I'm gonna interrupt you. We're having a really hard time, uh, hearing

you. Uh, you may wanna speak really slowly. I'm gonna -- I'm gonna start you over, just 'cause we -- we missed all that beginning portion of your comment.

Piras: Okay. Can you hear me okay now?

Lee: Yes, but you may wanna speak really slowly. It's --

Piras: It's not in (inaudible - 02:24:19). Um, and if I speak slowly, I say less, so that's a good point. Pat Piras, on behalf of the Sierra Club.

Lee: Pat, I'm gonna have to interrupt you. We cannot, uh, you're getting really bad feedback. If you -- if you would like to --

Piras: Okay.

Lee: -- you can email me your comment, uh, Pat, and I can read it for the record.

Piras: How about I'll call in on -- on the phones, 'cause I think that --

Lee: Okay.

Piras: -- would be better.

Lee: Okay. Okay.

Piras: Okay, I'll be back.

Lee: I'm gonna go to the next public comment. Um, Martin Espinoza, Jr.

Espinoza: Uh, good afternoon, members of the Commission. Uh, my name is Martin Espinoza. I'm a pallet driver. I'm a field representative for the pallet drivers. Our

office is out in Oakland, California. Um, I am one of those commuters, one of those thousands of commuters that commute over the Altamont every day. I live out in Manteca, California. Um, I wake up every morning at 3:00 a.m. just to make it over the Altamont into the Bay Area on time for work. I do that commute minimum five days a week. Uh, so th- -- this project really hits home to me, especially having two -- two young children at the house with my wife and, uh, what that means, uh, to us as far as quality of life. Um, typically, when I clock out of work at 5:00 p.m., I'm looking at a two and a half hour commute just to get home. Now, think in mind, that's only a 60-mile drive for me, which turns into two and a half hours. That's -- that's without a bad major accident. Um, so definitely, just the toll of all these drivers that go over the Altamont, it's gonna -- it's gonna truly help out in a -- in a great way. I've been doing this commute for over 10 years now, and the Valley Link project is just what we need for the future of our residents and our commuters. Uh, with traffic becoming more congested every year, um, Valley Link will be exactly what we need moving forward, not only to mention how many more jobs this pro- -- this project will generate that pay great wages and

benefits. I see this a lot right now on the high-speed rail out in Fresno, uh, putting a -- a ton of residents that live in the area to work, and they're gonna be working on that project for the foreseeable future. So that's also a great thing to look at, not to mention, um, how much we're gonna cut down on the pollution in the area. I urge the Commission to highly consider, uh, the staff's recommendations in approving and helping fund this project. Um, I only see great things moving forward into the Tri-Valley, and, uh, hopefully we can get this project started, and we can stay -- we can start taking advantage of it. Thank you.

Lee: The next public comment we have in the queue is, uh, from a member with the name Valley Link Rail. Can you please state your name and actual organization for the record?

Candace: My name is Candace (ph). Um, I'm a resident of Alameda County, and I'm a huge advocate for public transit. Um, any project that will ease my commute to and from work, you know, um, it'll improve the quality of life, um, the air quality. I voted yes to pay more taxes so that I could see that happen, and the Valley Link project is trying to do that now. Um, I just urge you all to vote yes today on this amendment.

Thank you for your time.

Lee: The next public comment in the queue, uh, again is Val Menotti from BART. Val Menotti from BART. I'm gonna go ahead, uh, and go to the next public comment. It's a phone number ending in 7107. If you can go ahead and unmute yourself.

Male: So maybe Val doesn't know to hit star 9, or is it that, how do you unmute yourself on a phone?

Lee: Uh, well, we do have a caller from 7107 that looks like they're unmuted right now.

Piras: Okay, do you want me to try? This -- this is Pat Piras from the Sierra Club.

Lee: Okay, great. We --

Piras: Is this a better connection?

Lee: Yes, we can hear you, Pat.

Piras: All right, thank you. Um, you do have the Sierra Club comments in your packet, and I'm here to just reinforce them. Um, I think there should be a correction to the statements that have been made that, quote, "MTC has already included this project in Plan Bay Area." That's not quite accurate. Uh, the project has been moved into, well, it has always been in the blueprint, which will be evaluated as Plan Bay Area, uh, as the process proceeds. And it was moved into the first tranche, um, after, um, some

questionable financing assumptions that have not yet been approved by the Air Resources Board. So please take that comment with a pound of salt. Um, there are also major issues as to how this will affect inter-regional commutes as discouraged by SB 375. Uh, and, um, the building -- the settlement agreement between MTC and ABAG and the Building Industry Association needs to be carefully taken into account. But I want to really reinforce the comments in the Sierra Club letter that it's premature to act on this request at this time. Yes, it was requested, uh, over approximately two years ago, but there were problems that needed to be worked out before it was even brought to the Commission. Uh, th- -- the material you got today al- -- already gives multiple reasons to delay this action. The San Joaquin County won't vote on their tax measure until 2022. Why not wait and see if -- if our money is an incentive for them or not? The so-called BART MOU has not yet been agreed to. Let's see what that says and how it -- it -- it will potentially affect riders going to Hayward and Oakland and Berkeley. Um, further, the Commission itself doesn't have credible, uh, information regarding the sales tax availability. Sorry, that's a different -- different meeting. Um, so, um, the mater- -- you

know, comment 36 specifically says the response, AC- -
- ACTC has not developed a five-year sales tax revenue
projection given the large uncertainties about the
recession and lack of sales tax data. So please delay
this action. Thank you very much.

Lee: It looks like that is the last of the public comment.
I just wanna note for, uh, those callers who attempted
to call in and weren't able to, uh, use your sound or
audio, you can, uh, call into the meeting using the
phone number or you can send an email, uh, to me at V
Lee at alamedactc.org if you'd like your comment to be
submitted for the record. And it looks like we have
one more hand raised, um, as I say that. Uh, phone
number ending in 6235. Phone number ending in 6235.
Uh, we're -- we're -- we're not --

Menotti: Uh --

Lee: There we go.

Menotti: -- hi, this is, uh -- hi, Val Menotti, Chief Planning
and Development Officer at BART. Sorry for the
technical challenges here. Uh, in your package, you
have a letter from BART General Manager Bob Powers.
It's important to note that these are BART staff
comments, as the full board has not taken a formal
position. But BART staff supports the proposed
amendment, which will acknowledge Tri-Valley Regional

Rail Authority and Valley Link as eligible recipients for the $400 million from the BART to Livermore category. Uh, BART is working in partnership with Valley Link team now. Um, I would note it's essential that we consider the customer experience as the project is developed, as most of the new travelers will be transferring from the Valley Link line to BART to get to their final destination. To create a safe, seamless, and comfortable travel experience, it will be important that the project invest in creating an elegant transfer at the Dublin-Pleasanton station, as well as ensuring that normally crowded BART can accommodate these new travelers in Alameda County. We intend to continue to partner with Valley Link to ensure a successful project. And we'll be working with Michael Tree on an MOU to address capacity needs, funding, and other matters. Thank you for your time.

Lee: Uh, that caller concludes our public comment. I just wanna note for the benefit of the Commission and the -- those on the call that we also received a public comment letter from MTC this morning, which was mailed out to the committee members and is also posted on the Alameda CTC website. Uh, so with that, we do not have any more public comment. Uh, you do have one hand raised.

Ortiz: Yes, thank you, Vanessa. I will call Commissioner Bauters, since you have your hand raised at this moment. Go ahead.

Bauters: Thank you, Madam Chair and, uh, staff. This is a, um, this is a super important item. We're amending a voter initiative. Um, I think we all understand the importance of doing this, uh, correctly. And, um, I really wanna thank the staff and Chair Cutter in particular for the time we have spent over the last three months, um, in extremely deep conversation about this. Um, and I'm gonna do something I only did once back when I was the PPLC chair, and I'm gonna ask my commissioners to indulge me and allow me to lead with some, um, perhaps extended remarks. Because I think the important thing for us to do, um, having spent probably close to 100 hours as I have, um, with the Chair's support, diving into the details on these comment letters and working with staff, um, to ensure that we have full and complete answers and we can have a discourse that reflects the landscape. Um, I really appreciate all the support letters that came in and all the commenters today. But I really wanna turn my comments attention, um, to the questions and comments that were raised by the Sierra Club and Bike East Bay. Um, those are important stakeholders to myself as a

commissioner and I know to many of you as well. And, um, I wanna kind of just take a few minutes to go over some of the things that were raised in those letters. Um, I think Carolyn did a fantastic job with the portion of the presentation summarizing this. And this is not intended to, um, in any way try to supplant her presentation, but to just, it's so much in such a quick presentation, I wanna kind of just go through some of it in a little more detail if I could. So there -- there were eight things that were raised in comments that I think that we need to put our attention on I wanna give some brief comment too. Um, the first was questioning the period of length that we had for the notice, um, for the public process. And I think the staff have adequately described the fact that the 45-day period, um, we -- we had out there is something that the voters approved. Um, that notice actually goes to jurisdictions under the measure. It's not like an EIR. I think there is some misunderstanding, um, from the public about what this process is. This is not like a draft EIR process. Um, so member jurisdictions get to provide comment. And the ACTC, um, board and our agency, we have no say as to how agencies engage in that. So every city and every, uh, transit agency involved had their own

process for doing that. Um, but nevertheless, the Commission still directed staff to receive the comments from the public, um, to respond to the comments from the public. The staff presentation was responsive to the comments from the public. And we actually have been receiving and answering them, um, past the deadline that was set for those 45 days. Um, and we've been having those discussions here at the PPLC, and we'll have that discussion later this month at the commission meeting as well. Um, I would also just further note that, um, if this amendment is approved, the independent watchdog committee will review this project annually. Um, and so it will become part of the annual discussion. And, um, Pat, I know you're still listening. Pat is our -- one of our representatives on that committee. So there will be an opportunity to keep an eye on how this project progresses. Um, and so I just would say that the process, I think, has really, um, been diligently adhered to. Um, I know that there's always ways to improve process, but I -- I was one who's got a keen eye for that for the public, and is always looking for public to speak first. Um, really think the staff did a fantastic job with that. The second question that was raised was about the impact on DLD funding, and

whether or not, um, transit agencies elsewhere in our jurisdiction would have a loss of DLD funding because of competition for operating funds by Valley Link as a new agency. Um, that won't happen because, uh, Valley Link didn't s- -- seek an amendment to do that. The transportation amendment, or the transportation expenditure plan actually spells out our formulas for -- for DLD funding, and that hasn't been altered. Valley Link isn't inserted in that formula, and there will be no, um, allocations for ongoing DLD expenditures that would undermine BART or AC transit. Um, there would have to be a separate application for an amendment to do that. So those funds are protected. Um, the third thing was, um, the talk about why is there a rush, this is premature, um, and waiting for the EIR to be completed. I think it's important to kind of look at what kind of precedent we would set if we did this. Um, each project has seven years from the first year of revenue to both get environmental clearance and have a full funding plan. And under the way that's defined in our transportation expenditure plan, that date is December 31st, 2022. Now there are 22 projects under Measure BB, okay? And to this date, five -- five plus years into the plan, seven of them still do not have an environmental

document completed. In fact, when we began Measure BB, um, only three of them had an environmental document that was completed, and that was because that expenditure was part of a preexisting project. For example, um, the Warm Springs project included an EIR for Irvington. So th- -- there was only a couple of projects that had that. And so to require, um -- to require Valley Link to somehow have completed an EIR, um, before it's eligible for an amendment into the expenditure plan would be putting Valley Link, um, subjecting it to a standard that we didn't subject any other project to. Um, and it actually would create a potential problem for us in the future. Because as of December 31st of 2022, the rules say that if you haven't completed your environmental document, or you don't have a full funding plan, you can come to the commission and ask for a one-year extension. There is a possibility that projects in our cities are going to need to have a one-year extension. We haven't had that discussion because we haven't reached that point yet, but that's a possibility. And if we're not willing to let the Valley Link project in, which is undergoing an EIR right now, but if we're not willing to let that in, what is gonna be the basis we're gonna have for giving our own projects extensions in the

future when they will have had seven years to do it? So I think we have to be really careful about the precedent we set and the arguments we could create against other projects in the plan if we create a, um -- a premature requirement of Valley Link that isn't actually part of the expenditure plan. So I just caution about the precedent. The fourth item is about the $400 million in sales tax revenue. Um, and I really appreciate the, um, attention to the sales tax discussion. And as the budget chair in my city, I have a city that makes a third of its revenue off of sales tax, I have spent an inordinate amount of time reviewing sales tax and the trends. Um, and I think it's really important to note the history of sales tax, both for this -- for this agency, but then also how it plays out in the TEP. So first of all, as staff kind of went over, and I'm not gonna go through all the statistics, every one of the prior measures has seen a recession at some point. So the 86 measure had one in 19 ei- -- uh '92, and then it rolled into one in 2002. The 2000 expenditure started with one and had one when we had the great recession. And we're experiencing one now for the first time with Measure BB. We have budgeted conservatively for year over year increases in sales tax revenue. And despite

all of those recessions, we have always come out ahead of what was the anticipated revenue. Even in light of the potential COVID, um, pandemic being ongoing, um, the staff's, uh, calculations and estimations for sales tax were so conservative that we're still exceeding them. And we anticipate that we'll continue to exceed them. And in my own city, I can't speak for others, we have been exceeding what we thought COVID would do to our sales tax revenue. It is actually a pretty resilient, um, source of money if you budget conservatively around the revenue stream. And so th- -- that I don't actually think is a problem. But the other thing that's actually more important is the concern about, well, why would we spend $400 million on a project, um, you know, a- -- and approve this, uh, without, you know, knowing if we'll have 400 million? The 400 million doesn't cover the cost of the project. The $400 million covers the money that we put in as leverage to pull down all those federal and state and other grants that make the project possible. So the staff have been very aggressive in getting grants that match these types of funds. And the 400 million isn't intended to cover the whole thing. So even if it was to fall short in a hypothetical situation, it's still used as a match

drawdown to help finance the full project, which is why th- -- th- -- the concern, I think, while legitimate, doesn't reflect the reality as to how the sales tax measure will pay out. Um, the other thing I would say about this is that Valley Link's project funding is for construction. And that's a really important thing because it doesn't touch the environmental document review. It doesn't touch, um, the design completion and process that leads up to construction. It's for construction. So this money doesn't go out the door until those other -- those other things have been funded and regional and state entities put money and skin in the game. And that leads me to th- -- the next item, which is, um -- which is about, well, actually, I'm gonna come back to it in just a second. I wanna talk to you about wh- -- what I think still needs to be addressed. Um, but then there was a question about dedicating money to East County in the letter and whether or not it could be guaranteed for real. Um, it says transit is an acceptable use. And I think it's important to note that BART went through an EIR for this project. Um, BART considered alternatives. Those alternatives included, uh, bus and other things. And there was mixed results about the GHG and ridership values of

bus and rail. And in the end, they voted both not to do the project and they voted against the preferred alternative. And the reality is that state legislation was passed with AB 758 that basically made Valley Link the successor to continue the project. And Valley Link is doing that. So the -- the argument that we should be spending it on something else in the BART system, um, we don't actually get to address that because Valley Link is legally the next entity in line to be able to ask for this. I think it is important to also note though that some of th- -- the ideas that the Sierra Club put forward about fare gates and other things that would materially enhance and improve the system, BART actually has $90 million in Measure BB for capital enhancements and improvements. BART has never submitted a full funding plan or done an EIR for that $90 million. So BART has the ability to do things already with $90 million. And in addition to this, part of the project proposal that has to come out of the EIR and the development of Valley Link requires system integration. And so when Valley Link links up to BART, they actually have to do that MOU with BART to decide how they're going to link the two transit agencies at the station, which could include fair gates and other things that would make those

enhancements as part of this project anyway. So that gets me to the last two things that are on the list. Um, well, actually there's one more, sorry. There's the question about SB 375 in Plan Bay Area. It's a really important question. Uh, but the reality is that the Regional Transportation and Sustainable Communities Plan that was adopted by the state, that applies to MTC. I agree with Pat that, um, MTC hasn't formally approved Plan Bay Area 2050. And you could make an argument that it would be premature to approve this today in the absence of that. But the reality is that the San Joaquin COG has approved it, um, and that MTC's draft as to what would happen with Plan Bay Area 2050 recognizes that it's compliant with the guidelines and its goals for inter-regional mo- -- modality. So assuming that, you know, MTC doesn't completely change its mind, the reality is we'll have two neighboring COGs that both agree this is a priority investment and a priority regional transportation solution. That leaves two things in the -- in the letters that I think are worth noting that I do have a concern with. And those two things are what is the matching commitment from San Joaquin County, which is something I've discussed repeatedly as needing to be skin in the game, so to speak. And

the other is the language that we have before us today for the amendment, which has, um, what I think is a opaque, um, term called the initial operating segment. And I think the two things can be resolved together. And so I'm gonna actually ask with permission from the chair, if I could briefly share my screen. And do I have screen sharing potential now?

Lee: Uh, no, let me --

Ortiz: Yeah, sorry, I was mute. Go ahead.

Lee: Uh, can you go ahead and give it a try now, Commissioner Bauters and see if you're able to?

Bauters: Okay, I'm trying, here we go. Yep, so I -- I am proposing the following and I'll explain why. I'm proposing a clarification to the amendment. So not a new amendment, but just to clarify it. So we want us to have San Joaquin County put some skin in the game and have funding. And I think that the definition of, the lack of a definition for in- -- initial operating segment, I think Sierra Club is correct that that leaves open to chance how is this going to be defined in the future? The $400 million that we would be committing from our expenditure plan can't be spent out of Alameda County. It can only be spent on construction, which means the other funding has to come first, but it doesn't actually, you could in

theory build a project just to Greenville Road. Um, and I think, you know, the Chair and I had a lot of discussion about this and how do we ensure that San Joaquin County is a partner? Um, and I heard Pat say, for example, that, "Well, why don't we wait to see if they do a ballot measure?" And I think that inserting the following language, which I've highlighted in yellow is clarifying language, which defines the operating segment as at a minimum going to Mountain House, does -- accomplishes a couple of things. First of all, it guarantees that construction doesn't begin until the project goes all the way from Dublin to Mountain House. And in that circumstance, that means that San Joaquin County will necessarily have to pay for their portion of the rail. Um, additionally, on top of that, because there's that seven year requirement that all projects in our TEP have to have both a, um, full environmental clearance and they have to be fully funded -- have to have a full funding plan, this means that within seven years, San Joaquin County will have to have come up with how they're going to pay for this. But I also think it improves efficiencies. Because as was noted by the Valley Link presentation today, I thought it was helpful, um, we would have to build a temporary station to house a

rail yard somewhere in East County if we were going to do this. And Tracy and San Joaquin County have already identified and offered over 20 acres of land to do that. And so by getting us to Mountain House, we are nec- -- necessarily not having to duplicate the need for creating a new, um, rail station or rail yard. And we can use that as part of the initial operating segment, um, a- -- and how that is the first go round. So we'll -- we'll both have a guarantee that, um, San Joaquin County has to put skin in the game because this project couldn't get off the ground without them working on it. We are committing our partnership to this being a real, um -- a real inter-regional project and it eliminates the sentiment of tribalism. Like we can't, we -- our money is here and your money is there. This would be a real regional partnership that we would have. Um, but it would also alleviate the concern about ambiguity as to what is defined as this. And I would just note that as was presented today, the Mountain House station is identified in the EIR as one of the places they did statistics for. And it's the one that yields the highest GHG reduction and the highest ridership. So for those reasons, um, I -- I wanted to really take a moment because I think the public's comments about

this are really important to discuss, to have a real thorough discussion of. Carolyn did a great job, but I understand the pressure to present. I really am grateful to the Committee Chair for affording me the time to go through this, 'cause I think this is a super important thing when we have voter confidence. Um, and my request today, if the rest of the Committee's discussion, um, yields this, is that if we do move forward, I would ask that the clarifying language here be included in our motion today, because I think that is what presents the best project going forward. Thank you, Madam Chair.

Ortiz: Thank you. I think the next one is Commissioner Pilch. We cannot hear you.

Pilch: Uh, can you hear me now?

Ortiz: Yep.

Pilch: Had the old double mute. Um, thank you, uh, to staff for a, uh, robust, uh, presentation and, uh, a list of materials. Um, I think you did an excellent job of -- of collating that and -- and stepping up to, uh, collate not only the materials from the jurisdiction, but all public comments. And I think that was the right thing to do in any case. Um, I'm, um -- I'm -- I'm gonna take some time as well because I think this item th- -- uh, should take, uh, requires robust, uh -

-- robust discussion, uh on -- on both sides. Um, and I'm hearing a lot of cheerleading from one side. So I'm gonna, uh, take, de- -- be a devil's advocate and, uh, bring up some concerns that I previously brought up and expand on them. Um, so number one, this, I want, uh, I -- I -- and I thank staff also for answering my questions previously over email. Uh, and from what I understand, uh, once we vote on this or once the Commission makes the final vote on this, uh, this change is permanent until the project is deemed to be essentially dead. So, uh, once we vote, uh, to allocate the 400 million, it will be, it will -- that will be a permanent, uh, uh -- permanent thing. So th- -- the Committee a- -- and the Su- -- the Subcommittee and the Commission should know that. Um, I'm a huge fan of rail infrastructure. I think that, uh, a- -- and the fact that this one is going to be a zero emission is great. Um, so I -- I'm -- I'm not opposed to that. But, um, I am c- -- I do continue to be concerned that this does seem to be, uh, a way, and -- and it's even in the, um, executive director's presentation, a way to, uh, facilitate mega comm- -- mega commutes. Um, and although we might be impacted by mega commutes and we might have impacted roads because of that, um, I'm worried about the incentives,

uh, that this creates to enable mega commutes and to de-incentivize the housing production where we need it. Uh, this is -- I think this is a land use question, and, uh, we should not send the wrong signal that, uh, the areas where people are commuting to, or the cities, the jurisdictions where people are commuting to absolutely do need to step up and produce their housing. Uh, and so that is, uh -- that is one of, that's my -- one of my biggest issues with this is the signal that it sends, especially since it does seem like this is being, uh, fast-tracked somewhat. And let me talk about that in a second. Um, the -- I do, uh, you know, I do share some of the concerns from my, uh, environmental colleagues, not all of them, but some of them. Um, and, um, I do wanna note that BART -- the BART board has not taken a formal position on this, although we've had members of the board and members of staff, uh, comment on this. And I do feel like I don't want to dismiss at all the, uh, concerns and the -- of those who do have these large commutes and feel like the only way that they can afford housing is by living very far away from their jobs. And I think that's a shame. And I think we, as leaders, we need to fix that by building housing and affordable housing in -- in the right places. Um, so,

uh, getting back to, um -- getting back to the, uh, COVID and the current times, um, I am not -- so I'm not as much concerned with the sales tax revenue as I am with the commute patterns having changed dramatically now. Uh, no one has discussed this yet, but we're seeing lots of companies, uh, shut down their offices and not be, uh, housing people in offices and rather, or -- or not -- not, um, sorry, housing is the wrong word. Uh, people are not commuting to their offices. They're working from home and likely some of this change is to be permanent. So the effect on the commute, I think needs to be addressed. Uh, and also because of this -- this effect, which has happened right now during the time of COVID, I'm not sure why we have to -- to vote on this now. I think that more time would be, um -- would be appropriate. Uh, the -- a- -- and, uh, I think I'm gonna end up the last -- my last, uh, comment, which is a question for staff. Uh, staff has answered all my questions except for one. Uh, I understand that the 45-day comment period is, uh, prescribed by law as a minimum. And so my question to staff, which has not been answered is, why did we choose the minimum and not choose a longer period, uh, for public comment? That ends my comment and

question.

Lengyel: Thank you, Commissioner Pilch. We were, uh, following the TEP implementing guidelines for plan amendments, and wanted to provide what, uh, was at the minimum so that we could, uh, make sure that the jurisdictions had the opportunity to comment and, uh, provide comment to the Commission. There, uh, it was before the Commission for that 45-day comment period. And that is what the Commission approved at their May meeting. And therefore we went --

Pilch: I -- I under- --

Lengyel: -- forward with the 45-day comment period.

Pilch: -- I -- I understand the Commission could have, uh, asked for a longer comment period, but I'm asking why the staff chose the 45 days instead of a longer period.

Lengyel: We felt that the 45 days would be adequate for people to have the opportunity to review the materials and provide and submit comments into the Commission.

Pilch: Okay, thank you very much. That concludes my comments and question.

Ortiz: Thank you. Next, uh, Commissioner Cutter, President of the Commission.

Cutter: Uh, thank you for that, uh, President of the Commission. That's a good thing. Um, so first of

all, I just wanted to say, um, in terms of saying that this is a final vote, yes, it is final. But with this very item, we're seeing how we've adjusted from something we had in our TEP, um, being the BART to Livermore and how that wasn't going to be funded, so we've adjusted. So it is final as long as, um, you know, it doesn't, um, it -- it follows all the guidelines. But should something happen, should San Joaquin not pass their bond, um, there's many things that could happen. It's not like this money is lost to us or, you know, forever spent. We have certain requirements that are gonna be int- -- in this, um, vote. And as long as those requirements are met, yes, this money will go to that fund. If they're not met, then this money will return back to us and, um, we'll figure out, you know, what to do with it at that point where I probably won't be on the Commission, but maybe I'll write it in my comments or something if that should ever happen. Um, really, what I wanted to say is the, um, this is something that we're really, um, obviously, it's a very big project. It's something that's a visionary project, not, um, you know, those little exchanges that we do on a freeway or putting a bike lane here or there. It's something that we have to get together and look at a vision. And it's this

vision for what we wanna see, um, with our commutes and so forth going to happen, because, um, these big projects don't come along every day. So with that, it was a very serious problem. I mean, I -- I can't tell you how many hours we've spent in the last 45 days or so just really talking this out and so forth. And I think the clarifying language that is being proposed really gives me the confidence to say that San Joaquin will be in the game. Um, I was very worried that it would be something that we'd have an Alameda County leg. And then if they didn't put a bond measure on or didn't do some kind of other funding that we would be then forever kind of stuck with this short, abbreviated, uh, rail line, which to me, isn't my vision. My vision is to take this all the way out so we can bring people in from the Valley, because that's the reality. Um, if you look at San Leandro, we have -- we're building a 60-unit here and we're building a 200-unit there. But we're not talking about the kind of housing that is really needed, nor, um, is going to alleviate this, um, crisis that we're in, this housing crisis. All of the cities are working together, I believe at this point to bring housing in. But the reality is, there's a lot of housing out in the Valley that needs to come in to, um, the city for the jobs

that are created here. I don't like that, but that's reality. And so I'm trying to figure out how we look at that reality and then go forward. So one of the things that, um, we're talking about is having, um, you know, the -- a lot of people working from home and so forth, and I get it. And so that is something that we're all thinking about. Because just right across the street where my daughter lives, both they are now working from home where before one of them was commuting a lot. So what is that gonna look like? My other worry is as we put something like this in, it's gonna cause the housing in San Joaquin Valley and beyond to get so much more expensive, because now they have a way to come into the Bow- -- you know, to the Bay Area into this higher job market. So, I mean, I really had to balance those things in my head about what is the benefit of this project or not. And with that, by, um, you know, putting this clarifying language in to go all the way to Mountain House, I think that we've kind of bridged that -- that -- the worries that I had about this. A- -- and that's why now I'm in support of it, if we can pass this clarifying language. Um, I'm not so much in support if we can't guarantee it goes to Mountain House. Thank you.

Ortiz: Thank you. Next, Commissioner Ezzy Ashcraft? Unmute yourself. Yeah.

Ezzy Ashcraft: I did. Hi. It takes me a minute. Hi, every- - - hi everyone. Nice to see you. Um, thank you. Um, thank you everyone for your -- your comments and to staff for putting together, um, an excellent report, very, um, thorough. And I also appreciate the comments that I've just heard from my fellow commissioners. I too have some concerns, and, um, emailed with, um, both Tess and -- and Carolyn Clevenger about this. Um, and I've had some -- some of my concerns answered, but others not. So let me just, um, share them. The first does pertain to the draft EIR. I understand the argument that was made that, uh, we could be setting a bad precedent for other projects if we suddenly require that to amend a TEP or to be in a TEP, you must have your environmental report completed. However, the staff report that we are considering, um, today, um, states on page 19 that the draft EIR for the Valley Link project is anticipated to be released in fall 2020. We are sitting here in the middle of September. That sounds awfully close to fall 2020. I didn't ask for a specific date. But I would be interested to know from staff, what exactly do we anticipate the, um -- the,

uh -- the draft EIR being released on this one? Because in this case, it's not just a matter of asking for this project to be swapped into th- -- the TEP. It is -- it would be being substituted because a previous project was found to be undeliverable, infeasible, or unfundable. So wouldn't we want to know, wouldn't we be able to make a more informed decision if we at least saw the, um -- the draft EIR before this vote? 'Cause I -- I did not get an answer to my question, what -- what is the rush? 'Cause I -- I don't see any imminent deadlines or funding, um, streams that would be lost if we put this vote off until, um, fall 2020, whenever that is. So that's something that I, um -- I am concerned with. And, um, I -- I also concur with, um, Commissioner Pilch about the concern for just, um, enabling these longer mega commutes. And, um, it's rather heartbreaking to hear from the teacher from, uh, Livermore, but very eloquently stated, talking about how teachers are commuting in from the Central Valley. But, um, to the extent, and I agree with, um, Chair Cutter that this is a visionary project. Part of our vision needs to be, how do we address these problems? I -- I understand that we are the Alameda County Transportation Commission, not the Housing Commission.

But we all know that there's a strong connection to, um, housing and transportation and the opportunities that we are affording our residents. And we need to especially be mindful of our most vulnerable residents who aren't afforded opportunities because they haven't been able to live closer to the resources that help them, um, and their families, um, advance. And that's schools and work opportunities and grocery stores and recreation and clean air and all those good things. So what I'm wondering, um, and by the way, I wanna thank, um, uh, Vice Chair Bauters. Uh, I thought that was very inspired. You always inspire me, um, with your -- your thoughtful, deep dives into these, uh, projects. I very much, um, endorse th- -- the modifications you suggested to the resolution, Commissioner Bauters. But what I would like to know from staff is what more can we do to address the housing? Because we certainly don't want to be, um, to have as an unintended consequence of this project, this proposal, that we are just, um, facilitating more urban sprawl. We -- we need to add housing and closer in. So, um, those are my -- and then the BART, the other thing, the last thing I would say is notwithstanding the $90 million I'm told that BART has, uh, in the, uh, Measure BB funds, I still don't

want to support one project at the expense of another. And we all know all too well how our transit systems have suffered, um, during this COVID crisis. And there's still, um, well, it's gonna be a while before they're back up and running at full steam. So let's make sure we're not further disadvantaging BART. I understand there's an MOU being worked out. But I -- I would definitely want, um, strong support, to see some strong support for, um, the measures that, uh, the General Manager, Mr. Powers, um, addressed in his letter. And speaking of COVID, uh, 19, I agree with Commissioner Pilch. We all should be mindful that just because, uh, I am hopeful that in the next year, we're gonna see a lot of changes and we'll see some vaccines for COVID-19. It doesn't mean that we turn the clock back to, uh, 2019 and just go back to business as usual. We're already seeing, and, um, you know, around the world in places where the workforce has started to go back in larger numbers, like in Germany, people are not going back 100 percent to working a five-day work week. And so, um, that's the sort of thing that, well, you would expect a -- a draft EIR to be contemplating, although it might've been started, um, even before this was an issue. But, um, I would like to -- to hear, um, when staff

addresses us, um, what concern is being given, uh, to the COVID, the post-COVID, um, landscape. Um, thank you for allowing my comment.

Ortiz: Thank you. Next, Commissioner Halliday.

Halliday: Uh, thank you. Um, and thank, uh, thank you, John, for, uh, Commissioner Bau- -- Bauters for, um, a -- a really excellent summary and going through all that. And, um, I -- I really, uh, I do support this amendment, um, and I think have in the past. Um, uh, and I, did you actually move the item? And no, so is, um, can I -- can I make that motion?

Ortiz: Can -- can we wait as --

Halliday: Oh, okay.

Ortiz: -- until the commissioners finish talking?

Halliday: Okay. Sure, sure. Um, I would also support the language that he added. I think my questions revolve around, um, this, the strict project deadlines, um, paragraph. And I would like to hear further from staff about the short, um, well, I -- we can't have a short full assurance, but that the project is on, um, track to meet those, um -- those requirements. The, uh, and the draft environmental impact report would not be environmental clearance. It would have to be a final approved EIR, right? And --

Ortiz: Yes.

Halliday: -- okay. And then also, um, a full funding plan. So if we a- -- if we adopt, if we do adopt this resolution with Commissioner Bauters', um, proposed language, does that mean that the full, um, plan that we're talking about for this 400,000, uh, $400 million, um, that we're approving now, um, would be for strict, well, obviously it has to be spent in Alameda County. But would a full funding plan for, um, this project to go to Mountain House, then, um, without a full funding plan for the rest of it, would that suffice?

Lengyel: So Commissioner, the, um -- the language specifically says that the project would fund the first phase of the project in Alameda County. And we can only, as you know, fund, um, uh, project construction in Alameda County. And so what they're looking at in terms of the first phase in Alameda County, um, if that amendment is made to Mountain House, it would be for that.

Halliday: Right.

Lengyel: And -- and the cost of that is approximately $2 billion. So again, the sales tax measure is, um, as with all projects, a down payment for, uh -- for the project and is often, and is used and is expected to be used to leverage other funds.

Halliday: Okay, thank you. And that -- that does answer my questions. And I -- I think, uh, we know COVID is impacting commutes. But there are a lot of reasons for people to wanna move around the Bay Area. And we want them in the future to feel that they can move around the Bay Area, um, you know, without adding to greenhouse gas emissions or getting into a crowded freeway situation or making the commute, the -- the freeways worse. And I -- I fully support, um, connectivity by rail. I think our Commission supports it. And so anyway, I'm -- I plan to support a motion once one is made. Thank you.

Ortiz: Thank you.

Ezzy Ashcraft: Ms. Lengyel, could -- could you please go back and answer my question about when we can anticipate that the draft EIR will be released?

Lengyel: Yeah, Commissioner, um, Madam Chair, is it okay if I go ahead and answer all of Commissioner Ezzy Ashcraft's comments? I know you were trying to hear from all of the commissioners. What is your preference?

Ortiz: Um, I think that we should listen to all of them. And before I speak, please answer to Commissioner Ezzy Ashcraft.

Lengyel: Okay.

Ortiz: The next one on the list is Commissioner Haggerty.

Haggerty: Thank you, Madam Chair. I appreciate the opportunity to speak on this item. First of all, I wanna thank, uh, Commissioner Bauters, Vice Chair Bauters. Um, uh, it's always a pleasure to work with him. He always seems to be the adult in the room, the one that really studies and understands things. And, uh, I just, I can't appreciate this man enough. Um, having said that, first of all, let me -- let me get rid of the elephant in the room. Um, I -- I support the amendment. I think it's a better project. Um, I think, I'm, you know, I am not worried about San Joaquin P- -- County putting in skin in the game. Um, I know they're going to. Um, and so I -- I think that for us, uh, to say that we go to, uh, Mountain House is appropriate. Um, as Chair Bauters -- Vice Chair Bauters pointed out, um, the -- saves us, saves the project about $100 million in building a temporary facility. You know, when -- when you do these plans, and I also wanna thank Commissioner Halliday too. Um, again, looking at the region, 'cause I -- I can tell you there's many times I've sat here, countless times, probably more than two-thirds of the times I've sat here and voted for regional -- regional improvements, uh, up in the North County. Um, and, uh, you know,

you have to look at the entire region. And as Chair of MTC, I look at the entire region when I vote. Um, you know, I -- I think when you plan for these projects, you -- you -- you're planning for the future, um, and you're planning for what may come. Could you imagine if the planning wasn't done for BART in the fifties and we had 475,000 cars on the road pre-COVID? Sorry, we all have to say that. But by the time this project is on -- on the ground, COVID is not gonna affect it. We'll be back to 93 people -- 93,000 people coming over the Altamont. We'll be tripling the truck traffic over the Altamont. There's gonna be, uh, just so we understand, traffic is back here. It took me 50 minutes --

Female: It's true.

Haggerty: -- to get from Santa Rita to Greenville last Thursday night. Fifty minutes, Santa Rita, Pleasanton to Livermore. So it's already back. It's back because these are your laborers. These aren't people that work in office that can Zoom calls all day. You look at the, I -- I look at them every day. I'm sitting next to them. They're wearing orange vests. They've been up in our communities working hard, trying to build the housing, trying to build the office, trying to build our roads, trying to build transit. And then

they go home to San Joaquin County. They're your teachers, as you've heard. These aren't executives, okay? Although a lot of executives live out there because it's a nice place to live and that's why people live there. You know, we talk a lot about, um, a little bit, well, let me -- let me make this other point. So what I just said, the future is now. We're already late. We're already behind the eight ball and we really need to catch up. And that's what we're trying to do right now. We talk about this MOU with BART. I have no problem with BART. If we have to make station improvements, then so be it. I mean, that's -- that's just smart. But we're also, BART has, and we saw it the other day, BART has the capacity on their current trains that are running to accept the commuters that are coming in on Valley Link and transferring over to the BART train. They already have the capacity. That's capacity. They're running empty. So we're actually bringing them customers that will be paying to ride into their system. Um, but when we talk about this MOU, let's not forget that since the 1960s, Livermore has paid almost $400 million into the BART system. So it's not like we're a bunch of freeloaders here. We've been paying our taxes and we're coming forward now to try to build a

system that will work. Um, you know, there's -- there's many things that I think were addressed, but, um, I don't think we should wait. I think to continue to wait will put this project at a disadvantage. Um, I think that right now, MTC has this. I mean, Therese McMillan sent in a letter of support this morning talking about that this is a project that is gonna help us attain our greenhouse gas projects. And in fact, one of the highest scoring price -- scoring pri-- -- programs in Plan Bay Area 2050, one of the highest. It went through committee the other day, came out unanimous. So, and then we'll vote on it again, uh, later on this month. Um, we understand that as a region, this is important. We also understand that having housing was important. So one of the first things we did, oh, maybe a little bit more than a year ago, we adopted a program that is similar to A, uh, MTC's transit-oriented development, uh, station policy. And this was big for San Joaquin County, to be very honest with you, to talk about high density housing around transit lines. And they approved it. They now have to build high -- high density, uh, uh, housing around their transit stations if they want one. And in fact, some of the developers that are in that area are already responding and changing the way

they're thinking. So we understand about the high density housing. But I do find it a bit comical that the areas in which are building the housing, Dublin, Livermore, Tracy, we're saying, we're afraid they're gonna build housing. People, they're already doing it for you. Th- -- you're not building housing in your communities. You know? We're -- we're building it. Don't be afraid of whether or not the housing, that's just a rouge (sic). That's just trying to find a no. It doesn't make any sense at all. These people are already building the housing. So I -- I wanna thank those of the commissioners that are in support of this project. Um, I know there has been a lot of threats. And I know that there's been a lot of going back and forth. But quite frankly, um, I appreciate the fact that you will allow us to do what the voters voted on here. And that was to approve rail in the 580 corridor. This is what the voters, this is -- this is why they voted for it. And I think we have to honor that commitment. 'Cause if we don't honor that commitment, then I think we have to look at Measure BB in its totality and say, is it really working for the voters here? So, I think, um, I know Rebecca Kaplan often refers to us as the least dysfunctional agency in Alameda County. And I agree with that. At times

I've been chair of this organization. I've been very, very proud of it. And -- and unless you've been the chair, you -- I -- I think when you become the chair, you beca- -- you be- -- you -- you kind of love the agency just a little bit more. But let's not start following into, um, uh, dysfunction now. We can deliver a project that the region, the region, the nine Bay Area counties has voted and said, this is a good project. And we have been given the ability to go to the state and federal funding and to be able to fund this project. And I'm gonna guarantee you, there is no project in our TEP that has $700 million already assigned to it. So we're doing our job. And again, thank you for the commissioners that spoke in support. I really appreciate it.

Ortiz: Thank you. Next, Commissioner Arreguin.

Arreguin: Thank you. Well, there's another voice of support for the proposed amendment. And Supervisor Haggerty is always a tough act to follow, but I wanna thank him for his very eloquent comments to really frame how important this is for the region. Um, he's correct. I mean, we are already seeing traffic return. And prior to COVID, the 580 corridor was one of the most congested corridors in Alameda County. It's important for goods movement, as well as, uh, to connect people

to and from the San Joaquin Valley. We know that rising housing costs are pushing people further out of our region. And while we do need to create housing in Alameda County, we also need to think about how those people are gonna get to and from San Joaquin County, and how we can reduce greenhouse gas emissions to a- -- to address our, um -- our climate crisis. Our -- our planet is burning. Our skies are orange. Ash is falling from the sky. This is a real issue. And we need to take steps to reduce single occupancy vehicle trips now and to reduce carbon emissions. And this is one way we can do that. As the president of ABAG, the other agency working on Plan Bay Area 2050, I want to, uh, just reinforce what Supervisor Haggerty said. This was one of the highest scoring projects of all the trans- -- transformative projects that MTC had evaluated as part of our Plan Bay Area process. And, um -- and this was actually moved to the first tier because of the benefits that it's providing, as well as the fact that this project already has funding committed, a- -- aside from this particular amendment, to move towards design and to move to the next phases of the process. So unlike some other projects that were put forward, this one is -- is much more further along. And so if we're serious about reaching that 19

percent greenhouse gas reduction target, which we have to meet under SB 375, projects like this are critical. And expanding regional rail is one strategy in our Plan Bay Area document as a way for us to reach those greenhouse gas reduction targets. Um, it -- BART, as was noted, uh, by the comments from Val Menotti, um, did provide a comment letter raising issues around coordination. I know that they've been working very actively with the Regional Rail Authority, and they expressed support today for this particular amendment. So I think these issues can be worked out as the project moves forward. Um, lastly, I'll just say that when the voters approved Measure BB in 2014, they approved an earmark for rail in the Tri-Valley. And the project at that time was BART to Livermore. That project is no longer moving forward. This is the mo- -- th- -- at the present time, the only viable project to provide rail in the Tri-Valley. And this is critical to the state and regional rail plan, and critical -- a critical link, um, in our transportation network in the Bay Area that we should move forward. I feel we're honoring the commitment we made to the voters when we earmarked 400 thou- -- $400 million for rail in the Tri-Valley. And it's really swapping one project that isn't happening with the project that is

moving forward, and that already is -- has funding committed for design and planning, and is, I think, gonna be very important for us, um, to not only meet, uh, our greenhouse gas reduction targets, but also to get cars off the road and to improve goods movement in the county. So I -- I strongly support this amendment and urge my colleagues to do so, thank you.

Ortiz: Thank you. And I think that I will wait until the end, and I see John's hand, Bauters' hand, but if you allow me, I'm gonna comment. Um, as you recall, I said that I will ask my AC Transit colleagues, since they appointed me, since I represent them, uh, direction of how to vote on this amendment. Uh, well, at the last board meeting, I was directed to vote no on amending Measure BB. Among the concerns that were raised included that ACTC should wait until San Joaquin County comes up with the money to cement its commitment to moving forward, before AC2 -- ACTC approves the transfer of funds. As well as, um, concern about these, uh, funds benefited primarily San Joaquin Valley residents instead of Alameda County residents who are paying for the sales tax. John?

Bauters: Thank you, Madam Chair, for giving me an opportunity to speak, um, one more time. And I would just like, if my colleagues will indulge me, to just, um, offer

my thoughts, and then I know staff is probably gonna respond to some things. I know Commissioner Ashcraft had some outstanding questions still. Um, but I just wanna, I don't wanna delay it, but I just wanna point out a few things that I just, as people think about this, especially those who are on the fence or who are thinking they're a no, I just wanna point out a few things I heard. First, there was a lot of discussion about not wanting to incentivize people to move into the Central Valley, um, and housing out there. And are we exacerbating the problem. If you go back to the staff presentation on slide 8, you'll see that since 2010, there's been a net increase of 86,000 plus daily commutes into our county from people who live in San Joaquin. Now that could be because jobs are here that aren't there, which is one thing. That could be because education opportunities are here that aren't there. There is no CSU or Cal University in San Joaquin County. Stockton is the largest city in California without a university. Um, it could be because people have, um, moved out or migrated out because of cost pressures or displacement. Um, but the reality is like, I -- I really c- -- caution people against using causation as an argument here, um, th- -- the cause, to Commissioner Haggerty's

points, the causes already exists. Uh, people are already doing that. And, um, I will be among -- I will be among us as city leaders, like we don't do enough on housing. Um, and I'm like the guy who builds it on top of the building that's already there, right? But like we collectively don't do enough about housing. Um, and like, we have to kind of put the onus back on us. And Commissioner Haggerty is right. The fastest growing jurisdiction, one of the fastest growing jurisdictions in California for the last 10 years has been the City of Dublin. Um, the City of Dublin has added more housing than most of us have ever thought of adding. Um, and th- -- it's really important to note that the Isabel specific plan in Livermore, the City of Livermore has a transit-oriented development plan to add 2200 units of housing at Isabel. Um, and so this is -- this is not like it's being done in a vacuum. I appreciate the questions about housing, because the interrelatedness and intersection of land use for transportation and housing should be discussed together. I think that is necessary. Um, but I just think we have to put all the facts out there and not, um, be curious without answers as to, well, what's gonna happen or will this be done? Um, there are plans in Dublin and Livermore

to add even more housing when this comes online. Um, I think that that's really important. And then I think Commissioner Arreguin made a really salient point about climate change. I mean, that's the other nexus here is the environment. And the reality is that the longer we wait, the more we look like the fly in the ointment about what are we doing to get people out of cars? Um, I know Commissioner Pilch is as green as I am when it comes to environmentalism. And so I really appreciate your -- your consternation about this issue, Commissioner, um, as I did. I spent, as I told you, I mean, Tess talked to me for two hours on a Sunday yesterday to go over some of my very deep concerns about how to really mitigate some of these things. But the time for action is now. And my concern was saying, well, it's just another month for the EIR. What keeps us from waiting 'til October or November? The reality is that the EIR isn't a threshold for this conversation. And then what happens if someone chooses to appeal the EIR? Do we have to then wait for the appeal to be done? I mean, there's so much that could be delayed. But the truth is that if we put this in the plan, the seven year clock to get people to start financing it, our partners, the clock starts, right? And so we -- we

need to start the clock. We need to, a- -- and there's so much work Commissioner Haggerty and others have done at MTC and ABAG to move this along. And San Joaquin has already put it in their regional plan. And it's very apparent from MTC's letter this morning that they will do the same thing. So it's like, read the writing on the wall is how I feel a little bit about it. Um, w- -- w- -- we need to do this. This is a -- this is a GHG reducing endeavor. Um, and the reality is that whether we like people living there or not, Albany and Alameda and Berkeley and Hayward and all of us, we could build, you know, 10,000 more units of housing each and we still wouldn't get to the 86,000 unit, uh, people who are commuting in every day, right? So like we have so much work to do on both fronts. But to sit there and deny the geography of the Altamont Pass, which has no, we shouldn't be wanting to expand a freeway. And I don't vote to do that as you saw at the last meeting. I won't vote to do that, right? Like th- -- but the reality is like we -- we have an opportunity here to make a meaningful connection. It saves money by going to Mountain House. It puts the onus on San Joaquin to be a financial partner, right? I- -- it does all the things that, um, are, I think, legitimate concerns

about what is going to be the solution to this. And we get a clear path forward for environmentalists because the EIR will have to at a minimum go to Mountain House. We will have to see those GHG reductions. This does not change any of the state law or other existing ACTC guidelines that say we have to show that the project has measured successes in ridership, GHG reduction, and fiscal sustainability. So it still has to meet those things. Like this isn't --

Female: Thank you.

Bauters: -- like we're approving this and that goes out the window. Those things are all there. Um, and then just to the last comments that were made by the Chair, um, and I really appreciate her and her position, um, as an AC Transit member, you know, two things. One, San Joaquin putting money i- -- in the game. Um, I really care about AC Transit. It's probably my closest partner, um, in the -- in the county on things I work on in my city. And so the clarifying language I've proposed, um, will ensure that San Joaquin County puts skin in the game. And the second was, um, about San Joaquin residents being the primary beneficiaries. And I just wanna point one last statistic as my closing comments. Valley Link is 42 miles long, if it

goes from Dublin-Pleasanton BART Station, all the way to Stockton. The Alameda County portion of that is 24 miles, which represents 57 percent of the total mileage for this project. Okay? The Valley Link ridership is estimated at just under 33,000 people per day. The Alameda County portion is 10,000 people per day. So it's 30 percent of the total ridership. But when you look at the project costs as we got in the presentation today, if you go Dublin-Pleasanton BART all the way to North Lathrop, it's $3 billion, okay? And Measure BB, we have a $400 million commitment. So we only cover 13 percent of the total cost. If we go to Mountain House, it's $2 billion. The Measure BB commitment is still $400 million. That's a 20 percent cost. So even though we get 57 percent of the project miles out of this project, and we get 30 percent of the ridership, at most, we are only 13 to 20 percent of the cost. When we talk about our complaints with San Mateo and Santa Clara County for shoveling other obligations on us, this is actually a reality where the total cost for our county, in relation to what we get as ridership and mileage benefits of new track, is minimal. This is a win for us. And having a shared station --

Ortiz: Thank you.

Bauters: -- at Mountain House is a win.
Ortiz: Thank you, John. Tess, do you wanna answer some of the questions that were raised?
Lengyel: Sure. Um, I see you have another hand by Commissioner Haggerty, but, uh, I'd be happy to go ahead.
Ortiz: Okay. Uh, Commissioner Haggerty, do you wanna talk now, wait after, uh, Tess responds?
Haggerty: I am at your mercy, Madam Chair.
Ortiz: Okay, go ahead.
Haggerty: No, uh, actually, it's -- it's nothing. Um, uh, I -- I just forgot. I'm usually a little better at this, but, um, for some reason today, I am somewhat nervous. I think this is huge for the region. And, uh, it's been a lot of years put into this. But I -- I was remiss in thanking staff. I know that staff has put in a ton of work on this, a ton of work. And, um, it's been a real stress on them, you know, working from home, trying to put all this together. But I also wanna thank the Chair and the Vice Chair. Um, they have put in insurmountable work over the last month, mostly. I mean, they've been working on this for several months, but mostly this last month, usually when, you know, you're supposed to be taking August off, um, both the Chair and Vice Chair have been almost in daily contact with ACTC, trying to, you

know, get the answers to the questions that people are responding to. And I -- I just wanna take a minute and thank both of them. I mean, they're true regionalists, and -- and that's what's important. That's what makes us good as a region, when you have people that are leading you that look at the whole region. And I just wanna say thank you to, um, Pauline and John for all the work that you did also.

Ortiz: Thank you. Tess?

Lengyel: Thank you, uh, Madam Chair. Um, so I do wanna go back to the questions raised by Commissioner, uh, Ezzy Ashcraft. You had, uh, questions about housing, the COVID effect, and th- -- when the EIR is gonna be released. And I just wanna note that, um -- that in -- in the Bay Area overall, what we've seen is the fastest growing area in terms of res- -- residential growth is in the East Bay. And specifically in Alameda County it's in the Tri-Valley. And this is what we monitor on our performance report. And this is what we reported to the Commission, um, in January of this year regarding that -- that growth. And it's the highest level of residential growth is right there in the Tri-Valley. This project, um, has adopted, uh, or the Commission, the Authority, the San Joaquin, um, Regional, excuse me, the Tri-Valley-San Joaquin Valley

Regional Rail Authority has adopted a TOD policy, which is very similar to -- which is essentially the same, uh, policy as adopted by MTC, which requires high density development around each of the stations. And Commissioner Bauters noted those -- those numbers. Um, the cities, uh, are focusing, uh, on developing new priority development areas. Um, there was a new priority development area that was submitted to ABAG for a potential South Front station, and that was approved in February of this year by ABAG. So the -- so the -- the Tri-Valley is looking at expanding its areas of priority, uh, development and the connection between transportation, housing, and jobs. Um, I'd like to, um, ask Michael Tree, who's the Executive Director of, uh, Valley Link, if he could comment on the specific date of the EIR. He's, um, the project sponsor leading all the technical works. I -- I'd rather offer him an opportunity to answer the question specifically about the EIR. And if there's anything else you wanna add, uh, Michael, regarding the TOD policy and -- and the housing.

Tree: Right, uh, yeah. Uh, so the EIR is scheduled to come out probably late October, early November. And this is really important. We've been working with Congressman Swalwell and other congressmen who have

representation in the Valley Link, uh, project area and talking about a potential infrastructure stimulus bill. So obviously having these amendments approved will, uh, help us greatly in that discussion. Uh, I think the only other thing in regard to TOD, it's been brought up, you know, how important it is. The policy, uh, by the Valley Link board is 2,200 units within a half mile. The reality is all of the, uh, communities that are planning TOD currently have between 3,500 and 4,000 units being planned within that half a mile.

Lengyel: Thank you. And then the last question that you had, Commissioner, regarding, um, COVID, with, um, you know, it's too early to tell what the full long-term effect of COVID is gonna be. We have seen, uh, businesses, we have seen organizations respond by keeping people at home who are able to be -- to work from home. As you heard on many of the comments, and has been mentioned by, um, different commissioners, some people cannot work from home. Many of those who build, uh -- build things for us, um, are not able to work from home. What we have seen on the express lanes, I'll just give you a quick example. We, uh, on I-580, because of COVID, we stopped, uh, the express lanes operations in March. Within three months, the

traffic was up so high, back to like 89 to 90 percent capacity, we ended up reopening those lanes and we reported that to the Commission. And I think that's, um, true throughout the Bay Area we've -- is we've seen a significant rise in people using their vehicles, and we're seeing increasing congestion on our roadways. So, uh, again, we will continue to monitor on an annual basis. But at this point, our crystal ball is not clear enough to be able to give us the long-term outcomes of the COVID effect.

Ortiz: Uh, Marilyn, is that enough or do you have more?

Ezzy Ashcroft: I -- I just wanted to comment. I wanted to thank Mr. Tree for his, um, the information that he provided. Um, that -- that is a good point about, um, needing to talk to your congressman about, um, the federal infrastructure package, because certainly, um, many funding sources are going to be needed. And just for the record, I never mentioned a concern about San Joaquin County and worrying that, um, one county or another might be more advantaged by this project. We have to think regionally and, um -- and connect people and make it much more seamless for people to travel all over the Bay Area. I particularly appreciate the comments as well as yours, Mr. Tree, of my colleagues, um, uh, Commissioner Arreguin and -- and Bauters. Um,

and -- and I do appreciate, um, your -- your very, um, thoughtful and timely remarks, Commissioner Arreguin. You're right, uh, Ms. Lengyel, the reason your crystal ball may be a little foggy is the air quality is just so bad. Visibility is terrible, but -- but it is true. We, um, you know, our -- our governor has made the point that we are -- we are the living example of climate change and we are in a position to do something about it. So, um, thank you all. And then I will say, um, the reason that I think we are the least, um, dysfunctional agency, and it is a pleasure to serve with you all, is that, um, for the most part, we treat each other with collegiality and respect. And I, um, very much appreciate your informative remarks. Uh --

Ortiz: Thank you.

Ezzy Ashcraft: -- thank you.

Ortiz: Uh, Vanessa, let's call the vote. Oh, no, is there a motion?

Bauters: I was gonna say, I don't know what I'm doing. But I -- - I -- I will -- I will if, um -- if you will let me, Madam Chair. I would like to make a motion, but my motion will be to approve the staff, um, oh, let me find my motion. Okay, here's my love language. To approve the staff recommendation and the, um,

amendment language, but to insert as clarifying language. Um, so it's keeping the amendment as intact, but adding just clarifying language. After the, um, in the middle of the paragraph where it says for the initial operating segment, um, to add a comma and then add the words defined as from Dublin-Pleasanton BART station to the proposed Mountain House station, comma, and then, um, continue with the amendment as was in the staff report. That would be my motion.

Ortiz: Is there a second? Commissioner Halliday seconds. Um, Vanessa, would you call the vote?

Lee: Sure, so just for the record, that was a motion by Commissioner Bauters and a second by Commissioner Halliday. Uh --

Ortiz: Yes.

Lee: -- roll call vote. Commissioner Arreguin?

Arreguin: Yes.

Lee: That's a yes from Commissioner Arreguin. Commissioner Carson?

Carson: Yes.

Lee: That's a yes from Commissioner Carson. Commissioner Ezzy Ashcraft?

Ezzy Ashcraft: Yes.

Lee: That is a yes from Commissioner Ezzy Ashcraft.

Commissioner Halliday?

Halliday: Yes.

Lee: That's a yes from Commissioner Halliday. Commissioner Haggerty?

Haggerty: Yes.

Lee: Yes. From Commissioner Haggerty. Commissioner Kaplan?

Kapla: Yes.

Lee: That's a yes from Commissioner Kaplan. Commissioner Pilch?

Pilch: Abstain.

Lee: That's an abstention from Commissioner Pilch. Commissioner Valle has not joined the call. Commission Chair, Commission Vice Chair Bauters?

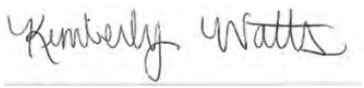
Bauters: Aye.

Lee: That's an aye from Vice Chair Bauters. Commission Chair Cutter?

Cutter: Aye.

Lee: That's an aye from Commission Chair Cutter. Committee Chair Ortiz?

Ortiz: No.



Lee: That's a no from Committee Chair Ortiz. Uh, the motion passes.

(End 03:40:08)

TRANSCRIBER'S CERTIFICATE

I, Kimberly Watts, do hereby certify that I have listened to the recording of the foregoing; further that the foregoing transcript, Pages 1 through 98, was reduced to typewritten form from a digital recording of the proceedings held September 14, 2020, in this matter; and that the foregoing is an accurate record of the proceedings as above transcribed in this matter on the date set forth.

DATED this 6th day of June, 2026.

Alameda CTC Commission Agenda
Thursday, September 24, 2020 2:00 p.m.

Due to the statewide stay at home order and the Alameda County Shelter in Place Order, and pursuant to the Executive Order issued by Governor Gavin Newsom (Executive Order N-29-20), the Commission will not be convening at its Commission Room but will instead move to a remote meeting.

Members of the public wishing to submit a public comment may do so by emailing the Clerk of the Commission at vlee@alamedactc.org by 5:00 p.m. the day before the scheduled meeting. Submitted comments will be read aloud to the Commission and those listening telephonically or electronically; if the comments are more than three minutes in length the comments will be summarized. Members of the public may also make comments during the meeting by using Zoom's "Raise Hand" feature on their phone, tablet or other device during the relevant agenda item, and waiting to be recognized by the Chair. If calling into the meeting from a telephone, you can use "Star (*) 9" to raise/ lower your hand. Comments will generally be limited to three minutes in length.

Chair:	Pauline Russo Cutter, Mayor City of San Leandro	Executive Director:	Tess Lengyel
Vice Chair:	John Bauters, Councilmember City of Emeryville	Clerk of the Commission:	Vanessa Lee

Location Information:

Virtual Meeting Information:	**https://zoom.us/j/96455839265?pwd=Q0ZMZElidTk0cFdIVWhCL2ZxNnUyZz09** **Webinar ID: 964 5583 9265** **Password: 256305**
For Public Access Dial-in Information:	**1 (669) 900 6833** **Webinar ID: 964 5583 9265** **Password: 256305**

To request accommodation or assistance to participate in this meeting, please contact Vanessa Lee, the Clerk of the Commission, at least 48 hours prior to the meeting date at: vlee@alamedactc.org

Meeting Agenda

1. Call to Order

2. Roll Call

3. Public Comment

4. Chair and Vice Chair Report

5. Executive Director Report

6. Consent Calendar **Page/Action**

Alameda CTC standing committees approved all action items on the consent calendar, except Item 6.1.

6.1.	Approve July 23, 2020 Commission Meeting Minutes	1	A
6.2.	FY2019-20 Third Quarter Report of Claims Acted Upon Under the Government Claims Act	7	I
6.3.	Approve Alameda CTC FY19-20 Year-End Unaudited Investment Report	9	A
6.4.	Award Request for Proposal R20-0008 for the Dublin Boulevard-North Canyons Parkway Extension Project	29	A
6.5.	Approve Contract Amendment for San Pablo Avenue Multimodal Corridor Project and funding agreement with Contra Costa County Transportation Authority and West Contra Costa Transportation Advisory Committee	35	A
6.6.	Approve actions necessary to facilitate project advancement into the construction phase for the I-80 Gilman Interchange Improvement Project and adopt a Resolution in support of right-of-way acquisition for the I-80 Gilman Interchange Improvement Project	49	A
6.7.	Congestion Management Program (CMP): Summary of the Alameda CTC's Review and Comments on Environmental Documents and General Plan Amendments	61	I
6.8.	Approve issuance of a Request for Proposals for Paratransit Coordination Services	63	A

7. Planning, Policy and Legislation Committee

The Planning, Policy and Legislation Committee approved the following action item, unless otherwise noted in the recommendations.

7.1.	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment	65	A

8. Public Hearing of I-580 Express Lanes Toll Enforcement Ordinance

8.1.	Open Public Hearing		I
8.2.	Presentation of the I-580 Express Lanes Toll Enforcement Ordinance	301	I
8.3.	Public Comment		I
8.4.	Close Public Hearing		I

8.5.	Waive Reading Beyond the Title and Adopt the I-580 Express Lanes Toll Enforcement Ordinance		A

9. Planning, Policy and Legislation Committee

The Planning, Policy and Legislation Committee approved the following action item, unless otherwise noted in the recommendations.

9.1.	Federal, state, regional, and local legislative activities update	319	I/A

10. Finance and Administration Committee

The Finance and Administration Committee approved the following action items, unless otherwise noted in the recommendations.

10.1.	FY2019-20 Sales Tax Revenues Update	325	I

11. Closed Session

11.1.	Pursuant to Government Code Section 54957: Public Employee Performance Evaluation: Executive Director		I
11.2.	Report on Closed Session		I
11.3.	Approve the annual performance evaluation of the Executive Director for 2020, objectives for 2021, and a salary adjustment pursuant to the approved contract	329	A

12. Commission Member Reports

13. Adjournment

Next Meeting: October 22, 2020

Notes:

- All items on the agenda are subject to action and/or change by the Commission.
- To comment on an item not on the agenda, submit an email to the clerk or use the Raise Hand feature or if you are calling by telephone press *9 prior to or during the Public Comment section of the agenda. Generally public comments will be limited to 3 minutes.
- Call 510.208.7450 (Voice) or 1.800.855.7100 (TTY) five days in advance to request a sign-language interpreter.
- If information is needed in another language, contact 510.208.7400.
- Call 510.208.7400 48 hours in advance to request accommodation or assistance at this meeting.
- Meeting agendas and staff reports are available on the website calendar.

ALAMEDA County Transportation Commission

1111 Broadway, Suite 800, Oakland, CA 94607 • 510.208.7400 • www.AlamedaCTC.org

Memorandum

7.1

DATE:	September 17, 2020
TO:	Alameda County Transportation Commission
FROM:	Tess Lengyel, Executive Director Carolyn Clevenger, Deputy Executive Director of Planning and Policy
SUBJECT:	Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Recommendation

It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request (Attachment A) for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to: 1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds; 2) remove the BART to Livermore project and associated $400 million Measure BB funding; 3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and 4) make associated technical amendments. The Commission Plan Amendment Resolution recommended for approval is included as Attachment B and the proposed 2014 Measure BB Expenditure Plan redline markups and technical amendments are detailed in Attachment C. This is an action item and requires 2/3 of the Authorized vote for approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Summary

The 2014 Measure BB TEP included $400 million for BART to Livermore. Since that time, a significant number of developments have occurred on the project and in the project area, as detailed in the Project Background section of this memo. The TVSJVRRA was created by the State Legislature in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

In 2017, BART released the Draft Environmental Impact Report for BART to Livermore. In May 2018 the BART Board voted to certify the Final EIR. The Board also passed a motion directing the General Manager to not advance an alternative, effectively passing over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley

Link. The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link.

The TEP amendment process, as detailed later in this memo, requires a 45-day comment period by jurisdictions in Alameda County. The Commission approved initiation of the comment period on May 28, 2020. Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission of a 45-day comment period regarding the proposed amendment, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy through the US Postal Service on May 29, 2020. The comment period ended on July 13, 2020. Comments received by August 28, 2020 are included in the summary matrix of comments and responses included as Attachment D; full text of the comment letters are included in Attachment E. Additional comments received for the September 14, 2020 PPLC meeting are included in Attachment F. Any comments received following the mailout of the Commission packet and up to 5pm on September 23, 2020 will be included in a handout provided to the Commission and posted on the Alameda CTC website the day of the Commission meeting.

Staff will present a summary of the comments received during the comment period to the Commission for its consideration. A 2/3 Authorized vote by the Commission is needed to amend the TEP, per the TEP Implementing Guidelines.

The proposed amendment includes the following elements, which are documented in Attachments B and C:

1) Acknowledgement of the TVSJVRRA as a new agency in Alameda County that is an eligible recipient of Measure BB funds (Attachment B, Plan Amendment Resolution).
2) Removal of the BART to Livermore Project: The amendment would remove reference to the BART to Livermore project, which was a named capital project in the BART Expansion and Maintenance program of the TEP and the associated $400 million.
3) Addition of the Valley Link project: The amendment would add the Valley Link project as a new named capital project under the Commuter Rail Improvements program of the TEP and would include $400 million in Measure BB funding.
4) Technical Adjustments: The amendment would make minor technical adjustments, such as updating maps and tables, to reflect the changes noted above (as shown in Attachment C, TEP Redline Markups).

Planning, Policy and Legislation Committee (PPLC)

There was extensive discussion of the item at the September 14, 2020 PPLC meeting. One clarification was made to the proposed TEP amendment and the PPLC moved to recommend the amended item to the Commission for approval. Below is documentation of the clarification made at the PPLC meeting. Thirty-eight additional comment letters were received in advance or on the day of the PPLC meeting and are detailed in Table

2; those letters are also included as Attachment F and the comments were added to the updated comment response matrix, Attachment D. Sixteen public comments were made verbally at the PPLC meeting and are also noted in Attachment D.

PPLC Discussion

Following public comment, the Committee members discussed a number of considerations. In response to concerns regarding San Joaquin County's financial participation in the project, and interest in ensuring an initial operating segment that effectively provides significant benefits to the Tri-Valley and the corridor overall, the following clarification was made to the proposed TEP amendment, as shown in yellow.

Recommended TEP Amendment (See yellow highlight of PPLC clarification language)

~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a ~~BART~~ Valley Link Rail Extension from the existing Dublin/Pleasanton BART Station within the Tri-Valley and Altamont Pass in Alameda County ~~– I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Blue denotes new language added; Red denotes language removed

This clarification ensures:

- a clear understanding of what the initial operating segment is in Alameda County,
- establishes the funding nexus with San Joaquin County since Alameda County funding may only be spent within the county and Mountain House is in San Joaquin County,
- the highest ridership and cost effectiveness per passenger, based on data provided by the TVSJVRRA,
- the highest estimated greenhouse gas emissions reduction, contingent upon final technology selection, and
- ensures only one maintenance facility is built by the project with the land donated by the City of Tracy (rather than a temporary station if the project only went to Greenville or Southfront in Alameda County).

Comments Received

Per the TEP Implementing Guidelines, the comment period for a TEP Amendment is a comment period for jurisdictions in Alameda County. Comments received by the public and advocacy organizations are also included for the Commission's consideration. All

written comments received are included as Attachments E and F. The information below summarizes key themes and comments received; a complete documentation of comments, including those made verbally at PPLC and Commission meetings, and responses are included in Attachment D.

Key Themes from Comments

Support

Comments expressing support for the TEP Amendment focused on project benefits and the need for rail in the Tri-Valley. The three cities in the Tri-Valley, along with the Board of Supervisors, Union City, the BART Board representative, LAVTA and the San Joaquin Regional Rail Commission all submitted strong letters of support. In addition, chambers of commerce/business groups and labor expressed support for the TEP Amendment and the Valley Link project. Full documentation of comments and responses are included in Attachments D and E; key benefits noted by commenters include:

- fulfills a commitment made to the Tri-Valley to advance rail connectivity to Livermore
- assures Tri-Valley residents will benefit from the taxes they have paid
- reduction of over 99.4 million Vehicle Miles Traveled
- reduction of over 33,000 metric tons of greenhouse gas emissions per year
- supports advancement of transit-oriented development
- protects open space
- supports businesses in the Tri-Valley by providing easy and convenient access
- provides an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues

Oppose/Concerns Raised

Comments in opposition of the TEP Amendment included a number of key themes that were repeated across multiple commenters, summarized below. Full documentation of comments and responses are included in Attachments D and E.

- Timing of Amendment and impacts of COVID-19: Commenters raised concerns that the TEP Amendment is being rushed. Commenters stated that there is no valid reason to amend the TEP at this point in time, and that the amendment should be delayed until the project's Environmental Impact Report (EIR) is available and the impacts of the COVID-19 pandemic on sales tax revenues and transit ridership are better understood.

  Response:
  - Overall timeframe: The TVSJVRRA submitted a request for the TEP Amendment in September 2019. Since that time, Alameda CTC staff has worked with TVSJVRRA staff as well as partner agencies to better understand the project, including detailed discussions regarding potential impacts on the I-580 Express Lanes and the potential funding plan. The ability to leverage local sales tax dollars to secure competitive regional, state and federal funds is a key principle of local sales taxes. By being able to show a commitment of local funding, the project will be more competitive for regional, state and federal funding.

  - EIR: As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal

requirements. The TEP does not require that projects must complete an environmental document before being in the plan, nor does it require that full funding is required before being in the plan. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects.

Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters. The Draft EIR is anticipated to be released in fall 2020.

- COVID-19: The long-term travel impacts of COVID are unknown at this time. It is unclear when the region and country will start to have a better understanding of mid- and long-term impacts of the COVID-19 pandemic on travel patterns, and transit in particular. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early (first 10) years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan.

  Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues. Sales tax revenues are received from the California Department of Tax and Fee Administration (CDTFA) two months in arrears, and staff has been updating the Commission as data becomes available.

  Alameda CTC has not developed a 5-year sales tax revenue projection at this point given the large uncertainties regarding the depth and breadth of the recession and the lack of sales tax receipt data received to date. Revenue projections for FY2020-21 were included in the agency budget that was adopted in May 2020. The budget for sales tax revenues for FY2020-21 will be updated if and when appropriate based on data received from the CDTFA.

- Inadequate public noticing: Commenters raised concerns that the proposed TEP Amendment was not noticed to the public or posted on the Alameda CTC website. Requests were made for more time for the comment period, and for all comments to be posted by the end of July.

  Response: The comment period, per the TEP Implementing Guidelines for a proposed TEP Amendment, is a comment period for jurisdictions. As noted above, following the Commission's May 28, 2020 approval to initiate the comment period, Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy

through the US Postal Service on May 29, 2020. Per the direction of the Commission at its May meeting, staff were directed to include the full set of comments received in the PPLC materials and distribute those in advance of the meeting per standard Commission processes.

- Insufficient alternatives analysis and interest in other transit investments in the corridor: Commenters stated that there had been insufficient analysis of alternatives, with specific focus on further analysis of a bus alternative in order to determine if there are better, more efficient uses of the funding. In addition, BART and other commenters raised concerns regarding ensuring full understanding of and eligibility for BART core system impacts as part of the project and potential uses of the $400 million. A few commenters specifically referenced TEP Implementing Guideline #22 as a reason other projects could be eligible for the funding.

  Response: Extensive alternatives analysis has been completed in the 580 corridor as part of previous BART studies and environmental impact reports. BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included and Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. Details of the alternatives can be found here. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled.

  In developing the Valley Link Feasibility Report, and continuing in the EIR, the TVSJVRRA is evaluating alternatives, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The Feasibility Report included analysis of express bus alternative that included operating as bus on shoulder to provide a more time-competitive service, and focused on a limited set of stations mirroring the proposed rail service. The Feasibility Report found, consistent with the BART findings, that while express bus alternatives could be delivered at a fraction of the cost, the potential ridership benefits and greenhouse gas emission reductions were significantly higher for the rail alternative. An additional evaluation of alternatives will be released as part of the Valley Link Draft EIR.

  The TEP #22 Guideline notes, "Fund Allocations: Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be reallocated

to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC." The Valley Link project is a Transit project as is the BART to Livermore Project and it is at the Commission's discretion to act on a plan amendment to use these funds for transit purposes.

Based on current ridership forecasts developed by the TVSJVRRA, it appears that there may be some degree of impact to the BART core system in the 2040 horizon. The TVSJVRRA has proposed to enter into an MOU with BART to address these future potential impacts. BART and the TVSJVRRA continue to work closely to fully identify and understand all potential impacts and benefits. Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project.

- Benefits to San Joaquin County and not Alameda County: A number of commenters raised concerns that Alameda County residents would not benefit from the project, but instead the project will primarily benefit San Joaquin County residents. In addition, concerns were raised that San Joaquin County has not committed funding to the project.

  Response: As required by the TEP, expenditures from Measure BB will only be spent on transportation improvements in Alameda County. The project as defined will benefit Alameda County residents and businesses as well as San Joaquin County. The Bay Area is part of an integrated mega-region, with people and goods regularly moving between the Bay Area, Central Valley, and Sacramento region. Providing a high-quality transit alternative over the heavily-traveled Altamont Pass will support both the Central Valley and Bay Area. Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop.

  - 10,137 daily boardings in the Tri-Valley in 2040
  - 32,993 daily boardings in the full corridor
  - Annual reduction of between 33,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration
  - Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040
  - Approximately 57% of the project track mileage is in Alameda County
  - Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative.

  Regarding funding, the proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment.

The TVSJVRRA is working closely with cities in San Joaquin County, the San Joaquin Council of Governments (SJCOG), and the state to secure additional funding for the project. Thus far, the City of Tracy is anticipated to act in September 2020 to donate a key 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including showing $163.9 million for the project in the plan from future measures and state funds, and SJCOG also contributed funding for the environmental document.

- Questions regarding how an initial operating segment would be determined: There were questions requesting more detail on how an initial operating (IOS) segment would be determined, given the proposed amendment language.

  Response: The Valley Link Feasibility Report identified two major phases of the project: Phase 1 from Dublin-Pleasanton to North Lathrop; and Phase 2 from North Lathrop to Stockton. Within Phase 1, the project could be delivered in phases, including an initial operating segment that would terminate before North Lathrop. As part of the analysis currently underway, the TVSJVRRA Board will consider potential IOSs in order to more quickly deliver service in the corridor. Options under consideration include service from Dublin-Pleasanton to Greenville, or from Dublin-Pleasanton to Mountain House. In addition, the TVSJVRRA is considering a Southfront Station in Livermore. Estimated ridership, emissions reduction and costs for two IOS under consideration are summarized in Table 2.

  Table 2. Potential Initial Operating Segments

Potential IOS	Initial Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

  * Range based on various technologies under consideration.
  **Costs do not include O&M facilities ($198.67 million) or vehicles ($508.82 million)
  ***Includes Southfront station

- Potential project impacts related to sprawl and interregional commutes: Commenters stated that the project will increase sprawl and further the distances between where people live and work. It was noted that this would violate the "inter-regional commuting" policy of Senate Bill 375 (SB 375) and Plan Bay Area.

  Response: SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations

(MPOs) in the state of California. As it relates to this project, the two MPOs are the Metropolitan Transportation Commission (MTC) and the San Joaquin Council of Governments (SJCOG). The MTC Commission recently voted to include Valley Link in Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region. SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project. MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.

The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:

- Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
- Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was submitted to MTC/ABAG earlier this year and approved in February 2020.

- Measure BB equity considerations: Commenters stated that the amendment would require the entire TEP to need to be reopened because it would dramatically change the distribution of benefits across the county. That would therefore require the basic allocation formula for local streets and roads to need to be reconsidered.

  Response: When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County. The $400 million was identified in the TEP for a rail extension in the Tri-Valley. The proposed amendment does not change the geographic distribution of the benefits of the overall TEP.

Project Background

A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years, there have been efforts by many residents, local elected officials, and other stakeholders to extend

the BART alignment to Livermore, including planning, funding and project development efforts.

Regional and State Rail Planning

In 2007, the San Francisco Bay Area Regional Rail Plan developed by the Metropolitan Transportation Commission (MTC) identified the BART to Livermore extension as an important inter-regional rail connection. The Regional Rail Plan envisioned that BART should connect to the ACE train service in Livermore in order to provide a reliable and fast transit option for the growing congestion over the Altamont Pass and along the I-580 corridor. The importance of rail service between the Tri-Valley and San Joaquin Valley was reiterated in the 2018 California State Rail Plan, which calls for a Tri-Valley rail hub and increased rail frequencies and connectivity over the Altamont Corridor.

BART to Livermore Project

By the 1980s, the extension of BART further east in the Tri-Valley was already under serious consideration. In the mid-1980s, BART purchased a potential site for a future station near the Isabel Avenue and Interstate 580 interchange and a site in the vicinity of Greenville Road and Interstate 580 for purposes of preserving land for a potential station and yard/maintenance facility. In 1997, the Dublin/Pleasanton line was opened, with a West Dublin station added in 2011.

Numerous local and regional transportation measures have included support for BART to Livermore, starting with the 1986 Alameda County Measure B, which included $170 million for a "Rail extension to Dublin Canyon". The 2000 TEP included funding of $8.7 million for "I-580 Corridor/BART to Livermore Studies". Measure BB included $400 million in the 2014 TEP for "BART to Livermore". The project also received Regional Measure 1 bridge toll funding to advance planning and environmental work. In June 2018, Bay Area voters approved Regional Measure 3, which includes $100 million for "Tri-Valley Transit Access Improvements."

In 2010, after two years of analysis, BART completed a Program Environmental Impact Report (EIR) that evaluated the feasibility of five potential station sites and 10 different alignments for the BART to Livermore extension. In 2012, the BART Board of Directors directed its staff to advance the conceptual engineering and environmental review of a one-station extension to Isabel Avenue (Proposed Project), as well as to coordinate with the City of Livermore on the land use planning around the future station site.

In 2014, Alameda County voters approved Measure BB to fund the 2014 TEP, which includes $400 million in dedicated funding for the BART to Livermore extension. Measure BB commits funds to support construction of the extension of BART in the I-580 corridor using the most effective and efficient technology.

On July 31, 2017, BART released the Draft Project EIR evaluating the Proposed Project and alternatives. In May 2018, BART released the Final Project EIR. The BART Board certified the Final Project EIR on May 24, 2018 and directed staff to not advance a specific project.

As major transportation project planning and analysis was underway, cities also advanced land use planning around future rail service. The City of Livermore prepared the Isabel Neighborhood Plan and program-level EIR for development around a new station. The Livermore City Council adopted the Isabel Neighborhood Plan and certified the EIR for the Plan in May 2018.

ACEforward Program

The San Joaquin Regional Rail Commission (SJRRC) ACEforward program outlined a vision for a phased rail infrastructure and service improvement plan to increase frequency, increase service reliability, and enhance passenger facilities along the existing ACE service corridor from San Jose to Stockton, and to extend ACE service to Modesto and Merced. The (SJRRC) released a Draft EIR in May of 2017 that was later rescinded; however, the technical documents developed by the SJRRC for the ACEforward Draft EIR were made available to the TVSJVRRA for advancement of the Valley Link Project Feasibility Report and Draft EIR.

Creation of TVSJVRRA

In 2017 Assemblymembers Catharine Baker and Susan Eggman authored AB 758, which created the TVSJVRRA. The TVSJVRRA is led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal established for the TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system that reflects regional consensus and meet the goals and objectives of the San Joaquin Valley and Tri-Valley communities, consistent with a feasibility report.

AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance the project per AB 758. The TVSJVRRA adopted several goals and policies to guide the development of the project.

A key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

TVSJVRRA Adopted Project Goals:

The following goals were adopted by the TVSJVRRA to address identified regional and economic and transportation challenges:

- Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs.

- Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service.
- Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve.
- Be a model of sustainability in the design, construction, and operation of the system.
- Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link Project Development Policies

The TVSJVRRA adopted several policies to guide the development framework of the project, including the following sustainability and transit-oriented development policies:

- Sustainability Policy: Identifies implementing strategies to achieve a zero emissions system. The adopted Sustainability Policy includes a commitment to encourage engagement in planning and decision-making for the project to ensure a meaningful level of participation from disadvantaged communities and low-income communities and households. It further directs maximizing benefits to these communities and households in the project planning and design of Valley Link. Four of the proposed stations in San Joaquin County are within disadvantaged community geographic areas and/or designated as low-income communities.
- Transit Oriented Development (TOD) Policy: Support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to:
    - Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations.
    - Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans.

The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently submitted by the City of Livermore to MTC/ABAG as a new PDA.

Valley Link Project Description

Valley Link is a proposed new rail service between Alameda and San Joaquin Counties. The proposed Phase 1 project will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the North Lathrop ACE intermodal station. The

proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

The TVSJVRRA has been updating the project costs as part of project development. The most current project cost estimates range from $2.81 billion to $3.18 billion in mid-point year of expenditure dollars for the Phase 1 project from Dublin-Pleasanton to North Lathrop. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021 respectively.

To date, a total of $708 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds), $40 million in impact fees from the City of Livermore, $40 million from the Tri-Valley Transportation Council, and $40 million from the City of Tracy property contribution. The project is expected to compete for regional, state and federal funds to secure additional funding. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

Other Agency Actions

Given the project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, the San Joaquin Council of Governments (SJCOG), SJRRC, BART, Alameda CTC, the California State Transportation Agency, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project:

- MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Resolution Number 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans. In June 2020, MTC allocated an additional $46.8 million to advance the project's environmental and design phases.
- SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.

- BART: BART has committed staff to directly lead the early development of the project due to its expertise in developing and delivering similar projects, such as the e-BART extension to Antioch.
- Alameda CTC, the SJRRC and Caltrans have provided technical reviews of preliminary design plans and documents. In addition, the TVSJRRA is in discussion with the City of Tracy regarding donation of a key 200-acre parcel under City of Tracy ownership to the project to be used for an operations and maintenance facility. The property was recently appraised and has an estimated value of $40 million.

Project Considerations

The project construction will have significant impacts on the I-580 Express Lanes, with major impacts anticipated during construction. The TVSJVRRA staff have been working with Alameda CTC, as well as Caltrans, to identify design and construction considerations. Alameda CTC staff have held several workshops with the project design team to evaluate the preliminary design plans and will continue to be engaged through the ESC and technical groups to provide policy and technical feedback during design development to ensure minimal impacts to the I-580 Express Lanes. Alameda CTC will continue to work closely with the TVSJVRRA as the project design advances, and will also conduct financial analysis to understand potential impacts to toll revenues during construction to ensure revenue losses are addressed.

Proposed Amendments

The amendment that has been requested to be made to the 2014 TEP includes two elements as follows:

- Amend to include the new entity of the TVSJVRRA
- Amend to include the Valley Link Project for $400 million

Existing TEP Language to be Amended

The following is the current language in the 2014 TEP (page 18 of 2014 TEP):

BART Extension and System improvements ($710 M)

The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system, as well as provide local funding for a proposed BART extension in the eastern part of the county.

> BART to Livermore ($400 M)
>
> This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed

alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Proposed Changes Throughout the TEP

The 2014 TEP has many references to BART to Livermore or a BART extension and requires changes to several pages in the 2014 TEP. The proposed changes include moving the project from page 18 from the BART section of the TEP to page 20 under the section "Major Transit Corridor and Commuter Rail Improvements", remove references to BART as the agency leading the rail extension, change references from the BART to Livermore project to Valley Link on pages 2, 3, 14, 18, 19 (map) and add Valley Link to the map on page 21 (see Attachment C).

Specific Changes to Project Description

This following description will be included on page 20 of the 2014 TEP under Major Transit Corridor and Commuter Rail Improvements as shown on Attachment C. Blue denotes new language added; red denotes language removed.

~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a ~~BART~~ Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County ~~I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Implementing Guidelines Related to this TEP Amendment

Once the 2014 TEP amendments are complete, all the implementing guidelines will be applicable to the project and project sponsor similar to all other TEP projects. Specifically, for this TEP amendment, the following guidelines describe requirements for the amendment as well as the new project sponsor.

4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment.

8. Strict Project Deadlines: To ensure that the projects promised in this plan can be completed in a timely manner, each project will be given a period of seven years from

the first year of revenue collection (up to December 31, 2022) to receive environmental clearance approvals and to have a full funding plan for each project. Project sponsors may appeal to the Alameda CTC Commissioners for one-year time extensions.

Note: any new amendment that adds a project must comply with this provision and the start date of the seven years will be from the date of the adopted amendment.

11. Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds and includes local hiring requirements. Funding agreements will include performance and accountability measures. All funds will be allocated through open and transparent public processes. In addition, fund recipients will be required to have an annual audit conducted by an independent CPA to ensure that funds are managed and spent according to the requirements of this Plan.

14. No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. Under no circumstances may these funds be appropriated by the State of California or any other governmental agency, as defined in the implementation guidelines.

18. New Agencies: New cities or new entities (such as new transit agencies) that come into existence in Alameda County during the life of the Plan may be considered as eligible recipients of funds through a Plan amendment.

Fiscal Impact: There is no fiscal impact for this item associated with the requested action.

Dear Chair Cutter,

This letter is intended to supersede the information in the letter written to Chair Valle on September 11, 2019 (attached) as it relates to the language to be amended in the 2014 Transportation Expenditure Plan currently found on page 18. Please use the following language for the amendment:

Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a Valley Link Rail Extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Thank you,

Alameda County Supervisor Scott Haggerty, Chair

September 11, 2019

Supervisor Richard Valle, Chair
Alameda County Transportation Commission
111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Valle,

In May of 2018 the BART Board decided not to extend conventional BART to Livermore in favor of deferring the development of a rail extension project to the newly established Tri-Valley – San Joaquin Valley Regional Rail Authority ("Authority").

In the statute that created the Authority, AB 758 (Eggman/Baker), the Legislature addressed the transfer of local funds to the Authority for the Valley Link project in Section 132658:

> "the unencumbered balance of all local funds programmed for the completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall be transferred to the authority and be considered resources available to effectuate the authority's purposes pursuant to this chapter, except that local funds controlled by the Alameda County Transportation Commission to be used for completion of the BART Livermore extension or that have otherwise been identified for the connectivity shall continue to be programmed and allocated by the Alameda County Transportation Commission pursuant to measures approved by the voters of Alameda County pursuant to Division 19 (commencing with Section 1800000)."

Over the past 18 months, the Authority has been actively engaged in the planning of Valley Link, a passenger rail project that connects with the Dublin/Pleasanton BART station and travels eastward to Livermore and beyond to communities in the Northern San Joaquin Valley. A key element of the Valley Link Funding Plan for the Dublin/Pleasanton connection with BART and rail construction to Livermore is the $400 million in Measure BB that is currently listed in the Alameda County 2014 Transportation Expenditure Plan ("Plan") for the BART to Livermore project. Per the requirements of the Plan, The Tri-Valley – San Joaquin Valley Regional Rail Authority requests the following amendments:

1. The Tri-Valley – San Joaquin Valley Regional Rail Authority, established by AB 758,be included as an eligible recipient of funds.
2. That the following, specific language be amended:

   Move and amend the following language from Page 18 of the Plan to Page 20:

Valley Link
Connecting People, Housing, and Jobs

~~BART to Livermore~~ Valley Link to Livermore ($400 M)
The project funds Valley Link ~~the first phase of a BART to extension~~ within the I-580 Corridor freeway alignment from the Dublin/Pleasanton BART station to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction of or any element of this ~~first phase~~ project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

In accordance with the Alameda County 2014 Transportation Expenditure Plan Implementing Guidelines, the Tri-Valley – San Joaquin Valley Regional Rail Authority understands and can fully comply with the requirements of recipients of Measure BB funds, including, but not limited to, annual audits and compliance reporting, the establishment of separate accounting funds for Measure BB funds, independent Watchdog reviews, performance measures, environmental clearance timelines, timely use of funds, contracting requirements, public reviews and approvals.

Thank you for your consideration,

Alameda County Supervisor Scott Haggerty, Chair

ALAMEDA COUNTY TRANSPORTATION COMMISSION
Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the TVSJVRRA has been updating the project costs as part of project development. The most current project cost estimates range from $2.81 billion to $3.18 billion in mid-point year of expenditure dollars for the Phase 1 project from Dublin-Pleasanton to North Lathrop. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $708 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds), $40 million in impact fees from the City of Livermore, $40 million from the Tri-Valley Transportation Council, and $40 million from the City of Tracy property contribution. The project is expected to compete for regional, state and federal funds to secure additional funding. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans. In June 2020, MTC allocated an additional $46.8 million to advance the project's environmental and design phases.

SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds, and SJCOG also contributed funding for the environmental document. In addition, the City of Tracy is

anticipated to act in September 2020 to donate a 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million.

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

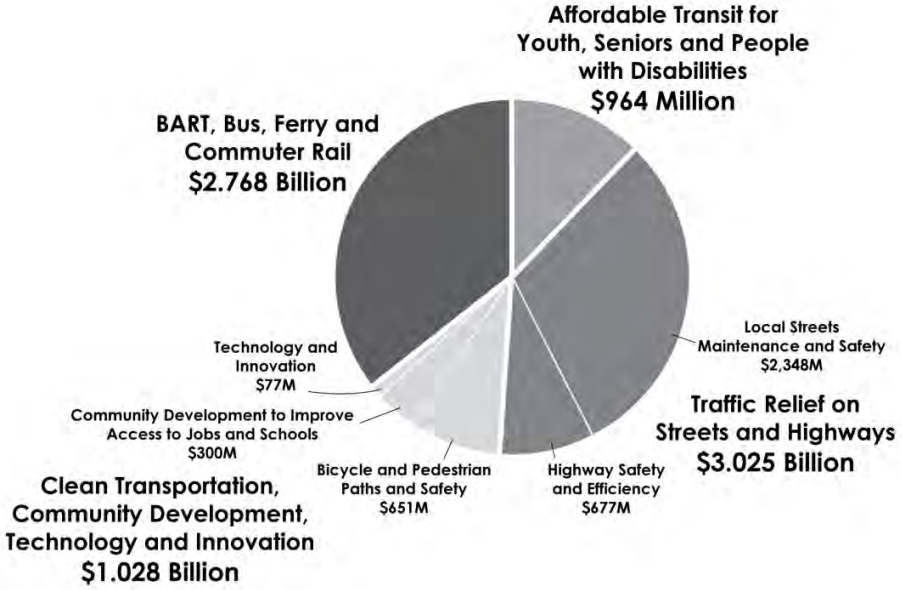
A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, September 24, 2020 in Oakland, California, by the following vote:

AYES: NOES: ABSTAIN: ABSENT:

SIGNED: Attest:

_____ _____



Pauline Russo Cutter, Vanessa Lee,

Chair, Alameda CTC Clerk of the Commission

Summary of Investments	FUNDS ALLOCATION* ($ x million)
BART, Bus, Ferry and Commuter Rail for Reliable, Safe and Fast Services	**$1,587**
BART Expansion and Maintenance	$349 ~~$749~~
Bus Operations, Maintenance and Rapid Bus Projects	$1,548
Commuter Rail Improvements	$832 ~~$432~~

Notes: Priority implementation of specific investments and amounts for fully defined capital projects and phases will be determined as part of the Capital Improvement Program developed through a public process and adopted by Alameda CTC every two years and will include geographic equity provisions.
BART Maintenance funds will require an equal amount of matching funds and must be spent in Alameda County.
All recipients of sales tax funds will be required to enter into agreements which will include performance and accountability measures.

ACTC_AR2949

BART, BUS, SENIOR AND YOUTH TRANSIT

A total of 48% of net revenue will be dedicated to BART, bus, commuter rail, and senior and youth transit investments. Funds for operations and maintenance will be provided to transit operators in the county (AC Transit, BART, Union City Transit and Livermore Amador Valley Transit Authority (LAVTA)) as well as to ferries and the Altamont Commuter Express (ACE) rail service. In addition, these funds will substantially increase Alameda County's commitment to the growing transportation needs of older adults and people with disabilities, essentially doubling the funds available for targeted services for this important group. Grant funds are also available to support affordable transportation access to schools. Major capital investments include upgrades to the existing ~~BART~~ rail system and BART extensions, adding bus rapid transit routes to improve the utility and efficiency of transit, and providing funding for transit improvements serving the Dumbarton Corridor Area.

TRANSIT OPERATIONS, MAINTENANCE, AND SAFETY PROGRAM (24% OF NET REVENUE, $1,857 M)

This program provides transit operators with a consistent funding source for maintaining, restoring and improving transit services in Alameda County. Transit operators will allocate these funds in consultation with their riders and policy makers with the goal of creating a world class transit system that is an efficient, effective, safe and affordable alternative to driving.

This funding will support the following:

Transit Operations and Maintenance Program (21.55% of net revenue, estimated at $1.668 M)

Funds are disbursed to AC Transit, BART, ACE, the Water Emergency Transportation Authority (WETA), LAVTA and Union City Transit. The relative percentage of net revenue being allocated to these agencies is as follows:

Agency	% of Net Total Revenue	Total 2015-2045 (est.) $Millions
AC Transit	18.8%	$1,455
ACE	1.0%	$77
BART Maintenance	0.5%	$39
WETA (ferries)	0.5%	$39
LAVTA (WHEELS)	0.5%	$39
Union City Transit	0.25%	$19
Total Transit Operations	**21.55%**	**$1,668**

Affordable Youth Transit Pass Program ($15 million)

This program is for the purposes of funding one or more models for a student transit pass program. The program would be designed to account for geographic differences within the county. Successful models determined through periodic reviews will have the first call for funding within the innovative grant program, as described below.

Innovative Grant Program including successful student transportation programs (2.24% of net revenue, estimated at $175 M)

These grant funds, administered by Alameda CTC, will be used for the purposes of funding innovative and emerging transit projects, including implementing successful models aimed at increasing the use of transit among junior high and high school students, including a transit pass program for students in Alameda County. Successful models will receive the first priority for funding from this category.

Funds will be periodically distributed by Alameda CTC for projects and programs with proven abilities to accomplish the goals listed below:

- Increase the use of public transit by youth riders (first priority for funding) and increase youth access to school
- Enhance the quality of service for transit riders
- Reduce costs or improve operating efficiency
- Increase transit ridership by improving the rider experience
- Enhance rider safety and security

ACTC_AR2950

BART STATION ~~EXTENSION~~ AND SYSTEM IMPROVEMENTS ($37~~7~~10 M)

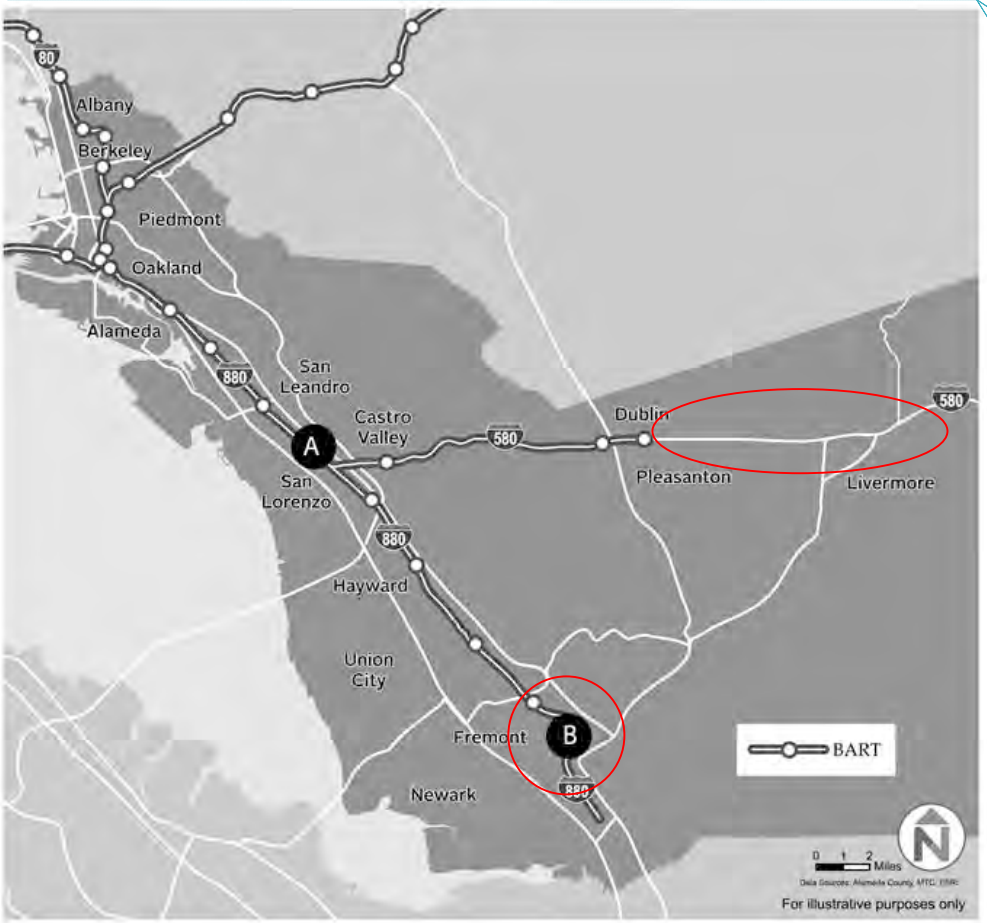
The capital projects funded as part of the BART System Modernization and Expansion investments include projects that increase the capacity and utility of the existing system~~, as well as provide local funding for a proposed BART extension in the eastern part of the county.~~

~~BART to Livermore ($400 M)~~

~~This project funds the first phase of a BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology. Funds for construction for any element of this first phase project shall not be used until full funding commitments are identified and approved, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternative assessment of all fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.~~

BART Station Upgrades and System Improvements ($310 M)

BART projections indicate that its system will need to carry over 700,000 daily riders by the end of this Plan period. New riders will affect the capacity of existing systems and stations, requiring focused capacity enhancements to keep the system moving as ridership increases occur.



- **The Bay Fair Connector/BART METRO project will receive $100 M** in sales tax funds for the Alameda County portion of this project which will increase capacity and operational flexibility systemwide. One goal of these improvements will be to improve connections to jobs in the southern part of the county and beyond as Santa Clara County builds its own BART extension.

- **The BART Station Modernization and Capacity Program will receive $90 M** for improvements at all BART stations in Alameda County, addressing station site, building envelope, escalator and elevator rehabilitation/replacement, circulation and wayfinding, air conditioning, lighting and ambient environment, station reliability upgrades, and other station equipment replacement/upgrades.

- **The Irvington BART Station will receive $120 M** to provide an infill station on the soon-to-open Warm Springs extension south of the existing Fremont Station, creating new accessibility to BART in the southern part of the County.

ACTC_AR2951

BART INVESTMENTS

A Bay Fair Connector / BART METRO

B Irvington BART Station

Not Shown:

- BART Station Modernization and Capacity Improvements
- Affordable Transit for Seniors and People with Disabilities

Commented [ACTC1]: Bottom circle: The new "B" is Irvington BART Station, and below that removal of "C"

Commented [ACTC2]: Top circle: Removal of the original "B – BART Extension to Livermore (within the I-580 corridor)"

Commented [ACTC3]: Middle circle: Change the original "C – Irvington BART Station" to a new "B"

MAJOR TRANSIT CORRIDOR AND COMMUTER RAIL IMPROVEMENTS ($~~355~~ 755 M)

Investments include maintenance and service enhancements on existing rail lines and the development of transportation investments serving the Dumbarton Corridor Area. Funds will also be allocated for preserving rail right of way for transportation purposes, ensuring that service is available for future generations. Finally, this funding category acknowledges the importance of connecting high speed rail to Alameda County and the Bay Area and seeks to prioritize targeted investments to ensure strong connections to this future service.

Dumbarton Corridor Area Transportation Improvements ($120 M)

Dumbarton Corridor Area Transportation Improvement projects will support express bus services in the Dumbarton Corridor connecting southern Alameda County and the Peninsula. The projects will also support transit oriented development and priority development areas, and improve local streets and bicycle and pedestrian infrastructure within the cities of Fremont, Newark and Union City.

Union City Intermodal Station ($75 M)

This project funds the development of a new intermodal station in Union City to serve BART, Dumbarton Corridor services, Capitol Corridor, ACE and local and regional bus passengers. The project involves construction of a two-sided rail station and bus transit facility, accessible to a 30-acre transit oriented development site. Improvements will be made to pedestrian and bicycle access, BART parking, elevators, fare gates and other passenger amenities.

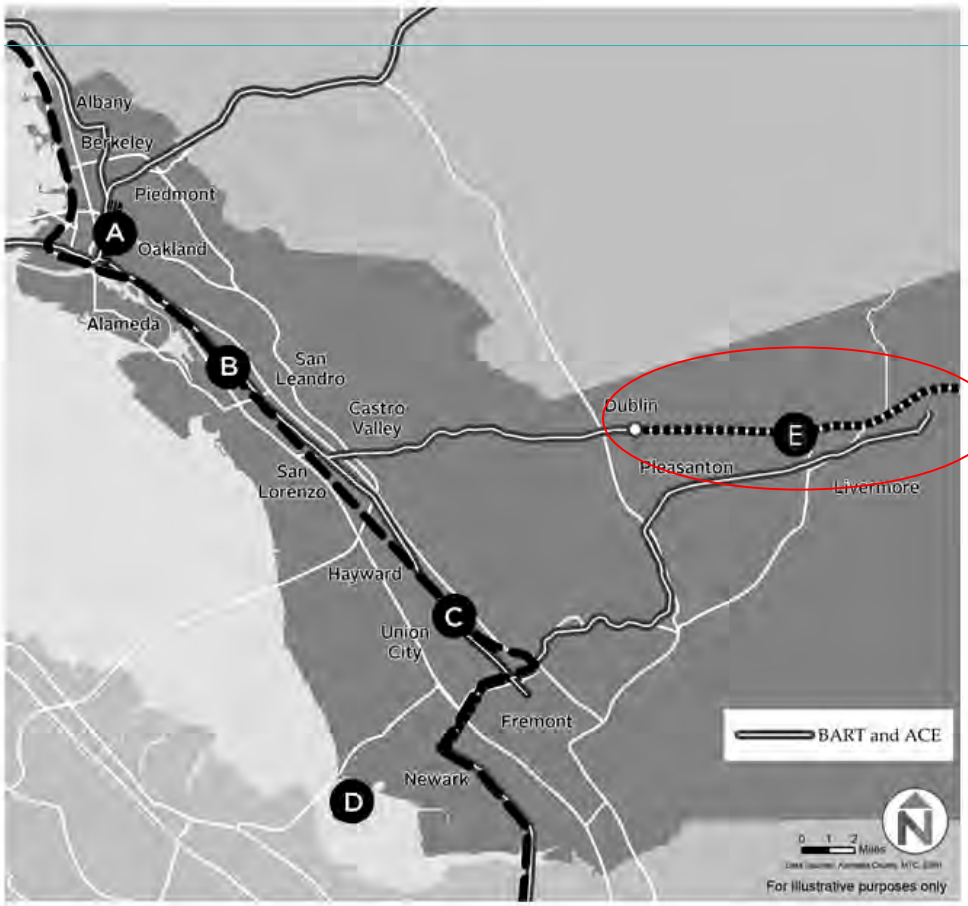
Capitol Corridor Service Expansion ($40 M)

This project supports track improvements and train car procurement which will enable the trains running between Oakland and San Jose to increase daily round trips, matching frequencies between Sacramento and Oakland.

Railroad Corridor Right of Way Preservation and Track Improvements ($110 M)

Funds allocated by this project may be used to maintain and enhance existing railroad corridors for regional rail as well as to preserve the rights of way of rail corridors that could be used for other transportation purposes, such as major trails.

Oakland Broadway Corridor Transit ($10 M)



This project will link neighborhoods to transit stations along Broadway, Oakland's major transit spine, providing a frequent and reliable connection between the regional rail hub at Jack London Square, with Downtown Oakland, the Uptown Arts and Entertainment District, and adjoining neighborhoods, utilizing the most efficient and effective technology.

Valley Link Rail in Alameda County ($400 M)

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

TEP Amendment Comment Letters

Jurisdiction Comments

Agency	Date	Comments	Response
AC Transit General Manager	July 9, 2020	1. AC Transit's Board of Directors has not had the opportunity to provide official comment and position on the proposed amendment; this letter reflects the comments of AC Transit staff.	Noted.

		2. The Valley Link Rail project appears to have a primary purpose of transporting residents from San Joaquin County to Alameda County, with an ultimate destination in Santa Clara County, similar to existing ACE Train service. Alameda County taxpayers would not directly benefit as much as San Joaquin County residents, especially if there are no committed funds from San Joaquin County.	Expenditures from Measure BB will only be spent on transportation improvements in Alameda County. No expenditures may be made outside of Alameda County. Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop. o 10,137 Tri-Valley daily boardings in 2040 o 32,993 total daily boardings in 2040 o Annual reduction of 38,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration o Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040 o Approximately 57% of the project track mileage is in Alameda County o Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative. Valley Link will provide fast and frequent rail service to BART, operating 25 daily roundtrips a day with a focus on serving the Oakland and San Francisco commute. ACE currently operates 4 daily roundtrips with a focus on primarily serving Santa Clara County commuters. Expansion of ACE service is constrained due to operations on Union Pacific tracks in mixed freight.

		3. There are many transportation projects that could improve travel and commute for Eastern Alameda County and would have a better cost-benefit ratio than the Valley Link Rail project and thus, a better and more efficient use of funds. Possible projects such as express bus service and bus rapid transit would fall into this category. Implementing Guideline #22 – "Fund Allocations" under the TEP would allow for such projects to be funded with the allocation.	BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included an Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. Details of the alternatives can be found here. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. In considering the Project EIR in 2018, the BART Board could not reach consensus on which transit alternative to adopt as a preferred alternative. The BART Board acted to not advance an alternative. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled. The Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) was created by the State Legislature in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and

Agency	Date	Comments	Response
			San Joaquin County that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. When the BART Board directed the General Manager to not advance an alternative, it effectively passed over to the TVSJVRRA the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. The TVSJVRRA then assumed the lead role for the project, now known as Valley Link. The TVSJRRA has requested Alameda CTC to amend the TEP to add Valley Link and move the $400 million from the BART to Livermore TEP project to Valley Link. The TVSJVRRA is currently evaluating alternatives as part of the Valley Link EIR, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The 2014 Transportation Expenditure Plan (TEP) #22 Guideline notes, “Fund Allocations: Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be reallocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.” The Valley Link project is a Transit project as is the BART to Livermore Project and it is at the Commission’s discretion to act on a plan amendment to use these funds for transit purposes.

Agency	Date	Comments	Response
		4. Given the current financial climate and the uncertainty that lies ahead, it is within reason for ACTC to also consider reallocating the $400 million to any number of under-funded capital projects throughout the county, including transit projects within the AC Transit service area.	The funds that were programmed to BART to Livermore must be used on Transit and the Commission programming actions are subject to geographic equity by planning area. Reprogramming $400M to other parts of Alameda County, rather than exclusively towards improvements built in East County, will impact the original TEP geographic funding distribution by planning area.
Alameda County Board of Supervisors	June 10, 2020	5. Expressed support for the amendment; will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and assure that our residents will finally benefit from the taxes they have paid.	Support noted.
		6. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space	Benefits noted.
BART General Manager	July 13, 2020 and May 27, 2020	7. Expressed support, with recommendations, of the TEP amendment.	Support noted.
		8. Staff believes this action is consistent with intent of Alameda County voters to invest in transit in the I-580 Corridor. It is important that the $400 M sales tax investment does accrue to Alameda County residents and businesses.	Noted.

Agency	Date	Comments	Response
		9. BART recommends that the amendment to the TEP clearly indicate that required improvements to the BART system in Alameda County resulting from the impacts of the Valley Link Rail project are priority components of the Phase 1 Valley Link Rail project. - Base Project: Impacts to the BART system including additional rail cars and the reconfiguration of the Dublin/Pleasanton station - Core Improvements: improvements to destination stations of Valley Link patrons - I-580 Corridor Faregate Modernization: modernize faregates for all stations in the I-580 Corridor (Castro Valley, West Dublin/Pleasanton, and Dublin/Pleasanton stations)	Valley Link and BART are working together closely to identify potential future impacts and benefits to the BART system, including both capital and operating impacts. Over the course of project development, it is anticipated that the benefits and impacts will be better defined. Based on current ridership forecasts, it appears that there may be some degree of impact to the BART core system in the 2040 horizon. The TVSJVRRA has proposed to enter into an MOU with BART to detail a process to identify and address these future potential impacts. Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project.
BART Director McPartland	May 27, 2020	10. Expressed support for the project approval of TEP amendment.	Support noted.
		11. Noted key benefits of project: to fulfil commitment made to Tri-Valley and reduce traffic on 580/680 corridor and VMT.	Benefits noted.
City of Dublin	May 25, 2020 and July 10, 2020	12. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure that residents will finally benefit from the taxes paid.	Support noted.

Agency	Date	Comments	Response
		13. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - connects Northern California Megaregion's workforce to affordable housing - will provide an estimated 22,000 jobs during construction and went operational support 400 jobs per year	Benefits noted.
City of Livermore	July 10, 2020 and May 28, 2020	14. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure that our residents will finally benefit from the taxes paid.	Support noted.
		15. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space - connects Northern California Megaregion's workforce to affordable housing - will provide an estimated 22,000 jobs during construction and went operational support 400 jobs per year	Benefits noted.

Agency	Date	Comments	Response
City of Pleasanton	May 26, 2020 and June 26, 2020	16. Expressed support for the amendment. The Valley Link Project will complete the regional rail concept initially envisioned for the Tri-Valley decades ago and meets the vision and goals of Measure BB by expanding regional rail, providing traffic relief, improving air quality by providing clean transportation.	Support noted.
		17. Noted key benefits of the project: - reduction of greenhouse gas emissions - included renewable energy sources and sustainable construction practices - supports transit-oriented development - protects open space	Benefits noted.
City of Union City	July 21, 2020	18. Expressed support for the amendment request.	Support noted.
		19. Noted benefits of the project: - mega-regional cooperation - provides connectivity to other transit providers - provides service between housing and job centers - facilitates the movement of goods - provides a transit alternative to reduce greenhouse gas emissions - supports transit-oriented development	Benefits noted.
LAVTA	May 25, 2020	20. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure residents will finally benefit from the taxes paid.	Support noted.

Agency	Date	Comments	Response
		21. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - support advancement of transit-oriented development - protects open space	Benefits noted.
San Joaquin Regional Rail Commission	July 2, 2020	22. Expressed support for the amendment request.	Support noted.
		23. Noted key benefits of the project: - fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore - supports an intermodal connection between ACE and the BART system and the advancement of the Altamont Corridor Vision. - will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor - estimated 28,000 are projected to ride the Valley Link system in 2040 - reduction of over 99.4 million Vehicle Miles Traveled (VMT) - reduction of over 33,000 metric tons of greenhouse gas emissions per year	Benefits noted.

Public Comments

Organization/Individual	Date	Comments	Response
Bay Area Council	May 27, 2020	24. Expressed support for the project and amendment that will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, assure residents will finally benefit from the taxes paid.	Support noted.
		25. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports advancement of transit-oriented development - protects open space	Benefits noted.
Alameda County Taxpayers Association	May 22, 2020	26. Expressed opposition to transferring funds to Valley Link at this time.	Opposition noted.
		27. Encourages narrow reading of TEP as to intention of voters and sees need for full alternatives analysis completed including consideration of express bus. States that ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.	See response to Comment 3.

Organization/Individual	Date	Comments	Response
		28. Troubled by transferring funds before San Joaquin contribution is secured.	The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment. The TVSJVRRA is working closely with cities in San Joaquin County, SJCOG, and the state to secure additional funding for the project. Thus far, the City of Tracy has committed to donation of a key 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds.
Bay Area Transportation Working Group	May 11, 2020 and May 23, 2020	29. Expressed opposition to the project and amendment.	Opposition noted.

Organization/Individual	Date	Comments	Response
		30. A full unbiased feasibility study must be done, including assessment of projected ridership, cost-effectiveness, and funding opportunities of Valley Link and other transportation options for the corridor. Stated that the BART staff recommended a significantly upgraded bus option to its Board in 2017 that would better serve the transportation needs to Pleasanton and Livermore. Stated that the Bay Area Transportation Working Group conducted an extensive investigation of a bus alternative and concluded that in terms of improving the access of the people of Livermore to BART, well-appointed buses operating in bus-only lanes would be a far cheaper and better option.	See response to Comment 3. The BART staff did not recommend an alternative to the BART Board when considering the adoption of the Final BART to Livermore Environmental Impact Report on May 24, 2018.
		31. Valley Link primarily benefits non-Alameda County residents.	See response to Comment 2.

Organization/Individual	Date	Comments	Response
		32. Changes brought about by COVID must be considered.	The long-term travel and commute impacts of COVID are unknown at this time. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan.
Bike East Bay	May 11, 2020	33. Bike East Bay supports transit but has questions and concerns regarding the project.	Support with concerns noted.
		34. Concerned there was not sufficient public outreach in Livermore to generate support for the project. Where are the residents of Livermore on the project?	To-date there has been extensive public outreach in Livermore, first as part of the BART to Livermore project and subsequently when the Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJRRA) developed the Project Feasibility Report. The TVSJVRAA documented outreach it conducted in Appendix B of the Project Feasibility Report. The City of Livermore also conducted significant outreach as part of the Isabel Neighborhood Specific Plan, which is closely tied to rail service in Livermore. Livermore also recently advanced an application to form a new Priority Development Area (PDA) by the proposed site for a future station, the Southfront Station PDA, which was approved by ABAG in February 2020.
		35. Hour headways off-peak is not high-quality transit. What can be done to convert this to good transit?	As the project development has advanced, the planning service frequencies have been updated. The TVSJRRA is currently planning for 12-minute frequencies in the weekday peak, 24-minute frequencies in the off-peak, and 36-minute frequencies on weekends and holidays by 2040.

Organization/Individual	Date	Comments	Response
		36. Requested information regarding the potential impacts of the current financial crisis on the project.	Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues. Sales tax revenues are received from the California Department of Tax and Fee Administration (CDTFA) two months in arrears, and staff has been updating the Commission as data becomes available. Alameda CTC has not developed a 5-year sales tax revenue projection at this point given the large uncertainties regarding the depth and breadth of the recession and the lack of sales tax receipt data received to date. Revenue projections for FY2020-21 were included in the agency budget that was adopted in May 2020, which can be found on Alameda CTC's website at the following link: https://www.alamedactc.org/wp-content/uploads/2020/05/7.1_COMM_FY2020-21_Proposed_Budget_20200528.pdf. The budget for sales tax revenues for FY2020-21 will be updated if and when appropriate based on data received from the CDTFA. Formulas used to calculate Direct Local Distributions (DLD) are not affected by increases or decreases in sales tax revenue collections. Alameda CTC's website also includes sales tax projections for DLDs for FY2020-21 here. Alameda CTC currently does not anticipate any impact to payments to jurisdictions for other grants nor specific projects or programs due to COVID-19.

Organization/Individual	Date	Comments	Response
Building and Construction Trades Council of Alameda County	May 26, 2020 (same as May 11 letter)	37. Expressed support for the project and amendment that has been under development dating back to the 1960s when the BART system was originally envisioned.	Support noted.
		38. Noted key benefits of the project: - cost effective and efficient in that it uses currently existing transportation rights of way - will provide transportation alternatives that will benefit the environment, economy and quality of life of residents and Bay Area workers - sustainable technology - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports transit-oriented development - will provide an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues	Benefits noted.

Organization/Individual	Date	Comments	Response
		39. Supports advancing the amendment now so the project can compete for additional funding.	Support noted. The ability to leverage local sales tax dollars to secure competitive regional, state and federal funds is a key principle of local sales taxes. By being able to show a commitment of local funding, the project will be more competitive for regional, state and federal funding.
Chabot-Las Positas Community College	May 25, 2020	40. Expressed support for the amendment and notes fulfilment of commitment to tri-valley and benefits for student population from both Tri-Valley and 580-880 corridors.	Support and benefits noted.
Innovation Tri-Valley Leadership Group	May 7, 2020	41. Expressed support for the amendment, which fulfills a long-standing vision for rail connections from Dublin/Pleasanton to Livermore, and is consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley.	Support noted.
		42. Noted congestion reduction benefits of the project and the need to provide transportation alternatives in the corridor to benefit the environment, the economy and the quality of life of residents and workers.	Benefits noted.
		43. Amending the TEP now is important to allow the Authority to leverage local funds with State, federal and private funding to complete the project.	Support noted.

Organization/Individual	Date	Comments	Response
Laborers' Local 304 (Rafael Gonzalez)	May 26, 2020	44. Expressed support for the project and amendment.	Support noted.
		45. Noted key benefits of the project: - cost effective and efficient in that it uses currently existing transportation rights of way - will provide transportation alternatives that will benefit the environment, economy and quality of life of residents and Bay Area workers - sustainable technology - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports transit-oriented development	Benefits noted.
Livermore Chamber of Commerce	May 8, 2020	46. Expressed support for the proposed amendment to provide an urgently needed and long-awaited effective rail connection between Livermore and the Dublin/Pleasanton BART station.	Support noted.
Hacienda	June 9, 2020	47. Expressed support for the project and amendment that advance long-held objectives of creating a viable rail connection between alameda and San Joaquin Counties.	Support noted.

Organization/Individual	Date	Comments	Response
		48. Critical employment centers, such as Hacienda, need to make sure that all corridors leading into the Tri-Valley provide easy and convenient access for businesses whose labor supply extends into outlying areas. Likewise, residents at Hacienda similarly need the ability to enjoy access to corridors connecting the Tri-Valley with the larger region.	Support noted. Valley Link would provide access to support businesses and residents at Hacienda.
		49. Noted key benefits of the project: - reduction of over 99.4 million Vehicle Miles Traveled - reduction of over 33,000 metric tons of greenhouse gas emissions per year - supports advancement of transit-oriented development - protects open space	Benefits noted.
Jon M Spangler	July 15, 2020	50. Expressed opposition to the project and amendment.	Opposition noted.
		51. Inadequate public noticing of the comment period: - The project was never on the 2014 Measure BB project list - Very limited public notice or input and almost no publicity - Process to submit public comment was not noticed on Alameda CTC's website	The following are amendment requirements as specified in the 2014 Transportation Expenditure Plan (2014 TEP) Implementing Guidelines: "4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment."

Organization/Individual	Date	Comments	Response
			The comment period is for jurisdictions in Alameda County. Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission of a 45-day comment period regarding the proposed amendment, which included direction on how comments must be submitted to the Commission. The notifications were sent via email and hard copy through the US Postal Service on May 29, 2020. The public noticing process is consistent with what is required in the TEP Implementing Guidelines. The process was described at the May Alameda CTC Committee and Commission agenda materials and discussed at the meetings. Alameda CTC is responding to all public comments received. Comments were received by member jurisdictions as well as advocacy organizations and individual members of the public expressing a diversity of viewpoints on the proposed amendment.

Organization/Individual	Date	Comments	Response
		52. No environmental impact report is not complete so there is not detailed information available regarding the rail project's effects.	As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal requirements. There is no legal requirement and the TEP does not require that projects must complete an environmental document before being in the plan, nor does it require that full funding is required before being in the plan. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects. Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only four of the 21 named capital projects in the TEP had an approved EIR when the TEP was approved by voters. The Draft EIR is anticipated to be released in fall 2020.
		53. No detailed evaluation of other alternatives such as extending BART service to Livermore.	See response to Comment 3.

Organization/Individual	Date	Comments	Response
		54. Concerned with exurban sprawl and the need to re-establish patterns of living close to work. Before the Valley Rail project received any public funding, policies must be established to ensure that only higher-density, compact growth will be allowed in these outlying areas.	The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the regional goals of both San Joaquin County and the Bay Area to support the advancement of transit-oriented development (TOD) in Valley Link station areas. The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines and identifies key policy objectives and strategies to: • Develop and implement station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within a half mile radius of stations. • Develop station area plans that, at a minimum, define the land use plan for the area, zoning, design standards, parking policies and station access plans. The intent of these policies is to develop strategies to create vibrant and livable station area communities within the proposed station environs. The advancement of transit-oriented development adjacent to stations aims to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions (GHG) for the project. Station area plans are currently under development at the Isabel, Downtown Tracy and River Islands stations. The Dublin/Pleasanton and Isabel Stations are in established MTC Priority Development Areas (PDA) and an application for a Southfront Station PDA was recently added as a new PDA.
		55. The additional demand on BART and the mechanism for funding BART's added costs should also be detailed ahead of making large expenditures like this.	See response to Comment 9.

Organization/Individual	Date	Comments	Response
		56. Large-scale policy and planning decisions and clearer understanding of Valley Link's overall impacts on growth and additional sprawl in the exurbs and suburbs must be very carefully calculated before, not after, such a project is funded.	See response to Comment 52.
		57. With future sales tax revenues in doubt and existing transit systems in crisis, the funding should remain unspent, be allocated to other voter-approved Measure BB projects, or used to support existing transit agencies and services.	See responses to Comments 3 and 4.
Law Offices of Jason A. Bezis	May 28, 2020	58. Expressed opposition to the TEP Amendment.	Opposition noted.
		59. Stated that the Amendment would be a bait and switch while voters distracted by the COVID-19 pandemic and is a major decision that should not be made during an emergency.	The Alameda County Transportation Commission continues to operate during the COVID pandemic, including acting on advancing projects approved by voters in the 2014 Transportation Expenditure Plan.
		60. Stated that the Valley Link Rail project to Altamont Pass is a drastically different project than BART to Livermore and raised concerns about funding being spent outside of the county and for little to no benefit to Alameda County taxpayers.	See response to Comment 2.

Organization/Individual	Date	Comments	Response
		61. Stated that the Amendment upsets to overall geographic equity consensus that underpins the Measure BB TEP, as the benefits to the residents of the Tri-Valley are less than they would have been is BART to Isabel Avenue had advanced.	This Amendment preserves the original geographic funding distribution of the 2014 TEP. When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County. The Amendment does not propose redistributing funds outside of the East Planning Area.
		62. Stated that the Commission is acting prematurely, with too many unknowns, and highlighted the need for the EIR to be released and an implementation plan and funding plan to be complete.	See responses to Comments 3 and 52. The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved
		63. Raised concerns regarding potential impacts on crowded BART trains.	See response to Comment 9.
		64. States that alternatives need to be further evaluated. The commenter specifically advocated for an express bus alternative that was identified in the 2003 Caltrans I-580 widening study as a cost-effective alternative that could be implemented quickly, or for a t-BART proposal that would utilize existing rail corridors in the Tri-Valley.	See response to Comment 3. Conditions have changed since 2003 with the construction of the I-580 Express Lanes. BART did analysis in 2018 (Comment 3) and express bus was considered but not recommended to be advanced.
		65. Noted that voters in the Tri-Valley did not support Measure BB and suggested that voters in the Tri-Valley vote on whether or not to reallocate the $400 million.	Measure BB passed based on total votes in the county, not based on geographies within the county. The TEP Implementing Guidelines lay out the Amendment process. This proposed Amendment is following that process.

Organization/Individual	Date	Comments	Response
		66. Stated that the decision should not be made until after the fall elections, which will result in new mayors for all three cities in the Tri-Valley and a new county supervisor.	Actions taken at the Alameda County Transportation Commission are done based upon the 22 members representing the full Commission and are not made on a planning area basis.
		67. Stated that Livermore residents would be betrayed if the Amendment proceeds, as they would continue paying taxes with no BART service and diminished local streets and road funding.	The Valley Link project includes rail stations, and rail service connecting directly into the BART system. The City of Livermore submitted a letter of support for the project. See also response to Comment 34.
		68. Raised concerns regarding the Measure BB campaign.	See Memorandum, Attachment A to this Comment Matrix.
Sierra Club	May 11, 2020 and July 13, 2020	69. Expressed opposition to the proposed actions. Recommend that no action be taken for the foreseeable future, at least until after completion of a full Environmental Impact Report process and other related documentation, and until there is a return to financial stability for Measure BB sales tax funds.	See response to Comments 52 (regarding environmental analysis) and 36 (regarding sales tax).
		70. Expressed no current position regarding the project itself, pending much more documentation and analysis for both decisionmakers and the public.	Noted the desire for more documentation and analysis.

Organization/Individual	Date	Comments	Response
		71. Insufficient comment period: - No notice was provided to the public or posted on the Alameda CTC website - The public was not informed how to communicate with elected representatives so that timely and informed comments by the jurisdiction could be submitted	See response to Comment 51.
		72. Request that all comments by jurisdictions be posted on the Alameda CTC website by the end of July 2020 so that the public can communicate on this matter with their elected officials.	Per direction of the Commission in May 2020, all comments will be posted with the September materials for the Planning, Policy and Legislation Committee (PPLC) along with a comment and response matrix.
		73. Request information regarding the potential/expected impact on other transit recipients if Valley Link is approved as a new agency that is eligible for Measure BB funds, including for operations? Does the selective omission of Valley Link in the "redlined" Appendix C of the May 28 materials mean that Valley Link will not be an eligible recipient under the Category of "Transit: Operations, Maintenance, and Safety Program"?	The TEP amendment request did not include a request for operating funds and, therefore, consideration for operating funds is not subject to this amendment. Redistribution of funds for operations would require a separate amendment, which has not been requested.

Organization/Individual	Date	Comments	Response
		74. The entire package of proposed actions is premature before completion of a full Environmental Review process, which is necessary to determine the viability, appropriateness, and environmental impact of the proposed project.	See response to Comment 51.
		75. Concerned the actions are being rushed, especially given the magnitude of current revenue uncertainties.	The TVSJVRRA submitted its request for the TEP Amendment to Alameda CTC in September 2019. Over the past year, Alameda CTC has participated on a project Executive Steering Committee with MTC, BART, SJRRC, Caltrans, and the California State Transportation Agency to provide input on the development of the feasibility report and project development. Alameda CTC also evaluated initial project designs related to potential impacts on the I-580 Express Lanes; those discussions will continue as the design progresses. See response to Comment 36 regarding sales tax.

Organization/Individual	Date	Comments	Response
		76. Current financial projections and analyses identify significant shortfalls in sales tax revenues at all levels for the foreseeable future. Please identify your responses below both with, and without, the impact of ACTC approval of the proposed Valley Link actions: - What are the current estimates and projections for Measures B and BB revenues (for at least the next 5 years), and as compared to previous actuals? - How will these changes in revenues affect DLD formulas, as well as other anticipated payments to jurisdictions and/or projects or programs?	See response to Comment 36.

		77. There is no "entitlement" for Measure BB funds from the cancelled "BART to Livermore" project for either the Tri-Valley planning area or even for a rail project, and the voters who actually approved Measure BB, with the "BART to Livermore" project, were, in large part, not primarily from the Tri-Valley. There should be an open, full and fair competitive assessment to determine any re-programming of that project's successor, per Implementing Guideline 22 from the TEP. ***22. Fund Allocations****: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, 4 Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.*	See responses to Comments 3 and 4.

Organization/Individual	Date	Comments	Response
		78. Valley Link violates the "inter-regional commuting" policy of SB 375 and Plan Bay Area.	SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations (MPOs) in the state of California. As it relates to this project, the two MPOs are the Metropolitan Transportation Commission (MTC) and the San Joaquin Council of Governments (SJCOG). The MTC Commission recently voted to include Valley Link in Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region. SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project. MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.
		79. Valley Link would disadvantage Alameda County residents, taxpayers, and transit riders to the benefit of inter-regional travelers from San Joaquin County.	See response to Comment 2.
		80. ACTC should not act until there is at least a matching financial commitment from San Joaquin County. Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and continuing operations for this multi-county project.	See response to Comment 28.

		81. The ACTC meeting materials from May 28th show the proposed project description only as it would be amended, without including the carefully negotiated original terms – approved by the voters – that are proposed for omission or change now. - What difference does the "initial operating segment" make to the proposal's potential draw on Alameda County funds? - What criteria will be used to assess whether the initial operating segment "most effectively meets" the adopted project goals, and which agency will make that determination? - When will "full funding commitments" be identified and approved for the full project? - Please also explain why the references to "detailed" analysis and "all" alternatives are being deleted.	No Measure BB funds may be expended outside of Alameda County. Measure BB funds could be used for an Initial Operating Segment that would be adopted by the TVSJVRRA Board, which has established project goals against which the proposed project and project alternatives will be measured and considered when considering project adoption. The TVSJVRRA-adopted project goals are: • Improve connectivity within the Bay Area Megaregion: connecting housing, people and jobs. • Establish rail connectivity between the Bay Area Rapid Transit District's rapid transit system and the Altamont Corridor Express commuter service. • Pursue project implementation that is fast, cost-effective and responsive to the goals and objectives of the communities it will serve. • Be a model of sustainability in the design, construction, and operation of the system. • Support the vision of the California State Rail Plan to connect the Northern California Megaregion to the State rail system. Currently the TVSJVRRA is considering two different potential initial operating segments: an extension from Dublin-Pleasanton BART to Greenville, or an extension from Dublin-Pleasanton BART to Mountain House. As stated in the proposed TEP Amendment language, a full funding plan must be identified before Alameda CTC would release Measure BB funds. In addition, Measure BB funds are only allowed to be used for construction. References to "detailed" and "all" are proposed to be removed for clarity and to remove vague qualifying statements. The BART

Organization/Individual	Date	Comments	Response
			to Livermore Project EIR evaluated a number of alternatives, and the Valley Link EIR is also evaluating a number of alternatives.
		82. Several places in the proposed "amendments" describe Valley link as "Commuter Rail," despite the fact that it is proposed to operate throughout the day. Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?	Valley Link will comply with all ADA regulations and will work with local transit operators to assure equitable access to the system. Under those regulations, Valley Link clearly falls within the definition of "commuter rail" as it will not operate in exclusive right-of-way and is not a light rail (street car) system by definition. See 49 CFR §37.3, §37.121(c).
		83. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?	See response to Comment 36.
Pleasanton Chamber of Commerce	May 27, 2020	84. Expresses support for amendment. Cites traffic reduction benefits, fulfilment of voter promise, reduction in VMT.	Support noted. Benefits noted.

Organization/Individual	Date	Comments	Response
Train Riders Association of California	May 26, 2020	85. Urge the Commission to defer action until an Environmental Impact Report is completed.	Comment noted.
		86. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines: - No Expenditures Outside of Alameda County: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County.	No Measure BB funding may be spent outside of Alameda County. See response to Comment 2.
		87. Valley Link may result in overcrowding on the BART system that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.	See response to Comment 9.

Organization/Individual	Date	Comments	Response
		88. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use constraining provisions of Alameda County year 2000 Measure D. An EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.	The "gateway policy" is part of the Alameda County East County Area Plan - as amended by Measure D. The policies identified in the Plan (as noted in italics below) do not preclude the advancement of Valley Link. The Valley Link project will both facilitate the movement of commercial goods and improve safety in the corridor. • *The County shall assign priority in funding decisions to arterial and transit improvements that would improve local circulation, and to improvements that would facilitate movement of commercial goods.* • *This policy shall not preclude the County from supporting or approving any rail projects or improvements required for roadway safety*.
		89. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment.	The TEP implementing guidelines do not include any special requirements for specific projects. The TEP implementing guidelines specifically state: "4. Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners. All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment."
		Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.	See response to Comment 4.

Organization/Individual	Date	Comments	Response
		90. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer.	See response to Comment 3.

Verbal Comments & Letters Received for PPLC and Commission Meetings

May 11, 2020 Alameda CTC Planning, Policy and Legislation Committee meeting

The following public comments were heard during the May 11, 2020 PPLC meeting:

- Pat Piras, on behalf of the Sierra Club, spoke during public comment noting that there were too many issues and questions that should be addressed before the recommended actions move forward. Ms. Piras specifically questioned the lack of funding from San Joaquin County, consistency with SB 375, and the financial impact of COVID-19.

The following letters were received for the May 11, 2020 PPLC Meeting and received by Commissioners:

- Gerald Cauthen on behalf of Bay Area Transportation Working Group – expressing concern about reallocation, advocating for buses in bus-only lanes as a superior alternative.
- Dave Campbell on behalf of Bike East Bay – Raised questions about the lack of outreach in the City of Livermore. He mentioned concerns regarding how the financial crisis will impact the proposed project
- Kelly Ellen Marshal on behalf of Building and Construction Trades Council of Alameda County, AFL-CIO – Support of staff's recommendation
- Tim Sbranti on behalf of Innovation Tri-Valley Leadership Group – Support of staff's recommendation
- Dawn P. Argula on behalf of Livermore Chamber of Commerce – Support of staff's recommendation
- Sierra Club (San Francisco Bay Chapter) (Matt Williams, Dick Schneider, Eric Parfrey) – Noted too many issues and questions that should be addressed before the recommended actions move forward; and questioned the lack of funding from San Joaquin County, consistency with SB 375, and the financial impact of COVID-19

May 28, 2020 Alameda CTC Commission meeting:

The following public comments were heard during the May 28, 2020 Commission meeting:

- Jason Bezis stated he did not support staff's recommendation and noted his concerns about the $400 Million being used by San Joaquin residents and not Alameda County residents.
- BART Director John McPartland stated that he supports staff's recommendation.

- Pat Piras, on behalf of the Sierra Club, urged Alameda CTC to defer this action and requested Alameda CTC respond to the letters and comments before the end of the 45-day comment period.
- Gerald Cauthen (President of Bay Area Transportation Working Group) expressed his opposition to staff's recommendation.

The following Public comment letters were received by the noticed deadline for the May 28, 2020 Commission Meeting and provided to Commissioners:

- Alameda County Taxpayers Association – Oppose staff's recommendation
- BART Director John McPartland – Support of staff's recommendation
- BART General Manager Robert Powers – Support of staff's recommendation
- Jim Wunderman writes on behalf of the Bay Area Council – Support of staff's recommendation
- Gerald Cauthen, President and co-founder of the Bay Area Transportation Working Group – Oppose staff's recommendation
- Andreas Culver, Secretary-Treasurer, of the Building and Construction Trades Council of Alameda County – Support of staff's recommendation
- Ronald P. Gerhard, Chancellor of the Chabot-Los Positas Community College District – Support of staff's recommendation
- Linda Smith, City Manager of the City of Dublin – Support of staff's recommendation
- John Marchand, Mayor of the City of Livermore – Support of staff's recommendation
- Nelson Fialho, City Manager of the City of Pleasanton – Support of staff's recommendation
- Tim Sbranti, on behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group – Support of staff's recommendation
- Rafael Gonzalez on behalf of Laborers' Local 304 – Support of staff's recommendation
- David Haubert on behalf of the Livermore Amador Valley Transit Authority (LAVTA) – Support of staff's recommendation
- Steve Van Dorn, President and CEO of the Pleasanton Chamber of Commerce – Support of staff's recommendation
- David Schonbrunn, President of the Train Riders Association of California, writes to urge the Commission to defer action on amending the Expenditure Plan for Measure BB until Alameda CTC receives an environmental impact report for Valley Link

June 8, 2020 Alameda CTC Planning, Policy and Legislation Committee

1. **Public Comment**
   Pat Piras, on behalf of the Sierra Club, commented on the Valley Link Project and the proposed 2014 Transportation Expenditure Plan amendment. Ms. Piras requested that Alameda CTC respond to questions raised by the Sierra Club, well in advance of the 45-day comment period that is required to amend the 2014 Transportation Plan. She requested to extend the 45-day comment period to end at a later date.

September 14, 2020 Alameda CTC Planning, Policy and Legislation Committee

The following public comments were heard during the September 14, 2020 PPLC meeting:

- Mark Roberts – City Manager, City of Livermore – Support staff's recommendation
- Val Menotti – Chief Planning and Development Officer, BART – BART staff support staff's recommendation and are working closely with Valley Link to develop a Memorandum of Understanding and to ensure potential impacts to the BART system are addressed and that a high-quality experience is provided to the customer
- Guisselle Nunez – Chabot Las Positas Community College – Support staff's recommendation
- Mark Triska – Tri-Valley Conservancy – Support staff's recommendation
- Dan Leavitt – San Joaquin Regional Rail Commission – noted the SJRRC is working closely with Valley Link and that a future Valley Link and ACE service are not duplicative of each other – Support staff's recommendation
- John McPartland – BART director – Support staff's recommendation
- Evan Branning – teacher in the Tri-Valley – Support staff's recommendation
- Steven Dunbar – resident of Livermore – Support staff's recommendation
- Linda Smith – City Manager, City of Dublin – Support staff's recommendation
- John Belperio – Carpenters Union – Support staff's recommendation
- Jennifer – Livermore resident – Support staff's recommendation
- Mario Santa Cruz – field representative for Local 102 – Support staff's recommendation
- Pat Pirus – Sierra Club – Noted opposition of the amendment, as detailed in comment letter. Specific concerns noted verbally include: inconsistency with SB 375 and interregional commute; clarification that Plan Bay Area 2050

has not been adopted; premature to act on the amendment and urged the Committee to wait and see if San Joaquin County passes sales tax, and if an MOU with BART gets signed; and stated there were no credible sales tax estimates. – Oppose staff recommendation
- Martin Espinoza Jr – field rep for the pile drivers – Support staff's recommendation
- Regina –Livermore resident – Support staff's recommendation
- Candice –Alameda County resident – Support staff's recommendation

The following letters were received for the September 14, 2020 PPLC Meeting and received by Commissioners:

Letters of **support for the TEP Amendment** were submitted by the following:

MEMORANDUM

September 3, 2020

TO: Alameda County Transportation Commission

FROM: R. Zachary Wasserman

RE: Comments from Jason Bezis regarding the 2014 campaign to approve Measure BB as part of Valley Link comments

---

Jason Bezis submitted a number of comments on the Valley Link amendment which are addressed as part of the Comment Matrix. In addition to comments about both the substance and the process for this amendment, he added irrelevant comments about the 2014 election that approved the extension and increase of the sales tax supporting transportation projects and programs in Alameda County. Mr. Bezis raised these issues in 2014 and 2015 with the Commission and with the State Fair Political Practices Commission ("FPPC"). The Commission retained an independent law firm, Renne Sloane Holtzman Sakai to investigate the issues he raised. Randy Riddle of that firm conducted a thorough factual investigation and legal analysis, resulting in a 62-page report. The report concluded that no laws were violated, that no public funds were improperly used and that no conflict of interest rules were violated by any of the actions raised by Mr. Bezis. Mr. Riddle did recommend that Commission staff receive formal ethics training about campaign rules. That training has been provided as part of a broader ethics training program.

Mr. Bezis made a complaint to the FPPC with similar issues. The FPPC reviewed the complaint and a response from ACTC and declined to investigate those complaints. A similar, but more vague complaint was made by Jerry Cauthen to the FPPC. After reviewing the report by Randy Riddle, the FPPC also declined to investigate that complaint.

These issues are entirely irrelevant to the Valley Link amendment and as noted have been thoroughly investigated and rejected by both the Commissions independent investigator and the FPPC. No further response is necessary.

This page intentionally left blank

Alameda-Contra Costa Transit District

July 9, 2020
Mayor Pauline Cutter
Alameda County Transportation Commission Chair
1111 Broadway, Suite 800
Oakland, CA 94607

Re: Valley Link TEP Amendment

Dear Chair Cutter,

Thank you for providing AC Transit and other jurisdictions in Alameda County the opportunity to comment on the Alameda County Transportation Commission (ACTC) and Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJVRRA) proposed amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to reprogram $400 million in the Measure BB funds from the BART to Livermore project to the Valley Link Rail project. Please note that AC Transit's Board of Directors has not had the opportunity to provide official comment and position on the proposed amendment and AC Transit's Board representative has indicated she will be guided by the board's direction. Therefore, this letter reflects the comments of AC Transit staff.

As a primary transportation provider in Alameda County, AC Transit has interest in the county's transportation services and the establishment of a comprehensive, multi-modal transit network. As a result, staff has the following comments with regard to the proposed amendment:

- Though the BART to Livermore project did not align with BART's service priorities, the project was primarily intended for Alameda County residents, employees and taxpayers. Any alternate use of the funding allocation should benefit the same population in the county. This is consistent with Implementing Guideline #14 - "No Expenditures Outside of Alameda County" under the TEP.

  The Valley Link Rail project appears to have a primary purpose of transporting residents from San Joaquin County to Alameda County, with an ultimate destination in Santa Clara County, similar to existing ACE Train service. ACTC Staff and Valley Link Project staff were unable to clarify this issue when asked by the AC Transit Board. If the funding allocation is transferred to this project, Alameda County taxpayers would not directly benefit as much as San Joaquin County residents, especially if there are no committed funds from San Joaquin County.

- Appropriate use of the $400 million in funding should be to help create a comprehensive multimodal transportation network that serves the residents, employees and taxpayers of Alameda County. There are many transportation projects

that could improve travel and commute for Eastern Alameda County and would have a better cost-benefit ratio than the Valley Link Rail project and thus, a better and more efficient use of funds. Possible projects such as express bus service and bus rapid transit would fall into this category. Implementing Guideline #22 – "Fund Allocations" under the TEP would allow for such projects to be funded with the allocation.

- Given the current financial climate and the uncertainty that lies ahead, it is within reason for ACTC to also consider reallocating the $400 million to any number of under-funded capital projects throughout the county, including transit projects within the AC Transit service area that are identified in multiple countywide plan documents. Per Implementing Guideline #4 – "Amendments Require 2/3 Support" of the TEP, ACTC could amend the plan with a 2/3 supporting vote of the commission and distribute funds to existing planned or proposed projects.

Again, thank you for giving AC Transit the opportunity to comment on this proposed amendment to the TEP. Should you have any questions or need clarification on the above comments, please do not hesitate to contact AC Transit staff.

Sincerely,

Michael Hursh
General Manager

BOARD OF SUPERVISORS

June 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

RE: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services – firefighters, police, nurses, and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

1221 OAK STREET • FIFTH FLOOR • OAKLAND, CALIFORNIA 94612 • 510 272-6984 • FAX 510 272-3784

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Richard Valle, President
Alameda County Board of Supervisors

re: ACTC May 28, 2020 meeting, Agenda item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)

Dear Chair Cutter:

The Alameda County Taxpayers Association (ACTA), a 501(c)(4) organization, represents the taxpayers of this County in advocating legal and productive expenditures of taxpayer funds. As such, ACTA is a statutory appointer of a member of the ACTC Independent Watchdog Committee.

Alameda County Taxpayers Association [ACTA] is troubled by plan to transfer $400 million BART funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority. The Alameda County voters approved the Special Tax of Measure BB and to be dedicated for Alameda County transportation projects such as the BART to Livermore extension. The foremost consideration of ACTC must be the will of the voters. ACTC must narrowly construe the intention of the voters regarding the 'specific purposes' of the Measure BB special sales tax. The voters did not contemplate that the Measure BB taxes would single-handedly fund multi-county projects in the absence of funds contributions from other counties. When the Tri-Valley Authority has produced its share of the project funding, the ACTC can plan how to spend Tri-Valley Authority funds. ACTA will vigorously oppose any plan to divert these funds away from a voter-approved project.

For the present ACTC must demonstrate that it can plan a viable project by solving the BART to Livermore extension. This Committee must demonstrate leadership and build consensus on existing Alameda County projects, not leap ahead to the next glorious project that has not even been planned. As a first step in leadership, the committee should use its power to make the promised annual audits of Measure BB expenditures a reality.

We call on ACTC to table this action until such time as a proper study be made of this project and the logical alternatives, including a long-haul commuter express bus network for both Eastern Alameda County along the I-580 Corridor and over the hills from the Central Valley. We certainly have no objection to working jointly with Central Valley governments and other interest groups on a project of mutual benefit. However, we do not understand why ACTC is proposing that the Alameda County taxpayers be the first to transfer funds approved by the voters to benefit primarily Alameda County residents to a project that would instead primarily benefit residents of other counties – particularly since there is no commitment from those counties, or even an idea of when such a commitment might be made.

The $400 million was originally approved by the voters as part of Measure BB in 2014 for a BART extension to Livermore. The BART Board elected not to pursue this, so we agree it is proper to study other transportation improvements in this corridor – but, we believe that the first priority should be for what the voters intended, benefits for the residents and travelers along the I-580 corridor in the Eastern Tri-Valley area.

We do not object to the study of rail alternatives in this corridor and into the Central Valley, either BART or commuter/inter-city rail. But, in our role as a taxpayer advocate, we believe that it would be improper to advocate for rail unless and until a proper, unbiased study fairly considers other options, including a bus system on dedicated lanes, that could require far less taxpayer dollars and could be completed much faster. If the study shows that Valley Rail is the best option and is fair to the taxpayers and the traveling public, and is feasible, then ACTC should consider this $400 million reallocation at that time.

We do not understand the necessity nor the benefit of making this decision so early in the planning process.

I will be commenting on this matter at the Commission meeting.

Thank you for your consideration of the position of the Alameda County Taxpayers Association on this important matter before the Commission.

Respectfully submitted,

Marcus Crawley -President of

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As BART Director (District 5) and representative for my constituents and taxpayers in the Tri-Valley area, I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades. The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. RE: Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request

Chair Cutter:

Thank you for the opportunity to comment on the above referenced item. On behalf of the San Francisco Bay Area Rapid Transit District (BART), I would like to express support for beginning a 45-day comment period on the proposed amendment to the 2014 Measure BB funded TEP, as described in the staff memorandum.

In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Since then, BART staff have been engaged with the TVSJVRRA throughout project feasibility and initial design and environmental assessments of the proposed Valley Link Rail project, and this coordination continues.

Because of this, BART supports the action to begin the public comment period for the amendment to the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. It is important to hear from Alameda County residents and other stakeholders. The District anticipates submitting a more detailed set of comments during the official 45-day comment period that this action will kick-off.

Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

RE: Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Ms. Lengyel,

Thank you for the opportunity to comment on the above referenced item as part of the 45-day comment period that began following the Alameda County Transportation Commission's (Alameda CTC) initial action on May 28, 2020. On behalf of the staff of the San Francisco Bay Area Rapid Transit District (BART), I am writing to express my support, with recommendations detailed below, of the proposed amendment of the 2014 Transportation Expenditure Plan, specifically on the $400 million (M) of the 2014 Measure BB funds identified for the BART to Livermore extension project.

The 2014 Transportation Expenditure Plan (TEP) that was approved by Alameda County voters did specify "a BART Extension within the I-580 Corridor … using the most effective and efficient technology." In May 2018, the BART Board of Directors certified the Final Project EIR for the BART to Livermore extension, and directed staff not to advance a specific project in the Tri-Valley. Pursuant to AB 758 (Baker), the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) at that point assumed responsibility to advance a rail project in the corridor. Because of the BART Board's decision to not advance a project in the corridor, and TVSJVRRA's subsequent assumption of the lead for rail planning in the Tri-Valley, BART staff supports (with recommendations below) the proposed action to amend the TEP naming the TVSJVRRA as an eligible recipient of Measure BB funds and specifically naming the Valley Link project in place of BART to Livermore. Staff believes this action is consistent with intent of Alameda County voters to invest in transit in the I-580 Corridor. It is important that the $400 M sales tax investment does accrue to Alameda County residents and businesses.

Since the TVSJVRRA assumed responsibility for a rail project in the Tri-Valley, BART staff have been engaged with the Authority during project feasibility and initial design of the proposed Valley Link Rail project, and this coordination continues as the project undergoes environmental review and design refinement. This coordination has been key to BART's review of the potential impacts that the Valley Link project is projected to have on riders of the BART system.

ACTC_AR3007

To ensure a safe, comfortable and seamless journey for transit riders, BART recommends that the amendment to the TEP clearly indicate that required improvements to the BART system in Alameda County resulting from the impacts of the Valley Link Rail project are priority components of the Phase 1 Valley Link Rail project. These fall into three areas of investments:

1) **Base Project:** As a result of our initial analysis of these impacts, BART projects that the increased ridership driven by the Valley Link Rail project will result in impacts to BART (including the need to acquire additional rail cars), station capital improvement needs (to accommodate safe and smooth passengers flows), and reconfiguration of the Dublin/Pleasanton station (to facilitate transfers between the two systems). These analyses will be further revised as coordination continues, in preparation for the release of the Draft Environmental Impact Report for the Valley Link Rail project scheduled for later this year
2) **Core Improvements:** Initial analysis indicates that many future Valley Link patrons would transfer to the BART system, and that capacity improvements of varying cost may be required at destination stations, such as the 12th St Oakland, 19th St Oakland, Castro Valley, Lake Merritt, and West Dublin / Pleasanton BART stations (i.e., platform width, emergency egress, vertical circulation). Measure BB funding eligibility must reflect the potential that expenses related to the Valley Link Phase 1 project may occur outside the I-580 corridor itself, but still within Alameda County.
3) **I-580 Corridor Fare Gate Modernization:** Funding is required to modernize faregates for BART stations within the I-580 Corridor (Castro Valley, West Dublin/Pleasanton and Dublin/Pleasanton stations) to the revised standard adopted by the BART Board of Directors. These new faregates address fare evasion at these stations and provide current and future travelers within the I-580 Corridor a safer and more secure experience.

The Valley Link project will not be successful for our riders and Alameda County taxpayers if the system does not adequately accommodate these new passengers. BART does not have funding to mitigate these impacts, which are critical to the overall success of this project. Therefore, BART anticipates that the close coordination with the Valley Link Rail project team will continue as the project advances. While ultimately other fund sources may be used for the core system BART impacts noted above, at this early phase it is important to maintain maximum flexibility of local funding so that they can be used to leverage additional region, state, and federal funding sources.

Thank you again for this opportunity to comment on this proposed action. Please do not hesitate to contact me or my staff with any additional questions.

Sincerely,

Robert M. Powers
General Manager

Bay Area Transportation Working Group (BATWG)

May 11, 2020

Hon. Elsa Ortiz, Chair, and Members of the Planning, Policy and Legislation Committee

Alameda County Transportation Commission (ACTC)

1111 Broadway, Suite 800 Oakland, CA 94607

Dear Commissioner Ortez:

It has come to our attention that the ACTC is thinking of reallocating the Measure BB funds set aside for the Livermore BART connection to "Valley Link". We urge you to desist.

For one thing such an action would make a mockery of what the Alameda County voters voted for in 2016. For another it would deny the people of Livermore the one good way of getting from their city to the East Dublin BART Station.

At the time the BART Board was considering whether or not to put the Measure BB $400 million toward a proposed $3.2 billion BART extension to Greenville Road, BATWG conducted an extensive investigation of the bus alternative. It was our conclusion that in terms of improving the access of the people of Livermore to BART, well-appointed buses (patterned after the privately-operated hi-tech buses) operating in bus-only lanes would be a far cheaper and better option. At the time we envisioned three separate lines originating in separate parts of Livermore all traveling out-of-traffic, at least during commute hours, to the Station.

re: ACTC May 28, 2020 meeting, Agenda Item 8.1, "Approve Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment (Valley Rail)"

Dear Chair Cutter:

The Bay Area Transportation Working Group (BATWG) is an Oakland-based 501(c)(3) composed of senior transportation experts and advocates with centuries of collective experience in California, Bay Area, and Alameda County transportation issues and projects.

At BATWG's May 21, 2020 meeting there was a discussion of the proposed diversion of Alameda County Measure BB funds to Valley Rail. After the discussion the vote was unanimous; we believe this action would be inappropriate and unwise.

What Valley Rail needs most right now is a full, proper, and unbiased study of its feasibility – including projected ridership, cost-effectiveness and identified sources of funding, all in comparison with the other transportation options for the corridor and all taking the changes brought on by COVID into full account.

In 2017, when the question how to use this $400 million was before the BART Board, the BART staff recommended a significantly upgraded bus option on grounds that it would better serve the transportation needs of Pleasanton and Livermore than an expensive 10-mile extension of BART to Livermore's Greenville Road would. BATWG strongly supported the staff's recommendation and subsequently submitted a list of proposed bus system enhancements.

The original BART Extension project approved by the Alameda County voters was intended to benefit the people of Alameda County, including the residents of

Pleasanton and Livermore Area and those traveling to those cities from more westerly Alameda County locations. Obviously, this was a project that the Alameda County taxpayers were willing to support because the vast majority of the benefits would accrue to Alameda County residents and taxpayers. Valley Rail, which includes five stations in the Central Valley and only three in Alameda County, is intended to primarily benefit non-Alameda County residents.

There is no reason or justification for diverting $400 million in BB funds to Valley Rail at this time.

The Bay Area Transportation Working Group looks forward to working with the ACTC in working to improve transportation in the I-580 Corridor.

Respectfully submitted,

Gerald Cauthen PE

Commission

We support transit, and possibly this project too, but have questions and concerns around:

1. The lack of public outreach in Livermore to generate support for this project. Measure BB in Livermore did not get a ton of support and BART was controversial. RM3 get even less support in Livermore. We don't want this project to be controversial like the BART project was. The Isabel Neighborhood Plan was controversial too because of BART. Where are the residents of Livermore on this project?;
2. Hour headways off -peak is poor public transit, and is in fact commuter rail. This corridor needs good transit. What can be done to convert this project from commuter rail to good transit?
3. Can we hear more about the financial crisis and how this project is affected? It's concerning to hear a presentation that does not acknowledge the current financial crisis.

Thank you for more clarifying information.

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

May 26, 2020

The Alameda County Building and Construction Trades Council Supports the Staff Recommendation, under item 5.1 (Valley Link) for the following reasons:

- A BART extension to Livermore has been a longstanding project, dating back in concept to the 1960s when the BART system was originally envisioned. Over the years there have been efforts by many resident, local elected officials, and other stakeholders to extend the BART alignment to Livermore.
- After decades of planning, in May of 2018 the BART Board certified the BART to Livermore EIR but voted to not advance a specific project, opting instead to defer the planning and construction of passenger rail in the 580 corridor of the Tri-Valley to the Tri-Valley – San Joaquin Valley Regional Rail Authority.
- Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.
- The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.
- The Tri-Valley – San Joaquin Valley Regional Rail Authority will publish the draft Valley Link EIR in September and aims to certify the EIR by the end of 2020. NEPA and 30% design will be completed in 2021. Final design and construction will begin in 2022, with the project scheduled to open for passenger service in late 2027 to early 2028.
- Per a recent PGH Wong study, during construction the economic impact of Valley Link project will be 16,300 to 22,200 jobs and between $2.6 billion and $3.5 billion in revenues.
- Valley Link is a project advancing quickly and cost effectively. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete.

Sincerely,

Andreas Cluver, Secretary-Treasurer
Building & Construction Trades Council of Alameda County

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The CLPCCD and, especially Las Positas College, as evidenced by our MOU with LAVTA, recognize the value of public transportation in meeting sustainability goals and facilitating travel to and from the college. Specifically, the largest benefactor of these two projects will be Las Positas College, and the community we serve which encompasses over 9,200 students and 500 employees. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. A rail extension to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors. We know there is still a great need for additional public transportation options for all of our students and employees.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Ronald P. Gerhard
Chancellor

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

July 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment.

On May 28, 2020, the Alameda County Transportation Commission (ACTC) approved the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP) to add the Authority's Valley Link project into the TEP, remove the BART to Livermore project from the TEP, and to move $400 million from the BART to Livermore TEP project to the Valley Link project. ACTC's action initiated 45-day comment period for all jurisdictions in Alameda County to comment on the proposed amendment. On behalf of the City of Dublin and as an ACTC member jurisdiction, I write to strongly support the amendment of the TEP to include Valley Link and to move $400 million of Measure BB funding to Valley Link. The Valley Link project will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and, after many decades of study, it will assure that our residents will finally benefit from the taxes they have paid.

An estimated 28,000 people are projected to ride the 42-mile, 7-station Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. Valley Link will connect Northern California Megaregion's workforce to affordable housing, will provide opportunities for compact transit-oriented development, and will significantly reduce greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, Valley Link is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

I support ACTC's approval of the 2014 Measure BB Transportation Expenditure Plan Amendment to include the Valley Link project. This action will ensure that this vital project moves forward.

Sincerely,

Oakland, CA 94607

Subject: Agenda Item 8.1 - Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. Position of support.

Dear Chair Cutter:

I write to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire County by reducing traffic over the Altamont Pass and through the congested I-580 and I-680 corridors. An estimated 93,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses, teachers, and people employed in manufacturing in the Tri-Valley and throughout Alameda County. Many of these Bay Area workers have been priced out of the communities they serve by rising housing costs and are suffering through an average 78-minute commute each way.

The environmental benefits of Valley Link are significant. Valley Link offers a rail alternative for those commuting by automobile. An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

Valley Link supports construction of badly needed affordable housing. Through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The Isabel Neighborhood Specific Plan, developed around the Valley Link station at Isabel Avenue, includes 4,095 new multifamily housing units with a mandatory 20% minimum affordable requirement with an overall goal for 25% affordable units in the Plan area.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will help ensure that this vital project can move forward to benefit the entire County and that commitments to the Tri-Valley are finally met.

Sincerely,

John Marchand

Subject: Support for Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Cutter:

On behalf of the City of Livermore and as a member jurisdiction of the Alameda County Transportation Commission, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and after many decades of study, it will assure that our residents will finally benefit from the taxes they have paid.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

An estimated 28,000 commuters are projected to ride the 42-mile, 7-station Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles

Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. An example of Valley Link supported TOD is the proposed Isabel Neighborhood Plan in Livermore, which includes 4,095 new housing units with a 20% minimum affordable inclusionary requirement per project with overall 25% affordability goal for the plan area.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Subject: Support for 2014 Measure BB Transportation Expenditure Plan Amendment – Valley Link

Dear Chair Cutter:

Thank you for the opportunity to comment on the proposed 2014 Transportation Expenditure Plan Amendment.

The Alameda County Transportation Commission (Alameda CTC) discussed and approved the request from the Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJVRRA) request for an amendment of the 2014 Measure BB transportation Expenditure Plan on May 28, 2020. The amendment proposes to complete several actions: 1) recognize the TVSJVRRA as a new agency that is eligible to receive Measure BB funds; 2) Replace the BART to Livermore project with the Valley Link project and retain the $400 million in Measure BB funding for the Valley Link project.

The City of Pleasanton strongly supports the amendment to the 2014 Measure BB Transportation Expenditure Plan. As stated in the City's previous letter dated May 26th, 2020, the Valley Link Project will complete the regional rail concept initially envisioned for the Tri-Valley decades ago. The TVSJVRRA was created in 2017 to expedite the planning, development and construction of a rail service that connects BART to the Altamont Commuter Express. Valley Link not only benefits the Tri-Valley in creating regional mobility and reducing traffic along the 580 corridor; the project will connect San Joaquin County to the Bay Area servicing up to 28,000 riders per day.

The congestion reduction also provides numerous environmental benefits. Valley Link will reduce GHG emissions, pursue renewable energy sources, strive to attain 100 percent self-sufficiency, and apply global best practices to design and construct sustainable infrastructure. Valley Link will reduce GHG emissions by 24,000 metric tons of CO_2 emissions annually in

P.O. Box 520, Pleasanton, CA 94566-0802 **123 Main Street**

City Clerk (925) 931-5027 Fax: 931-5492

DocuSign Envelope ID: BC1D21C3-AE51-4CF8-BAEB-804A01C5C672

2025, and 33,000 metric tons of CO2 emissions annually in 2040. The vehicle technology will provide additional environmental benefits by using Multiple Units featuring hybrid technology with the ability to convert to a fully-electric operation in the future.

Valley Link will also support the advancement of Transit Oriented Development by supporting MTC's Plan Bay Area; having four PDAs located along the Valley Link alignment will support more than 2,200 homes, all located within ½ mile of the stations. Housing and jobs in these areas will be within walking distance to regular Valley Link service, providing access throughout the day in both directions, and connecting with the Bay Area's BART system.

The project meets the vision and goals of Measure BB by expanding regional rail, providing traffic relief, improving air quality by providing clean transportation. The City of Pleasanton is encouraged by the TVSJVRRA's progress on the Valley Link Project and looks forward to the approval of the use of the Measure BB funds to assist in the completion of this vital project.

Re: Comments on ACTC 2014 Measure BB Expenditure Plan Amendment

Dear Chair Cutter:

I am pleased to support the Tri-Valley San Joaquin Valley Regional Rail Authority request to amend the 2014 TEP to replace the BART to Livermore project with the Valley Link rail project.

The project is an excellent example of mega-regional cooperation to facilitate the construction of key infrastructure improvements and leveraging different funding resources to enable more frequent passenger rail serve between the Central Valley, the Tri-Valley, and the San Francisco Bay Area; provide connectivity to other transit providers, provide service between housing and job centers, and facilitate the movement of goods.

- The Stockton Diamond Grade Separation project facilitates the Phase 2 Valley Link connectivity to Stockton, will enable ACE to dispatch more passenger trains, and eliminates a choke point for fright movement on Union Pacific and BNSF rail lines.
- Valley Link will provide local service to several communities in the Tri-Valley and Central Valley while ACE provides express service to transit hubs in Alameda and Santa Clara counties.
- Union City looks forward to ACE providing service to Union City BART and our Station District.
- Greenhouse gas generation and Vehicle Miles Traveled will be reduced when automobile commuters are provided a rail alternative and additional rail capacity becomes available to automobile commuters.
- Transit Oriented Development (TOD) policies along the Valley Link Corridor will mirror MTC Resolution 3434 policies to exceed 2,200 housing units within ½ mile radius of stations.

I look forward to supporting projects that leverage funding sources to benefit multiple rail providers and provide seamless connectivity to transit hubs.

Sincerely,

Carol Dutra-Vernaci

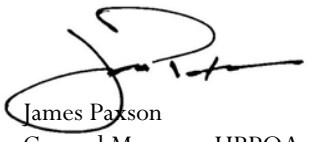
Re: Measure BB Amendment for Tri-Valley-San Joaquin Valley Regional Rail Authority

Dear Chair Cutter:

Hacienda is located near the geographic center of the San Francisco Bay Area and, at 875 acres, is the largest development of its kind in Northern California. Over 10 million square feet of existing, mixed-use space is occupied by some 700 companies that locally employ approximately 20,000 people. Key tenants include Kaiser Permanente, Oracle, Roche Molecular Systems and Gap who have all made substantive investments in their presence within Hacienda. In addition, Hacienda features homes to some 5,600 residents and is in the active planning and construction phase for as many more. Our facilities thrive because of the state-of-the-art working and living environments that have been developed which are in large part due to an ongoing commitment to providing comprehensive approaches to commute choices and community development.



Hacienda is pleased to provide this letter to strongly support the approval sought by the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. With the decision made not to pursue traditional BART rail service beyond its current eastern Alameda County terminus at the East Dublin/Pleasanton station, Valley Link offers a critical opportunity to advance long-held objectives of creating a viable rail connection between Alameda and San Joaquin Counties.

As you are aware, the Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the Interstate 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars and confronting an average 78-minute commute each way. Critical employment centers, such as Hacienda, need to make sure that all corridors leading into the Tri-Valley provide easy and convenient access for businesses whose labor supply extends into outlying areas. Likewise, residents at Hacienda similarly need the ability to enjoy access to corridors connecting the Tri-Valley with the larger region.

An estimated 28,000 are projected to ride the Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Transit Oriented Development Policy adopted by the Authority's Board, Valley Link will support the advancement of transit-oriented projects, such as Hacienda, adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. Hacienda's existing and proposed development along with the proposed Isabel Neighborhood Plan are examples of how this can happen throughout the system.

The Valley Link project is critical for the equitable and sustainable future of the Tri-Valley and Bay Area. We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment in support of moving this vital project forward and making a significant improvement to the quality of life and commutes in Hacienda, the Tri-Valley and the region.

Sincerely,

James Paxson

Hi Vanessa-

I hope you are staying healthy and safe. Considering that I cannot attend next Monday's PPLC meeting in person due to the SIP, please make sure my comments are read into the record for Public Comment as part of agenda item 5.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti
(925) 858-5303

Dear Chair Ortiz and Honorable Commissioners:

On behalf of the Innovation Tri-Valley Leadership Group, I respectfully request for the PPLC to support the Staff recommendation to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. Our Committee worked to ensure that the Expenditure Plan included the fulfillment of plans dating back to the 1960's which envisioned a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. This vision was part of the plan approved by the voters of Alameda County. Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it.

Four years later in May of 2018, the BART Board certified the BART to Livermore EIR but transferred the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley to the Tri-Valley - San Joaquin Valley Rail Authority. The Authority has since completed a Feasibility Report for Valley Link, a project proven to be cost effective and efficient, estimated to carry between 26,000 and 28,000 riders a day in the highly congested I-580 corridor.

With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority that will benefit the environment, the economy and the quality of life of residents and

Bay Area workers. Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with State, federal and private funding to complete the project. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision of Measure BB for rail connectivity in the Tri-Valley, and I urge the Committee to approve the item.

Subject:	Public Comment for Item 8.1 at ACTC meeting on Thursday 5/28
Date:	Tuesday, May 26, 2020 11:26:55 PM

Hi Vanessa-

I hope you are doing well. Please make sure my comments are read into the record for Public Comment as part of agenda item 8.1. Let me know if you have any questions or need anything else. Thanks!

Tim Sbranti

Dear Chair Russo Cutter and Honorable Commissioners:

On behalf of the business and civic leaders who comprise the Innovation Tri-Valley Leadership Group, please support the Staff recommendation and the unanimous decision from PPLC to amend the Measure BB Transportation Expenditure Plan and replace the BART to Livermore project with the Valley Link project.

I served on ACTC's Steering Committee as Mayor of Dublin when Measure BB was drafted. As Commissioner Haggerty pointed out at the PPLC meeting, a deliberate decision was made to ensure that priorities of leaders in each of ACTC's 4 planning areas were included in the measure. The priority in 2014 remains the same as it was 50 years as it is today.....establishing a rail connection heading east from the Dublin/Pleasanton BART Station into Livermore. By transferring the funding in Measure BB to Valley Link, it would also be consistent with the original intent and vision approved by the voters of Alameda County for rail connectivity in the Tri-Valley.

Another element of Measure BB gave the Commission the authority to make small modifications to the Plan as the need arose and future conditions warranted it. Considering that the planning and construction of passenger rail in the I-580 corridor of the Tri-Valley was transferred in 2018 from BART to the Tri-Valley - San Joaquin Valley Rail Authority, now is the time to transfer the funds as well for rail in the Tri-Valley. In recent months, the Authority has completed a Feasibility Report for Valley Link, a project proven to be cost-effective and efficient, estimated to carry between 26,000 and 28,000 riders a day to relieve gridlock in the highly congested I-580 corridor. With congestion on I-580 due to increase 75% by 2040, transportation alternatives for the area are a high priority and the time to act is now.

Amending the Measure BB Transportation Expenditure Plan to provide $400 million to the Valley Link project for construction in the Alameda County portion of the project will be extremely important at this time so that the Authority can leverage local funds with state, federal and private funding to complete the much-needed project, and we hope that you will

fulfill the original vision and meet present and future needs of the County by approving the item.

RE: Oppose Reallocating $400 Million of Measure BB Funds to Valley Link Rail Project (TVSJVRRA)

The “Valley Link” rail connector project is an intriguing effort to connect the far-flung San Joaquin Valley and Tri-Valley areas with the San Francisco Bay Region’s urban core. Any project that gets more commuters out of automobiles is usually worthy of the Alameda County Transportation Commission’s (ACTC’s) consideration — butnot this one. Not now.

I am a Bay Area native. I grew up in Redwood City with steam-powered Southern Pacific commute trains. I have served on the BART Bicycle Advisory Task Force (BBATF) since 2011 and now serve as its Vice chair — although these comments are mine alone and are not made on behalf of the BBATF. I have been active in City of Alameda transportation and planning issues for 22 years and worked on regional transportation solutions.

INADEQUATE PUBLIC NOTICING FOR THIS COMMENT PERIOD

First, proponents of the relatively new Valley Link rail connector project are asking ACTC to reallocate $400 million for a project that was never even on the 2014 Measure BB project list — or on any transit funding ballot measure. This alone is troubling to someone like me who worked hard to pass Measure BB.

Secondly, this request is coming before you with very limited public notice or input and almost no publicity — a glaring omission. Had I not stumbled on discussions of this ACTC reallocation and the Valley Rail project — on Twitter — within the past week I would not have known that $400 million in Measure BB funds were about to be reallocated for a project I had never heard of before. Where did this come from? Frankly, it reminds me of the mid-19th-century promoters who built rail lines across the United States (and across the island of Alameda) in pursuit of real estate profits.

Thirdly, I was unable to find a way to submit public comment on the ACTC website. For that, I had to ask others who knew about the project and the looming close of public comment that opened May 28 — in the midst of the pandemic's shutdown. What happened to the ACTC's once-effective and hard-to-miss public noticing process? And where is the careful consideration of the Valley Link project's potentially massive negative impacts on the region, including sprawl, energy use, and global climate change that should precede major funding?

NO ENVIRONMENTAL IMPACT REPORT, TOO MANY SPRAWL-RELATED RISKS

Valley Link has not undergone a full environmental analysis: there is no Environmental Impact Report (EIR) on the rail project's effects on exurban sprawl, climate change, or its potential harm to open space and agricultural land by stimulating the building of more McMansions on the San Joaquin Valley farmlands. Nor is there any detailed evaluation of other land use, transportation, and economic alternatives, such as extending some form of BART service to Livermore — much less re-focusing on building affordable, high-density housing in the urban core areas where the jobs exist.

Does the Alameda County Transportation Commission (ACTC) want to accelerate exurban sprawl? This project appears to guarantee that much more housing will be built on what is now open space and agricultural land, further diminishing those resources. To significantly improve sustainability and create a greener California while reducing energy use, global warming, and sprawl, we would halt home construction so far from our workplaces and re-establish traditional patterns of living close to work and stop enabling more super-commuting road warriors — or even rail warriors.

Before the Valley Rail project received any public funding, policies must be established to ensure that only higher-density, compact growth will be allowed in these outlying areas: it is fruitless to build a transit system to serve sprawling tracts of McMansions whose low densities do not support transit.

The additional demand on BART and the mechanism for funding BART's added costs should also be detailed ahead of making large expenditures like this.

These broad policy and priority discussions need to take place before public funds are committed to any transit project that promises to blow up what remains of "compact growth" initiatives throughout the Bay Area and the mega-region. The Valley Rail project's overall impacts on growth and additional sprawl in the exurbs and suburbs must be very carefully calculated <u>before</u>, not after, such a project is funded.

A QUESTIONABLE FUNDING STREAM: SALES TAX REVENUE IN THE PANDEMIC AND ONLINE SHOPPING ERA

We are in the middle of a viral pandemic with no end in sight — partly because of federal failures in leadership.This new Valley Link project is asking for $400 million in sales tax revenue that may never exist because of the pandemic-caused economic crisis on top of a long-term drop in “brick and mortar” retail sales.

With future sales tax revenues in doubt and our existing metropolitan transit systems already in crisis, the $400 million should remain unspent, be reallocated to support other voter-approved Measure BB projects, or be used to support existing transit agencies and service. For decades, BART pursued an ”expansionist” policy to the detriment of maintaining and improving its core system and original infrastructure: ACTC and other transportation stakeholders should learn from BART’s strategic mistake. In conclusion, there are too many questions about the overall costs and environmental effects of the Valley Rail (TVSJVRRA) proposal, especially the great likelihood of sharply increasing exurban sprawl far beyond the nine-county Bay Region. Many more large-scale policy and planning decisions need to be made before we further expand the costly and unsustainable mega-commute. And without a stable local retail economy or stable existing transit agencies, ACTC should not engage in expansionist, sprawl-inducing projects.

Please do not reallocate Measure BB funds to Valley Link/TVSJVRRA at this time.

Respectfully submitted,

Jon M. Spangler

From:	Rafael Gonzalez
To:	Vanessa Lee
Subject:	Valley Link
Date:	Tuesday, May 26, 2020 10:10:41 AM

Good morning. I am writing to you in support of the Valley Link project and the proposed funding of that project. As a representative of thousands of workers who commute from the Central Valley into the Bay Area, and as someone who does that same commute, I can attest to the importance of the Valley Link Rail System. I moved to Tracy, about 20 years ago and I have seen firsthand the increase in commuter traffic. All the experts agree that this will only continue to increase as time goes on. This will result in more time on the road, which increases the carbon footprint of each individual commuter. Valley Link provides a safe alternative from the Central Valley to the Bay Area, reducing the amount of vehicles on the road, which in turn results in lower commute times, carbon emissions, and stress levels!

Created by AB758 (Baker/Eggman), the Tri-Valley – San Joaquin Valley Regional Rail Authority has since completed a Feasibility Report and selected from alternatives the Valley Link passenger rail project. Phase 1 of Valley Link is a 42 mile, seven station alignment from the Dublin/Pleasanton BART station to the North Lathrop station, with a key connection with BART at the Dublin/Pleasanton BART station and with ACE at the Greenville Station and the planned ACE North Lathrop station. The project is cost effective and efficient in that it uses currently existing transportation rights of way (580 in Tri-Valley, former So Pacific Railroad right of way now owned by County of Alameda in the Altamont and the UP right of way in the San Joaquin Valley). Valley Link will carry between 26,000 and 28,000 rides/day as a transportation option for the nearly 100,000 commuters on the highly congested 580. With congestion in the 580 due to increase 75% by 2040, transportation alternatives are a high priority that will benefit the environment, the economy and the quality of life of residents and Bay Area Workers.

The goal of the Valley Link Board is to be 100% sustainable, with catenary/battery technology being studied and solar/wind energy being planned to power both the O&M facility and the seven stations. Additionally, the Valley Link Board has approved a Transit Oriented Development policy that mirrors MTC policy to mandate 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space and lowers VMT. Valley Link will result in a reduction of 99.4 million vehicles miles travelled per year and a reduction of 33,000 metric tons in greenhouse gas emissions annually.

For these reasons and other, I humbly ask that you consider having the Tri-Valley – San Joaquin Valley Regional Rail Authority recognized as an agency eligible for Measure BB funds (agency hadn't been created when Measure BB was approved). We are also seeking to amend the Measure BB Transportation Expenditure Plan to replace the BART to Livermore project with the Valley Link project. This will put $400 million in Measure BB funds into the control of the Valley Link Board.

I thank you for your consideration.

Livermore Amador Valley
TRANSIT AUTHORITY

May 25, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

David G. Hudson

Re: May 28, 2020 Meeting: Agenda Item 8.1: Opposition to Measure BB TEP Amendent

To Chair Cutter and Commissioners:

This office represents Alameda County citizens opposed to a request by the Tri-Valley-San Joaquin Valley Regional Rail Authority for a 2014 Measure BB Transportation Expenditure Plan Amendment.

This $400 million revision of the Measure BB TEP would completely change the largest capital expenditure in Measure BB. It is an epic "bait-and-switch" against Alameda County voters while they are distracted by a global state of emergency.

A major amendment of a voter-passed ballot measure is a major decision that should not be made during the COVID-19 emergency. Commissioners should carefully consider the Statement on Government Coronavirus Emergency Transparency by 140-plus organizations:

> Government bodies should not opportunistically take advantage of the public's inability to attend large gatherings to make critical decisions affecting the public's interest if those decisions can reasonably be postponed. Just as citizens are being asked to defer nonessential travel and errands, so should government agencies defer noncritical policy-making decisions until full and meaningful public involvement can be guaranteed.

The voter-approved text of Measure BB Transportation Expenditure Plan (TEP) states, "BART to Livermore ($400 M) This project funds the first phase of a BART Extension within the I -580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange using the most effective and efficient technology."

This proposed amendment would substantially revise the TEP to state, "Valley Link Rail in Alameda County ($400 M) This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology."

"Valley Link Rail" to Altamont Pass is a drastically different project than BART within I-580 to western Livermore. Your Commission is constrained by this implementing guideline: "Under no

circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County." Alameda County receives little or no benefit by paying for a very costly rail line through Altamont Pass. Very few people live in Altamont Pass. There will be no station in Altamont Pass. A rail line funded by Alameda County taxpayers through Altamont Pass effectively is a gift of Alameda County funds to San Joaquin Valley real estate development interests. This is not what Alameda County voters contemplated in the 2014 election. Valley Link is a much different project than was sold to voters in 2014 – a BART line that ends in western Livermore. As such, it is akin to a "revision" of Measure BB, not a mere "amendment."

Moreover, this proposed $400 million amendment upsets the "overall geographic equity" consensus that underpins the Measure BB TEP. Measure BB spending on Valley Link in Altamont Pass does not "benefit" the Tri-Valley to the same extent that BART to Isabel Avenue would. Measure BB claims to distribute local street and road funding based on population and road miles, but ACTC manipulates the formula to reward certain cities and punish others based on other parts of the TEP. This $400 million amendment affects other funding formulas in the TEP and effectively revises them. The "geographic equity" is thrown off. To ensure "overall geographic equity," local street and road funding and other formulas need to be re-visited as part of this amendment process, pursuant to Implementing Guideline Nos. 12 and 13 and other authorities.

Your Commission would acting prematurely if it were to undertake this drastic revision of the Measure BB TEP today. "Valley Link" is an unproven and unknown project in many respects. Too little is known about it. A much-anticipated environmental impact report is not yet released. A 2003 Caltrans I-580 widening analysis stated that there is insufficient existing right-of-way to accommodate both a rail line and HOV lanes. Even if more freeway right-of-way were obtained, the new HOT lanes would need to be destroyed. The financing of Valley Link is questionable, which likely is why Valley Link wants to use this $400 million for construction in the Altamont Pass, which would not benefit Alameda County.

Before approving the TEP amendment, careful consideration also must be made about the impacts on BART. Before the COVID-19 emergency, the Dublin/Pleasanton BART line trains had been packed during commute hours. During the morning commute, many passengers board at West Dublin/Pleasanton, ride backwards to (East) Dublin/Pleasanton, and then jockey for space in the crowded trains.

Your Commission first should consider alternatives to Valley Link. The 2003 Caltrans I-580 widening study included an express bus alternative that deserves careful consideration. That 2003 analysis considered an express bus connection directly from I-580's HOV lanes to and from (East) Dublin/Pleasanton BART station. That likely would be the most cost-effective solution and could be implemented many years before an I-580 rail concept.

Your Commission also should re-consider the "t-BART" proposals that were much discussed in the early 2000s (sister project to "e-BART" in eastern Contra Costa County). There was a "t-BART" proposal that utilized the existing rail corridor in the Tri-Valley with a link to (East) Dublin/Pleasanton BART via Hacienda Business Park and the former Southern Pacific (Iron

Horse Trail) corridor, with a possible extension to Bishop Ranch in San Ramon. The "t-BART" proposals could be less costly and more effective to solving Tri-Valley transportation challenges than Valley Link. Your Commission should not rush into giving $400 million to Valley Link.

Voters in the Tri-Valley communities of Livermore, Pleasanton and Dublin did not support the Measure BB sales tax increase in the November 2014. Attached please find a map generated by the County Registrar of Voters that illustrates the depth of disapproval of Measure BB in eastern and southern Alameda County. The Tri-Valley is a sea of red. Measure BB won in just one precinct in Livermore, one precinct in Pleasanton, and maybe one or two precincts in Dublin. Measure BB won just 49 percent of the vote in Livermore. One solution could be for voters in the Tri-Valley to vote on whether or not the $400 million should be reallocated.

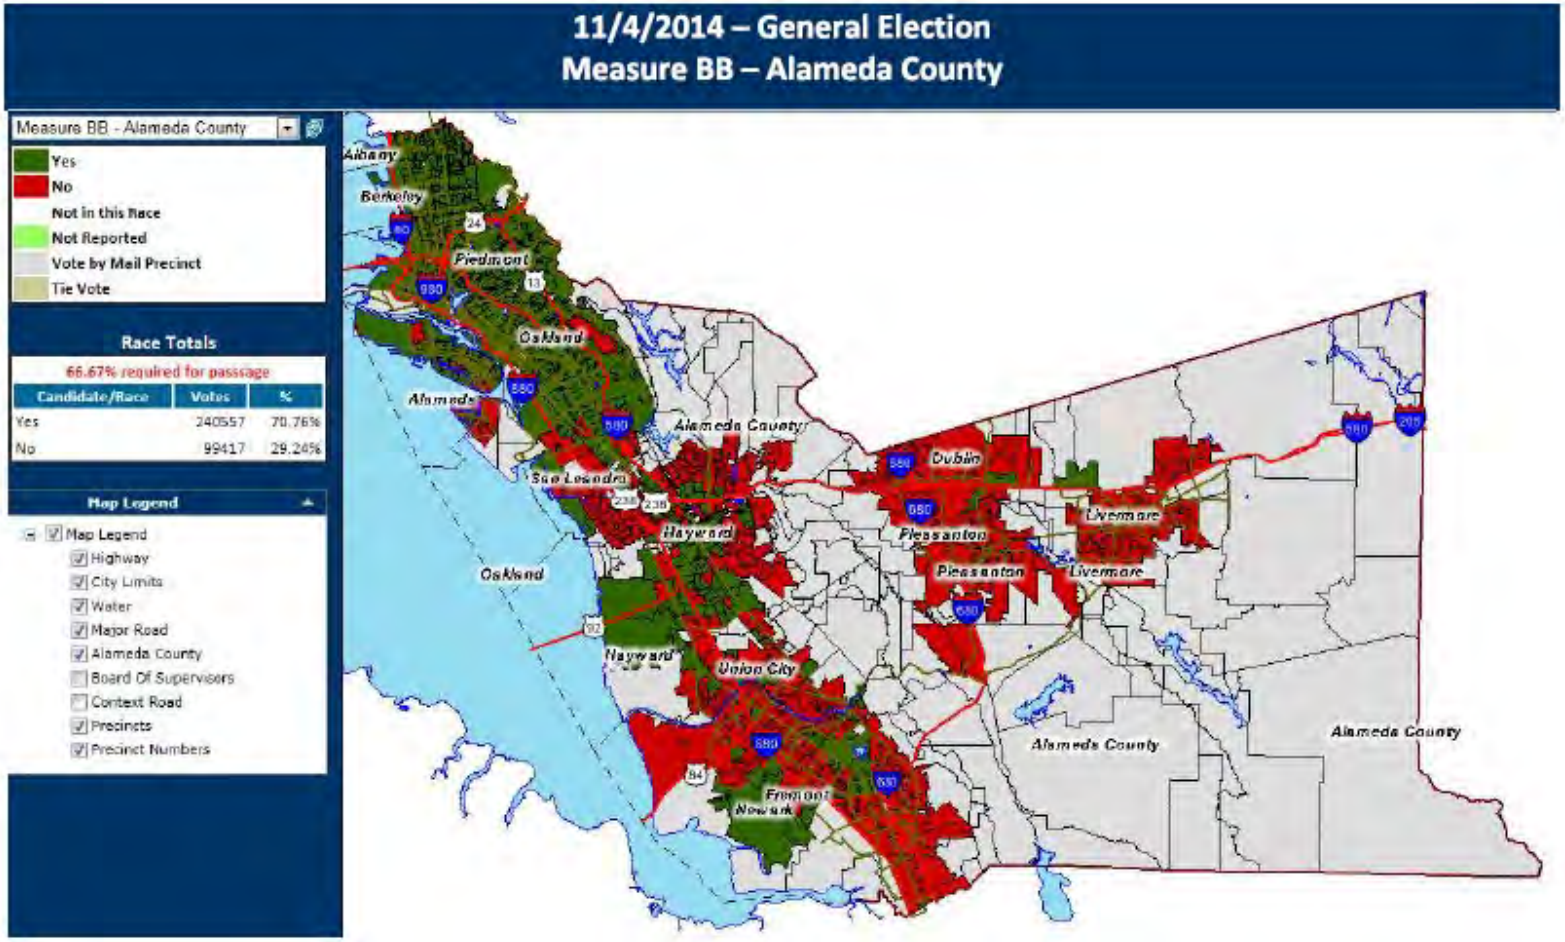
This major $400 million revision should not be decided by "lame duck" ACTC commissioners. A new county supervisor will be elected in November in eastern Alameda County. All three Tri-Valley cities could have new mayors after November. Let this controversial issue be publicly debated during these campaigns.

Livermore voters should feel especially betrayed. They have paid BART property taxes since circa 1962. They have paid the BART sales tax since circa 1970. They have paid a special Alameda County transportation sales tax since 1987. In 2014, after all those years of paying for BART service everywhere else, they were promised $400 million for BART to Livermore through Measure BB. Livermore got stuck with yet another ½ percent sales tax increase through Measure BB. Then ACTC manipulated the Measure BB local street and road funding formula to give Livermore much less than its "fair share" of funds based on population and road miles. Now Livermore would be stuck with higher taxes, no BART, diminished local street and road funding, and a forced subsidy of a costly and ineffective railroad through Altamont Pass.

Alameda County Transportation Commission and Measure BB beneficiaries jointly engaged in one of the most sordid political campaigns in county history to persuade voters – especially Tri-Valley voters – to support the Measure BB in 2014:

- The "Yes on BB" campaign literally was headquartered out of your general counsel's law office. ACTC more than doubled the size of your general counsel's contract after the "BB" passed.
- Another ACTC attorney was married to the Yes on BB campaign manager, who had earlier received a special ACTC consulting contract to develop Measure BB.
- Tess Lengyel, ACTC's current executive director, managed ACTC's supposedly neutral "public information" efforts concerning Measure BB. Ms. Lengyel was unavailable during the final weeks of the Measure BB campaign to fulfill her official duties. She failed to answer Public Records Act and other inquiries about Measure BB before the election. It was later revealed that Ms. Lengyel had been preoccupied with engaging in partisan, pro-BB propaganda. Video of a "Yes on BB" campaign fundraiser shows Ms. Lengyel openly participating in pro-BB election activities. The video shows Ms. Lengyel leading "Yes on BB" campaign donors in a pro-BB cheer. See: https://www.youtube.com/watch?v=GdjuU6DrURs

- With ACTC's legal advisors and ACTC's "Public Information" officer (Ms. Lengyel) working for the "Yes on BB" campaign, ACTC effectively (and illegally) became an arm of the "Yes on BB" campaign.
- ACTC used public funds to hire the Bay Area Council Economic Institute to conduct a supposedly "independent" economic analysis of Measure BB benefits. The Bay Area Council endorsed Measure BB.
- In August 2014, an official dedication ceremony for the ACTC Iron Horse Trail project in Pleasanton was inappropriately transformed into a "Yes on BB" campaign rally. Speeches expressly advocated for passage of Measure BB. A "Yes on BB" campaign sign was hung prominently behind the dais and at the ribbon cutting location.
- In October 2014, just a few days before the Measure BB election, ACTC's official dedication ceremony for the State Route 84 widening project in Livermore was inappropriately transformed into a "Yes on BB" campaign rally. As the ribbon was cut, the backdrop was a crowd of Building and Construction Trades union members waving "Yes on BB" campaign signs.
- Any semblance of a "firewall" between ACTC and the "Yes on BB" campaign was demolished. Just before election day, "Yes on BB" transferred thousands of dollars to arms of the Democratic Party to aid distribution of "slate cards" that not only boosted Measure BB, but also "picked winners" in mayoral and city council races around the county. This raises the concern the ACTC staff and contractors engaged in partisan political activities that altered the composition of ACTC itself.



Many of these same parties, including the Bay Area Council and Building and Construction Trades unions, are today advocating for amendment of Measure BB.

For these reasons, your Commission should not take this major action today to reallocate $400 million to a controversial, unproven project that voters have not approved.

Sincerely,

Jason A. Bezis

Re: PPLC Agenda Item 5.1 – Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Ortiz:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly planning, funding, and maintaining and operating our transportation system is a key policy priority for LVCC.

LVCC supports the above referenced item, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore and the Dublin/Pleasanton East BART station. I reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. LVCC appreciates the wisdom of the leaders of the Alameda County Transportation Commission in designating significant funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, your prudent actions necessary to amend the expenditure plan to accommodate the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority is welcomed and appreciated. LVCC recognizes and strongly supports the efforts of the TVSJRRA to effectively deliver a rail connection project in this corridor within the next few years.

We look forward to moving forward with this initiative and this project, and stand ready to support you in this action.

Respectfully,
Dawn P. Argula

PLEASANTON CHAMBER of COMMERCE

May 27, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I am writing to support the approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley, and particularly Livermore, to eventually advance rail connectivity to the San Joaquin Valley. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are finally met.

Sincerely,

Steve Van Dorn
President & CEO

RE: PP&L Agenda item #5.1 – Approve Tri-Valley- San Joaquin Valley Regional Rail Authority (TVSJVRRA, aka Valley Link) Request for a 2014 Measure BB Transportation Plan Expenditure (TEP) Amendment

Dear Chair Ortiz and Members of the PP&L Committee:

On behalf of our more than 13,500 members in Alameda County, the Sierra Club writes to respectfully express great concern about Item #5.1 on your Agenda for Monday May 11, 2020. We believe that there are far too many issues and questions that should be addressed before the recommended actions move forward.

We recognize that the proposed actions before your Committee are just the beginning of a process to reprogram the sales tax funds that were approved by voters for "BART to Livermore." But as set forth in the staff memo, the proposed actions, and their timing, would establish dangerous precedents for lack of planning and financial responsibility. There is simply no need to rush into the proposed actions, particularly in the context of the current health and financial crises being faced by the State and local communities. Why not first take time for responsible analysis and an opportunity to see if-how-and-when recovery is able to occur, before committing funds that may not materialize for years to come?

Every responsible forecast is anticipating that "the future of work" will be different, post-pandemic, than we have ever been experiencing previously. Why base such a massive investment of public funds on what is already and at best "old data?"

The first Agenda request is that the TVSJVRRA be acknowledged as a new agency in Alameda County that can be an eligible recipient of Measure BB funds. While this

2530 San Pablo Ave., Suite I, Berkeley, CA 94702 Tel. (510) 848-0800 Email: info@sfbaysc.org

should be the least controversial element of the requests, nothing in the staff memo identifies the potential magnitude of impacts on other Measure BB transit recipients. There is no operating budget provided in the Committee materials. Can taxpayers and pre-pandemic passengers be assured that this new system will not become a drain on other, voter-approved transit agencies in the County?

The second and third requests would remove "BART to Livermore" from the TEP and substitute Valley Link with no consideration of possible alternatives – why? The project list for Measure BB was the result of years of input and deliberation by Community and Technical Working Groups. Why not have a full and fair competition for alternative uses of these funds, throughout the full list of "BART, Bus, Senior, and Youth Transit" options identified as the relevant "Type" on page 3 of the TEP (page 24 of the Committee packet), especially with the enormous uncertainties facing projections for both traffic and funding revenues?

Implementing Guideline 22 of the Measure BB TEP is surprisingly omitted from the staff memo, but supports this broadened approach, stating:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets, Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

Even the language from AB 758 (Eggman/Baker, PUC section 132658) that is quoted in the "superseded" request dated September 11, 2019, recognized that there was no entitlement to the "local funds controlled by the Alameda County Transportation Commission."

It should also be noted that the proposed description and conditions regarding Valley Link delete and/or change significant descriptive and cautionary language (which was carefully negotiated and voter-approved) before funds may actually be "used." The text below sets forth full "before and after" language in a single view for the information of Commissioners and the public:

> ~~BART to Livermore ($400 M)~~
> Valley Link rail in Alameda County ($400 M)
>
> This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

> Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Why are voter and environmental protections proposed to be removed for this new project? Do Commissioners really think this is wise and appropriate? Why not, at a minimum, wait until the requisite Environmental Review is both released in draft form and then completed? – This critical document is already a year behind the previous schedule.

Where is the San Joaquin County commitment to support their own residents who are likely to be the primary beneficiaries of this project? The proposed resolution merely states that:

> SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures and state funds**. (emphasis added)**

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and operations for this multi-county project. “Leveraging” of other funds should, at a minimum, be based on full and fair participation from designated “partners.”

Several places in the proposed “amendments” describe Valley link as “Commuter Rail," despite the fact that it is proposed to operate throughout the day. Subsection 49 CFR 37.3 in relevant part defines “commuter rail” as

> *Commuter rail transportation* means short-haul rail passenger service operating in metropolitan and suburban areas, whether within or across the geographical boundaries of a state, usually characterized by reduced fare, multiple ride, and commutation tickets and by morning and evening peak period operations. This term does not include light or rapid rail transportation.

Is this an attempt to obviate or avoid an obligation for ADA complementary paratransit service for passengers, or attempted passengers, who may have difficulty using the train service?

We must also ask if ACTC or Valley Link have informed MTC and ABAG that the proposed project will facilitate inter-regional commuting, contrary to the intent of SB 375 and the Bay Area's Sustainable Communities Strategy.

This message sets forth only some of the most obvious concerns about the proposed Measure BB actions. There are certain to be more, but disclosure by ACTC and Valley Link should not be delayed until the end of the requisite "public comment" period. The Sierra Club respectfully requests, and urges at a minimum, that the questions and issues noted above be addressed before any Commission action to consider Valley Link's requests. To do any less would call into question Commissioners' significant public service obligations to Alameda County voters, taxpayers, and residents. We look forward to working with you and ACTC staff to consider a full range of responsible uses of Measure BB funds. If you have any questions, or desire further information, please do not hesitate to contact Matt Williams at mwillia@mac.com.

RE: Sierra Club Comments in Opposition to Proposed ACTC TEP Amendment and Actions regarding "Valley Link" Rail

Dear Chair Cutter and Commissioners:

Based on the reasons outlined in this letter and in our previous correspondence and public comments, the Sierra Club opposes the actions proposed by the Alameda County Transportation Commission (hereinafter ACTC or Commission) at your meeting of May 28, 2020, regarding the "Valley Link" rail project. We further recommend that no action be taken on these matters for the foreseeable future, at least until after completion of a full Environmental Impact Report (EIR) process and other related documentation, and until there is a return to financial stability for Measure BB sales tax funds.

Given the dearth of substantive information on the proposed project itself, and the uncertainty regarding local, regional, and state financial revenues, the Sierra Club does not currently express a position regarding the actual project, since that would be objectively premature pending much more documentation and analysis for both decisionmakers and the public. We urge the Commission to follow this example. In the meantime, on behalf of our more than 13,500 members in Alameda County, we offer the questions and concerns below.

How can there be a "comment period" without published public notice, especially given the critical information that ACTC has omitted from sharing with its Commissioners?

Implementing Guideline #4 of the 2014 Transportation Expenditure Plan (TEP) for Measure BB states in part "All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment." We understand that

information regarding the proposed amendments and process was sent to Alameda County jurisdictions, but we have been unable to find any notice, anywhere on the ACTC website, notifying the public of this voter-approved opportunity, or of its parameters. How are members of the public supposed to know how to communicate with their elected representatives so that timely and informed comments by the jurisdictions can be submitted?"

This appears to be a serious breach of the intent of proper government procedure, even during the current pandemic circumstances. Such an apparent opposition to public transparency is not likely to engender taxpayer support for any future requests by ACTC to voters. We have tried in this letter to identify several key issues that are not addressed adequately, if at all, in the ACTC correspondence, so that Commissioners can have a more informed basis for their consideration when they are requested to act.

Further, we request that all comments by jurisdictions be posted on the ACTC website by the end of July 2020, so that the public can communicate on this matter with their elected officials.

What is the potential/expected impact on other transit recipients in Alameda County if Valley Link is approved as a new agency that is eligible for Measure BB funds, including for operations?

We have previously asked this question, but received no response. It must be answered with regard to the "Direct Local Distribution" (DLD) formula, as well as for the capital request. Director Joel Young of the AC Transit Board asked a similar question during an ACTC presentation to their agency, but unfortunately, a direct response was not provided then either. Does the selective omission of Valley Link in the "redlined" Appendix C of the May 28 materials mean that Valley Link will <u>not</u> be an eligible recipient under the Category of "Transit: Operations, Maintenance, and Safety Program"? Please respond directly to this question.

The entire package of proposed actions is premature before completion of a full Environmental Review process, which is necessary to determine the viability, appropriateness, and environmental impact of the proposed project.

This essential analysis is already a year delayed in its schedule, so neither the public nor regulatory agencies can identify the potential impacts of the proposed project, any mitigations needed, or any potential benefits or harms.

The 2019 "Feasibility Report" required by AB 758 (Eggman/Baker) was little more than a compilation of previous presentations to the Valley Link Board, with no independent analysis, and seriously lacking in objectivity. <u>The "Feasibility Report" is not a "Viability Report</u>." We note that current financial reports and projections for two of the most recent new rail systems in the country (SMART and Sound Transit), which were implemented with assistance of Valley Link's consultants, have identified significant shortfalls into the foreseeable future. What reason is there to believe that Valley Link will fare any differently?

There is no valid reason for ACTC Commissioners to rush into the proposed actions until the project is better understood and documented for the County's voters, and for ACTC itself.

Current financial projections and analyses identify significant shortfalls in sales tax revenues at all levels for the foreseeable future – How can ACTC responsibly commit $400 million under these circumstances?

ACTC's Finance and Administration Committee most recently met on May 11th, with sales tax revenue data as of March and thereby not reflecting coronavirus and related "shutdown" conditions and impacts. Presentation materials from that meeting project only modest reductions in sales tax revenues, and clearly need updating.

Please identify your responses below both with, and without, the impact of ACTC approval of the proposed Valley Link actions:

- What are the current estimates and projections for Measures B and BB revenues (for at least the next 5 years), and as compared to previous actuals?
- How will these changes in revenues affect DLD formulas, as well as other anticipated payments to jurisdictions and/or projects or programs?

Recently "60 Minutes" reported that the non-partisan Congressional Budget Office is predicting that it will take up to 9 years for a full recovery from the financial effects of the Coronavirus pandemic. MTC staff reports are a bit more optimistic, but still do not predict financial recovery until approximately 2024 or 2025. Any current revenue predictions are speculative at best. If ACTC finds itself short of funds, how will decisions be made, and what will be cut? Please identify how impacts on social equity will be addressed.

What is the rush to commit $400 million in hypothetical revenues from the public trust? This is more than a rhetorical question – Why now, given the magnitude of current revenue uncertainties?

There is no "entitlement" for Measure BB funds from the cancelled "BART to Livermore" project for either the Tri-Valley planning area or even for a rail project, and the voters who actually approved Measure BB, with the "BART to Livermore" project, were, in large part, not primarily from the Tri-Valley. There should be an open, full and fair competitive assessment to determine any re-programming of that project's successor.

Documentation from ACTC has notably failed to mention even the existence of Implementing Guideline #22 from the TEP:

> **22. Fund Allocations**: Should a planned project become undeliverable, infeasible, or unfundable due to circumstances unforeseen at the time this Plan was created, or should a project not require all funds programmed for that project or have excess funding, funding for that project will be allocated to another project or program of the same type, such as Transit, Streets,

> Highways, Community Development Investments, or Bicycle and Pedestrian Safety, at the discretion of Alameda CTC.

This policy clearly identifies that there is no entitlement or guarantee, for either a rail project or for the Tri-Valley area, of the money that is no longer needed for BART-to-Livermore. Rather the money can – when it is actually available – be used for any transit project anywhere throughout the County. Why not act as responsible stewards of the public trust, and study what might be the highest and best use of the funds? Examples might include funding BART faregates and the enclosing of cross-paid-area elevators throughout Alameda County stations, and/or providing a strong down-payment for vehicles and infrastructure for a large portion of the CARB-required Zero Emission Bus fleets for all of the public transit bus systems in the County. Another option would be to help backfill the loss of fare revenues for all transit agencies. How might BART "development" projects on their property help to achieve other ACTC and Sierra Club goals, such as enhancing success of Priority Development Areas (PDAs) for Plan Bay Area?

Valley Link violates the "inter-regional commuting" policy of SB 375 and Plan Bay Area.

According to MTC's *Frequently Asked Questions* | *Plan Bay Area:*

> "Regions also must demonstrate that their plans accommodate all future projected households <u>without further growth in in-commuting</u>, or the amount of people traveling from neighboring areas to the region (i.e. from outside of the Bay Area to the Bay Area)." *(emphasis added)4*

Not only does Valley Link violate the premise of discouraging inter-regional commutes – and reliance on a "Mega-Region" is not relevant or applicable under current law -- but the public descriptions indicate that Valley Link would disadvantage Alameda County residents, taxpayers, and transit riders to the benefit of inter-regional travelers from San Joaquin County. In a return to pre-pandemic BART service and ridership, trains arriving at Bayfair station on the Blue Line are often full already – will local passengers have any chance of a seat after Valley Link passengers get first choice? ACTC officials should not approve such a disservice to your constituents without much more explanation.

ACTC should not act until there is at least a matching financial commitment from San Joaquin County.

The proposed resolution provided by Valley Link does not present adequate commitment from San Joaquin County as a funding partner for this potentially massive proposal to benefit their commuters. It merely states that

> "SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from ***future*** measures

and state funds." ***(emphasis added)***

Any ACTC action should be conditioned on a firm commitment of adequate funds for both capital and continuing operations for this multi-county project. A one-sided "leveraging" of funds is not prudent public policy.

The "technical amendment" to the Valley Link project description is disingenuous if not misleading, and changes the conditions approved by voters.

The ACTC meeting materials from May 28th show the proposed project description only as it would be amended, without including the carefully negotiated original terms – approved by the voters – that are proposed for omission or change now. The excerpt below tries to more transparently and concurrently portray the full language under consideration (with additions underlined and deletions ~~crossed out~~). Commissioners are urged to please seriously consider what is intended by the changes, and what might be unintended consequences.

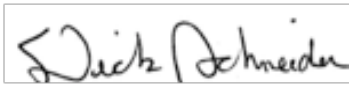
"~~BART to Livermore ($400 M)~~
Valley Link rail in Alameda County ($400 M)

This project funds the first phase of a ~~BART Extension within the I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ Valley Link rail extension from the existing Dublin/ Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology.

Funds are for construction for any element of this first phase project and shall not be used until full funding commitments are identified and approved for the initial operating segment that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include an ~~detailed~~ alternative assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process."

Among other questions, what difference does the "initial operating segment" make to the proposal's potential draw on Alameda County funds? What criteria will be used to assess whether the initial operating segment "most effectively meets" the adopted project goals, and which agency will make that determination? When will "full funding commitments" be identified and approved for the full project? Please also explain why the references to "detailed" analysis and "all" alternatives are being deleted.

In conclusion --



For these reasons, the Sierra Club strongly opposes all of the proposed actions laid out in your Commission materials of May 28, 2020. We further urge no further consideration on these matters until our concerns have been resolved.

If you have any questions regarding these comments, or wish further information, please do not hesitate to contact Matt Williams at mwillia@mac.com .

Sincerely,

Matt Williams

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission (ACTC)
1111 Broadway, Suite 800
Oakland, CA 94607

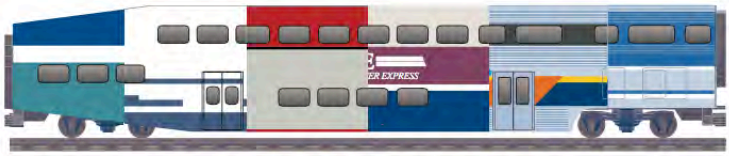
Dear Chair Cutter:

Subject: Support for ACTC Action to allocate $400 million in Measure BB funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority for the Valley Link Project

San Joaquin Regional Rail Commission (SJRRC) is a project partner and member of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority). The Authority is requesting that the Alameda County Transportation Commission (ACTC) take action to allocate $400 million Measure BB funding to the Valley Link Project that is currently identified for the BART to Livermore Project. This action is consistent with Assembly Bill 758 (AB 758), the Authority's enabling legislation. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between ACE and the BART system and the advancement of the Altamont Corridor Vision.

The Authority was created in 2017 by AB 758 for the purpose of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the ACE commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. An estimated 28,000 are projected to ride the Valley Link system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year.

SJRRC urges approval of the ACTC Action to allocate $400 million in Measure BB funds to the Tri-Valley-San Joaquin Valley Regional Rail Authority for the Valley Link Project. This action will ensure that the Valley Link project moves forward and it supports the Altamont Corridor Vision that SJRRC and the Authority are diligently working jointly to advance.



Sincerely,

Christina Fugazi, Chair
San Joaquin Regional Rail Commission

Re: Agenda Item # 8.1, May 28 Meeting
Measure BB Exp. Plan Amendment

Dear Chair Cutter:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. TRAC has been involved in passenger rail planning for the Altamont Corridor for at least two decades. We have made presentations to the Valley Link Board and participated in their public meetings.

We write today to urge your Board to defer action on amending the Expenditure Plan for Measure BB until you receive an environmental impact report for Valley Link, which is nearing completion. The Administrative Draft was under review last October, and the Draft EIR is now scheduled for public review in September 2020. TRAC suggests the following reasons for deferral of this agenda item:

1. Without a certified EIR, there is no evidence to support the claim that the proposed Valley Link project will provide meaningful benefits to Alameda County taxpayers. The Commission has a special duty to taxpayers to make an affirmative finding of benefit, under Section 14 of the Expenditure Plan Guidelines:

> **No Expenditures Outside of Alameda County**: Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County. (emphasis added.)

2. From its inception, this project raised serious questions as to whether BART would be able to handle the additional passengers that Valley Link would transport from the Central Valley. The EIR

should resolve that question. If Valley Link were projected to make overcrowding on BART even worse, that would have serious implications as to whether the project could reasonably be judged as benefitting Alameda County residents.

3. An EIR would determine whether Valley Link would result in the construction of any infrastructure or station that would be inconsistent with the land use-constraining provisions of Alameda County year 2000 Measure D. On a related topic, an EIR will provide information on the Valley Link project's compliance with the County's Gateway Policy.

4. As the largest single capital project in Measure BB, BART to Livermore was the marquee project. Because of that special status, it demands special treatment above and beyond the 2/3 majority required for an amendment. This is not some minor project. Amending the Plan to include this project changes the entire profile of the measure, because the voters never gave their support to the Valley Link project. There is no evidence that the voters of the Tri-Valley, which did not support Measure BB, would support Valley Link.

5. Because Measure BB resulted in financial trade-offs between the Tri-Valley and the North County cities through a reweighting of the basic allocation formula for local streets and roads, the entire Expenditure Plan would need to be reopened to assure fairness for all jurisdictions.

6. Other alternative projects, including several that TRAC has advocated for, would potentially be far more cost-effective in providing the service that Valley Link seeks to offer. In particular, the $1+ billion dollar cost of the I-580 relocation is merely a utility relocation, offering no transportation benefit to taxpayers.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

David Schonbrunn, President, TRAC

US Representative Eric Swalwell
Wente Family Estates

ALAMEDA COUNTY FAIRGROUNDS
PLEASANTON

September 11, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 50 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy

main925.426.7600 | fax925.426.7599 | www.alamedacountyfair.com | 4501 Pleasanton Avenue | Pleasanton, California 94566

mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Jerome P. Hoban

RE: **Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan (TEP) Amendment**

Dear Chair Cutter:

I again write to underscore strong support for the Tri-Valley-San Joaquin Valley Regional Rail Authority request to amend the 2014 Measure BB TEP. This action will directly benefit the taxpaying residents of the Tri-Valley, connect our Alameda County service work force, and importantly, it will create new jobs to stimulate our faltering economy. It will advance TOD plans currently underway at proposed stations – adding new and affordable housing units where they are needed most. It will also reduce congestion and improve safety on Interstate 580 – ranked as one of the Bay Area's most congested goods movement corridors that serves the Port of Oakland.

The time to take action is now as this action will help position this vital project for federal and state stimulus funds. The compelling project facts have all been clearly identified and after decades of studies that have exhaustively reviewed bus alternatives and virtually every imaginable alignment and mode option, there is simply no need for additional studies and delay with further consequential and wasteful cost escalation. This project meets the moment and the urgency of this moment is now as we position our County for economic recovery and support the needs of our vital, taxpaying work force.

I appreciate your consideration of this request and look forward to the advancement of these important project. Should you have any questions or concerns, please do not hesitate to reach out to me directly. Your staff can also contact Brandon Bratcher at (916) 319-2016 or brandon.bratcher@asm.ca.gov.

Sincerely,

Rebecca Bauer-Kahan
Assemblymember, 16th District

BOARD OF SUPERVISORS

June 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

RE: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

I write to support the approval of the the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to initiate an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. After many decades of study, it will assure that our residents will finally benefit from the taxes they have paid to BART for many decades.

The Authority was created in 2017 by Assembly Bill 758 for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the Altamont Corridor Express (ACE) commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering our most vital services – firefighters, police, nurses, and teachers, many of whom have been priced out of the communities they serve by rising housing costs – who face an average 78-minute commute each way.

An estimated 28,000 are projected to ride the system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

CHABOT
LAS POSITAS
COMMUNITY
COLLEGE
DISTRICT

September 8, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan (TEP) Amendment

Dear Chair Cutter:

I write on behalf of Chabot-Las Positas Community College District to again underscore strong support for the Tri-Valley-San Joaquin Valley Regional Rail Authority request to amend the 2014 Measure BB TEP. This action will directly benefit the taxpaying residents of the Tri-Valley, our students and employees, connect our Alameda County service work force, and importantly, it will create new jobs to stimulate our faltering economy.

CLPCCD provides educational opportunities and support for completing of students' transfer, associate degree, basic skills, career technical education, and retraining goals. We serve, annually, approximately 29,000 students. Our employees and students use public transportation to get to and from their homes to our places of work. Our research shows that our public transportation usage average is 10,000 individual rides per month and nearly 500 students take the bus each business day. Of our total student population, 20% take classes at both campuses. Valley Link to Livermore would support and facilitate the needs of student populations from both the Tri-Valley and 880/580 corridors.

We know there is still a great need for additional public transportation options for all of our students and employees. Valley Link and TEP Amendment will advance TOD plans currently underway at proposed stations – adding new and affordable housing units where they are needed most. It will also reduce congestion and improve safety on Interstate 580 – ranked as one of the Bay Area's most congested goods movement corridors that serves the Port of Oakland.

The time to act is now as this action will help position this vital project for federal and state stimulus funds. This project meets the moment and the urgency of this moment is now as we position our County and region for economic recovery and support the needs of our vital, taxpaying work force.

Chabot-Las Positas Community College District urges the Commission to consider the approval of Measure BB Transportation Expenditure Plan amendments for Valley Link.

Respectfully,

Ronald P. Gerhard
Chancellor

LIVERMORE
CALIFORNIA

September 14, 2020

The Honorable Eliza Ortiz, Chair
Planning, Policy and Legislation Committee
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Support for Alameda CTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Ortiz:

As a project partner and member of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority), I write to request the support of the Planning, Policy and Legislation Committee's (PPLC) for the approval of the Authority's request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between ACE and the BART system in the Tri-Valley and support the advancement of the Altamont Vision.

The Authority was created in 2017 by Assembly Bill 758 for the purpose of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the ACE commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities.

The Valley Link rail project would cover 42 miles connecting the existing Dublin/Pleasanton BART Station to the proposed ACE North Lathrop Station. This project will utilize existing transportation rights of-way where feasible. A second phase would extend service from the North Lathrop Station to the ACE and Amtrak Stockton Station. This rail-based solution was developed by the Authority through extensive studies and public outreach. The studies evaluated many alternatives, including rail alignments and transit modes, for potential benefits and impacts, including ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel

times, integration with land use, and cost-effectiveness. Along this corridor, studies have shown buses do not provide sufficient travel time reduction or capacity to be effective. Valley Link rail was found to carry significantly more riders and resulted in a much higher reduction in vehicle miles traveled.

Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. Valley Link will operate 74 daily round trips, providing and estimated 33,000 daily rides in 2040. This will result in the reduction of almost 100 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year.

Livermore residents are in support of utilizing Measure BB tax dollars for what they were originally intended for. The voters of Alameda County approved Measure BB funds to improve the Tri-Valley's access to BART. Livermore residents have been paying taxes for over 50 years for rail improvements to access BART which would be realized with the Valley Link project.

We urge the PPLC's support for the approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that the Valley Link project moves forward and supports the Altamont Vision that our agencies are diligently working jointly to advance.

Sincerely,

John Marchand

Subject: Support for 2014 Measure BB Transportation Expenditure Plan Amendment – Valley Link

Dear Chair Ortiz:

On behalf of the City of Pleasanton, I write to give our strong support for the approval of the Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJRAA) request to amend the 2014 Measure BB transportation Expenditure Plan. The amendment proposes to complete several actions: 1) recognize the TVSJVRRA as a new agency that is eligible to receive Measure BB funds; 2) Replace the BART to Livermore project with the Valley Link project and retain the $400 million in Measure BB funding for the Valley Link project.

The Valley Link Project is a critical regional project and will complete the regional rail concept initially envisioned for the Tri-Valley decades ago. With the approval of Assembly Bill 758 in 2017, the TVSJVRRA was created to expedite the planning, development and construction of a rail service that connects BART to the Altamont Commuter Express.

As stated in the City's previous letters dated May 26th, 2020 and June 26, 2020, the Valley Link Project will benefit the entire Tri-Valley by improving rail mobility from San Joaquin County to the Tri-Valley region. Valley Link will service approximately 28,000 riders per day which will reduce traffic congestion, vehicle miles traveled, and travel time through the Altamont and 580 corridor. Valley Link will also reduce GHG by 33,000 metric tons of CO2 in 2040 by operating a self- sufficient renewable energy system.

Valley Link will also support the advancement of Transit Oriented Development by supporting MTC's Plan Bay Area; having four PDA's located along the Valley Link alignment will support more than 2,200 homes, all located within ½ mile of the stations. These transit-oriented developments will be within walking distance to regular Valley Link service providing access throughout the day in both directions and connecting with the Bay Area's BART system which further contributes to the reduction of traffic congestion and GHG emissions in the Tri-Valley region.

1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a project partner and member of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority), I write to support the approval of the Authority's request to an amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between ACE and the BART system in the Tri-Valley and support the advancement of the Altamont Vision.

The Authority was created in 2017 by Assembly Bill 758 for the purpose of planning, developing and delivering cost-effective and responsive transit connectivity between BART and the ACE commuter rail service in the Tri-Valley that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the 580/680 corridor. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. Valley Link will operate 74 daily round trips, providing an estimated 33,000 daily rides in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that the Valley Link project moves forward and supports the Altamont Vision that our agencies are diligently working jointly to advance.

Sincerely,

Bill Clarkson
Mayor, City of San Ramon

September 11, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

The Dublin Chamber of Commerce represents over 250 business organizations most who are within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 5600 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the

reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Ingeborg E. Houston
President and CEO

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

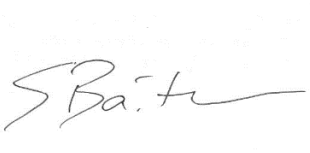
Dear Chair Cutter:

On behalf of the East Bay Economic Development Alliance, the East Bay Leadership Council and Innovation Tri-Valley Leadership Group, which represent a broad range of private and public sector employers in Alameda County, we are writing to express our strong support of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). This Amendment acknowledges the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project.

This action will fulfill a commitment made to the voters of Alameda County to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work. It will help address both immediate and long-term transportation, housing, economic, and environmental needs in Alameda County as well as provide tremendous benefits to the greater Bay Area region. The recently completed Feasibility Report provided to the state legislature demonstrates that the Project is financially viable and provides significant increases in regional rail ridership in the Altamont Corridor.

The Altamont Corridor that connects the San Joaquin Valley to Alameda County and the greater Bay Area is one of the most heavily traveled and fastest growing corridors in the Northern California megaregion. In addition, the Altamont Corridor is also the primary gateway for goods movement between the Bay Area and the Central Valley and Southern California and relieving congestion is essential for maintaining and improving the health of our state's economy. According to a recent report in the Orange County Register, commuters in Northern San Joaquin County lead the nation in "super commuters" traveling 90 miles or more to work each day, which causes significant environmental harm. Furthermore, the Bay Area Council estimated that congestion will increase an additional 75% by 2040. To achieve state and regional environmental and economic development goals, a robust passenger rail alternative is needed in the Altamont Corridor to increase mobility by providing a sustainable transportation option, provide greater connectivity, as well as a better quality of life and access to educational opportunities, health care facilities, and other regional amenities.

The Tri-Valley is a thriving Bay Area job center - with two national laboratories and headquarters for more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses, and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.



Valley Link's 42-mile, 7 station system is estimated to have a ridership of 28,000 by 2040. It will reduce the amount of greenhouse gases and air pollution emissions by diverting trips that would have previously been taken by an automobile. Specifically, this will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted Transit Oriented Development (TOD) Policy, Valley Link will also support the advancement of affordable housing and TOD by fostering more compact and sustainable growth centered around a robust rail network adjacent to its stations, which will further reduce VMT and greenhouse emissions. The TOD policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space.

The Project would also have a transformative effect on underserved communities by providing a convenient and inexpensive alternative to the rising costs and impacts of automobile usage. Connecting San Joaquin Valley to the Bay Area's large economic centers would increase safe and affordable transportation options between these communities while also providing an opportunity to rebalance job centers equitably. The Project addresses the social justice concerns caused by the displacement of former Bay Area residents living in San Joaquin County who rely on jobs in the Bay Area for their family's economic survival. Simply put, jobs will ultimately leave the Bay Area if we do not provide a reliable transit connection for those who are most in need.

During these challenging economic times, it is also important to note that Valley Link is projected to provide an estimated 22,000 jobs during construction, and when operational, support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing. The project already has substantial funding, and once it clears its final hurdle early next year with approval of the Final Environmental Impact Report, the amended TEP will make the project "shovel ready" and immediately eligible for federal funding opportunities.

In summary, Valley Link is consistent with the intent of the voters of Alameda County to extend rail service into the Tri-Valley. It is consistent with the State Rail Plan, MTC Regional Rail Plan, MTC Plan Bay Area 2050, and MTC Resolutions 3829 and 2007. We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

GILLIG

September 9, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Re: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

GILLIG is a 130-year-old American manufacturer of heavy-duty transit buses for cities and municipalities across the United States. We take great pride in our successful history as a US manufacturing business, and our employment of nearly nine hundred hard working Californians who are steadfast in helping our customers fulfill their duties and mission in public transit.

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), I write to you today to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

When GILLIG outgrew its facility in Hayward, we decided to build in the Tri-Valley because a large percentage of our workforce lived in the Northern San Joaquin County area. The length of their commutes coupled with inaccessibility to reasonable public transportation options weighed heavily on their overall quality of life. Moving to Livermore in 2017 meant shorter commute times for most employees and gave us more accessibility to high caliber talent outside our immediate area. It goes without saying that adding advanced rail connectivity, would be a huge benefit to both our employees and to GILLIG.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

GILLIG urges approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Derek Maunus

Oakland, California 94607

Re: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Cutter:

Hacienda is located near the geographic center of the San Francisco Bay Area and, at 875 acres, is the largest development of its kind in Northern California. Over 10 million square feet of existing, mixed-use space is occupied by some 700 companies that locally employ approximately 20,000 people. Key tenants include Kaiser Permanente, Oracle, Roche Molecular Systems and Gap who have all made substantive investments in their presence within Hacienda. In addition, Hacienda features homes to some 5,600 residents and is in the active planning and construction phase for as many more. Our facilities thrive because of the state-of-the-art working and living environments that have been developed which are in large part due to an ongoing commitment to providing comprehensive approaches to commute choices and community development.

Hacienda writes to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center with two national labs and headquarters for more than 450 technology companies, many of them located at Hacienda, and regional gross domestic product (GDP) of an estimated $42 billion. Valley Link will benefit the entire Tri-Valley by reducing traffic over the Altamont Pass and through the Interstate 580/680 corridor. An estimated 98,500 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars and confronting an average 78-minute commute each way. Critical employment centers, such as Hacienda, need to make sure that all corridors leading into the Tri-Valley provide easy and convenient access for businesses whose labor supply extends into outlying areas. Likewise, residents at Hacienda similarly need the ability to enjoy access to corridors connecting the Tri-Valley with the larger region.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Transit Oriented Development Policy adopted by the Authority's Board, Valley Link will support the advancement of transit-oriented projects, such as Hacienda, adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. Hacienda's existing and proposed development along with the proposed Isabel Neighborhood Plan are examples of how this can happen throughout the system.

Valley Link is a transformational project that will link our most vital Bay Area workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and, when operational, support an estimate 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities; now more than ever given the recovery needs we are facing.

We urge approval of the Authority's request for the allocation of funding. This action will support the goals and objectives of Hacienda and the economic recovery of our region by ensuring that this important project will move forward.

Sincerely,

James Paxson

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Cutter:

I have been directly involved in efforts to expand rail connectivity in the Tri-Valley since 1999 in various capacities, including as a federal and state legislative staffer, local elected official, and advocate for business and labor interests. Given my personal history, involvement, and knowledge of the project, I have been following the recent discussion and public comments regarding Valley Link with great interest.

During the past 21 years that I have been working on this effort, one noteworthy highlight that is particularly relevant to this item is when I served on the Measure BB Executive Steering Committee in 2014. One of the key principles as we were crafting the TEP was ensuring that the top transportation priorities of each of the four planning areas were addressed for purposes of equity. In 2014, the leaders of the eastern planning area (i.e. the Tri-Valley) identified BART to Livermore as one of those priorities. Today, the leaders of that same planning area are respectfully requesting that the successor project to BART to Livermore (i.e. Valley Link) be incorporated into the amended plan to fulfill the will of the voters of Alameda County for rail connectivity in the Tri-Valley. By approving this Amendment, the carefully crafted principles of regional equity through the fair distribution of projects and priorities within the four planning areas which comprise the TEP will be preserved. Notwithstanding the numerous benefits of Valley Link, by denying this Amendment it creates an injustice to the residents of eastern Alameda County by subjecting them to worsening congestion and air quality while shattering the foundational principles of the equitable distribution of resources that were the cornerstone of the TEP.

I have both spoken and written about the project's benefits previously, and I am aware that dozens of letters of support from key stakeholders have been written recently that have further articulated all of the reasons the TEP Amendment should be supported. I trust that you will review those carefully. Unfortunately, I believe that there are also mischaracterizations of Valley Link being circulated by opponents of the project. In order that you can make an informed decision. I wish to draw your attention to the attached "Myths vs. Facts" document that I have submitted with this letter. I apologize in advance for the length of this document, but I felt it was critically important for you to have this information.

Thank you in advance for your consideration, and it is my sincere hope that you will fulfill the long-awaited promises to the residents of the Tri-Valley and the vision of MTC Plan Bay Area 2050, the MTC Regional Rail Plan, and the State Rail Plan by voting to support Valley Link.

Sincerely,

Tim Sbranti
Strategic Initiatives Director, Innovation Tri-Valley Leadership Group (2018-present)
Deputy Chief of Staff/District Director, Congressman Eric Swalwell (2015-2018)
Mayor, City of Dublin (2008-2014)
Councilmember, City of Dublin (2002-2008)
District Aide, State Senator Tom Torlakson (1999-2001)

Myth vs. Fact

Tri-Valley – San Joaquin Valley Regional Rail Authority Request
Amendment to 2014 Measure BB Transportation Expenditure Plan

Myth: Measure BB Funds will be spent outside of Alameda County
Fact: This is simply not true.
No expenditure of Measure BB funds will be made outside of Alameda County. The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for an initial operating segment.

Myth: Valley Link primarily benefits non-Alameda County residents
Fact: The economies of the Northern California Megaregion are interconnected and residents and businesses throughout Alameda County will benefit from Valley Link
The project as defined will benefit Alameda County residents and businesses as well as San Joaquin County. Benefits of the project, including data specific to Alameda County residents is noted:

- 57% of the project track mileage is in Alameda County
- 74 round trips in 2040
- 10,137 daily boardings in the Tri-Valley in 2040
- 33,000 daily boardings in the full corridor in 2040
- 99.4 million annual reduction in vehicle miles travelled (VMT)
- 33,880 to 42,650 metric tons per year reduction in greenhouse gas (GHG)

Valley Link is vitally needed to support the interconnected economies of the Northern California Megaregion: both the Bay Area and San Joaquin County. An estimated 93,400 of our Bay Area workers are now living in Northern San Joaquin County, including those delivering our most vital services – firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Valley Link will connect our displaced workforce to housing and jobs, help companies attract and retain employees in Alameda County and cease the tide of companies seeking to move elsewhere.

It is also worth noting that the primary goods movement corridor from products being shipped to and from the Port of Oakland and other businesses in Alameda County to the Central Valley and Southern California are transported over the Altamont Pass. If improvements are not made to this corridor, this critical freight movement will come to a grinding halt, causing immeasurable harm to businesses and customers in Alameda County.

Myth: Valley Link will duplicate ACE service
Fact: They are complimentary and coordinated services
Valley Link will not duplicate ACE service. It will provide fast and frequent rail service to BART – operating 74 daily roundtrips a day with a focus on serving Tri-Valley, Oakland and San Francisco bound commuters. Expansion of the current ACE 4-daily roundtrip service is constrained due to operations on Union Pacific tracks in mixed freight.

Valley Link and ACE are working in partnership towards a long-term Altamont Corridor Vision that, consistent with the California State Rail Plan, will evolve into a coordinated megaregional system – providing connectivity to the future California High Speed Rail service. As plans for this long-term vision

are advanced, Valley Link will continue to plan upon providing fast and frequent service to a BART connection in the Tri-Valley with focus on serving the Oakland and San Francisco commute – while the ACE service will focus on longer-haul service with fewer stations and faster service to the Silicon Valley.

Myth: Valley Link will create sprawl
Fact: Valley Link will support compact development at stations
Valley Link provides a sustainable commute option to the more than 93,400 Bay Area workers who currently travel from their homes in Northern San Joaquin County to jobs in the Bay Area – where they've simply been priced-out. The Valley Link Board has adopted a transit-oriented development (TOD) policy, modelled after MTC's Resolution 3434 TOD requirements, that encourages local jurisdictions to conform to a minimum corridor threshold average of 2,200 units of housing within a half mile radius of stations and complete station area plans. These plans will address, at a minimum, future land use changes, station access needs, circulation improvements, pedestrian-friendly design, and other key features in support of transit-oriented development. Station area planning is currently underway for the Isabel, Downtown Tracy and River Island stations. The Dublin/Pleasanton, Isabel and Southfront stations are in Priority Development Areas (PDAs) established by MTC/ABAG.

Myth: Valley Link does not support the objectives of SB375
Fact: Will achieve significant reductions in greenhouse emissions
The primary focus of SB 375 is the reduction of greenhouse gas (GHG) emissions. Valley Link will reduce GHG by getting commuters out of their cars and onto trains. An estimated 75% of the 93,400 Northern San Joaquin Valley residents commuting to work in the Bay Area are driving alone. Ridership on Valley Link is projected to be an estimated 33,000 riders per day in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of between 33,880 and 42,650 metric tons of greenhouse gas emissions (GHG) per year depending on the vehicle technology. In addition, through a Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs.

Another goal of SB 375, as stated in Plan Bay Area 2040, was for the nine-county Bay Area region to provide sufficient housing for all new workers in the area. Not only has the region failed to achieve this goal, with the cost of a new housing unit in the area now estimated at $700,000, the goal of providing housing that is affordable to such workers may be unattainable. In contrast, the areas to be served by Valley Link provide many options for moderate income and affordable housing. By creating a commute option that allows those workers to reach jobs in the Bay Area region without increasing GHG emissions and congesting the area's roadways, Valley Link creates a win-win for both regions that might otherwise by unattainable.

Myth: A bus alternative would be more cost-effective
Fact: The bus alternatives fall way short
Express bus/BRT and enhanced bus alternatives were studied in the Project Feasibility Report and will be further examined in the EIR that is currently underway. Bus alternatives were also studied extensively in the BART to Livermore EIR that was certified by the BART Board in 2018. This review of bus alternatives have included a review of all possible ways to maximize the effectiveness of bus operations in this corridor - including a "bus on shoulder" alternative. In short, the bus alternatives appear to be less costly than rail but have much longer travel times, dramatically lower ridership and significantly less air quality improvement and environmental benefits.

Myth: Interstate 580 lanes will be lost in the Tri-Valley
Fact: No lane loss and minimal disruption is anticipated
There will be no loss of existing highway lanes or Express Lanes on I-580. Valley Link is currently working in partnership with Caltrans and ACTC (agency that oversees the I-580 Express Lanes) – planning to ensure minimal disruption during construction. It is important to note that the highway right-of-way was preserved (as feasible) for a potential BART extension in the I-580 median. Extensive efforts were made throughout the years to not preclude potential rail expansion when modifications to the

interstate were made and developments were planned in its proximity. When the decision was made to advance the I-580 Express Lanes, these efforts were continued. Although design and environmental review is still underway, it appears that impacts to existing infrastructure and land uses adjacent to I-580 will be minimized as a result of these efforts.

Myth: Insufficient study of alternatives
Fact: The Study of alternatives has been exhaustive and underway for many years
BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included an Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled.

When the BART Board directed the General Manager to not advance an alternative, it effectively passed over to the Authority the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. In developing the Valley Link Feasibility Report, and continuing in the EIR, the Authority is evaluating alternatives, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The Feasibility Report found, consistent with the BART findings, that the potential ridership benefits and greenhouse gas emission reductions were significantly higher for the rail alternative.

Myth: COVID-19: It's better to wait and defer decision
Fact: Valley Link will support economic recovery – inaction is costly
The time to advance this cost-effective solution is now – estimates show each year of delay will escalate cost by approximately $60 million per year. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early (first 10) years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan – and Valley Link has been rated as one of the top projects and designated for near-term implementation.

Additionally, a decision now will provide the Valley Link project additional advantage and leverage when seeking competitive funds from State and federal opportunities in the near future. It is also worth noting that as the economy has slowly started opening up, one of the few corridors in the entire Bay Area to begin seeing congestion return is I-580 in the Tri-Valley. This proves that delaying action will actually stifle economic growth when it is needed the most.

Finally, Valley Link will play a significant role in the region's economic recovery. Cost-effectively connecting our region's work force to jobs, particularly among the service sector where telecommuting is not an option. Importantly, it will create an estimated 22,000 jobs during construction with an economic impact estimate of $3.5 billion, and 400 more per year when operational that will result in labor income of over $19 million per year and $69 million in business sales annually.

Myth: San Joaquin County commitment inadequate
Fact: The inter-regional cooperation occurring is unprecedented
The Authority is working closely with the county and cities in San Joaquin County, SJCOG and the state to secure additional funding for the project. Important to note is that SJOG was the first agency to contribute funding for the Valley Link Feasibility Report ($300,000), the City of Tracy has committed to the donation of a key 200-acre parcel under City ownership to the project to be used for an operation and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG

Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds. Additionally, the SJCOG has included the project in their Congested Corridors Plan to access funding from the California Transportation Commission. Finally, SJCOG is preparing for a potential Transportation Sales Tax in 2022 that will provide both capital and operating funds for the Valley Link project.

Myth: Lack of outreach community support in Livermore
Fact: Outreach is a priority and community responsiveness a key goal
To-date there has been extensive public outreach in Livermore, first as part of the BART to Livermore project and subsequently when the Authority developed the Project Feasibility Report. The City of Livermore also conducted significant outreach as part of the Isabel Neighborhood Specific Plan, which is closely tied to rail service in Livermore. The project has received overwhelming support from residents, all of the Tri-Valley jurisdictions, civic groups and chambers of commerce and business groups and interests – each and every time an opportunity to provide advocacy and support has occurred.

A key mandate of AB758 and project goal adopted by the Authority Board is to be, "responsive to the goals and objective of the communities it will serve." To meet this goal, the Authority conducted an extensive community outreach program in the entire project area throughout the development of the Project Feasibility Report. This included community workshops in each of the station areas, including Livermore, and an online survey (available in English and Spanish) which was distributed widely through social media, employer newsletters, email blasts and the project website. In keeping with Board adopted Sustainability Policy Goals on Equitable Access, this community outreach included a focus on non-traditional, creative, grassroots approaches including pop-up events at public gatherings. In the Tri-Valley, an extensive number of pop-up events were conducted and included booths at the Farmer's Markets in Pleasanton, two days at the St. Patrick's Day Parade Event in Dublin, at the Dublin/Pleasanton BART Station, on the BART train, at ACE stations, Las Positas College on Club Day and at Contreras Market in Livermore. In addition, presentations were made to numerous civic and Chamber of Commerce meetings as well as briefings to City Councils upon request.

Myth: An EIR and full funding commitment is needed before decision is made
Fact: This has not been required of other projects
Valley Link should not be unfairly singled out. As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal requirements. The TEP does not require that a project complete an environmental document before inclusion in the plan, nor does it require that full funding be in place. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects. Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only 4 of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters.

Re: Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Cutter and Commissioners:

I am writing on behalf of the Livermore Valley Chamber of Commerce (LVCC), a business membership organization with nearly 500 members from a cross-section of private/public and non-profit industry sectors that employ nearly 20,000 workers. Ensuring that public dollars are wisely spent and that taxpayers receive a good return on their investment, while responsibly and effectively planning, funding, and maintaining and operating our transportation system, is a key policy priority for LVCC.

LVCC supports the above referenced request, advancing the efforts to close the gap in the I-580 corridor for an urgently needed and long-awaited, effective rail connection between Livermore/Eastern Alameda County and the Dublin/Pleasanton East BART station. We reiterate the support formerly expressed by LVCC over many years for planning and funding support for such a project. Advancement of a rail extension project connecting BART in the I-580 corridor has withstood challenges and opposition, oftentimes by those that are not on the ground in the Tri-Valley corridor. We recognize many do so with a view of maintaining the status quo and protecting their own interests, unwilling or unable to consider the utility of a future comprehensive and connected transportation network effectively serving all major corridors of Alameda County.

Over decades, the Tri-Valley I-580 corridor and now this project as well as the former BART extension have been studied ad nauseum. And yet, we continue to experience chronic traffic congestion and the related impacts to air quality, local roadways, the economy and general quality of life by those that travel, live or work along the I-580 corridor. We are satisfied that the TVSJVRRA Valley Link project is warranted. ACTC has invested hundreds of millions of dollars in projects that serve regional travel, beyond Alameda County borders, infrastructure necessary to support a strong regional economy. We understand the collective responsibility and benefits to us all.

Livermore Valley Chamber of Commerce
2157 First Street Livermore CA 94550
925.447.1606
www.livermorechamber.org

Recalling the rigors and pain of developing Measure BB including the $400 million earmarked for a BART extension project to Livermore, there was little doubt that the intent was to close a crucial rail gap in the Tri-Valley I-580 corridor. Upon the failure of the BART board of directors to meet expectations to implement this project, and to ensure that this opportunity was not lost to the 20th century models of bus and BART, forward thinking leaders in the Tri-Valley acted to meet the challenge, establishing the TVSJVRRA and developing the Valley Link project.

Today as we contend with the impacts of the COVID-19 public health emergency, business leaders are already looking beyond the pandemic, planning to adapt some of the changes, and strengthen their business models for the 21st Century post-COVID economy. Operating outside of our comfort zone has become an acquired skill during COVID, requiring vision and courage to move towards a safe, sustainable and successful future. We expect no less from leaders that have power over our economic transportation future.

LVCC appreciates the wisdom of the Alameda County Transportation Commission in designating $400 million of funding in Measure BB (which was supported by LVCC) to provide for a future rail connection in this corridor. In light of events that have transpired since the approval of BB, LVCC strongly urges actions necessary to amend the expenditure plan to approve the request by the Tri-Valley-San Joaquin Valley Regional Rail Authority and move $400 million towards delivering Valley Link.

Respectfully,

Dawn P. Argula

September 9, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of winery and hospitality employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation

infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Chris Chandler

Oakland, CA 94607

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Dear Chair Cutter:

Obtaining more safe and effective mass transit is critical to the Bay Area. Although it has temporarily lightened to some degree, it is well known that traffic conditions have become intolerable. These long commutes affect quality of life deeply in a negative way. The exhaustion that it causes among our citizens literally can affect their health as well.

Citizens like to feel productive and they need to be to accomplish their goals. Spending hours in their car has a very negative impact to these goals. They can work while commuting with mass transit. This allows them more time for family. They can catch a nap when needed to feel more refreshed.

We are talking about less pollution, more productivity, better quality of life, more rest, less chance of automobile accidents, this is a win-win in every sense for our community.

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 35 employees and more than 150 subcontractors, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and

greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

RE: Valley Link Transit Rail Project

Dear Ms. Lengyel:

I am aware that the Alameda County Transportation Commission (ACTC) Planning, Policy and Legislation Committee is taking up an amendment to the 2014 Measure BB expenditure plan (item 5.1) at its September 14, 2020 meeting. As you know, MTC has long supported actions to build the Tri-Valley Link Project and has committed over $60 million dollars since 2018 to bring this project forward. Most recently, at our June 24, 2020 meeting the Commission discussed the project at length and acted to allocate $46.8 million to the Tri-Valley - San Joaquin Valley Regional Rail Authority for completion of 30% design, environmental review documents and for various operations and technical reports/studies on the Valley Link project. The action your committee is contemplating to amend the expenditure to direct $400 million to the project is an important part of the overall financial plan for the project.

As well, the Valley Link project is featured as a higher preforming, early implementation transit expansion project for inclusion into Plan Bay Area 2050. MTC approved the transportation element of Plan Bay Area 2050 that included Valley Link, in July. Known as the 'Blueprint' at this point in the process, the Joint MTC Planning/ABAG Administrative Committee took action on Friday, September 1, 2020 to forward Valley Link among other projects, as part of the larger transit investment and GHG reduction strategy to the Commission and ABAG Executive Board for their approval this month.

When integrated with the Plan Bay Area 2050 Regional Growth Forecast the Blueprint will be further analyzed this fall in advance of approval of the Preferred Alternative for the Plan Bay Area 2050 EIR.

Please contact me if you have further questions.

Sincerely,

Therese W. McMillan
Executive Director, MTC

September 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Re: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a labor union within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 35,000 members, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the

transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Oscar De La Torre
Business Manager

September 6, 2020

Ms.Vanessa Lee

Alameda County Transportation Commission

1111 Broadway, Suite 800
Oakland, CA 94607

Dear Ms Lee:

Subject: Regarding Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan (TEP) Amendment

My husband and I are writing to you today regarding our support for the Tri-Valley-San Joaquin Valley Regional Rail Authority request to amend the 2014 Measure BB TEP. We think this is an important and valuable step as it serves many purposes. First, it will directly benefit the taxpaying residents of the Tri-

Valley, second it will connect our Alameda County service work force, and third, it will create new jobs to stimulate our faltering economy. It will advance TOD plans currently underway at proposed stations – adding new and affordable housing units where they are needed most. It will also reduce congestion and improve safety on Interstate 580. 580 has gotten busier every year since we moved in, and while this is a good sign of growth it is also an indicator of the growing need for public transit to scale with the times. It should be possible to get to work and home without routinely sitting in 20+mile traffic jams that fill the Tri-Valley with smog.

We think that this is the right moment to take action as it will position this vital project for federal and state stimulus funds. Decades of studies have been carried out to decide how to extend transportation, these exhaustive analyses have covered nearly every imaginable alternative. The public has all the information we need to proceed, and any further studies are simply raising cost without raising value. Not only is all the information gathered, but the critical juncture of economic and public health disasters begs for a proactive stimulus to the local economy. This is exactly the time to invest in infrastructure to position our County for economic recovery and support the needs of our vital, taxpaying work force.

I urge you to carefully consider the facts when considering arguments being made in favor of other projects and interests. It is important to let the Valley Link Project and TEP Amendment decision stand on the merit of the facts. Please review the attached fact sheet and go to valleylinkrail.com for further information.

Sincerely,

Robert and Cynthia Panas

Attachment: Myth vs. Fact: Tri-Valley - San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

Website: valleylinkrail.com

Myth vs. Fact

Tri-Valley – San Joaquin Valley Regional Rail Authority Request
Amendment to 2014 Measure BB Transportation Expenditure Plan

Myth: Measure BB Funds will be spent outside of Alameda County
Fact: This is simply not true.
No expenditure of Measure BB funds will be made outside of Alameda County. The proposed TEP amendment states that funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for an initial operating segment.

Myth: Valley Link primarily benefits non-Alameda County residents
Fact: The economies of the Northern California Megaregion are interconnected.
The project as defined will benefit Alameda County residents and businesses as well as San Joaquin County. Benefits of the project, including data specific to Alameda County residents is noted:

- 57% of the project track mileage is in Alameda County
- 74 round trips in 2040
- 10,137 daily boardings in the Tri-Valley in 2040
- 33,000 daily boardings in the full corridor in 2040
- 99.4 million annual reduction in vehicle miles travelled (VMT)
- 33,880 to 42,650 metric tons per year reduction in greenhouse gas (GHG)

Valley Link is vitally needed to support the interconnected economies of the Northern California Megaregion: both the Bay Area and San Joaquin County. An estimated 93,400 of our Bay Area workers are now living in Northern San Joaquin County, including those delivering our most vital services – firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Valley Link will connect our workforce to housing and jobs, help companies attract and retain employees on both sides of the Altamont Pass, and cease the tide of companies seeking to move elsewhere.

Myth: Valley Link will duplicate ACE service
Fact: They are complimentary and coordinated services
Valley Link will not duplicate ACE service. It will provide fast and frequent rail service to BART – operating 74 daily roundtrips a day with a focus on serving Tri-Valley, Oakland and San Francisco bound commuters. Expansion of the current ACE 4-daily roundtrip service is constrained due to operations on Union Pacific tracks in mixed freight.

Valley Link and ACE are working in partnership towards a long-term Altamont Corridor Vision that, consistent with the California State Rail Plan, will evolve into a coordinated megaregional system – providing connectivity to the future California High Speed Rail service. As plans for this long-term vision are advanced, Valley Link will continue to plan upon providing fast and frequent service to a BART connection in the Tri-Valley with focus on serving the Oakland and San Francisco commute – while the ACE service will focus on longer-haul service with fewer stations and faster service to the Silicon Valley.

Myth: Valley Link will create sprawl
Fact: Valley Link will support compact development at stations
Valley Link provides a sustainable commute option to the more than 93,400 Bay Area workers who currently travel from their homes in Northern San Joaquin County to jobs in the Bay Area – where they've simply been priced-out. The Valley Link Board has adopted a transit-oriented development (TOD) policy, modelled after MTC's Resolution 3434 TOD requirements, that encourages local jurisdictions to conform to a minimum corridor threshold average of 2,200 units of housing within a half mile radius of stations and complete station area plans. These plans will address, at a minimum, future land use changes, station access needs, circulation improvements, pedestrian-friendly design, and other key features in support of transit-oriented development. Station area planning is currently underway for the Isabel, Downtown Tracy and River Island stations. The Dublin/Pleasanton, Isabel and Southfront stations are in Priority Development Areas (PDAs) established by MTC/ABAG.

Myth: Valley Link does not support the objectives of SB375
Fact: Will achieve significant reductions in greenhouse emissions
The primary focus of SB 375 is the reduction of greenhouse gas (GHG) emissions. Valley Link will reduce GHG by getting commuters out of their cars and onto trains. An estimated 75% of the 93,400 Northern San Joaquin Valley residents commuting to work in the Bay Area are driving alone. Ridership on Valley Link is projected to be an estimated 33,000 riders per day in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of between 33,880 and 42,650 metric tons of greenhouse gas emissions (GHG) per year depending on the vehicle technology. In addition, through a Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs.

Another goal of SB 375, as stated in Plan Bay Area 2040, was for the nine-county Bay Area region to provide sufficient housing for all new workers in the area. Not only has the region failed to achieve this goal, with the cost of a new housing unit in the area now estimated at $700,000, the goal of providing housing that is affordable to such workers may be unattainable. In contrast, the areas to be served by Valley Link provide many options for moderate income and affordable housing. By creating a commute option that allows those workers to reach jobs in the Bay Area region without increasing GHG emissions and congesting the area's roadways, Valley Link creates a win-win for both regions that might otherwise by unattainable.

Myth: A bus alternative would be more cost-effective
Fact: The bus alternatives fall short
Express bus/BRT and enhanced bus alternatives were studied in the Project Feasibility Report and will be further examined in the EIR that is currently underway. This has included a review of all possible ways to maximize the effectiveness of bus operations in this corridor - including a "bus on shoulder" alternative. In all of the alternatives the buses must operate within mixed traffic to varying degrees. In short, the bus alternatives appear to be less costly than rail but have longer travel times, lower ridership and less air quality improvement.

Myth: Interstate 580 lanes will be lost in the Tri-Valley
Fact: No lane loss and minimal disruption is anticipated
There will be no loss of existing highway lanes or Express Lanes on I-580. Valley Link is currently working in partnership with Caltrans and ACTC (agency that oversees the I-580 Express Lanes) – planning to ensure minimal disruption during construction. It is important to note that the highway right-of-way was preserved (as feasible) for a potential BART extension in the I-580 median. Extensive efforts were made throughout the years to not preclude potential rail expansion when modifications to the interstate were made and developments were planned in its proximity. When the decision was made to advance the I-580 Express Lanes, these efforts were continued. Although design and environmental review is still underway, it appears that impacts to existing infrastructure and land uses adjacent to I-580 will be minimized as a result of these efforts.

Myth: Insufficient study of alternatives
Fact: The Study of alternatives has been exhaustive and underway for many years
BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018. The 2010 Program EIR included analysis of 10 alignment alternatives. The Project EIR included extensive analysis of four alternatives plus a no project alternative. The alternatives included an Express Bus/Bus Rapid Transit Alternative and an Enhanced Bus Alternative. The analysis included detailed evaluation of potential benefits and impacts, including but not limited to: ridership, vehicle miles traveled, greenhouse gas emissions, capital and operating costs, travel times, integration with land use, and cost-effectiveness. The BART Project EIR found mixed performance results for the alternatives. While the cost per new rider for the Express Bus/BRT option was lower than for the rail alternatives, the rail alternatives carried significantly more riders and resulted in a higher reduction in vehicle miles traveled.

When the BART Board directed the General Manager to not advance an alternative, it effectively passed over to the Authority the ability to plan for a connection to the Dublin/Pleasanton BART Station in July 2018. In developing the Valley Link Feasibility Report, and continuing in the EIR, the Authority is evaluating alternatives, building off of the work done by BART as well as by ACE as part of the ACE Forward analysis. The Feasibility Report found, consistent with the BART findings, that the potential ridership benefits and greenhouse gas emission reductions were significantly higher for the rail alternative.

Myth: COVID-19: It's better to wait and defer decision
Fact: Valley Link will support economic recovery – inaction is costly
The time to advance this cost-effective solution is now – estimates show each year of delay will escalate cost by approximately $60 million per year. In developing the region's long-range transportation plan, Plan Bay Area 2050, MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19; rather those impacts are largely concentrated in the early (first 10) years of the Plan. Projects under development within the Bay Area must be consistent with MTC's long-range plan – and Valley Link has been rated as one of the top projects and designated for near-term implementation.

Additionally, a decision now will provide the Valley Link project additional advantage and leverage when seeking competitive funds from State and federal opportunities in the near future.

Finally, Valley Link will play a significant role in the region's economic recovery. Cost-effectively connecting our region's work force to jobs, particularly among the service sector where telecommuting is not an option. Importantly, it will create an estimated 22,000 jobs during construction with an economic impact estimate of $3.5 billion, and 400 more per year when operational that will result in labor income of over $19 million per year and $69 million in business sales annually.

Myth: San Joaquin County commitment inadequate
Fact: The inter-regional cooperation occurring is unprecedented
The Authority is working closely with the county and cities in San Joaquin County, SJCOG and the state to secure additional funding for the project. Important to note is that SJOG was the first agency to contribute funding for the Valley Link Feasibility Report ($300,000), the City of Tracy has committed to the donation of a key 200-acre parcel under City ownership to the project to be used for an operation and maintenance facility. The property has an estimated value of $40 million. In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds. Additionally, the SJCOG has included the project in their Congested Corridors Plan to access funding from the California Transportation Commission. Finally, SJCOG is preparing for a potential Transportation Sales Tax in 2022 that will provide both capital and operating funds for the Valley Link project.

Myth: Lack of outreach community support in Livermore
Fact: Outreach is a priority and community responsiveness a key goal
To-date there has been extensive public outreach in Livermore, first as part of the BART to Livermore project and subsequently when the Authority developed the Project Feasibility Report. The City of Livermore also conducted significant outreach as part of the Isabel Neighborhood Specific Plan, which is closely tied to rail service in Livermore. The project has received overwhelming support from residents, all of the Tri-Valley jurisdictions, civic groups and chambers of commerce and business groups and interests – each and every time an opportunity to provide advocacy and support has occurred.

A key mandate of AB758 and project goal adopted by the Authority Board is to be, "responsive to the goals and objective of the communities it will serve." To meet this goal, the Authority conducted an extensive community outreach program in the entire project area throughout the development of the Project Feasibility Report. This included community workshops in each of the station areas, including Livermore, and an online survey (available in English and Spanish) which was distributed widely through social media, employer newsletters, email blasts and the project website. In keeping with Board adopted Sustainability Policy Goals on Equitable Access, this community outreach included a focus on non-traditional, creative, grassroots approaches including pop-up events at public gatherings. In the Tri-Valley, an extensive number of pop-up events were conducted and included booths at the Farmer's Markets in Pleasanton, two days at the St. Patrick's Day Parade Event in Dublin, at the Dublin/Pleasanton BART Station, on the BART train, at ACE stations, Las Positas College on Club Day and at Contreras Market in Livermore. In addition, presentations were made to numerous civic and Chamber of Commerce meetings as well as briefings to City Councils upon request.

Myth: An EIR and full funding commitment is needed before decision is made
Fact: This has not been required of other projects
Valley Link should not be unfairly singled out. As with all projects in the 2014 TEP, the project must meet specific environmental deadlines and comply with regional, state and federal requirements. The TEP does not require that a project complete an environmental document before inclusion in the plan, nor does it require that full funding be in place. Every project in the 2014 TEP has a funding shortfall; the sales tax dollars are intended to be leveraged with other local, regional, state and federal funds to deliver the projects. Most of the named capital projects in the 2014 TEP did not have completed EIRs when the TEP was approved by voters. Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters. The Draft EIR is anticipated to be released in Fall 2020.

PLEASANTON CHAMBER of COMMERCE

September 9, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

The Pleasanton Chamber of Commerce represents over 750 business organizations many of which fall within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a total work force of more than 25,000 employees. Our members strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

www.pleasanton.org
777 Peters Avenue • Pleasanton, CA 94566 • Phone: (925) 846-5858 • Fax: (925) 846-9697

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Steve Van Dorn
President & CEO

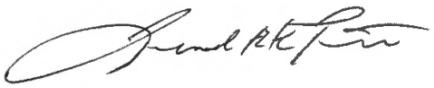
Subject: Support for 2014 Measure BB Transportation Expenditure Plan Amendment – Valley Link

Dear Chair Ortiz:

As a member of the Pleasanton City Council, I am providing my support for the approval of the Tri-Valley San Joaquin Valley Regional Rail Authority's (TVSJRAA) request to amend the 2014 Measure BB transportation Expenditure Plan. The amendment proposes to complete several actions: 1) recognize the TVSJVRRA as a new agency that is eligible to receive Measure BB funds; 2) Replace the BART to Livermore project with the Valley Link project and retain the $400 million in Measure BB funding for the Valley Link project.

The Valley Link Project will benefit the entire Tri-Valley by improving rail mobility from San Joaquin County to the Tri-Valley region. At the gateway to Silicon Valley and the greater Bay Area, the City of Pleasanton bears the brunt of traffic congestion through the 580 and 680 corridors. Valley Link will service approximately 28,000 riders per day which will reduce traffic congestion, vehicle miles traveled, and travel time through the Altamont and 580 corridor. Valley Link will also reduce GHG by 33,000 metric tons of CO2 in 2040 by operating a self- sufficient renewable energy system.



Valley Link will also support the advancement of Transit Oriented Development by supporting MTC's Plan Bay Area; having four PDA's located along the Valley Link alignment will support more than 2,200 homes, all located within ½ mile of the stations. These transit-oriented developments will be within walking distance to regular Valley Link service providing access throughout the day in both directions and connecting with the Bay Area's BART system which further contributes to the reduction of traffic congestion and GHG emissions in the Tri-Valley region.

The Valley Link Project is a critical regional project and will complete the regional rail concept initially envisioned for the Tri-Valley decades ago. It will expand regional rail, provide traffic relief, and will improve air quality by providing clean transportation. I urge the Planning, Policy and Legislation Committee approve the Measure BB amendment request by TVSJVRAA.

Tess Lengyel, ACTC Executive Director
Michael Tree, Authority Executive Director

Congress of the United States
Washington, DC 20515

September 10, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

I write to support approval of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority) request to an amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County and an eligible recipient of Measure BB funds. The amendment would also update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between Altamont Corridor Express (ACE) and the Bay Area Rapid Transit (BART) system in the Tri-Valley and support the advancement of the Altamont Vision.

The Authority was created in 2017 for the purpose of planning, developing, and delivering cost-effective and responsive transit connectivity between BART and ACE rail service that reflects regional consensus and meets the goals and objectives of the San Joaquin Valley and Tri-Valley communities. Valley Link is poised to fill the need for a rail alternative across the Altamont and is slated to be a robust and sustainable passenger rail system that has widespread support from constituencies and local leaders throughout the Northern California Megaregion. The 42-mile, seven-station system would link the Dublin/Pleasanton BART station in the Tri-Valley with communities and households in northern San Joaquin Valley. With 25 daily round trips, Valley Link staff estimates the service will provide 28,000 daily rides in 2040. Further, the Authority has also committed to making Valley Link an accessible and equitable public transit option, with four of the proposed stations in San Joaquin County within disadvantaged community geographic areas or areas designated as low-income communities.

As low-wage workers and others are displaced from the Bay Area to find more affordable housing, they are forced to make lengthier and more expensive daily commutes, making a rail connection a social justice issue. Given the potential this project has to improve the lives of commuters and help protect our environment, and given the motivation of its team to see the project completed and service begin, I want to make clear my strong support for approving the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that the Valley Link project moves forward and supports the Altamont Vision that regional agencies are diligently working jointly to advance.

Sincerely,

Eric Swalwell
Member of Congress

Dear Chair Cutter:

I am writing to encourage you to support the Tri-Valley–San Joaquin Valley Regional Authority's (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as an agency eligible for Measure BB funds and move the $400 million of Measure BB funding identified for the BART to Livermore project to Valley Link. To achieve our region's goals for the economy, the environment, housing and transportation, we need a robust and sustainable passenger rail system. I believe that Valley Link is important for the future of our region.

In 2017, the California State Legislature created the Tri-Valley - San Joaquin Valley Regional Rail Authority to plan, develop and deliver cost-effective transit connectivity between the Bay Area Rapid Transit District's (BART) rapid transit system and the Altamont Corridor Express' (ACE) commuter rail service. In 2018, they adopted the Valley Link project as the prepared alternative.

Valley Link is an opportunity to deliver a fast and efficient inter-regional rail service, connecting people, housing and jobs in the Northern California region and providing much needed congestion relief in one of the Bay Area's most congested corridors. Currently, there are over 98,500 daily commuters, traveling an estimated 78 minutes each way. By 2040, overall traffic is estimated to increase by 75% on I-580.

Valley Link will expand Bay Area rail access from the Dublin/Pleasanton BART Station to additional destinations in the Tri-Valley, including stations at Isabel Ave/I-580 in Livermore and Greenville Road/I-580 in Livermore. In addition, it will connect the Tri-Valley and Bay Area with communities in Northern San Joaquin Valley, with stations in Mountain House, Tracy and River Islands.

Valley Link has widespread support throughout the community. In addition, their environmental clearance is nearly complete and their targeted revenue service date is set for 2027.

I appreciate your consideration and look forward to the advancement of this important project.

Respectfully,

Steven M. Glazer

August 31, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

RE: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 100 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

My daughter is an ACSO deputy and my son is an EMT. Both of them serve our community and neither can afford to live in the communities they serve. We have 1,300 plus employees at our local hospital, many of whom cannot afford to live in the community and must commute to their jobs over the Altamont Pass. Reducing congestion on our freeways for goods movement, allowing essential workers and others to have a more efficient and predictable commute and reducing greenhouse gas emissions make Valley Link a win for the entire Bay Area.

An estimated 28,000 are projected to ride the 42-mile, 7-station system daily in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented

Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

John D. Sensiba

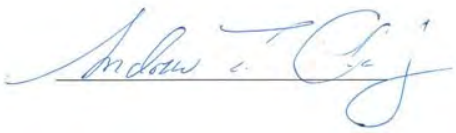
September 11, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

I am writing to help address the question of what the San Joaquin Council of Governments and our member jurisdictions are doing to support the development and eventual operation of a future Valley Link commuter rail program from the San Joaquin Valley to Alameda County. We have worked with the Tri-Valley, San Joaquin Valley Regional Rail Authority over the past three-plus years to help advance the cause of a continuously growing number of commuters from the northern San Joaquin Valley to various locations in the Bay Area. I am sure we will continue to work with the Authority to make this program a success.



The following are a list of positive steps we and our member jurisdictions and agencies have taken to advance Valley Link and passenger rail service across the Altamont:

- The 2018 adopted San Joaquin County Regional Transportation Plan included a Valley Link description promoting the advancement of an environmental document and related engineering studies. I believe we were the first Metropolitan Planning Organization (MPO) to do so.
- The San Joaquin Regional Rail Commission (SJRRC) conducted an environmental document with AECOM called ACE Forward that programmatically looked at passenger rail service across the Altamont. The effort involved a combination of state and San Joaquin County sources of funding. This substantial effort gave Valley Link a head start on its environmental document. I believe it has been described as equivalent to about a $3 million effort in advancing the Valley Link environmental work.
- The San Joaquin Council of Governments board of directors has discussed the potential for a future sales tax measure for transportation purposes on a countywide basis. Funding for passenger rail service across the Altamont (ACE and Valley Link) would be a component. The SJCOG Board has not taken affirmative action on a potential measure but has directed the exploration of a possible 2022 measure. For context, the 2006 Measure K Renewal included almost 13% of its measure for the San Joaquin Regional Rail Commission for ACE. Also, the 2006 measure was passed with 78% of the vote.

- In 1990, the voters of San Joaquin County passed the original Measure K half-cent transportation sales tax. This included funding to begin the Altamont Corridor Express service (ACE). Later Alameda County and Santa Clara County joined in providing funding for the service; a cooperative effort that has been a great success.
- The City of Tracy has scheduled Measure Y on the November ballot to promote Transit Oriented Development primarily to pave the way for Valley Link.
- The City of Tracy is also in the process of preparing for Council consideration a transfer of land to Valley Link for a maintenance facility on the San Joaquin side of the Altamont.
- San Joaquin COG and the San Joaquin Regional Rail Commission continue to work cooperatively with MTC, ACTC, BART, LAVTA, and Caltrans District 4 on the Executive Steering Committee for Valley Link
- San Joaquin COG is just beginning our update to the 2018 Regional Transportation Plan. Three months ago we amended the Plan to include a portion of the capital construction of Valley Link in the Tracy area. We have been in discussion with MTC over coordinating our approaches in our Plans for both the Altamont Corridor Express and Valley Link.

I hope this information proves helpful to you and your board in your deliberations. SJCOG looks forward to continued coordination with ACTC, LAVTA, MTC, BART, SJRRC, and the State of California in improving the plight of the long-distance commuters through enhanced passenger rail service across the Altamont Pass with ACE and Valley Link.

Sincerely yours,

Andrew T. Chesley
Executive Director

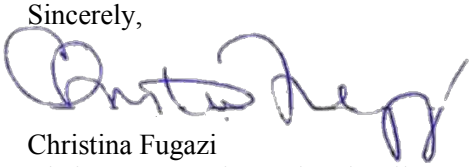
Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment



Dear Chair Cutter:

As a project partner and member of the Tri-Valley – San Joaquin Valley Regional Rail Authority (Authority), SJRRC writes to support the approval of the Authority's request to an amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore. It will also support an intermodal connection between ACE and the BART system and support the advancement of the Altamont Corridor Vision.

As the owner/operator of the ACE commuter rail service, SJRRC would like to highlight that ACE and Valley Link are complementary services. The two biggest markets served by ACE are between the Central Valley and Santa Clara County and Alameda County (Tri-Valley/Tri-City areas) to Santa Clara County. ACE trains run primarily on UPPR freight track which greatly limits the frequency of ACE. ACE's funded expansion program will extend ACE in the Central Valley to Sacramento, Stanislaus, and Merced counties. Valley Link offers a direct connection with BART at Dublin/Pleasanton which will greatly improve connectivity between Livermore/San Joaquin County to Oakland and San Francisco. Valley Link will also improve connectivity to BART for ACE passengers (with one or more Valley Link/ACE joint stations). Valley Link will provide a very frequent all-day rail link between the Tri-Valley and San Joaquin County whereas ACE service will continue to focus on serving the peak-periods traffic flows and serve longer-distance markets. SJRRC has also been working with the Authority to plan for shared infrastructure for Valley Link and ACE between North Lathrop and Livermore. It is important to highlight that SJRRC did the initial planning for what has become the Valley Link project – because it would complement ACE service and would have great potential benefits for the Altamont Corridor.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that the Valley Link project moves forward and supports the Altamont Corridor Vision that our agencies are diligently working jointly to advance.

Sincerely,

Christina Fugazi
Chair, San Joaquin Regional Rail Commission

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

As a resident of and councilmember for Livermore, I strongly support the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). I write this on a Friday afternoon. Were I to travel the 20 miles from my home to Tracy, it would take 40 minutes and I would be routed through backroads. Were I to drive the 28 miles from the Dublin-Pleasanton BART station—where Valley Link is proposed to connect—that would take me almost an hour, again cutting through town because the freeway is so impacted. The Tri-Valley is a thriving region with a traffic problem caused by inadequate housing throughout the Bay Area and inadequate public transportation linking San Joaquin County to the Tri-Valley. The result is less time for people to spend with families and engaging in their communities, poorer air quality for all, and poorer health for those sitting behind their steering wheels. The people who are most affected? Those who cannot afford to live closer to their jobs. Providing adequate public transportation is a social justice and environmental issue.

Valley Link will be a key part of solving these transportation problems. A TEP amendment would acknowledge the Authority as a new agency in Alameda County, make it an eligible recipient of Measure BB funds, and add Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. The Tri-Valley desperately needs rail connectivity to give our Bay Area work force the ability to thrive where they live.

I implore you to approve the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment, so that this critical project can move forward and that long-standing commitments to the Tri-Valley are finally honored.

Sincerely,

Trish Munro

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan (TEP) Amendment

On behalf of the Tri-Valley – San Joaquin County Regional Rail Authority, I write to underscore strong support for approval of our agency's request to amend the 2014 Measure BB TEP. The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will directly benefit the taxpaying residents of the Tri-Valley.

Valley Link will link our Alameda County workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. An estimated 33,000 are projected to ride the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,880 to 42,650 metric tons of greenhouse gas emissions per year. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. It will also reduce congestion and improve safety on Interstate 580 – ranked as one of the Bay Area's most congested goods movement corridors and a vital link to the Port of Oakland. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

The time to take action on this request is now as it will help position this vital project for potential federal and state stimulus funds. The compelling facts have all been clearly identified and, after decades of studies that have exhaustively reviewed bus alternatives and virtually every imaginable alignment and mode option, there is simply no need for additional studies and delay with further consequential and wasteful cost escalation.

We urge the approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,
Scott Haggerty
Board Chair

It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met. If you have any questions, please contact Lisa Bobadilla, TVTC administrator at (925) 973-2651 or email at lbobadilla@sanramon.ca.gov.

Sincerely,

Scott Perkins

August 8, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 250 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

An estimated 28,000 are projected to ride the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of over 33,000 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

5565 TESLA ROAD, LIVERMORE, CA 94550

WENTE
FAMILY ESTATES

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Karl D. Wente & The Wente Family

ALAMEDA COUNTY TRANSPORTATION COMMISSION

Valley Link: TEP Amendment

A presentation to the Alameda CTC Commission

September 24, 2020

Overview

- Summary of PPLC action
- Project Background
- Project Briefing: Michael Tree, Executive Director TVSJVRRA
- 2014 Measure BB Amendment Process
- Comments Received
- Proposed Amendment

PPLC Meeting

- Extensive discussion at September 14th PPLC meeting
- Comments received by PPLC meeting
  - 72 comment letters
  - 22 verbal public comments, including 16 at PPLC
- Commission discussion
  - Alameda and San Joaquin county benefits and funding
  - Timing of amendment
  - Housing and interregional commutes
- One clarification was made to clarify the initial operating segment as going from the Dublin/Pleasanton BART station to a station in Mountain House in San Joaquin County
- PPLC voted to recommend approval of the TEP amendment to the full Commission

PPLC Clarification

Proposed TEP Amendment Language (See yellow highlight of PPLC clarification)

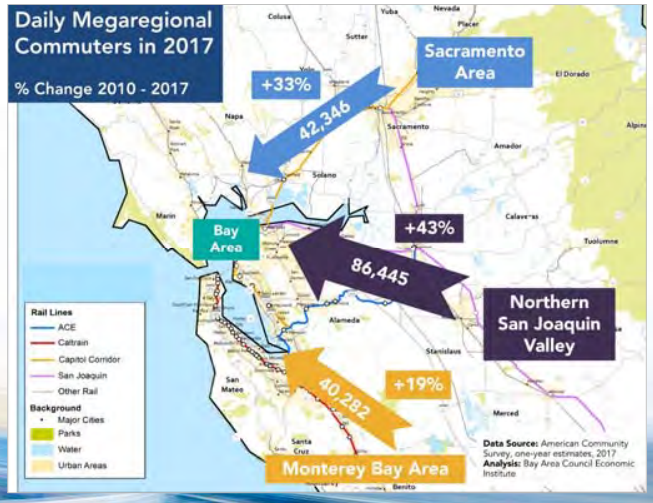
~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a ~~BART~~ Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County ~~I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Blue denotes new language added; Red denotes language removed

Funding for Rail in the Tri-Valley

- **Financial commitment:** Voters consistently supported funding
  - 1986 Alameda County Measure B
    - $170 million for a "Rail extension to Dublin Canyon"
  - 2000 Transportation Expenditure Plan
    - $8.7 million for I-580 Corridor/BART to Livermore Studies
  - 2014 Alameda County Measure BB
    - $400 million for BART to Livermore
  - Regional Measures (RM)
    - RM 1 bridge toll funding to advance planning, environmental and design work
    - RM 3 (2018) included $100 million for Tri-Valley Transit Access Improvements

BART to Livermore



- 1980s: BART purchased a potential sites near I-580 and Isabel Avenue and Greenville Road to preserve land for extension
- 2010: BART completed a Program EIR evaluating station sites and alignments
- 2012: BART advanced conceptual engineering and environmental review of extension to Isabel Avenue
- 2017: BART released Draft Project EIR
- 2018: BART certified Final Project EIR and directed staff to not advance an alternative

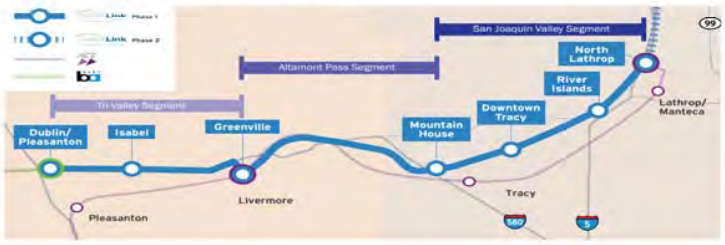
Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA)

- Assembly Bill 758 created the TVSJVRRA for the purposes of planning, developing and delivering cost-effective and responsive transit connectivity between BART and commuter rail service in the Tri-Valley and San Joaquin County
- TVSJVRRA assumed responsibility to advance rail project in 2018 when the BART Board declined to advance the project
- TVSJVRRA leveraged significant amount of previous work:
  - BART to Livermore
  - ACE*Forward* planning and environmental work
- MTC Commission has included the Valley Link project in the transportation element of the Draft Plan Bay Area 2050

More Commuters Making Megaregional Trips

Source: www.bayareaeconomy.org

Valley Link Project



Proposed Project

Phase 1:
Rail service from the existing Dublin/Pleasanton BART Station to the proposed North Lathrop ACE Station, utilizing existing transportation rights-of-way where feasible.

Phase 2:
Rail service extended from the North Lathrop ACE Station to the existing Stockton ACE / San Joaquins Station.

Alignment

Rail service from Dublin/Pleasanton BART Station to the proposed ACE North Lathrop ACE Station, utilizing existing transportation rights-of-way where feasible. Development of the three segments in the Valley Link alignment, and future visionary and universal alignments in the Altamont Corridor separate from freight, will offer improved opportunities for future collaboration and unification for both ACE and Valley Link service.

Project Benefits to Alameda County

- Phase 1, D-P to North Lathrop: 33,000 daily riders in 2040
  - Tri-Valley Segment: 10,137
  - San Joaquin County Segment: 22,856
- Overall project benefits
  - Annual reduction of between 33,880 and 42,650 metric tons of GHG emissions in 2040
  - Reduction of approximately 570,000 average weekday vehicle miles traveled in 2040
- 57% of mileage is in Alameda County

Potential Project Phasing

- Phase 1: D-P to North Lathrop
- Phase 2: North Lathrop to Stockton
- Project could be delivered in phases, including an initial operating segment. Options under consideration include:

Potential IOS	Initial Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

*Range based on various technologies under consideration
**Costs do not include O&M facilities ($198.67 M) and Vehicles ($508.82 M)
***Includes Southfront station

Draft Funding Plan

Fund Source	Estimated Amount
Alameda CTC Measure BB	$400 M
Regional Bridge Tolls	$188 M
City of Livermore Impact Fees	$40 M
Tri-Valley Transportation Council	$40 M
City of Tracy Property Contribution	$40 M
TOTAL	**$708 M**

Additional Potential Sources

- San Joaquin COG exploring a 2022 Transportation Sales Tax that could contain the Valley Link project
- City of Lathrop impact/developer fees and tax increment financing
- San Joaquin Valley Pollution District
- State funding: TIRCIP or Congested Corridors

Comment Period

- Commission approved initiation of the comment period on May 28, 2020
- Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission on May 29, 2020
- Comment period ended on July 13, 2020
- Comments received by September 11, 2020 are included in the summary matrix of comments and responses included as Attachment D with the full comment letters included in Attachments E and F
- All comments received by 5 p.m. on September 23, 2020 were distributed to the Commission as Handout, Attachment G, and posted to the Alameda CTC website

Key Themes - Support

- **Support:** Comments expressing support for the TEP Amendment focused on project benefits and the need for rail in the Tri-Valley
  - Fulfills a commitment made to the Tri-Valley to advance rail connectivity to Livermore
  - Assures Tri-Valley residents will benefit from the taxes they have paid
  - Reduction of over 99.4 million Vehicle Miles Traveled
  - Reduction of over 33,000 metric tons of greenhouse gas emissions per year
  - Support advancement of transit-oriented development
  - Protects open space
  - Supports businesses in the Tri-Valley by providing easy and convenient access
  - Provides an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues

Key Themes – Oppose/Concerns

- Timing of the amendment
- Inadequate public noticing
- Insufficient alternatives analysis
- Interest in other transit alternatives in the corridor
- Benefits to San Joaquin and not Alameda County
- How an initial operating segment would be determined
- Potential project impacts related to sprawl and interregional commutes
- Measure BB equity considerations

Today's Action

TEP Project Requirements

- All implementing guidelines will be applicable to the project and project sponsor, similar to all other TEP projects
- Strict Project Deadlines: Each project will be given a period of seven years to receive environmental clearance approvals and to have a full funding plan for each project
- Commitments from Fund Recipients: All recipients of funds allocated in this expenditure plan will be required to sign a Master Funding Agreement, which details their roles and responsibilities in spending sales tax funds, and includes local hiring requirements
- No expenditures outside of Alameda County

Proposed TEP Amendment

Proposed TEP Amendment Language (See yellow highlight of PPLC clarification)

~~BART to Livermore~~ Valley Link Rail in Alameda County ($400 M)
This project funds the first phase of a ~~BART~~ Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County ~~I-580 Corridor freeway alignment to the vicinity of the I-580/Isabel Avenue interchange~~ using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of ~~all~~ fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

Blue denotes new language added; Red denotes language removed

Today's Action

- It is recommended that the Commission approve the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) request for an amendment to the 2014 Measure BB Transportation Expenditure Plan (TEP) to:
  1) acknowledge TVSJVRRA as a new agency in Alameda County that can be an eligible recipient of Measure BB funds;
  2) remove the BART to Livermore project and associated $400 million Measure BB funding;
  3) add Valley Link in Alameda County project with $400 million in Measure BB funding; and
  4) make associated technical amendments.
- The Commission Plan Amendment Resolution recommended for approval is included as Attachment B and the proposed 2014 Measure BB Expenditure Plan redline markups and technical amendments are detailed in Attachment C.
- This is an action item and requires 2/3 of the Authorized vote for approval at the Commission meeting per the Implementing Guidelines of the 2014 TEP.

Additional Background Slides

Rail in the Tri-Valley

- Long-standing commitment to rail service and connectivity
- **Planning and policy priority:** identified in state and regional rail planning
  - Alameda CTC Countywide Transportation Plans
  - 2007 MTC Regional Rail Plan
  - 2018 California State Rail Plan
- **Local land use planning:** Isabel Neighborhood Plan completed in May 2018 for development around a new rail station

2018 California State Rail Plan

Valley Link

Connecting People, Housing and Jobs

Briefing Materials

Tri-Valley ⟡ San Joaquin Valley
REGIONAL RAIL AUTHORITY

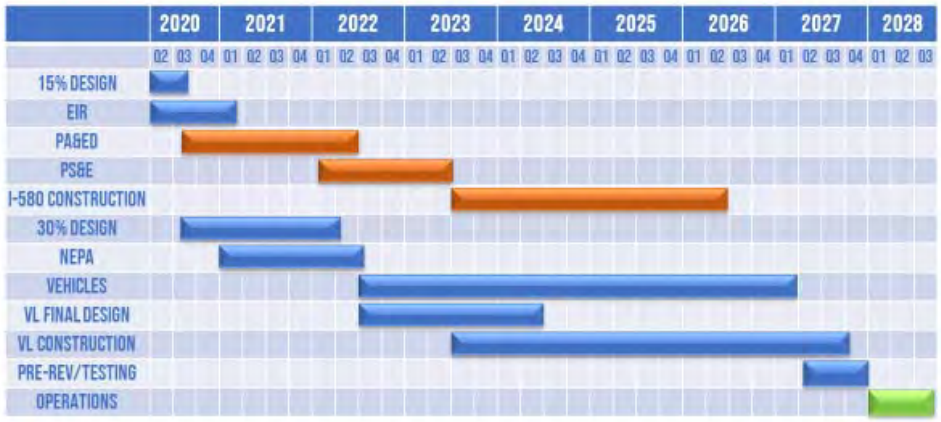
Improving Statewide Connectivity

Key Policy Objective
Support the vision of California State Rail Plan to connect the Northern California Megaregion to the State rail system.

Valley Link closes critical transit gaps and improves connectivity within the Bay Area Megaregion by connecting two designated State Rail Hubs and providing a connection to High Speed Rail.

Transit Oriented Development Policy

ADOPTED DECEMBER 11, 2019



- Station area plans required that include zoning, design standards, parking policies and station access plans
- Station area plans that meet or exceed a corridor-level threshold of 2,200 housing units within ½ mile radius of stations

Tri-Valley ⟡ San Joaquin Valley
REGIONAL RAIL AUTHORITY

Project Costs

- 2020 Capital Cost Estimate (mid-point YOE)
  - Phase 1: Dublin Pleasanton to North Lathrop
    - $2.81 B to $3.18 B
  - By segment (mid-point YOE)
    - D-P to Greenville: $1.61 B
    - Greenville to Mountain House: $424.97 M
    - Mountain House to North Lathrop: $429.27 M
    - Segment costs exclude O&M facilities ($198.67 M) and Vehicles ($508.82 M)

PROJECT SCHEDULE [UNCONSTRAINED FUNDING SCENARIO]

TEP Amendment Process

- TEP amendment process from the 2014 TEP
  - Amendments Require 2/3rds Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners
  - Comment Period: All jurisdictions within the County were given 45 days to comment
- Staff returning to Commission to report on the comments received

Timing of the Amendment

- Commenters raised concerns that the TEP Amendment is being rushed. Commenters stated that there is no valid reason to amend the TEP at this point in time, and that the amendment should be delayed until the project's Environmental Impact Report (EIR) is available and the impacts of the COVID-19 pandemic on sales tax revenues and transit ridership are better understood.

Response: Timing of the Amendment

- Overall timeframe
  - Initial request was submitted in September 2019
  - Demonstrating a local funding commitment allows projects to be more competitive when seeking regional, state and federal funding
- Environmental Impact Report
  - The project must meet specific environmental deadlines and comply with regional, state and federal requirements
  - The TEP does not require that projects have completed an environmental document or have full funding plans before being in the TEP
  - Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters
- COVID-19 impacts
  - Long-term travel impacts of COVID-19 are unknown at this time
  - Alameda CTC is carefully monitoring the impact of COVID-19 on sales tax revenues

Inadequate Public Noticing

- Commenters raised concerns that the proposed TEP Amendment was not noticed to the public or posted on the Alameda CTC website. Requests were made for more time for the comment period, and for all comments to be posted by the end of July.
- Response
  - TEP Implementing Guidelines for a proposed TEP Amendment requires a comment period for jurisdictions
  - Following the Commission's May 28, 2020 approval to initiate the comment period, Alameda CTC staff provided notification to the governing boards of all cities, the county and transit operators in Alameda County who are represented on the Alameda CTC Commission
  - Staff were directed to include the full set of comments received in the PPLC materials and distribute those in advance of the meeting per standard Commission processes

Insufficient Alternatives Analysis

- Commenters stated that there had been insufficient analysis of alternatives, with specific focus on further analysis of a bus alternative in order to determine if there are better, more efficient uses of the funding
- BART and other commenters raised concerns regarding ensuring full understanding of and eligibility for BART core system impacts as part of the project and potential uses of the $400 million
- A few commenters specifically referenced TEP Implementing Guideline #22 as a reason other projects could be eligible for the funding

Response: Insufficient Alternatives Analysis

- BART conducted extensive alternatives analysis, as both part of the 2010 Program Environmental Impact Report (EIR) and as part of the subsequent Project EIR certified in 2018
  - 2010 Program EIR included analysis of 10 alignment alternatives
  - 2018 Project EIR included extensive analysis of four alternatives plus a no project alternative
- Valley Link Feasibility Report further evaluated alternatives and continues to do so as part of the environmental document

Response: Other Transit Investments

- TEP Guideline 22
  - Should a planned project become undeliverable, infeasible or unfundable due to circumstances unforeseen…funding for that project will be reallocated to another project or program of the same type
  - The Valley Link project is a Transit project as is the BART to Livermore Project and it is at the Commission's discretion to act on a plan amendment to use these funds for transit purposes
- BART Core impacts
  - The TVSJVRRA has proposed to enter into an MOU with BART to address these future potential impacts
  - BART and the TVSJVRRA continue to work closely to fully identify and understand all potential impacts and benefits
  - Faregate modernization for non-Valley Link stations does not appear to be directly linked to impacts of the Valley Link project

Benefits San Joaquin County Not Alameda County

- Concerns were raised that Alameda County residents would not benefit from the project, but instead the project will primarily benefit San Joaquin County residents. In addition, concerns were raised that San Joaquin County has not committed funding to the project
- Response: Measure BB funds will only be spent on transportation improvements in Alameda County

Response: Benefits to Alameda County

- Benefits of the project, including data specific to Alameda County residents where possible, as provided by the Valley Link staff is noted below. Data is based on an extension from Dublin-Pleasanton BART to North Lathrop.
  - 10,137 daily boardings in the Tri-Valley in 2040
  - 32,993 daily boardings in from Dublin-Pleasanton BART to North Lathrop in 2040
  - Annual reduction of between 33,880 to 42,650 metric tons of greenhouse gas emissions in 2040 depending on the vehicle variant under consideration
  - Reduction of approximately 570,000 average weekday vehicle miles travelled in 2040
  - Approximately 57% of the project track mileage is in Alameda County
  - Transit-oriented development in the Tri-Valley including developments at the proposed Isabel station and Southfront station alternative

Response: San Joaquin Funding

- Funds are for construction only in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment
- TVSJVRRA is working closely with cities in San Joaquin County, the San Joaquin Council of Governments (SJCOG), and the state to secure additional funding for the project
- In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including showing $163.9 million for the project in the plan from future measures and state funds
- SJCOG also contributed funding for the environmental document

Determination of Initial Operating Segment

- Requests for more detail on how an initial operating segment would be determined
- Response: the TVSJVRRA Board is considering potential initial operating segments in order to more quickly deliver service

Potential IOS	2025 Daily Ridership	GHG Emissions Reduction* (annual metric tons)	Capital Costs** (mid-point YOE)
D-P to Greenville	8,372	4,075 to 5,739	$1.61 B
D-P to Mountain House***	11,101	3,980 to 7,172	$2.04 B

*Range based on various technologies under consideration
**Costs do not include O&M facilities ($198.67 M) and Vehicles ($508.82 M)
***Includes Southfront station

Potential Impacts to Sprawl and SB 375

- Commenters stated that the project will increase sprawl and further the distances between where people live and work. It was noted that this would violate the "inter-regional commuting" policy of Senate Bill 375 (SB 375) and Plan Bay Area
- Response:
  - SB 375 applies to regional transportation plans/sustainable communities strategies (RTP/SCS) that are adopted by metropolitan transportation organizations (MPOs) in the state of California
  - MTC Commission recently voted to include Valley Link in the Final Blueprint Transportation Element of Plan Bay Area 2050, the RTP/SCS currently in development in the Bay Area region; final PBA 2050 approval in summer/fall of 2021
  - SJCOG's most recent RTP/SCS was amended in early 2020 to include the Valley Link project
  - MTC's robust project performance assessment did not identify performance concerns with the Valley Link project regarding the project conflicting with the guiding principles of Plan Bay Area and identified it as a relatively well performing regional rail project.
  - The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy to support the advancement of transit-oriented development (TOD) in Valley Link station areas.
  - The policy mirrors the TOD guidelines outlined in MTC Resolution 3434 TOD guidelines

Measure BB Equity Considerations

- Commenters stated that the amendment would require the entire TEP to need to be reopened because it would dramatically change the distribution of benefits across the county. That would therefore require the basic allocation formula for local streets and roads to need to be reconsidered
- Response:
  - When the 2014 TEP was crafted by the Commission, it was done so to address geographic equity in investments and to reach consensus on a set of projects and programs that would provide benefits in all areas of Alameda County
  - The $400 million was identified in the TEP for a rail extension in the Tri-Valley so the proposed amendment does not change the geographic distribution of the benefits of the overall TEP

ALAMEDA COUNTY TRANSPORTATION COMMISSION
Resolution No. 20-007

Resolution of the Alameda County Transportation Commission Amending the 2014 Transportation Expenditure Plan to Delete the BART to Livermore Project and add the Valley Link Project

WHEREAS, by action of the governing body ("Commission") of Alameda County Transportation Commission ("Alameda CTC") at a regular Commission meeting on January 23, 2014, Alameda CTC approved the 2014 Transportation Expenditure Plan ("2014 TEP"), and in November 2014, the voters of Alameda County approved Measure BB, a sales tax measure intended to provide funding for the 2014 TEP.

WHEREAS, the 2014 TEP allocated $400 million to a project identified as "BART to Livermore," constituting the first phase of a San Francisco Bay Area Rapid Transit District ("BART") extension within the I-580 Corridor to serve residents and businesses in that Corridor.

WHEREAS, on May 24, 2018, the BART Board certified the Final Environmental Impact Report for the BART to Livermore project, but declined to approve the project as proposed nor any alternative for the project.

WHEREAS, Assembly Bill (AB) 758, as adopted by the State legislature and signed by the Governor, created the Tri Valley San Joaquin Valley Regional Rail Authority ("TVSJVRRA"), an entity led by a 15-member governing Board comprised of representatives from the counties of Alameda and San Joaquin; the cities of Dublin, Livermore, Pleasanton, Danville, San Ramon, Tracy, Lathrop, Stockton, and Manteca; Mountain House Community Services District; the Livermore Amador Valley Transit Authority (LAVTA), BART, and the San Joaquin Regional Rail Commission (SJRRC). The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley, to address regional economic and transportation challenges.

WHEREAS, AB 758 specifically stated that the TVSJVRRA would only assume planning, development and delivery of a rail extension should the BART Board fail to adopt a preferred alternative for a BART extension by June 30, 2018. When the BART Board voted to not advance the BART to Livermore project, the TVSJVRRA assumed

WHEREAS, the 2014 TEP and Public Utilities Code Section 180207 together provide that the 2014 Plan may be modified if an amendment is approved by a two-thirds vote of the Commission.

NOW THEREFORE, BE IT RESOLVED that the 2014 Transportation Expenditure Plan is amended to delete the BART to Livermore Project and all references to that Project;

BE IT FURTHER RESOLVED that the Tri Valley San Joaquin Valley Regional Rail Authority be recognized as an eligible agency for recipient of funds in the 2014 TEP;

BE IT FURTHER RESOLVED that the Valley Link Rail Project in Alameda County with an allocation of $400 Million is placed in the 2014 TEP, described as follows:

This project funds the first phase of a Valley Link rail extension from the existing Dublin/Pleasanton BART station within the Tri-Valley and Altamont Pass in Alameda County using the most effective and efficient technology. Funds are for construction for any element of this first phase project in Alameda County and shall not be used until full funding commitments are identified and approved for the initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station, that most effectively meets the adopted project goals, and a project-specific environmental clearance is obtained. The project-specific environmental process will include a detailed alternatives assessment of fundable and feasible alternatives, and be consistent with mandates, policies and guidance of federal, state, and regional agencies that have jurisdiction over the environmental and project development process.

BE IT FURTHER RESOLVED that the 2014 TEP be amended to include the following specific description of the Valley Link Project:

A proposed new rail service between Alameda and San Joaquin Counties that will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the City of Stockton. The proposed project includes seven stations on a 42-mile alignment that is expected to run along the existing I-580 corridor (11.5 miles), through the Altamont Pass using the Alameda County-owned former Southern Pacific Railroad corridor (12.5 miles) and on existing UPRR rail corridor (17.5 miles) into San Joaquin County. Design work is currently underway as part of the EIR process and will examine detailed project right-of-way needs and potential impacts in more detail.

DULY PASSED AND ADOPTED by the Alameda CTC Commission at the regular Commission meeting held on Thursday, September 24, 2020 in Oakland, California, by the following vote:

AYES: 23 NOES: 2 ABSTAIN: 1 ABSENT: 1

SIGNED: Attest:

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chairwoman Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a membership organization with more than 400 companies engaged in the business of entitling, designing and building new homes within the jurisdiction of the Alameda County Transportation Commission (ACTC), I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the authority as an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they live and work.

The Tri-Valley is a thriving Bay Area job center with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is a large part of its competitive advantage but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area such as firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, seven-station system in 2040. This will result in the reduction of over 99.4 million vehicle miles traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through ACT's Transit Oriented Development policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce

responsibility to advance a rail extension in the Corridor, now identified as "Valley Link."

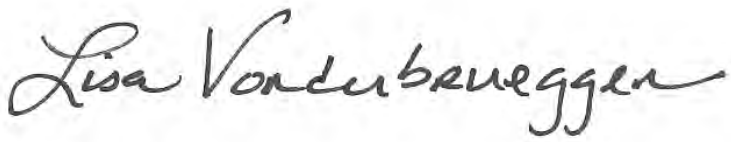
WHEREAS, a key requirement of AB 758 was that the TVSJVRRA Board approve a Feasibility Report for the project. The Final Feasibility Report was approved in October 2019. The TVSJVRRA has continued to work to advance the project, initiating the environmental impact analysis and preliminary design engineering work.

WHEREAS, the TVSJVRRA has been updating the project costs as part of project development. The most current project cost estimates range from $2.81 billion to $3.18 billion in mid-point year of expenditure dollars for the Phase 1 project from Dublin-Pleasanton to North Lathrop. The project is currently in the EIR process, and will begin both the Caltrans project development process and NEPA environmental clearance process in 2020 and 2021.

To date, a total of $708 million is identified by the TVSJVRRA as available for the project: $400 million in Measure BB funds (per a 2014 TEP amendment), $188 million in Bridge Toll funds (including $100 million in Regional Measure 3 funds), $40 million in impact fees from the City of Livermore, $40 million from the Tri-Valley Transportation Council, and $40 million from the City of Tracy property contribution. The project is expected to compete for regional, state and federal funds to secure additional funding. Other revenue measures in the Bay Area and San Joaquin County, if passed by voters, could be additional revenue sources for the project.

WHEREAS, given that the Valley Link project traverses two counties, two Metropolitan Planning Organization regions, and affects an interstate system, Express Lanes system, and existing rail system and service providers, the TVSJVRRA established an Executive Steering Committee (ESC) comprised of MTC, San Joaquin Council of Governments (SJCOG), San Joaquin Regional Rail Commission (SJRRC), BART, Alameda CTC, and Caltrans to provide input on the development of the feasibility report and project development. Alameda CTC's executive director participates in these meetings. Several of these agencies have taken actions to support development of the project, as outlined below:

MTC: In September 2018, MTC allocated $10.12 million to the TVSJVRRA for CEQA documentation and preliminary engineering on the Valley Link rail project, from the $95 million in AB1171 Bridge Tolls committed to Tri-Valley Transit Access Improvements through MTC Res. No. 3434. In March 2020, MTC approved an additional allocation of $3 million in AB1171 Bridge Toll funds to the TVSJVRRA for the environmental phase and updates to the preliminary engineering plans. In June 2020, MTC allocated an additional $46.8 million to advance the project's environmental and design phases.



SJCOG: In April 2020, the SJCOG Board approved an amendment to its 2018 Regional Transportation Plan to include the Valley Link project, including identification of $163.9 million for the project in the plan from future measures and state funds, and SJCOG also contributed funding for the environmental document. In addition, the City of Tracy is anticipated to act in September 2020 to donate a 200-acre parcel under City ownership to the project to be used for an operations and maintenance facility. The property has an estimated value of $40 million.

VMT and greenhouse emissions. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the authority's request for a 2014 Measure BB Transportation Expenditure Plan amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are met.

Sincerely,

September 22, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business owner within the jurisdiction of the Alameda County Transportation Commission (ACTC), I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse

emissions within the station environs.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Alan Cerro

San Leandro CA 94577

Honorable Pauline Cutter, Mayor of San Leandro
San Leandro City Hall

Dear Mayor Cutter:

As you may know I run a 501c3 Non Profit business in San Leandro. Our mission is to help our mostly young charges gain self-confidence and, through our emphasis on empathy, ethics and etiquette, develop into stronger, more productive and happier adults. Our program is popular with parents and the kids enjoy being at the Academy (currently shut down because of the pandemic)

I am writing to you in your capacity as the Chair of the Alameda County Transportation Commission to ask that you vote to defer a $400,000,000 allocation of Alameda County sales tax funds to the Valley Link project which is still in its early conceptual engineering stage. The value of this very expensive project to the people of Alameda County is still very much in doubt.

I'm told by people I trust that it is much too early to making so large an allocation, especially in view of the fact that its transportation benefits would devolve mostly to another County. As a long time admirer of your good work as Mayor of San Leandro, I urge you to vote for delay. Your serious consideration of this request would be most appreciated.

Sincerely,

XC

Xiebing

From: Doug Mann <doug@dougmann.com>
Sent: Tuesday, September 22, 2020 3:21 PM
To: Vanessa Lee <VLee@alamedactc.org>
Subject: Item 7.1 comment

Public Comment by Doug Mann, Livermore, on Alameda CTC September 24, 2020 Meeting Agenda Item 7.1 Expressing Opposition to 2014 Measure BB TEP Amendment Diverting $400 million to Valley Link Project.

In 2014 Alameda County voters approved the Measure BB sales tax increase to extend BART to Livermore. Now the Alameda County Transportation Commission, with support from Supervisor Haggerty and Tri-Valley Mayors Marchand, Thorne, and Haubert, is poised to divert $400 million of Measure BB funds to build the proposed "Valley Link" railroad to San Joaquin County. The Bay Area Transportation Working Group (BATWG), of which I am a member, opposes this action.

1. The $400 million allocated to Livermore for BART to Isabel Avenue – the largest single cost item in Measure BB – was intended to improve Tri-Valley access to and from BART. Measure BB promised voters, "Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County." Valley Link violates Measure BB by forcing Alameda County taxpayers to build an expensive new railroad through Altamont Pass and subsidize Central Valley commuters who don't pay the tax.

2. Greenville Road and Grant Line Road stations could induce sprawl and contravene the County's urban growth boundary (2000 Measure D).

3. The Metropolitan Transportation Commission ridiculously has diverted $60 million of "toll bridge seismic retrofit" dollars to Valley Link.

4. Senate Bill 916 (2003), implemented through voter-approved 2004 Regional Measure 2, says that MTC/Bay Area Toll Authority "shall … fund … rail or High-Occupancy Vehicle lane direct connector to BART and other improvements on I-580 in Alameda County for use by express buses." But the sponsors of the Valley Link proposal are disregarding this "express buses" mandate.

5. Bus systems are more flexible and have much lower capital and operating costs. The cheapest, fastest and best way of connecting Livermore with BART would be via an express bus network, patterned after the popular and well-used hi-tech buses. The Valley Link "alternatives analysis" was extremely inadequate in this regard. It studied a single bus line over the hills to San Joaquin County duplicating the proposed railroad, which offers little benefit to Tri-Valley residents. The potential of an efficient network of buses to improve travel in the Tri-Valley and augment access to Dublin/Pleasanton BART station was ignored.

Re: September 24, 2020 Meeting: Agenda Item 7.1: Opposition to Measure BB TEP Amendment

Dear Chair Cutter and Commissioners:

This office represents Transportation Solutions Defense and Education Fund (TRANSDEF), which is opposed to a request by the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA) for a 2014 Measure BB Transportation Expenditure Plan (TEP) Amendment. TRANSDEF requests that Alameda CTC postpone further action on this TEP Amendment, for reasons expressed in its separate letter and for the reasons that follow.

TEP Amendments are apparently very rare in Alameda County. Since Measure B's passage in 1986, TRANSDEF is aware of just two amendments to TEPs in this county, in 2005 and 2006. The Valley Link TEP Amendment apparently would be the third and by far the largest ($400 million). Because of its great financial significance (the largest capital project in Measure BB), the Commission must not allow the amendment process to be marred by procedural flaws.

I. TEP Amendment in Proposed Alameda CTC Resolution 20-007 Violates Public Utilities Code § 180207 and 2014 Measure BB Implementing Guideline No. 4.

First, this $400 million TEP Amendment cannot be completed at the September 24, 2020 Alameda CTC meeting because this TEP Amendment process is in violation of Public Utilities Code § 180207. This TEP Amendment process also is in violation of 2014 Measure BB Implementing Guideline No. 4, which states in part, "All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Plan amendment." See also Measure BB ordinance, Section 3(e): "All jurisdictions within the county will be given a minimum of 45 days to comment on any proposed Transportation Expenditure Plan amendment."

Public Utilities Code § 180207(b) states, "The authority shall notify the board of supervisors and the city council of each city in the county and provide them with a copy of the proposed amendments." TRANSDEF believes that proposed Alameda CTC Resolution No. 20-007 (pages 87-90 of agenda packet) cannot be finally adopted at the September 24, 2020 Alameda CTC meeting because the "proposed amendments" in proposed Resolution No. 20-007 are substantially different than the "copy of the proposed amendments" that Alameda CTC approved at its May 28, 2020 meeting. The language about the initial operating segment, "defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station," is completely

new in this September 2020 version of the "proposed amendments." That clause did not exist in the "proposed amendments" adopted by Alameda CTC on May 28, 2020 just before the purported 45-day comment period. That clause also is not found in the "Valley Link: TEP Amendment" presentation at the September 14, 2020 Alameda CTC Planning, Policy and Legislation Committee meeting at page/slide no. 39. If Alameda CTC wishes to propose a TEP Amendment containing the new material, then another 45-day comment period is necessary under P.U.C. § 180207 and 2014 Measure BB Implementing Guideline No. 4.

Before and during the 45-day comment period (May 29 to July 13, 2020), Valley Link was touted as a project that extended to North Lathrop in Phase 1 and to Stockton in Phase 2 and with Greenville Road as a station and Southfront a possible future infill station. However, at some unknown date in September 2020 some unknown person or entity substantially altered the Valley Link project to have an initial operating segment terminating most likely at Mountain House station (or possibly Greenville Road) and with Southfront station most likely replacing Greenville Road station if the initial operating segment were to terminate at Mountain House station. An implication is that San Joaquin County is unwilling and/or unable to support and/or fund its portion of the project. Another implication is that San Joaquin County expects Alameda County and MTC (including MTC/BATA's diversion of toll bridge seismic retrofit dollars) to fund almost all of this initial operating segment to Mountain House station. The proposed TEP Amendment and the project substantially differ from what was proposed during the May 29 to July 13, 2020 45-day comment period. Therefore, another 45-day comment period is necessary.

Moreover, after a diligent search of city council agenda packets for various Alameda County cities for council meetings during the purported 45-day comment period, TRANSDEF finds no evidence that Alameda CTC actually notified "the city council of each city in the county and provide[d] them with a copy of the proposed amendments." TRANSDEF emphasizes that "city council" is distinct from the city government or administration. TRANSDEF requests that Alameda CTC staff and commissioners prove that each city council was notified and provided with a copy of the proposed amendments. TRANSDEF requests that Alameda CTC place in the record for the amendment process proof that each city council was notified and a copy of the proposed amendments that were provided to them, in faithful accordance with P.U.C. § 180207.

II. $400 Million TEP Amendment Should Be Postponed Because TEP Amendment Procedures in the Alameda CTC Administrative Code Are Inconsistent with the 2010 Joint Powers Agreement.

Second, the $400 million TEP Amendment should be postponed because the Alameda CTC Administrative Code contains TEP amendment procedures that are inconsistent with the TEP amendment procedures in the 2010 Alameda CTC joint powers agreement.

The 2010 Alameda CTC Joint Powers Agreement states in Section 12, "VOTE REQUIRED. A majority of the voting power of those present and voting shall be required for all actions of the ACTC; except that a two-thirds vote of the total voting power shall be required to amend the Alameda County 2000 Transportation Expenditure Plan." (Emphasis added.). The voting power is set forth in Section 10(b) of the JPA.

The 2014 Measure BB TEP Implementing Guideline No. 4 states in part, “Amendments Require 2/3 Support: To modify and amend this Plan, an amendment must be adopted by a two-thirds vote of the Alameda CTC Commissioners …”

The Measure BB ordinance, Section 3(e) states, “To improve, construct, maintain, and operate certain transportation projects and facilities contained in the 2014 Transportation Expenditure Plan, which Plan is incorporated here by this reference as though fully set forth herein, and as that Plan may be amended from time to time pursuant to applicable law and as provided in the 2014 Transportation Expenditure Plan. Any amendment must be adopted by a two-thirds vote of the Alameda CTC Governing Body.” (Emphasis added.)

The 2020 Alameda CTC Administrative Code (as revised May 28, 2020) states in Section 3.17: “3.17 “Authorized Vote” means the total number of weighted votes represented by all Commission Members, pursuant to the provisions of the JPA. Weighted voting applies only to actions by the Commission, and is not used for Committee votes.”

Section 4.2.7 of the 2020 Alameda CTC Administrative Code (as revised May 28, 2020) states: “4.2.7 As required by the 2000 Transportation Expenditure Plan and the 2014 Transportation Expenditure Plan, two-thirds of the Authorized Vote of the Commission Members (and/or Alternates eligible to vote) present at the time of the vote is required to approve an amendment to the 2000 Transportation Expenditure Plan or the 2014 Transportation Expenditure Plan.” (Emphasis added.)

TRANSDEF contends that the 2010 JPA, ratified by the County Board of Supervisors and the City Councils of all fourteen cities in the county, controls. Although the JPA has not been amended to account for passage of 2014 Measure BB, the JPA expressly requires a two-thirds vote of the total voting power in order to approve a TEP amendment. TRANSDEF asserts that the phrase "total voting power" is an unambiguous reference to Board Membership, as articulated in JPA Section 10(b).

Because of that, TRANSDEF contends that the “two-thirds of the Authorized Vote … present at the time of the vote” language in Section 4.2.7 of the Alameda CTC Administrative Code, as revised May 28, 2020, is invalid. It conflicts with “two-thirds vote of the total voting power” in Section 12 of the JPA, and attempts to impermissibly rewrite the JPA.

TRANSDEF requests that the $400 million TEP Amendment be postponed until after your Commission amends the Alameda CTC Administrative Code to conform to the JPA. For future reference, we note that, as there are 27 total weighted votes, a TEP amendment would require a minimum of 18 weighted votes for approval.

//

//

//

III. TEP Amendment Should Be Postponed Because Project Sponsor TVSJVRRA Lacks Legal Authority Under Public Utilities Code §§ 132651, et seq. (AB 758) to Construct the Project As Currently Proposed.

Third, the $400 million TEP Amendment should be postponed because the project sponsor Tri-Valley San Joaquin Valley Regional Rail Authority (TVSJVRRA) does not have the legal authority to construct the Valley Link project as it currently is proposed.

Assembly Bill 758 created TVSJVRRA in 2017. AB 758 is codified at Public Utilities Code §§ 132651, et seq. Section 132652 is effectively the charter or legal mission statement for TVSJVRRA. It states in part, "The authority is hereby established for purposes of planning, developing, and delivering cost-effective and responsive transit connectivity, between BART's rapid transit system and the Altamont Corridor Express commuter rail service in the Tri-Valley region of California …" (Emphasis added.)

Proposed Alameda CTC Resolution No. 20-007 admits in its fourth "Whereas" clause, "The goal of TVSJVRRA is to deliver a cost-effective connection from the San Joaquin Valley to the BART system and the ACE system in the Tri-Valley …" (Emphasis added.)

The "Tri-Valley" clearly is defined by the Legislature in the TVSJVRRA enabling act to exclude any portion of San Joaquin County. Section 132651(e) states, " 'Tri-Valley' means the Cities of Danville, Dublin, Livermore, Pleasanton, and San Ramon."

For nearly 20 years, BART and Tri-Valley cities have promoted a connection between East Dublin/Pleasanton BART station and ACE, most often at Greenville Road in eastern Livermore, by some form of rail or by express buses. Senate Bill 916 (2003), implemented through voter-approved 2004 Regional Measure 2, says that MTC/Bay Area Toll Authority "shall … fund … rail or High-Occupancy Vehicle lane direct connector to BART and other improvements on I-580 in Alameda County for use by express buses."

In September 2020, well after the 45-day comment period on the $400 million TEP Amendment, TVSJVRRA began pushing a "Southfront" station in Livermore as a replacement for a Greenville Road station and called for an initial operating segment ending at Mountain House station. However, a "Southfront" station would lack connectivity with ACE, leaving the only planned connection between Valley Link and ACE at the future North Lathrop station. Because the North Lathrop station is not in the "Tri-Valley," the proposed project would not only fail to achieve the goal identified in the fourth "Whereas" clause, but also it would not comply with P.U.C. § 132652.

If your Commission were to adopt the TEP "proposed amendments" as in proposed Resolution No. 20-007, then project sponsor TVSJVRRA would be operating in violation of P.U.C. § 132652. TVSJVRRA appears to be engaging in *ultra vires* actions. A reasonable Alameda CTC Commissioner, exercising due care, would not aid and abet such illegal activity.

//

IV. TEP Amendment Should Be Postponed Because the "Altamont Pass" Proposed Amendment Would Not "Benefit" Alameda County.

Fourth, expenditure of $400 million to construct a new rail line through Altamont Pass would not "benefit" Alameda County.

The "Introduction" to the 2014 Measure BB TEP promised voters in large print on page 1, "This Plan benefits people who live in Alameda County." Page 35 promised voters, "Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County."

TEP Implementing Guideline No. 14, under the "RESTRICTIONS ON FUNDS" category, states in part, "Under no circumstances may the proceeds of this transportation sales tax be applied to any purpose other than for transportation improvements benefitting Alameda County."

TEP Implementing Guideline No. 19 states in part, "Fiduciary Duty: By augmenting and extending the transportation sales tax, Alameda CTC is given the fiduciary duty of administering the proceeds of this tax for the benefit of the residents and businesses of Alameda County." (Emphasis added.)

MTC admits that the Altamont Pass component of the Valley Link project is "interregional" for the purported benefit of the "megaregion." That component of the project does not benefit Alameda County. No rail station is planned within Alameda County east of Greenville Road (aside from the Grant Line Road infill station proposed for an environmentally sensitive site within the Altamont Habitat Management Unit, which also raises 2000 County Measure D compliance issues). Very few people reside in Alameda County between Greenville Road and the proposed Mountain House station. Almost no Alameda County residents would access the Valley Link system through Mountain House station. Very few Alameda County residents likely would be "reverse commuters" from Alameda County into San Joaquin County. In short, the Altamont Pass Valley Link segment provides effectively no benefit to Alameda County.

Given that, TRANSDEF believes it is improper for Alameda CTC to proceed with funding an interregional project using Alameda County's funds, until there is a full funding package, in which Alameda County will play its proportional part. Until such a funding package is agreed upon, TRANSDEF contends that adopting a TEP amendment to fund a project that includes anything east of Greenville Road would be in violation of TEP Implementing Guideline No. 19.

V. TEP Amendment Should Be Postponed Until Geographic Equity is Protected by a Renegotiation of the Local Street and Road Formula.

Fifth, Alameda CTC incessantly advances a myth that Valley Link is a local "Tri-Valley" project and therefore the Measure BB Local Street and Road funding formula, the Capital Improvement Program, and other "geographic equity" matters do not require revisiting. Numerous Alameda CTC Commissioners (including but not limited to Berkeley Mayor Jesse Arreguin) attest that their communities would benefit from Valley Link (implying that Valley Link is something other

than a Tri-Valley project), yet they refuse to revise the Measure BB funding formulas to reflect these ostensible benefits.

Page 22 of the 2014 TEP concerning the $1.55 billion Local Streets funding states, "The formula will be revisited within the first five years of the plan to ensure overall geographic equity in the Plan." TEP Implementing Guideline No. 12 states in part that the Alameda CTC Capital Improvement Program "will be updated every two years and will provide for geographic equity in overall funding allocations." TRANSDEF is not aware of any actions taken to fulfill these commitments. TRANSDEF believes that "geographic equity" needs to be resolved now, during the TEP Amendment process.

VI. TEP Amendment Should Be Postponed Because the *Hayward Area Planning Association* Precedent in Defense of Voter-Adopted Alameda County TEP Provisions Should Be Carefully Considered.

Sixth, the First Appellate District has a history of striking down this agency's projects that violate a voter-adopted Transportation Expenditure Plan. In 1999, the Court ruled that Alameda County Transportation Authority (Alameda CTC's predecessor agency) violated the 1986 Measure B TEP in attempting to alter the alignment of the proposed Hayward Bypass freeway through a process inconsistent with the law.

> If the tax revenues generated by Measure B may now be taken and applied to an entirely new highway alignment for which no tax was authorized, the many protections the Act provides--full disclosure of the expenditure plan, strict limitations on the use of voter-generated tax revenues, and voter involvement in expenditure plan amendments--are thus evaded, affording no protection whatsoever to taxpayers. *Hayward Area Planning Assn. (HAPA) v. Alameda County Transportation Authority* (1999) 72 Cal.App.4th 95, 106.

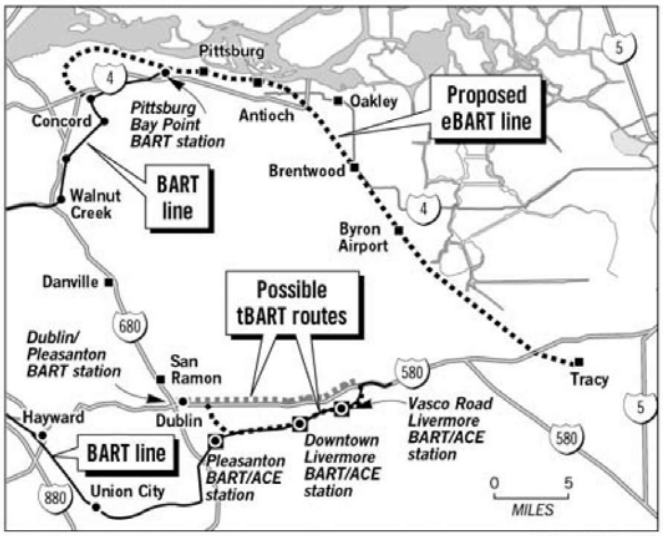
Although Alameda CTC is organized today under a different statute and has different governance, *HAPA* has strong precedential value. It is interesting to note that, despite *HAPA,* the current Amendment process has not sought voter involvement.

Voters approved Measure BB with the understanding that BART would be extended to Isabel Avenue in western Livermore. Voter surveys as Measure BB was developed and promoted showed that BART improvements were among the features of the Measure BB TEP that were most appealing to voters. See attachments to this letter, including a Yes on BB campaign mailer ("BETTER BART," "Expand BART," "Measure BB … Expands BART"), an Alameda CTC "Consider the Future of BART" handcard distributed at BART stations during the Measure BB campaign period ("In November 2014, Measure BB will be on the ballot to: Expand BART throughout Alameda County"), and BART's "bartable this month" September 2014 passenger newsletter (distributed at BART stations) that touts "Measure BB on November ballot … Measure BB will provide more than $860 million towards projects to modernize and expand the BART system." Alameda CTC staff insisted that BART place this promotion of Measure BB in this passenger newsletter.

Note that the Yes on BB campaign was managed out of Zack Wasserman's (Alameda CTC's general counsel) law office, in the same office building as Alameda CTC headquarters. The proposed TEP Amendment upsets voter expectations by "revising" (not merely "amending") the TEP, deleting the largest single capital project in the TEP, "BART to Isabel Avenue" and replacing it with an ambiguous "rail project through Altamont Pass."

If Alameda CTC adopts the Valley Link TEP amendment, the tax revenues generated by Measure BB would be taken and applied to an entirely new project for which no tax was authorized by voters. TRANSDEF has outlined in a separate letter the further steps needed to protect the taxpayers.

VII. TEP Amendment Should Be Postponed Until 2000 County Measure D Compliance Issues Are Addressed.



Seventh, TRANSDEF requests that the $400 million TEP Amendment be postponed until any 2000 County Measure D compliance issues are addressed. The Greenville Road and Grant Line Road stations, in particular, could directly or have related effects that would violate 2000 County Measure D.

VIII. TEP Amendment Should Be Postponed Until "tBART via SP Radum Line" and "eBART to Tracy" Alternatives From 2001 Are Considered Using Existing Rails as Much as Possible.

Eighth, TRANSDEF requests that the $400 million TEP Amendment be postponed until the 2002 and 2004 "tBART" reports[1] are given full consideration. These reports evaluated multiple DMU (tBART) and Rapid Bus Alternatives for the Tri-Valley (including the San Ramon Valley).

There is good reason why Southern Pacific Railroad finally abandoned its original transcontinental line through Altamont Pass and sold it to Alameda County by the mid-1980s – the Carquinez Strait route that opened in the late 1870s is almost entirely near sea level and avoids hills. For this reason, BART in 2001 proposed to reach Tracy via an "eBART" line by way of Brentwood and Antioch instead of via the Altamont Pass, Livermore and Dublin/Pleasanton. See the graphic from the April 5, 2001 *San Francisco Chronicle* below.

[1] Available at the following web addresses, respectively: Phase 1: https://transdef.org/media/BART-I-580-Phase-1-Final-Report.pdf Phase 2: https://transdef.org/media/BART-I-580-Phase-2-Final-Report.pdf

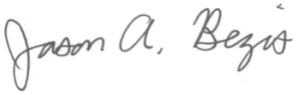
https://www.sfgate.com/bayarea/article/Tri-Valley-BART-Line-Proposed-BART-Plan-Calls-2934911.php#item-95844-tbla-1

TRANSDEF's sister organization, the Train Riders Association of California, submitted a project alternative in response to the Valley Link Notice of Preparation (see attachment) that is nearly an exact copy of one of the tBART alternatives: A DMU that would have used [what are now] the ACE tracks to connect to the former Southern Pacific Radum right-of-way [now the Iron Horse Trail] which runs below the Dublin/Pleasanton BART station.

TVSJVRRA documents, including the 2019 Valley Link Feasibility Report, curiously ignore the existence of the BART tBART and eBART studies from circa 2001. It appears their alternatives analysis has not been conducted in good faith. As the Supreme Court held in *Save Tara v. City of West Hollywood* (2008) 45 Cal.4th 116, project alternatives should be fully explored prior to the commitment of funds and other indicia of project approval. "Approval" should not be defined so early that the burden of environmental review impedes the exploration of potentially meritorious projects, nor so late that environmental review loses its power to influence key public decisions about those projects. *Save Tara*, 45 Cal.4th at 128. "[B]efore conducting CEQA review, agencies must not "take any action" that significantly furthers a project "in a manner that forecloses alternatives or mitigation measures that would ordinarily be part of CEQA review of that public project." *Save Tara*, 45 Cal.4th at 138.

Alameda CTC should postpone approval of the $400 million TEP Amendment unless and until these alternatives (including but not limited to DMU route alternatives and express bus alternatives, including lifecycle costs per rider) are considered in the Valley Link EIR (which has yet to be released, let alone approved).

//



//

IX. TEP Amendment Should Be Postponed Until After New Commissioners Are Seated after November 2020: "Lame Duck" Commissioners (Especially in Tri-Valley) Should Not Make Decision.

Finally, this $400 million TEP Amendment should be postponed because four of the five Alameda CTC commissioners who represent the Tri-Valley are "lame duck" members. Supervisor Haggerty, Livermore Mayor Marchand, Pleasanton Mayor Thorne, and Dublin Mayor Haubert all are retiring from their positions by the end of 2020. Voting is already underway on their replacements. In the same way that many people believe the current U.S. Supreme Court vacancy should be filled after the January inauguration, this major TEP Amendment should be decided after the new Alameda CTC Commissioners are seated.

TRANSDEF suggests that Alameda CTC Commissioners carefully and deliberately consider these concerns. A reasonable Commissioner, exercising due care, would not act rashly. Your Commission should postpone further action on this $400 million TEP Amendment.

Sincerely,

JASON A. BEZIS

Measure BB: a Transportation Plan for Our Future!

Measure BB will help seniors and people with disabilities get where they need to go affordably and independently by improving the reliability of BART, local bus systems and other transit.

Measure BB will expand BART service and modernize BART stations across Alameda County.

Measure BB will fill potholes, repair local streets and roads and reduce traffic congestion.

Measure BB will improve bike and pedestrian pathways, making them safe and accessible for local residents.

Measure BB will create 150,000 high quality jobs.

Measure BB will provide the youth transit pass program, helping kids get to school affordably and reducing costs for working families.

What is Measure BB and who will benefit from it?

Measure BB is a detailed plan defining the next generation of transportation in the County of Alameda. It authorizes the extension and augmentation of an existing sales tax measure to provide $7.8 billion in transportation projects over the coming years to directly benefit the people of Alameda County.

Why do we NEED Measure BB?

Measure BB will fund critical BART and transit extension and repair projects, keep transit affordable for seniors, youth and people with disabilities, fix local streets and roads, reduce traffic and provide infrastructure for transportation alternatives like biking and walking.

How does Measure BB affect the economy?

Measure BB will create $20 billion in total economic activity and create 150,000 new jobs. Well-functioning transportation systems are critical to economic competitiveness at the national and regional level.

We've studied Measure BB and we approve!

LEAGUE OF WOMEN VOTERS®

USOAC
UNITED SENIORS OF ALAMEDA COUNTY

Accountability Measures:

1. **MEASURE BB** funds can only be spent on local transportation improvements according to a specific detailed plan. Visit: ***www.alamedactc.org***

2. **ALL FUNDS** raised by Measure BB must be spent to improve transportation for local Alameda County residents.

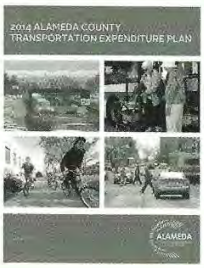
3. **MEASURE BB** requires an independent watchdog committee audit all expenditures and report their findings to the public.

For more information call **(510) 210-5280** or visit: **www.YESonBB.org**

Measure BB
on the November 2014 Ballot

Consider the Future of BART

- Improve and expand BART throughout Alameda County
- Modernize and improve access to all BART stations



ALAMEDA
County Transportation Commission

learn more →

In November 2014, Measure BB will be on the ballot to:

- Expand BART throughout Alameda County
- Increase BART capacity and accessibility
- Upgrade technology to keep the system moving
- Keep transportation affordable for students, seniors and people with disabilities
- Improve access to jobs and schools

This detailed plan includes **taxpayer safeguards:**

- ✓ Independent Audits
- ✓ Compliance Reports
- ✓ Independent Watchdog Committee Review and Annual Reports to the Public
- ✓ All funds spent locally to benefit Alameda County

The Choice Is Yours

Measure BB on November ballot

Funds would support transit in Alameda County

Transportation ballot Measure BB will go before Alameda County voters this November. Measure BB will extend the existing ½ cent transportation sales tax, which was approved by 81.5 percent of voters in 2000, and generate almost $8 billion for transportation improvements throughout Alameda County.

Measure BB was developed by the Alameda County Transportation Commission and outlines a 30-year plan that will generate $20 billion in economic activity for the Bay Area and nearly 150,000 jobs.

Measure BB will provide more than $860 million towards projects to modernize and expand the BART system.

It will also repair streets and reduce traffic, increase bus service, and expand safe walking and biking paths.

Visit AlamedaCTC.org/2014Plan to learn more about the projects that will be funded by Measure BB, as well as its accountability and performance measures.

Start Friday nights off right at UN Plaza

Start your weekend off at the Friday Night Market at the UN Plaza in San Francisco. With more than 45 vendors, food trucks and live music, there is something for everyone.

The Friday Night Market takes place from 4 to 9pm every Friday in September and October at UN Plaza, steps away from Civic Center BART.

For details, visit its Facebook page at fb.com/FridayNightMarketSF.

Follow us on Twitter @SFBARTable for a chance to win a $20 gift certificate to the market.

Be the A's BART Rider of the Game!

This is your last chance in 2014 to be the A's BART Rider of the Game! For this month's contest, send us a photo of you in your best game gear.

There are three ways to enter:

1) Tweet a photo of yourself to @SFBARTable and use the hashtag #BARTableRider

2) Email a photo of yourself to bartable@bart.gov with the subject "BART Rider of the Game"

3) Mail us a photo to A's BART RIDER OF THE GAME" Attn: BART Marketing Department, 300 Lakeside Dr., Oakland, CA 94612".

Enter by Sept. 10, 2014 to win tickets to the Sept. 17 game. For more information, visit bart.gov/fan.

Re: Scoping comments in response to Valley Link NOP

Dear Sirs:

These comments are being submitted jointly by the Train Riders Association of California, TRAC, and the Transportation Solutions Defense and Education Fund, TRANSDEF.

Areas to Study--Policy Consistency

Evaluate whether the Proposed Project is consistent with the language of AB 758. This is especially important, because this law was tailor-made to support a project in this corridor. We have concerns as to whether a $1.8 billion project can ever qualify as “cost-effective.” For this reason, we propose a Build Alternative that is unquestionably cost-effective.

In the absence of even a preliminary agreement or MOU with the SJRRC, it cannot be stated that the Proposed Project will connect to ACE. Because this connection is fundamental to AB 758, environmental review should not commence until an agreement is in place for there to be a BART to ACE connection. This is currently a fatal flaw in the scoping process: the project can't have a stable description until these issues are at least preliminarily resolved.

Areas to Study--ROW Suitability

The quality of the ROW needs to assessed before environmental review commences. As part of the original Transcontinental Railroad, the ROW was not engineered for modern speeds. Without modern speeds, a rail line will not provide enough of a travel time advantage to draw significant ridership. A determination needs to be made that the ROW

can provide adequate speeds before there is a full-blown EIR of a $1.8 billion project. If the many curves in the ROW can't be straightened adequately, that huge expenditure would not be worth pursuing, as it would produce only minor benefits. The EIR funds would be wasted.

Areas to Study--Growth Inducement

Providing new transportation infrastructure is the classic trigger for growth inducement. The key measures to be evaluated are growth in households, VMT growth and growth in GHG emissions. We suggest that one threshold of significance should be "Does the Proposed Project impede the State's attainment of SB 32's GHG 2030 targets?" If growth inducement is found to be significant, we propose the following mitigation: to reduce the growth in VMT and GHGs resulting from the induced growth, require cities to adopt enforceable walkable community plans, as a condition for receiving a station. These plans would break with the standard pattern of suburban subdivisions, and instead be shaped for access to the train by walking, cycling, or taking a community shuttle. Because work trips only make up about 25% of all trips, the walkable pattern is needed to reduce the other 75% of trips.

Alternative to Study--Cost-Effective Alternative

The ACE tracks already run within 3 miles of the Dublin-Pleasanton BART station. That station location had historically been connected to what is now the ACE mainline by a rail spur, which had been preserved in public ownership initially for that specific purpose. The spur is now in use as a segment of the Iron Horse Trail. It would be far more cost-effective to replace that segment of the trail, and put the tracks back on the spur, than to spend a billion dollars reengineering the freeway to put the tracks there.

It has been said that local residents would oppose this alternative. Objectors to reclaiming the trail for rail use should be offered the opportunity to raise the billion dollars needed for the highway project, to avoid the inconvenience of a train running 3 miles through their community. This opposition is purely a local issue--as long as BART is connected to ACE, there is no benefit to the region of spending an extra $1.7 billion. In addition, the opportunity costs of spending that money on the Proposed Project result in the inability to fund all kinds of transit projects that offer widespread benefits.

Sincerely,

/s/ DAVID SCHONBRUNN

David Schonbrunn,
Vice-President for Policy

Sept. 23, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a major employer in the Tri-Valley for more than 65 years, Lawrence Livermore National Laboratory has witnessed first-hand the massive growth this region has experienced over the past several decades. From the East Bay hills to the Central Valley, the region's expansion has supported thriving, desirable communities, made it a jobs center, and contributed significantly to the industrial ecosystem of the greater San Francisco Bay Area.

As you well know, this growth has placed a significant burden on the transportation corridors serving the region. The I-580 corridor, in particular, is expected to become only more congested in the future with personal and commercial vehicle traffic. Along with its Tri-Valley community partners, Lawrence Livermore has been encouraged by the progress of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) and its forward-thinking goal of establishing Valley Link through the I-580 corridor. This new service would be a tremendous addition to the transportation options of the region, reducing vehicle traffic, lowering greenhouse gas emissions, and saving resources, among other benefits.

Livermore Laboratory understands that the Commission will be considering approval of an Authority request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP), which will acknowledge the Authority as a new agency in Alameda

Recycle
7600-61230

County that can be an eligible recipient of Measure BB funds. More importantly, it will update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project.

Lawrence Livermore National Laboratory joins its Tri-Valley community partners in urging the Commission's approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment.

Sincerely,

Lynda Seaver
Director, Public Affairs
Lawrence Livermore National Laboratory

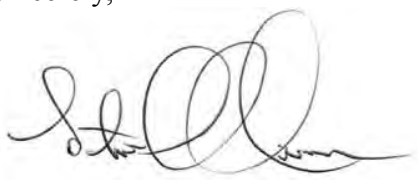
September 22, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 3 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.
The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.



Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled

(VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Steven A Lehman

Subject: VALLEYLINK RAIL PROJECT

To: Alameda County Transportation Commission

Valley Link has got to be one of the worst wastes of taxpayers money in the history of transportation.
No San Joaquin contribution to serve San Joaquin riders? You're kidding.
Duplicate Ace service?
Divert funds from Dumbarton Rail?
Build a white elephant to flatter a retiring politician?

It would not be that hard to spend the funds to benefit Alameda County.

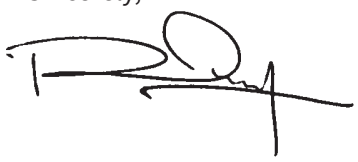
The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As a business within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force of more than 1400 employees, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP). The TEP amendment will acknowledge the Authority as a new agency in Alameda County that can be an eligible recipient of Measure BB funds and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center — with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage — but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area — firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.



Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a ½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Continued on back

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities — and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Sincerely,

Rick Shumway, MHA

September 23, 2020

The Honorable Pauline Cutter, Chair
Alameda County Transportation Commission
1111 Broadway, Suite 800
Oakland, CA 94607

Dear Chair Cutter:

Subject: Support for ACTC Approval of Tri-Valley-San Joaquin Valley Regional Rail Authority Request for a 2014 Measure BB Transportation Expenditure Plan Amendment

As an organization within the jurisdiction of the Alameda County Transportation Commission (ACTC), supporting a work force across the region of more than 100,000 employees and as an advisor to Lam Research with over 3,000 employees in Fremont and Livermore, I write to strongly support approval of the Tri-Valley-San Joaquin Valley Regional Rail Authority (Authority) request to amend the 2014 Measure BB Transportation Expenditure Plan (TEP) and update the TEP by adding Valley Link for the $400 million Measure BB funding identified for the BART to Livermore project. This action will fulfill a commitment made to the Tri-Valley to advance rail connectivity to Livermore and support our economy by providing our Bay Area work force with a chance to have safe and affordable choices about where they can live and work.

The Tri-Valley is a thriving Bay Area job center - with two national labs and it is the headquarter location of more than 450 technology companies. It has a regional gross domestic product (GDP) of an estimated $42 billion. The quality of life it affords its residents is considered to be a large part of its competitive advantage – but growing congestion and skyrocketing Bay Area housing costs put this all at risk. An estimated 93,400 Bay Area workers are now living in Northern San Joaquin County, commuting daily through the Altamont in their cars. This includes those delivering essential services to the Bay Area - firefighters, police, nurses and teachers, many of whom have been priced out of the communities they serve by rising housing costs. Pre-pandemic, these commuters faced an average 78-minute commute each way and already there is evidence that this congestion is rapidly returning.

Valley Link will provide an estimated 33,000 daily rides on the 42-mile, 7-station system in 2040. This will result in the reduction of over 99.4 million Vehicle Miles Traveled (VMT) and the reduction of an estimated 32,220 to 42,650 metric tons of greenhouse gas emissions per year. In addition, through the Board-adopted TOD Policy, Valley Link will support the advancement of transit-oriented development adjacent to its stations, which will further reduce VMT and greenhouse emissions within the station environs. The Transit Oriented Development policy mirrors the MTC policy with a corridor average threshold requirement of 2,200 homes within a

½ mile of stations, ensuring that the transportation infrastructure is a catalyst for smart growth that protects open space. The proposed Isabel Neighborhood Plan is an example of how this may happen throughout the system.

Valley Link will link our Northern California Megaregion's workforce to affordable housing, provide opportunities for compact transit-oriented development and will have a significant impact on the reduction of greenhouse gas emissions. It will also provide an estimated 22,000 jobs during construction and when operational support 400 jobs per year with labor income of over $19 million per year and $69 million in business sales annually. In short, it is vital to our environment and the quality of life in our communities – and now even more vital to our economy given the recovery needs we are now facing.

We urge approval of the Authority's Request for a 2014 Measure BB Transportation Expenditure Plan Amendment. This action will ensure that this vital project moves forward and that commitments to the Tri-Valley are long last met.

Re: Valley Link TEP Amendment

Dear Chair Cutter,

TRANSDEF, the Transportation Solutions Defense and Education Fund, has been advocating for an environmental approach to Bay Area transportation for 26 years. For what we believe to be the region's highest transportation priority, a special focus of our work has been on building a speedy new rail system in the Altamont Corridor. MTC has been blocking those efforts since at least 2008, and most recently left the Altamont Corridor Vision project out of the upcoming RTP, presumably because it would compete with Valley Link. What a coincidence that Supervisor Scott Haggerty is calling the shots at MTC as its current chair!

We strongly object to Alameda County's very own Mitch McConnell shamelessly pushing his pet project forward, prior to any reasoned analysis of alternatives, and prior to any analysis of the impact of the pandemic on ACTC revenues. We believe it is not prudent to commit to a major new project at this time.

Attached please find a letter from our sister organization, the Train Riders Association of California, describing the project's lack of merit. This letter will instead focus on the chaotic and unprofessional manner in which the proposed Amendment has been presented to Commissioners. Page citations are to the Board packet.

1. Not since the Oakland Airport Connector has such a worthless and poorly thought-out project come up for public funding. While we suspect that the political culture at ACTC will produce a similar outcome, we feel compelled to add our voices to the many others that object to the hurry-up push for this Amendment. It is deeply unseemly.

2. The project is in a state of flux, without a stable project description, so that Valley Link documents are not consistent with ACTC documents. The project definition has changed since this matter was considered by the Commission in May, but that is not

reflected in documents on the Valley Link website. The Amendment should not go forward without a stable project description.

a. "[T]he TVSJVRRA Board will consider potential IOSs in order to more quickly deliver service in the corridor. Options under consideration include service from Dublin-Pleasanton to Greenville, or from Dublin/Pleasanton to Mountain House. In addition, the TVSJVRRA is considering a Southfront Station in Livermore." (p. 74.)

b. The project scope has changed from "The proposed Phase 1 project will provide passenger rail service between the existing Dublin/Pleasanton BART Station and the North Lathrop ACE intermodal station" (p. 78) to an "initial operating segment, defined as from the Dublin/Pleasanton BART station to the proposed Mountain House station." (p. 67.)

3. Replacing a Greenville Road Station with a Southfront Station would mean that the initial segment of Valley Link would not meet the requirement of AB 758 to connect BART and ACE "in the Tri-Valley." With compliance with AB 758 uncertain, enacting the Amendment would appear to exceed the authority granted by that law.

4. AB 758 called for connecting ACE to BART, not replacing ACE. This project has suffered severe mission creep.

5. Claims made in support of the Amendment are unconvincing:

a. "• reduction of over 99.4 million Vehicle Miles Traveled" (p. 70) sounds impressive until seen in the context of being only 0.2% of total 2015 VMT in the region. This number is mere model noise. More to the point, this miniscule benefit would cost multiple billions of dollars, thereby preventing projects that would offer far greater benefits at lower costs from being funded.

b. "• reduction of over 33,000 metric tons of greenhouse gas emissions per year" (p. 70) sounds impressive until seen in the context of being only 0.04% of total 2011 GHG emissions in the region. This number is entirely insignificant. More to the point, this miniscule benefit would cost multiple billions of dollars, thereby preventing projects that would offer far greater benefits at lower costs from being funded.

c. "• supports advancement of transit-oriented development" (p. 70) is unconvincing. See 6(g) below.

d. "• protects open space" (p. 70) appears to be totally unsupported by evidence. Transportation projects typically don't have such features. If mitigation is needed for what the Project Feasibility Report describes as a station that would be built in the Altamont Habitat Management Unit (p. 5-13), that would not be a "project benefit." It would be a project requirement.

e. "• provides an estimated 22,000 jobs during construction and between $2.6 billion and $3.5 billion in revenues." (p. 70.) The vastly more expensive California High-Speed Rail project "invested more than $5.7 billion in planning and building high-speed rail infrastructure between July 2006 and June 2019, … creating 44,700 to 50,500 job-years of employment … while generating $8.3 to $9.2 billion in total economic output." (2020 Draft Business Plan, CHSRA, p. 25, emphasis added.) Compared to that, the Valley Link numbers appear to be wildly inflated. Note that proper analyses use job-years, rather than jobs. The term seems to have been used incorrectly here.

6. Arguments put forward in response to opposing comments are unconvincing:

a. "By being able to show a commitment of local funding, the project will be more competitive for regional, state and federal funding." (p. 70.) While true, that does not justify accelerating the approval of local funding before there is public confidence the project should go forward.

b. "Only four of the 21 specifically named capital projects in the TEP had an approved EIR when the TEP was approved by voters." (p. 71.) While that may be true, Valley Link was not approved by voters. The voters' ACTC representatives need the best information available--a certified EIR--to decide whether to substitute this project into the TEP. An especially important part of the EIR which is not now available to Commissioners is the alternatives analysis. Because of the discretion given to the Commission by Guideline #22, the Commission needs to know more about alternatives before proceeding.

c. "Alameda CTC has not developed a 5-year sales tax revenue projection at this point given the large uncertainties regarding the depth and breadth of the recession and the lack of sales tax receipt data received to date." (p. 71.) Given that statement, prudence would suggest not committing to a major new project until that uncertainty is resolved. "MTC's direction is to assume that long-term travel and development patterns do not significantly change as a result of COVID-19…" (p. 71.) MTC has a long and inglorious history of being wrong in its financial predictions. Far better to be prudent than to listen to MTC.

d. "The comment period, per the TEP Implementing Guidelines for a proposed TEP Amendment, is a comment period for jurisdictions." (p. 71.) Given that the TEP was approved by the public, who are funding ACTC, this statement is nothing short of insulting.

e. "An additional evaluation of alternatives will be released as part of the Valley Link Draft EIR." (p. 72.) Our point, precisely, for not proceeding with the Amendment at this time. ACTC has not conducted a public process to determine its highest priorities for use of transit-designated funds under Guideline #22.

f. The data presented on p. 73 to supposedly demonstrate that the project would benefit Alameda County residents has two problems that make it irrelevant: 1.) "Data is based on an extension from Dublin/Pleasanton BART to North Lathrop." That is not the project being considered by the Amendment. 2). "A number of commenters raised concerns that Alameda County residents would not benefit from the project, but instead the project will primarily benefit San Joaquin County residents." (p. 73.) Even if taken at face value, the data indicate two San Joaquin passengers for every Alameda resident. That clearly demonstrates that the project will primarily benefit San Joaquin County residents. "Approximately 57% of the project track mileage is in Alameda County." (p. 73.) This is a cost to Alameda County, not a benefit.

g. We do not believe the fact that "The TVSJVRRA has adopted a Transit Oriented Development (TOD) Policy" (p. 75) eliminates concerns about sprawl inducement by Valley Link. Such policies typically lack any kind of enforcement mechanism. Sprawl would be far less of a concern if there were a policy in place that "Valley Link will not build stations in jurisdictions that have not adopted Station Area plans meeting the agency's minimum density standards."

h. "The $400 million was identified in the TEP for a rail extension in the Tri-Valley. The proposed amendment does not change the geographic distribution of the benefits of the overall TEP." (p. 75.) We disagree. While the BART extension was intended to benefit Tri-Valley residents, there is no showing that the same is true of Valley Link. The staff's argument expressed in section (f) above only referred to generic benefits spread over all Alameda County residents: "The project as defined will benefit Alameda County residents and businesses as well as San Joaquin County." Note the absence of a claim that the project will specifically benefit Tri-Valley residents. The Myth vs. Fact document by Valley Link stated, "Valley Link is vitally needed to support the interconnected economies of the Northern California Megaregion: Both the Bay Area and San Joaquin County." (p. 1.) "By creating a commute option that allows those workers to reach jobs in the Bay Area region without increasing GHG emissions and congesting the area's roadways, Valley Link creates a win-win for both regions that might otherwise be unattainable." (p. 2.) Given the clearly non-local benefits of the project, the entire fiscal structure of the TEP will need to be renegotiated to provide geographic equity in the distribution of the local streets and roads funding.

Given all the reasons stated above, TRANSDEF urges the Commission to defer consideration of the Amendment until 1). there is a stable project description; 2). there is a certified EIR; 3). there is confidence in sales tax revenue projections; 4). a public process has been convened to determine Alameda County's highest transit priorities; 5). sprawl inducement has been definitively addressed by Valley Link; 6). ACTC provides public notice of the potential Amendment and 7). a renegotiated local streets and roads funding formula is adopted.

Sincerely,

/s/ DAVID SCHONBRUNN

Scott Haggerty, Chair
Tri-Valley - San Joaquin Valley Regional Rail Authority
1362 Rutan Court, Suite 100
Livermore, CA 94551

RE: Draft Feasibility Report

Dear Chair Haggerty:

The Train Riders Association of California, TRAC, has been actively promoting improved passenger rail transport for more than two decades. We offer the following comments on the Valley Link Feasibility Report ("Report"), from that informed context.

First, we wholeheartedly agree that there is a crying need for excellent rail transport in this Corridor. We are disappointed to have to conclude that the Valley Link project, as defined here, is not what the Corridor needs.

1. The proposed project fails any reasonable test of cost-effectiveness. In a world of unlimited resources, this project could succeed. In the current fiscal climate, however, this project cannot compete on its merits. The major problem is that moving the freeway is essentially a utility relocation, adding an extraordinary amount of cost while providing no direct transportation benefit.

2. The project's fundamental goal of connecting ACE to BART is deeply flawed:

    - First, BART has no surplus capacity. It is currently overcrowded, with no relief on the horizon. BART sent an August 16, 2013 scoping letter on ACEforward, stating "Also, as the backbone of the regional rail system, BART is anticipating capacity constraints in certain locations. While such constraints exist without the ACE-forward Program, the Program could contribute to the cumulative worsening of capacity issues."

- It is well-known that passengers resist transit transfers, which results in sub-optimal ridership for projects that require them. This project inherently requires a transfer, making it less desirable as a travel mode.

- BART is slower and noisier than modern conventional-gauge rail vehicles. BART is unable to provide express service--it is limited by its design to stopping at every station.

- A higher percentage of Central Valley residents have destinations currently served by ACE than are served by BART

3. The current plans for this project include no land use component. As a result, it will have tremendous growth-inducing negative impacts. This project would facilitate sprawl in the Central Valley, in precisely the same way BART resulted in the suburbanization of the East Bay. Auto-dependent communities drive much more, resulting in increased GHG emissions and VMT from the 75% of trips that are not work-related. While the project offers superficial sustainability elements, these are completely overwhelmed by the sprawl inducement.

4. The housing price comparison on PDF page 96 ignores the peculiar American practice of externalizing the costs of providing transportation to job centers, treating it separately from the price of seemingly affordable housing. If the cost of this project were built into the cost of all new homes in the region through Mello-Roos financing, housing in the Valley would not seem so inexpensive.

5. The table on PDF page 151 shows that the rail alternative costs 2.4 times more than the bus alternative on a per-passenger basis. Contrary to the equivocal statement on PDF page 175, "... high capacity rail alternative <u>appears</u> to be the better mode to meet that demand" , (emphasis added), it would be economically preferable to use as many articulated buses as needed, since that would cost only a tiny fraction of the rail alternative: "... the scale of investment required for this alternative pales in comparison to rail." (*Id*.)

6. The claimed VMT reductions in Table 7 on PDF page 164 are insignificant. They are only 0.1% and 0.2% of total VMT. Any honest modeler will admit these numbers are far below the noise level in the model. That means the project's claimed GHG reductions are equally insignificant.

7. There is no institutional need for yet another rail agency. The project's new stations east of Livermore were initially proposed by ACEforward. Nothing in the Report provides a compelling reason why ACE should not be the implementer of those new stations. Additionally, nothing in the Report establishes a need for <u>both</u> the existing ACE stations and the proposed new stations.

8. The low-cost Alternative TRAC proposed in our scoping letter was not considered in the Alternatives Analysis. Putting track back on the segment of the Iron Horse Trail

that connects the ACE mainline to the Dublin-Pleasanton BART station is undoubtedly the most cost-effective method of linking ACE to BART. The cost of replacing the trail's right-of-way is miniscule in comparison to moving a freeway.

Thank you for this opportunity to comment on Valley Link.

Sincerely,

/s/ DAVID SCHONBRUNN

Re: Tri-Valley-San Joaquin Valley Regional Rail Authority Request for 2014 Measure BB Transportation Expenditure Plan Amendment – **SUPPORT**

Dear Chair Cutter & Commissioners:

As members of the Tri-Valley Chamber of Commerce Alliance (TVCCA), we are writing to express our support for the Tri-Valley-San Joaquin Valley Regional Rail Authority request for an amendment to the 2014 Measure BB Transportation Plan. TVCCA is a collaboration of the Danville, Dublin, Livermore Valley, Pleasanton and San Ramon Chambers of Commerce representing over 3,000 member businesses and organizations employing nearly 90,000 workers.

Efficiently moving people and goods throughout the region is a major factor affecting Tri-Valley communities and beyond. We support and appreciate, ongoing investments in the Tri-Valley segments of I-580, I-680 and SR 84 highway corridors that are highly utilized by workers, residents and visitors. TVCCA members support local, regional, state and federal initiatives that plan, fund and deliver transportation projects and programs needed to sustain a strong economy, including TVSJVRRA and its Valley Link project.

The failure of the BART board of directors to implement an extension of service to Livermore which voters approved in Measure BB in the amount of $400 million was deeply disappointing. Closing the gap to effectively link passenger rail to the SF Bay Area's rail and transit network is the last major transportation improvement that remains to be deployed in the I-580 corridor. Fortunately, Tri-Valley leaders had the foresight to lay the legislative groundwork in preparation for this future rail connection, establishing the Tri-Valley-San Joaquin Valley Regional Rail Authority (TVSJVRRA). The TVSJVRRA has worked diligently to develop and advance the Valley Link rail project to the Livermore Valley, and queuing up a future rail connection to the neighboring San Joaquin Valley.

TVCCA considers Valley Link a “game-changing” project, the realization of which will create a legacy supporting economic strength and resiliency within this region and within the Northern California Mega Region, today and for generations to come. Never more so than now, as we endure the profound impacts of the COVID-19 pandemic, we look to our leaders to summon the courage to prepare to execute a new vision for the future. TVCCA stands with leaders at TVSJVRRA and at ACTC in this effort.

The TVCCA strongly supports and urges the Commission to approve the TVSJVRRA request and designate $400 million to the Valley Link rail project.

Respectfully,

Livermore Valley Chamber of Commerce
Dawn P. Argula, CEO

Danville Area Chamber of Commerce
Shelby McNamara, Interim President
